"Each institution conducting or sponsoring recombinant DNA research should take responsibility for monitoring its own activities in this area. Any unusual events that might be associated with the use of recombinant DNA molecules should be reported to the Director, NIH.

"7. Section VI of the Guidelines will be eliminated, except for those portions of Section VI–F relevant to the protection of proprietary information."

The vote on this substitute motion was called, and the vote was sixteen in favor, three opposed, with one abstention.

* Such as those specified by the CDC Guidelines or the USDA Quarantine Regulations.

Dr. Zinder requested that a motion be introduced in support of the Adelberg-Zinder proposal to eliminate the Guidelines and the RAC. No motion was introduced.

Annex E

Current Guidelines for Research Involving Recombinant DNA Molecules

October 1981.

These Guidelines are the Guidelines as published in the **Federal Register** of July 1, 1981 (46 FR 34462), with the incorporation of those changes promulgated in the **Federal Register** of October 30, 1981, Part V.

Table of Contents

I. Scope of the Guidelines
I–A Purpose
I–B Definition of Recombinant DNA Molecules
I–C General Applicability (see IV–B)
I–D Prohibitions
I–E Exemptions
I–F General Definitions (see IV–C)
II. Containment

Appendix G—Containment Conditions for Cloning of Genes Coding for the Biosynthesis of Toxins for Vertebrates
Appendix H—Experiments Covered by Section III–0

I. Scope of the Guidelines

I–A. *Purpose.* The purpose of these Guidelines is to specify practices for constructing and handling (i) recombinant DNA molecules and (ii) organisms and viruses containing recombinant DNA molecules.

I–B. *Definition of Recombinant DNA Molecules.* In the context of these Guidelines, recombinant DNA molecules are defined as either (i) molecules which are constructed outside living cells by joining natural or synthetic DNA segments to DNA molecules that can replicate in a living cell, or (ii) DNA molecules that result from the replication of those described in (i) above.

I–C. *General Applicability.* See Section IV–B.

I–D. *Prohibitions.* The following experiments are not to be initiated at the present time:

I–D–1. Formation of recombinant DNAs derived from the pathogenic organisms classifed [1] as Class 4 or 5 [2] or from cells known [2A] to be infected with such agents, regardless of the host-vector system used.

I–D–2. Deliberate formation of recombinant DNAs containing genes for the biosynthesis of toxins lethal for vertebrates at an LD_{50} of less than 100 nanograms per kilogram body weight (e.g., the botulinum toxins, tetanus toxin, diphtheria toxin, *Shigella dysenteriae* neurotoxin). Guidelines for the cloning of DNAs containing genes coding for the biosynthesis of toxins which are lethal to vertebrates at 100 nanograms to 100 micrograms per kilogram body weight are specified in Appendix G, which overerides other parts of the Guidelines (e.g., exemptions, return to host of origin, etc.).

I–D–3. [Deleted].

I–D–4. Deliberate release into the environment of any organism containing recombinant DNA

I–D–5. Deliberate transfer of a drug resistance trait to microorganisms that are not known to acquire it naturally, if such acquisition could compromise the use of a drug to control disease agents in human or veterinary medicine or agriculture. [2A]

I–D–6. Large-scale experiments (e.g., more than 10 liters of culture) with organisms containing recombinant DNAs other than those listed in Appendix C, Section 2, 3, and 4 of the Guidelines, unless the recombinant DNAs are rigorously characterized and the absence of harmful sequences established [3]. (See Section IV–E–1–b–(3)–(d).)

I–D (1–6). Experiments in Categories I–D–1 to I–D–6 may be excepted [4] from the prohibitions (and will at that time be assigned appropriate levels of physical and biological containment) provide that these experiments are expressly approved by the Director, National Institutes of Health (NIH), with advice of the Recombinant DNA Advisory Committee (RAC), after appropriate notice and opportunity for public comment. (See Section IV–E–1–b–(1)–(e).)

Experiments in Categories I–D–1, I–D–2, I–D–5, and experiments involving "wild type" host-vector systems are excepted from the prohibitions, provided that these experiments are designed for risk-assessment purposes and are conducted within the NIH high-containment facilities located in Building 41–T on the Bethesda campus and in Building 550 located at the Frederick Cancer Research Center. The selection of laboratory practices and containment equipment for such experiments shall be approved by the Office of Recombinant DNA Activities (ORDA) following consultation with the RAC Risk Assessment Subcommittee and the NIH Biosafety Committee. ORDA shall inform RAC members of the proposed risk-assessment projects at the same time it seks consultation from the RAC Risk Assessment Subcommittee and the NIH Biosafety Committee. If a major biohazard is determined, the clones will be destroyed after the completion of the experiment rather than retaining them in the high containment facility. Other clones that are non-hazardous or not of major hazard will be retained in the high containment.

I–E. *Exemptions.* It must be emphasized that the following exemptions [4] are not meant to apply to experiments described in the Sections I–D–1 to I–D–5 as being prohibited. In addition. any recombinant DNA molecules involving DNA from Class 3 organisms [1] or cells known to be infected with these agents, or any recombinant DNA molecules which increase the virulence and host-range of a plant pathogen beyond that which occurs by natural genetic exchange, are not exempt unless specifically so designated by NIH under Section I–E–5. Also, Appendix G overrides the exemptions for specified experiments involving genes coding for toxins.

The following recombinant DNA molecules are exempt from these Guidelines, and no registration with NIH is necessary:

I–E–1. Those that are not in organisms or viruses. [5]

I–E–2. Those that consist entirely of DNA segments from a single nonchromosomal or viral DNA source, though one or more of the segments may be a synthetic equivalent.

I–E–3. Those that consist entirely of DNA from a prokaryotic host, including its indigenous plasmids or viruses, when propagated only in that host (or a closely related strain of the same species) or when transferred to another host by well established physiological means; also those that consist entirely of DNA from a eukaryotic host, including its chloroplasts, mitochondria, or plasmids (but excluding viruses), when propagated only in that host (or a closely related strain of the same species).

I–E–4. Certain specified recombinant DNA molecules that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent. A list of such exchanges will be prepared and periodically revised by the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment. (See Section IV–E–1–b–(1)–(d).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix A. An updated list may be obtained from the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205.

I–E–5. Other classes of recombinant DNA molecules, if the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment, finds that they do not present a significant risk to health or the environment. (See Section IV–E–1–b–(1)–(d).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix C. An updated list may be obtained from the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland, 20205.

I–F. *General Definitions.* See Section IV–C.

II. Containment

Effective biological safety programs have been operative in a variety of laboratories for many years. Considerable information, therefore, already exists for the design of physical containment facilities and the selection of laboratory procedures applicable to organisms carrying recombinant DNAs. [6–19] The existing programs rely upon mechanisms that, for convenience, can be divided into two categories: (i) A set of standard practices that are generally used in microbiological laboratories, and (ii) special procedures, equipment, and laboratory installations that provide physical barriers which are applied in varying degrees according to the estimated biohazard.

Experiments on recombinant DNAs, by their very nature, lend themselves to a third containment mechanism—namely, the application of highly specific biological barriers. In fact, natural barriers do exist which limit either (i) the infectivity of a *vector*, or *vehicle*, (plasmid or virus) for specific hosts or (ii) its dissemination and survival in the environment. The vectors that provide the means for replication of the recombinant DNAs and/or the host cells in which they replicate can be genetically designed to decrease by many orders of magnitude the probability of dissemination of recombinant DNAs outside the laboratory.

As these three means of containment are complementary, different levels of containment appropriate for experiments with different recombinants can be established by applying various combinations of the physical and biological barriers along with a constant use of the standard practices. We consider these categories of containment separately here in order that such combinations can be conveniently expressed in the Guidelines.

In constructing these Guidelines, it was necessary to define boundary conditions for the different levels of physical and biological containment and for the classes of experiments to which they apply. We recognize that these definitions do not take into account all existing and anticipated information on special procedures that will allow particular experiments to be carried out under different conditions that indicated here without affecting risk. Indeed, we urge that individual investigators device simple and more effective containment procedures and that investigators and institutional biosafety committees recommend changes in the Guidelines to permit their use.

II–A. *Standard Practices and Training.* The first principle of containment is a strict adherence to good microbiological practices. [6–15] Consequently, all personnel directly or indirectly involved in experiments on recombinant DNAs must receive adequate instruction. (see Sections IV–D–1–g, IV–D–5–d and IV–D–8–b.). This shall, as a minimum, include instructions in aseptic techniques and in the biology of the organisms used in the experiments, so that the potential biohazards can be understood and appreciated.

Any research group working with agents with a known or potential biohazard shall have an emergency plan which describes the procedures to be followed if an accident contaminates personnel or the environment. The principal investigator must ensure that everyone in the laboratory is familiar with both the potential hazards of the work and the emergency plan. (See Sections IV–D–5–e and IV–D–3–d.) If a research group is working with a known pathogen where there is an effective vaccine it should be made available to all workers. Where serological monitoring is clearly appropriate it shall be provided. (See Sections IV–D–1–h and IV–D–8–c.)

II–B. *Physical Containment Levels.* The objective of physical containment is to confine organisms containing recombinant DNA molecules, and thus to reduce the potential for exposure of the laboratory worker, persons outside of the laboratory, and the environment to organisms containing recombinant DNA molecules. Physical containment is achieved through the use of laboratory practices, containment equipment, and special laboratory design. Emphasis is placed on primary means of physical containment which are provided by laboratory practices and containment equipment. Special laboratory design provides a secondary means of protection against the accidental release of organisms outside the laboratory or to the environment. Special laboratory design is used primarily in facilities in which experiments of moderate to high potential hazards are performed.

Combinations of laboratory practices, containment equipment, and special laboratory design can be made to

achieve different levels of physical containment. Four levels of physical containment, which are designated as P1, P2, P3, and P4, are described. It should be emphasized that the descriptions and assignments of physical containment detailed below are based on existing approaches to containment of pathogenic organisms. For example, the "Classification of Etiologic Agents on the Basis of Hazard,"[7] prepared by the Centers for Disease Control, describes four general levels which roughly correspond to our descriptions for P1, P2, P3, and P4; and the National Cancer Institute describes three levels for research on oncogenic viruses which roughly correspond to our P2, P3, and P4 levels.[8]

It is recognized that several different combinations of laboratory practices, containment equipment, and special laboratory design may be appropriate for containment of specific research activities. The Guidelines, therefore, allow alternative selections of primary containment equipment within facilities that have been designed to provide P3 and P4 levels of physical containment. The selection of alternative methods of primary containment is dependent, however, on the level of biological containment provided by the host-vector system used in the experiment. Consideration will also be given by the Director, NIH, with the advice of the Recombinant DNA Advisory Committee to other combinations which achieve an equivalent level of containment. (See Section IV–E–1–b–(2)–(b).) Additional material on physical containment for plant host-vector systems is found in Sections III–C–3 and III–C–4.

II–B–1. *P1 Level.*

II–B–1–a. *Laboratory Practices.*

II–B–1–a. Laboratory doors shall be kept closed while experiments are in progress.

II–B–1–a–(2). Work surfaces shall be decontaminated daily, and immediately following spills of organisms containing recombinant DNA molecules.

II–B–1–a–(3). All biological wastes shall be decontaminated before disposal. Other contaminated materials, such as glassware, animal cages, and laboratory equipment, shall be decontaminated before washing, reuse, or disposal.

II–B–1–a–(4). Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

II–B–1–a–(5). Eating, drinking, smoking, and storage of foods are not permitted in the laboratory area in which recombinant DNA materials are handled.

II–B–1–a–(6). Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

II–B–1–a–(7). Care shall be taken in the conduct of all procedures to minimize the creation of aerosols.

II–B–1–a–(8). Contaminated materials that are to be decontaminated at a site away from the laboratory shall be placed in a durable leak-proof container, which is closed before removal from the laboratory.

II–B–1–a–(9). An insect and rodent control program shall be instituted.

II–B–1–a–(10). The use of laboratory gowns, coats, or uniforms is discretionary with the laboratory supervisor.

II–B–1–a–(11). Use of the hypodermic needle and syringe shall be avoided when alternative methods are available.

II–B–1–a–(12). The laboratory shall be kept neat and clean.

II–B–1–b. *Containment Equipment.* Special containment equipment is not required at the P1 level.

II–B–1–c. *Special Laboratory Design.* Special laboratory design is not required at the P1 level.

II–B–2. *P2 Level.*

II–B–2–a. *Laboratory Practices.*

II–B–2–a–(1). Laboratory doors shall be kept closed while experiments are in progress.

II-B-2-a-(2). Work surfaces shall be decontaminated daily, and immediately following spills of organisms containing recombinant DNA molecules.

II-B-2-a-(3). All laboratory wastes shall be steam-sterilized (autoclaved) before disposal. Other contaminated materials such as glassware, animal cages, laboratory equipment, and radioactive wastes shall be decontaminated by a means demonstrated to be effective before washing, reuse, or disposal.

II-B-2-a-(4). Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

II-B-2-a-(5). Eating, drinking, smoking, and storage of food are not permitted in the laboratory area in which recombinant DNA materials are handled.

II-B-2-a-(6). Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

II-B-2-a-(7). Care shall be exercised to minimize the creation of aerosols. For example, manipulations such as inserting a hot inoculating loop or needle into a culture, flaming an inoculation loop or needle so that it splatters, and forceful ejection of fluids from pipettes or syringes shall be avoided.

II-B-2-a-(8). Contaminated materials that are to be steam sterilized (autoclaved) or decontaminated at a site away from the laboratory shall be placed in a durable leak-proof container, which is closed before removal from the laboratory.

II-B-2-a-(9). Only persons who have been advised of the nature of the research being conducted shall enter the laboratory.

II-B-2-a-(10). The universal biohazard sign shall be posted on all laboratory access doors when experiments requiring P2 containment are in progress. Freezers and refrigerators or other units used to store organisms containing recombinant DNA molecules shall also be posted with the universal biohazard sign.

II-B-2-a-(11). An insect and rodent control program shall be instituted.

II-B-2-a-(12). The use of laboratory gowns, coats, or uniforms is required. Laboratory clothing shall not be worn to the lunch room or outside of the building in which the laboratory is located.

II-B-2-a-(13). Animals not related to the experiment shall not be permitted in the laboratory.

II-B-2-a-(14). Use of the hypodermic needle and syringe shall be avoided when alternative methods are available.

II-B-2-a-(15). The laboratory shall be kept neat and clean.

II-B-2-a-(16). Experiments of lesser biohazard potential can be carried out concurrently in carefully demarcated areas of the same laboratory.

II-B-2-b. *Containment Equipment.* Biological safety cabinets[20] shall be used to contain aerosol-producing equipment, such as blenders, lyophilizers, sonicators, and centrifuges, when used to process organisms containing recombinant DNA molecules, except where equipment design provides for containment of the potential aerosol. For example, a centrifuge may be operated in the open if a sealed head or safety centrifuge cups are used.

II-B-2-c. *Special Laboratory Design.* An autoclave for sterilization of wastes and contaminated materials shall be available in the same building in which organisms containing recombinant DNA molecules are used.

II-B-3. *P3 Level.*

II-B-3-a. *Laboratory Practices.*

II-B-3-a-(1). Laboratory doors shall be kept closed while experiments are in progress.

II-B-3-a-(2). Work surfaces shall be decontaminated following the completion of the experimental activity, and immediately following spills of organisms containing recombinant DNA molecules.

II-B-3-a-(3). All laboratory wastes shall be steam-sterilized (autoclaved) before disposal. Other contaminated materials, such as glassware, animal cages, laboratory equipment, and radioactive wastes, shall be decontaminated by a method demonstrated to be effective before washing, reuse, or disposal.

II-B-3-a-(4). Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

II-B-3-a-(5). Eating, drinking, smoking, and storage of food are not permitted in the laboratory area in which recombinant DNA materials are handled.

II-B-3-a-(6). Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

II-B-3-a-(7). Care shall be exercised to minimize the creation of aerosols. For example, manipulations such as inserting a hot inoculating loop or needle into a culture, flaming an inoculation loop or needle so that it splatters, and forceful ejection of fluids from pipettes or syringes shall be avoided.

II-B-3-a-(8). Contaminated materials that are to be steam-sterilized (autoclaved) or decontaminated at a site away from the laboratory shall be placed in a durable leak-proof container, which is closed before removal from the laboratory.

II-B-3-a-(9). Entry into the laboratory shall be through a controlled access area. Only persons who have been advised of the nature of the research being conducted shall enter the controlled access area. Only persons required on the basis of program or support needs shall be authorized to enter the laboratory. Such persons shall be advised of the nature of the research being conducted before entry, and shall comply with all required entry and exit procedures.

II-B-3-a-(10). Persons under 16 years of age shall not enter the laboratory.

II-B-3-a-(11). The universal biohazard sign shall be posted on the controlled access area door and on all laboratory doors when experiments requiring P3-level containment are in progress. Freezers and refrigerators or other units used to store organisms containing recombinant DNA molecules shall also be posted with the universal biohazard sign.

II-B-3-a-(12). An insect and rodent control program shall be instituted.

II-B-3-a-(13). Laboratory clothing that protects street clothing (e.g., long-sleeve solid-front or wrap-around gowns, no-button or slipover jackets) shall be worn in the laboratory. Front-button laboratory coats are unsuitable. Laboratory clothing shall not be worn outside the laboratory and shall be decontaminated before it is sent to the laundry.

II-B-3-a-(14). Raincoats, overcoats, topcoats, coats, hats, caps, and such street outer-wear shall not be kept in the laboratory.

II-B-3-a-(15). Gloves shall be worn when handling materials requiring P3 containment. They shall be removed aseptically immediately after the handling procedure and decontaminated.

II-B-3-a-(16). Animals and plants not related to the experiment shall not be permitted in the laboratory.

II-B-3-a-(17). Vacuum outlets shall be protected by filter and liquid disinfectant traps.

II-B-3-a-(18). Use of hypodermic needle and syringe shall be avoided when alternative methods are available.

II-B-3-a-(19). The laboratory shall be kept neat and clean.

II-B-3-a-(20). If experiments involving other organisms which require lower levels of containment are to be conducted in the same laboratory concurrently with experiments requiring P3-level physical containment, they shall be conducted in accordance with all P3-level laboratory practices.

II-B-3-b. *Containment Equipment.*

II-B-3-b-(1). Biological safety cabinets [20] shall be used for all equipment and manipulations that produce aerosols—e.g., pipetting, dilutions, transfer operations, plating, flaming, grinding, blending, drying, sonicating, shaking, centrifuging—where these procedures involve organisms containing recombinant DNA molecules, except where equipment design provides for containment of the potential aerosol.

II-B-3-b-(2). Laboratory animals held in a P3 area shall be housed in partial-containment caging systems, such as Horsfall units [19A], open cages placed in ventilated enclosures, solid-wall and -bottom cases covered by filter bonnets, or solid-wall and -bottom cages placed on holding racks equipped with ultraviolet radiation lamps and reflectors.

Note.—Conventional caging systems may be used: *Provided,* That all personnel wear appropriate personal protective devices. These shall include, at a minimum, wrap-around gowns, head covers, gloves, shoe covers, and respirators. All personnel shall shower on exit from areas where these devices are required.

II-B-3-b-(3). *Alternative Selection of Containment Equipment.* Experimental procedures involving a host-vector system that provides a one-step higher level of biological containment than that specified in Part III can be conducted in the P3 laboratory using containment equipment specified for the P2 level of physical containment. Experimental procedures involving a host-vector system that provides a one-step lower level of biological containment than that specified in Part III can be conducted in the P3 laboratory using containment equipment specified for the P4 level of physical containment. Alternative combinations of containment safeguards are shown in Table I.

TABLE I.—COMBINATIONS OF CONTAINMENT SAFEGUARDS

Classification of experiment according to guidelines		Alternate combinations of physical and biological containment			
		Physical containment			
Physical containment	Biological[1] containment	Laboratory design specified for—	Laboratory practices specified for—	Containment equipment specified for—	Biological containment

P3	HV1	P3	P3	P2	HV2.

[1] See Section II-D for description of biological containment.

II-B-3-c. *Special Laboratory Design.*

II-B-3-c-(1). The laboratory shall be separated by a controlled access area from areas that are open to unrestricted traffic flow. A controlled access area is an anteroom, a change room, an air lock or any other double-door arrangement that separates the laboratory from areas open to unrestricted traffic flow.

II-B-3-c-(2). The surfaces of walls, floors, and ceilings shall be readily cleanable. Penetrations through these surfaces shall be sealed or capable of being sealed to facilitate space decontamination.

II-B-3-c-(3). A foot-, elbow-, or automatically-operated hand-washing facility shall be provided near each primary laboratory exit area.

II-B-3-c-(4). Windows in the laboratory shall be sealed.

II-B-3-c-(5). An autoclave for sterilization of wastes and contaminated materials shall be available in the same building (and preferably within the controlled laboratory area) in which organisms containing recombinant DNA molecules are used.

II-B-3-c-(6). The laboratory shall have a ventilation system that is capable of controlling air movement. The movement of air shall be from areas of lower contamination potential to areas of higher contamination potential

(i.e., from the controlled access area to the laboratory area). If the ventilation system provides positive pressure supply air, the system shall operate in a manner that prevents the reversal of the direction of air movement or shall be equipped with an alarm that would be actuated in the event that reversal in the direction of air movement were to occur. The exhaust air from the laboratory area shall not be recirculated to other areas of the building unless the exhaust air is filtered by HEPA filters or equivalent. The exhaust air from the laboratory area can be discharged to the outdoors without filtration or other means for effectively reducing an accidental aerosol burden provided that it can be dispersed clear of occupied buildings and air intakes.

II–B–3–c–(7). The treated exhaust-air from Class I and Class II biological safety cabinets [20] may be discharged either to the laboratory or to the outdoors. The treated exhaust-air from a Class III cabinet shall be discharged directly to the outdoors. If the treated exhaust-air from these cabinets is to be discharged to the outdoors through a building exhaust air system, it shall be connected to this system so as to avoid any interference with the air balance of the cabinet and the building ventilation system.

II–B–4. *P4 Level.*

II–B–4–a. *Laboratory Practices.*

II–B–4–a–(1). Laboratory doors shall be kept closed while experiments are in progress.

II–B–4–a–(2). Work surfaces shall be decontaminated following the completion of the experimental activity and immediately following spills of organisms containing recombinant DNA molecules.

II–B–4–a–(3). All laboratory wastes shall be steam-sterilized (autoclaved) before disposal. Other contaminated materials such as glassware, animal cages, laboratory equipment, and radioactive wastes shall be decontaminated by a method demonstrated to be effective before washing, reuse, or disposal.

II–B–4–a–(4). Mechanical pipetting devices shall be used; pipetting by mouth is prohibited.

II–B–4–a–(5). Eating, drinking, smoking, and storage of food are not permitted in the P4 facility.

II–B–4–a–(6). Persons shall wash their hands after handling organisms containing recombinant DNA molecules and when they leave the laboratory.

II–B–4–a–(7). Care shall be exercised to minimize the creation of aerosols. For example, manipulations such as inserting a hot inoculating loop or needle into a culture, flaming an inoculation loop or needle so that it splatters, and forceful ejection of fluids from pipettes or syringes shall be avoided.

II–B–4–a–(8). Biological materials to be removed from the P4 facility in a viable or intact state shall be transferred to a nonbreakable sealed container, which is then removed from the P4 facility through a pass-through disinfectant dunk tank or fumigation chamber.

II–B–4–a–(9). No materials, except for biological materials that are to remain in a viable or intact state, shall be removed from the P4 facility unless they have been steam-sterilized (autoclaved) or decontaminated by a means demonstrated to be effective as they pass out of the P4 facility. All wastes and other materials as well as equipment not damaged by high temperature or steam shall be steam sterilized in the double-door autoclave of the P4 facility. Other materials which may be damaged by temperature or steam shall be removed from the P4 facility through a pass-through fumigation chamber.

II–B–4–a–(10). Materials within the Class III cabinets shall be removed from the cabinet system only after being steam-sterilized in an attached double-door autoclave or after being contained in a nonbreakable sealed container, which is then passed through a disinfectant dunk tank or a fumigation chamber.

II–B–4–a–(11). Only persons whose entry into the P4 facility is required to meet program or support needs shall be authorized to enter. Before entering, such persons shall be advised of the nature of the research being conducted and shall be instructed as to the appropriate safeguards to ensure their safety. They shall comply with instructions and all other required procedures.

II–B–4–a–(12). Persons under 18 years of age shall not enter the P4 facility.

II–B–4–a–(13). Personnel shall enter into and exit from the P4 facility only through the clothing change and shower rooms. Personnel shall shower at each egress from the P4 facility. Air locks shall not be used for personnel entry or exit except for emergencies.

II–B–4–a–(14). Street clothing shall be removed in the outer side of the clothing-change area and kept there. Complete laboratory clothing, including undergarments, head cover, shoes, and either pants and shirts or jumpsuits, shall be used by all persons who enter the P4 facility. Upon exit, personnel shall store this clothing in lockers provided for this purpose or discard it into collection hampers before entering the shower area.

II–B–4–a–(15). The universal biohazard sign is required on the P4 facility access doors and on all interior doors to individual laboratory rooms where experiments are conducted. The sign shall also be posted on freezers, refrigerators, or other units used to store organisms containing recombinant DNA molecules.

II–B–4–a–(16). An insect and rodent control program shall be instituted.

II–B–4–a–(17). Animals and plants not related to the experiment shall not be permitted in the laboratory in which the experiment is being conducted.

II–B–4–a–(18). Vacuum outlets shall be protected by filter and liquid disinfectant traps.

II–B–4–a–(19). Use of the hypodermic needle and syringe shall be avoided when alternate methods are available.

II–B–4–a–(20). The laboratory shall be kept neat and clean.

II–B–4–a–(21). If experiments involving other organisms which require lower levels of containment are to be conducted in the P4 facility concurrently with experiments requiring P4-level containment, they shall be conducted in accordance with all P4-level laboratory practices specified in this section.

II–B–4–b. *Containment Equipment.*

II–B–4–b–(1). Experimental procedures involving organisms that require P4-level physical containment shall be conducted either in (i) a Class III cabinet system or in (ii) Class I or Class II cabinets that are located in a specially designed area in which all personnel are required to wear one-piece positive-pressure isolation suits.

II–B–4–b–(2). Laboratory animals in experiments requiring P4-level physical containment shall be housed either in cages contained in Class III cabinets or in partial containment caging systems (such as Horsfall units [19A], open cages placed in ventilated enclosures, or solid-wall and -bottom cages covered by filter bonnets, or solid-wall and -bottom cages placed on holding racks equipped with ultraviolet irradiation lamps and reflectors) that are loated in a specially designed area in which all personnel are required to wear one-piece positive-pressure suits.

II–B–4–b–(3). *Alternative Selection of Containment Equipment.* Experimental procedures involving a host-vector system that provides a one-step higher level of biological containment than that specified in Part III can be conducted in the P4 facility using containment equipment requirements specified for

the P3 level of physical containment. Alternative combinations of containment safeguards are shown in Table II.

TABLE II.—COMBINATIONS OF CONTAINMENT SAFEGUARDS

Classification of experiment according to guidelines		Alternate combinations of physical and biological containment			
		Physical containment			
Physical containment	Biological containment [1]	Laboratory design specified for	Laboratory practices specified for	Containment equipment specified for	Biological containment
P4	HV1	P4	P4	P4	HV1.
P4	HV1	P4	P4 [2]	P3	HV2.

[1] See Section II–D for description of biological containment.
[2] In this case gloves shall be worn, in addition to the clothing requirements specified in II–B–4–a–(14).

II–B–4–c. *Special Laboratory Design.*

II–B–4–c–(1). The laboratory shall be located in a restricted-access facility which is either a separate building or a clearly demarcated and isolated zone within a building. Clothing-change areas and shower rooms shall be provided for personnel entry and egress. These rooms shall be arranged so that personnel leave through the shower area to the change room. A double-door ventilated vestibule or ultraviolet air lock shall be provided for passage of materials, supplies, and equipment which are not brought into the P4 facility through the change room area.

II–B–4–c–(2). Walls, floors, and ceilings of the P4 facility are constructed to form an internal shell which readily allows vapor-phase decontamination and is animal- and insect-proof. All penetrations through these structures and surfaces are sealed. (The integrity of the walls, floors, ceilings, and penetration seals should ensure adequate containment of a vapor-phase decontaminant under static pressure conditions. This requirement does not imply that these surfaces must be airtight.)

II–B–4–c–(3). A foot-, elbow-, or automatically-operated handwashing facility shall be provided near the door within each laboratory in which experiments involving recombinant DNA are conducted in openface biological safety cabinets.

II–B–4–c–(4). Central vacuum systems are permitted. The system, if provided, shall not serve areas outside the P4 facility. The vacuum system shall include in-line HEPA filters near each use point or service cock. The filters shall be installed so as to permit in-place decontamination and replacement. Water supply, liquid and gasous services provided to the P4 facility shall be protected by devices that prevent backflow.

II–B–4–c–(5). Drinking water foundations shall not be installed in laboratory or animal rooms of the P4 facilitiay. Foot-operated water fountains are permitted in the corridors of the P4 facility. The water service provided to such fountains shall be protected from the water services to the laboratory areas of the P4 facility.

II–B–4–c–(6). Laboratory doors shall be self-closing.

II–B–4–c–(7). A double-door autoclave shall be provided for sterilization of material passing out of the P4 facility. The autoclave doors shall be interlocked so that both doors will not be open at the same time.

II–B–4–c–(8). A pass-through dunk tank or fumigation chamber shall be provided for removal from the P4 facility of material and equipment that cannot be heat-sterilized.

II–B–4–c–(9). All liquid effluents from the P4 facility shall be collected and decontaminated before disposal. Liquid effluents from biological safety cabinets and laboratory sinks shall be sterilized by heat. Liquid effluents from the shower and hand washing facilities may be activated by chemical treatment. HEPA filters shall be installed in all vents from effluent drains.

II–B–4–c–(10). An individual supply and exhaust-air ventilation system shall be provided. The system shall maintain pressure differentials and directional air flow as required to ensure inflow from areas outside the facility toward areas of highest potential risk within the facility. The system shall be designed to prevent the reversal of air flow. The system shall sound an alarm in the event of system malfunction.

II–B–4–c–(11). Air within individual laboratories of the P4 facility may be recirculated if HEPA filtered.

II–B–4–c–(12). The exhaust air from the P4 facility shall be HEPA filtered and discharged to the outdoors so that it is dispersed clear of occupied buildings and air intakes. The filter chambers shall be designed to allow *in situ* decontamination before removal and to facilitate certification testing after replacement.

II–B–4–c–(13). The treated exhaust-air from Class I and Class II biological safety cabinets [20] may be discharged directly to the laboratory room environment or to the outdoors. The treated exhaust-air from Class III cabinets shall be discharged to the outdoors. If the treated exhaust-air from these cabinets is to be discharged to the outdoors through the P4 facility exhaust air system, it shall be connected to this system so as to avoid any interference with the air balance of the cabinets or the facility exhaust air system.

II–B–4–c–(14). As noted in Section II–B–4–b–(1), the P4 facility may contain specially designed areas in which all personnel are required to wear one-piece positive-pressure isolation suits. Such areas shall be airtight.

The exhaust-air from the suit shall be filtered by two sets of HEPA filters installed in series, and a duplicate filtration unit and exhaust fan shall be provided. The air pressure within the suit area shall be less than that in any adjacent area. An emergency lighting system, communication systems, and power source shall be provided. A double-door autoclave shall be provided for sterilization of all waste materials to be removed from the suit area.

Personnel who enter this area shall wear a one-piece positive-pressure suit that is ventilated by a life-support system. The life-support system shall be provided with alarms and emergency backup air. Entry to this area is through an airlock fitted with airtight doors. A chemical shower area shall be provided to decontaminate the surfaces of the suit before removal.

II–C. *Shipment.* Recombinant DNA molecules contained in an organism or virus shall be shipped only as an etiologic agent under requirements of the U.S. Public Health Service, and the U.S. Department of Transportation § 72.3, Part 72, Title 42, and §§ 173.386–173.388, Part 173, Title 49, U.S. Code of Federal Regulations (CFR) as specified below:

II–C–1. Recombinant DNA molecules contained in an organism or virus requiring P1, P2, or P3 physical containment, when offered for transportation or transported, are subject to all requirements of § 72.3(a)–(e), Part 72, Title 42 CFR, and §§ 173.386–173.388, Part 173, Title 49 CFR.

II–C–2. Recombinant DNA molecules contained in an organism or virus requiring P4 physical containment, when offered for transportation or transported, are subject to the requirements listed above under II–C–1 and are also subject to § 72.3(f), Part 72, Title 42 CFR.

II–C–3. Additional information on packaging and shipment is given in the "Laboratory Safety Monograph—A

Supplement to the NIH Guidelines for Recombinant DNA Research."

II–D. *Biological Containment.*

II–D–1. *Levels of Biological Containment.* In consideration of biological containment, the vector (plasmid, organelle, or virus) for the recombinant DNA and the host (bacterial, plant, or animal cell) in which the vector is propagated in the laboratory will be considered together. Any combination of vector and host which is to provide biological containment must be chosen or constructed so that the following types of "escape" are minimized: (i) Survival of the vector in its host outside the laboratory and (ii) transmission of the vector from the propagation host to other nonlaboratory hosts.

The following levels of biological containment (HV, or *Host-Vector*, systems) for prokaryotes will be established; specific criteria will depend on the organisms to be used. Eukaryotic host-vector systems are considered in Part III.

II–D–1–a. *HV1.* A host-vector system which provides a moderate level of containment. *Specific systems:*

II–D–1–a–(1). *EK1.* The host is always *E. coli* K–12 or a derivative thereof, and the vectors include nonconjugative plasmids (e.g., pSC101, ColE1, or derivatives thereof[21–27]) and variants of bacteriophage, such as lambda[28–33]. The *E. coli* K–12 hosts shall not contain conjugation-proficient plasmids, whether autonomous or integrated, or generalized transducing phages, except as specified in Section III–0.

II–D–1–a–(2). *Other Prokaryotes.* Hosts and vectors shall be, at a minimum, comparable in containment to *E. coli* K–12 with a nonconjugative plasmid or bacteriophage vector. The data to be considered and a mechanism for approval of such HV1 systems are described below (Section II–D–2).

II–D–1–b. *HV2.* These are host-vector systems shown to provide a high level of biological containment as demonstrated by data from suitable tests performed in the laboratory. Escape of the recombinant DNA either via survival of the organisms or via transmission of recombinant DNA to other organisms should be less than $1/10^8$ under specified conditions. *Specific systems:*

II–D–1–b–(1). For EK2 host-vector systems in which the vector is a plasmid, no more than one in 10^8 host cells should be able to perpetuate a cloned DNA fragment under the specified nonpermissive laboratory conditions designed to represent the natural environment, either by survival of the original host or as a consequence of transmission of the cloned DNA fragment.

II–D–1–b–(2). For EK2 host-vector systems in which the vector is a phage, no more than one in 10^8 phage particles should be able to perpetuate a cloned DNA fragment under the specified nonpermissible laboratory conditions designed to represent the natural environment either (i) as a prophage (in the inserted or plasmid form) in the laboratory host used for phage propagation or (ii) by surviving in natural environments and transferring a cloned DNA fragment to other hosts (or their resident prophages).

II–D–1–c. *HV3.* These are host-vector systems in which:

II–D–1–c–(1). All HV2 criteria are met.

II–D–1–c–(2). The vector is dependent on its propagation host or is highly defective in mobilizability. Reversion to host-independence must be less than $1/10^8$ per vector genome per generation.

II–D–1–c–(3). No markers conferring resistance to antibiotics commonly used clinically or in agriculture are carried by the vector, unless expression of such markers is dependent on the propagating host or on unique laboratory-controlled conditions or is blocked by the inserted DNA.

II–D–1–c–(4). The specified containment shown by laboratory tests has been independently confirmed by specified tests in animals, including primates, and in other relevant environments.

II–D–1–c–(5). The relevant genotypic and phenotypic traits have been independently confirmed.

II–D–2. *Certification of Host-Vector Systems.*

II–D–2–a. *Responsibility.* HV1 systems other than *E. coli* K–12, and HV2 and HV3 host-vector systems, may not be designated as such until they have been certified by the Director, NIH. Application for certification of a host-vector system is made by written application to the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205.

Host-vector systems that are proposed for certification will be reviewed by the National Institutes of Health (NIH) Recombinant DNA Advisory Committee (RAC). (See Section IV–E–1–b–(1).) This will first involve review of the data on construction, properties, and testing of the proposed host-vector system by a Working Group composed of one or more members of the RAC and other persons chosen because of their expertise in evaluating such data. The Committee will then evaluate the report of the Working Group and any other available informaton at a regular meeting. The Director, NIH, is responsible for certification after receiving the advice of the RAC. Minor modifications of existing certified host-vector systems, where the modifications are of minimal or no consequence to the properties relevant to containment may be certified by the Director, NIH, without review by the RAC. (See Section IV–E–1–b–(3)–(f).)

When new host-vector systems are certified, notice of the certification will be sent by the Office of Recombinant DNA Activities (ORDA) to the applicant and to all Institutional Biosafety Committees (IBCs) and will be published in the *Recombinant DNA Technical Bulletin.* Copies of a list of all currently certified host-vector systems may be obtained from ORDA at any time.

The Director, NIH, may at any time rescind the certification of any host-vector system. (See Section IV–E–1–b–(3)–(i).) If certification of a host-vector system is rescinded, NIH will instruct investigators to transfer cloned DNA into a different system, or use the clones at a higher physical containment level unless NIH determines that the already constructed clones incorporate adequate biological containment.

Certification of a given system does not extend to modifications of either the host or vector component of that system. Such modified systems must be independently certified by the Director, NIH. If modifications are minor, it may only be necessary for the investigator to submit data showing that the modifications have either improved or not impaired the major phenotypic traits on which the containment of the system depends. Substantial modifications of a certified system require the submission of complete testing data.

II–D–2–b. *Data To be Submitted for Certification.*

II–D–2–b–(1). *HV1 Systems Other than E. Coli K–12.* The following types of data shall be submitted, modified as appropriate for the particular system under consideration. (i) A description of the organism and vector; the strain's natural habitat and growth requirements; its physiological properties, particularly those related to its reproduction and survival and the mechanisms by which it exchanges genetic information; the range of organisms with which this organism normally exchanges genetic information and what sort of information is exchanged; and any relevant information on its pathogenicity or toxicity. (ii) A description of the history of the particular strains and vectors to be used, including data on any mutations which render this organism

less able to survive or transmit genetic information. (iii) A general description of the range of experiments contemplated, with emphasis on the need for developing such an HV1 system.

II–D–2–b–(2). *HV2 Systems.* Investigators planning to request HV2 certification for host-vector systems can obtain instructions from ORDA concerning data to be submitted [33A, 33B]. In general, the following types of data are required: (i) Description of construction steps, with indication of source, properties, and manner of introduction of genetic traits. (ii) Quantitative data on the stability of genetic traits that contribute to the containment of the system. (iii) Data on the survival of the host-vector system under nonpermissive laboratory conditions designed to represent the relevant natural environment. (iv) Data on transmissibility of the vector and/or a cloned DNA fragment under both permissive and nonpermissive conditions. (v) Data on all other properities of the system which affect containment and utility, including information on yields of phage or plasmid molecules, ease of DNA isolation, and ease of transfection or transformation. (vi) In some cases, the investigator may be asked to submit data on survival and vector transmissibility from experiments in which the host-vector is fed to laboratory animals (e.g., rodents). Such *in vivo* data may be required to confirm the validity of predicting *in vivo* survival on the basis of *in vitro* experiments.

Data must be submitted in writing to ORDA. Ten to twelve weeks are normally required for review and circulation of the data prior to the meeting at which such data can be considered by the RAC. Investigators are encouraged to publish their data on the construction, properties, and testing of proposed HV2 systems prior to consideration of the system by the RAC and its subcommittee. More specific instructions concerning the type of data to be submitted to NIH for proposed EK2 systems involving either plasmids or bacteriophage in *E. coli* K–12 are available from ORDA.

II–D–2–b–(3). *HV3 Systems.* Putative HV3 systems must, as the first step in certification, be certified as HV2 systems. Systems which meet the critera given above under II–D–1–(c)–1, II–D–1–(c)–2, and II–D–1–(c)–3 will then be recommended for HV3 testing. Tests to evaluate various HV2 host-vector systems for HV3 certification will be performed by contractors selected by NIH. These contractors will repeat tests performed by individuals proposing the HV2 system and, in addition, will conduct more extensive tests on conditions likely to be encountered in nature. The genotypic and phenotypic traits of HV2 systems will be evaluated. Tests on survival and transmissibility in and on animals, including primates, will be performed, as well as tests on survival in certain specified natural environments.

II–D–3. *Distribution of Certified Host-Vectors.* Certified HV2 and HV3 host-vector systems (plus appropriate control strains) must be obtained from the NIH or its designees, one of whom will be the investigator who developed the system. NIH shall announce the availability of the system by publication of notices in appropriate journals.

Plasmid vectors will be provided in a suitable host strain, and phage vectors will be distributed as small-volume lysates. If NIH propagates any of the host strains or phage, a sample will be sent to the investigator who developed the system or to an appropriate contractor, prior to distribution, for verification that the material is free from contamination and unchanged in phenotypic properties.

In distributing the certified HV2 and HV3 host-vector systems, NIH or its designee will (i) send out a complete description of the system; (ii) enumerate and describe the tests to be performed by the user in order to verify important phenotypic traits; (iii) remind the user that any modification of the system necessitates independent approval of the system by the NIH; and (iv) remind the user of responsibility for notifying ORDA of any discrepancies with the reported properties or any problems in the safe use of the system.

NIH may also distribute certified HV1 host-vector systems.

III. Containment Guidelines for Covered Experiments

Part III discusses experiments covered by the Guidelines. The reader must first consult Part I, where listings are given of prohibited and exempt experiments.

Containment guidelines for permissible experiments are given in Part III. For these experiments no registration with the National Institutes of Health (NIH) is necessary. However, for these experiments, prior to their initiation, investigators must submit to their Institutional Biosafety Committee (IBC) a registration document that contains a description of (a) the source(s) of DNA, (b) the nature of the inserted DNA sequences, (c) the hosts and vectors to be used, (d) whether a deliberate attempt will be made to obtain expression of a foreign gene in the cloning vehicle and if so, what protein, and (e) the containment conditions specified by these Guidelines. This registration document must be dated and signed by the investigator and filed only with the local IBC. The IBC shall review all such proposals: IBC review prior to initiation of the experiment is not required for experiments described in Section III–O. Prior IBC review is required for all other experiments described in the subsections of Part III, including III–0–1, III–0–2, etc.

Changes from the levels specified in Part III for specific experiments (or the assignment of levels to experiments not explicitly considered here) may not be instituted without the express approval of the Director, NIH. (See Sections IV–E–1–b–(1)–(a), IV–E–1–b–(1)–(b), IV–E–1–b–(2)–(b), IV–E–1–b–(2)–(c), IV–E–1–b–(3)–(b).)

In the classification of containment criteria for different kinds of recombinant DNAs, the stated levels of physical and biological containment are minimal for the experiments designated. The use of higher levels of biological containment (HV3>HV2>HV1) is encouraged if they are available and equally appropriate for the purposes of the experiment.

When the reader finds that the containment level given for the same experiment is different in two different sections within Part III, he may choose whichever of the two levels he wishes to use for the experiment.

III–O. *Classification of Experiments Using Certain Host-Vector Systems.* Experiments listed in Appendix H may be performed at P1 physical containment. For these experiments IBC review prior to initiation of the experiment is not required.

III–O–1. *Experiments Involving Class 3 Organisms.* Experiments involving recombinant DNA from Class 3 organisms [1] or from cells known to be infected with these agents may be conducted at P3 containment in *E. coli* K–12 EK1 hosts (see Appendix C). Containment levels for all other experiments with Class 3 organisms or with recombinant DNA which increases the virulence and host range of a plant pathogen beyond that which occurs by natural genetic exchange will be determined by NIH. (See Section IV–E–1–b–2–(e)).

III–0–2. *Experiments involving Nonpathogenic Prokaryotic and Lower Eukaryotic Host-Vector Systems.* DNA from any species nonpathogenic for man, animals, or plants may be cloned into lower eukaryotes nonpathogenic for man, animals, or plants at the P3 level of

containment [2A]. DNA from any species nonpathogenic for man, animals, or plants may be cloned into prokaryotes nonpathogenic for man, animals. or plants at the P2 level of containment [2A]. Data supporting the contention that the donor and recipient are nonpathogenic must be submitted to the local IBC. Lower levels of physical containment may be assigned by ORDA on a case-by-case basis for specific donor-recipient combinations (see Section IV–E–1–b–(3)–(h)).

III–A. *Classification of Experiments Using Certain HV1 and HV2 Host-Vector Systems.* Certain HV1 and HV2 host-vector systems are assigned containment levels as specified in the subsections of this Section III–A. Those so classified as of publication of these revised Guidelines are listed in Appendix D. An updated list may be obtained from the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205.

III–A–1. *Shotgun Experiments.* These experiments involve the production of recombinant DNAs between the vector and portions of the specified cellular source, preferably a partially purified fraction. Care should be taken either to preclude or eliminate contaminating microorganisms before isolating the DNA.

III–A–1–a . *Eukaryotic DNA Recombinants.*

III–A–1–a–(1). *Primates.* P2 physical containment + an HV2 host-vector or P3 + HV1.

III–A–1–a–(2). *Other Mammals.* P2 physical containment + an HV2 host-vector or P3 + HV1.

III–A–1–a–(3). *Birds.* P2 physical containment + an HV2 host-vector, or P3 + HV1.

III–A–1–a–(4). *Cold-Blooded Vertebrates.* P2 physical containment + an HV1 host-vector or P1 + HV2. If the eukaryote is known to produce a potent polypeptide toxin, [34] the containment shall be increased to P3 + HV2.

III–A–1–a–(5). *Other Cold-Blooded Animals and Lower Eukaryotes.* This large class of eukaryotes is divided into two groups:

III–A–1–a–(5)–(a). Species that are known to produce a potent polypeptide toxin[34] that acts in vertebrates, or are known pathogens listed in Class 2,[1] or are known to carry such pathogens must use P3 physical containment + an HV2 host-vector. When the potent toxin is not a polypeptide and is likely not to be the product of closely linked eukaryote genes, containment may be reduced to P3 + HV1 or P2 + HV2. Species that produce potent toxins that affect invertebrates or plants but not vertebrates require P2 + HV2 or P3 + HV1. Any species that has a demonstrated capacity for carrying particular pathogenic microorganisms is included in this group, unless the organisms used as the source of DNA have been shown not to contain those agents. in which case they may be placed in the following group.[2A]

III–A–1–a–(5)–(b). The remainder of the species in this class including plant pathogenic or symbiotic fungi that do not produce potent toxins: P2 + HV1 or P1 + HV2. However. any insect in this group must be either (i) grown under laboratory conditions for at least 10 generations prior to its use as a source of DNA, or (ii) if caught in the wild, must be shown to be free of disease-causing microorganisms or must belong to a species that does not carry microorganisms causing disease in vertebrates or plants.[2A] If these conditions cannot be met, experiments must be done under P3 + HV1 or P2 + HV2 containment.

III–A–1–a–(6). *Plants.* P2 physical containment + an HV1 host-vector, or P1 + HV2. If the plant source makes a potent polypeptide toxin,[34] the containment must be raised to P3 physical containment + an HV2 host-vector. When the potent toxin is not a polypeptide and is likely not to be the product of closely linked plant genes, containment may be reduced to P3 + HV1 or P2 + HV2.[2A]

III–A–1–b. *Prokaryotic DNA Recombinants.* P2 + HV1 or P1 + HV2 for experiments with phages, plasmids and DNA from nonpathogenic prokaryotes which do not produce polypeptide toxins.[34] P3 + HV2 for experiments with phages, plasmids and DNA from Class 2 agents.[1]

III–A–2–a. *Viruses of Eukaryotes* (summary given in Table III; see also exception given at asterisk at end of Appendix D).

III–A–2–a–(1). *DNA Viruses.*

III–A–2–a–(1)–(a). *Nontransforming viruses.*

III–A–2–a(1)–(a)–(*1*). *Adeno-Associated Viruses, Minute Virus of Mice, Mouse Adenovirus (Strain FL), and Plant Viruses.[48]* P1 physical containment + and HV1 host-vector shall be used for DNA recombinants produced with (i) the whole viral genome, (ii) subgenomic DNA segments, or (iii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(1)–(a)–(*2*). *Hepatitis B.*

III–A–2–a–(1)–(a)–(*2*)–(*a*). P1 physical containment + an HV1 host-vector shall be used for purified subgenomic DNA segments.[38]

III–A–2–a–(1)–(a)–(*2*)–(*b*). P2 physical containment + an HV2 host-vector, or P3 + HV1. shall be used for DNA recombinants produced with the whole viral genome or with subgenomic segments that have not been purified to the extent required in footnote 38.

III–A–2–a–(1)–(a)–(*2*)–(*c*). P2 physical containment + an HV1 Host-vector shall be used for DNA recombinants derived from purified cDNA copies of viral mRNA.[37]

III–A–2–a–(1)–(a)–(*3*). *Other Nontransforming Members of Presently Classified Viral Families.[36]*

III–A–2–a–(1)–(a)–(*3*)–(*a*). P1 physical containment + an HV1 host-vector shall be used for (i) DNA recombinants produced with purified subgenomic DNA[38] segments or (ii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(1)–(a)–(*3*)–(*b*). P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with the whole viral genome or with subgenomic segments that have not been purified to the extent required in footnote 38.

III–A–2–a–(1)–(b). *Transforming Viruses.*[37A]

III–A–2–a–(1)–(b)–(*1*). *Herpes Saimiri, Herpes Ateles, and Epstein Barr Virus.[39]*

III–A–2–a–(1)–(b)–(*1*)–(*a*). P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with purified nontransforming subgenomic DNA segments.[38]

III–A–2–a–(1)–(b)–(*1*)–(*b*). P2 physical containment + an HV1 host-vector shall be used for (i) DNA recombinants produced with purified subgenomic DNA segments containing an entire transforming gene [38] or (ii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(1)–(b)–(*1*)–(*c*). P3 physical containment + an HV1 host-vector, or P2 + HV2, shall be used for DNA recombinants produced with the whole viral genome or with subgenomic segments that have not been purified to the extent required in footnote 38.

III–A–2–a–(1)–(b)–(*2*). *Other Transforming Members of Presently Classified Viral Families.[36]*

III–A–2–a–(1)–(b)–(*2*)–(*a*). P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with purified nontransforming subgenomic DNA segments.[38]

III–A–2–a–(1)–(b)–(*2*)–(*b*). P2 physical containment + an HV1 host-vector shall be used for (i) DNA recombinants produced with the whole viral genome, (ii) subgenomic DNA segments containing an entire transforming gene, (iii) purified cDNA copies of viral mRNA, [37] or (iv) subgenomic segments

that have not been purified to the extent required in footnote 38.

III–A–2–a–(2). *DNA Transcripts of RNA Viruses.*

III–A–2–a–(2)–(a). *Retroviruses.*

III–A–2–a–(2)–(a)–(*1*). *Gibbon Ape, Woolly Monkey, Feline Leukemia and Feline Sarcoma Viruses. [39]*

III–A–2–a–(2)–(a)–(*1*)–(*a*). P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with purified nontransforming subgenomic DNA segments.[38]

III–A–2–a–(2)–(a)–(*1*)–(*b*). P2 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with purified subgenomic DNA segments[38] containing an entire transforming gene.

III–A–2–a–(2)–(a)–(*1*)–(*c*). P2 physical containment + an HV2 host-vector, or P3 + HV1, shall be used for DNA recombinants produced with (i) the whole viral genome, (ii) purified cDNA copies of viral mRNA,[37] or (iii) subgenomic segments that have not been purified to the extent required in footnote 38.

III–A–2–a–(2)–(a)–(*2*). *Other Members of the Family Retroviridiae.[36]*

III–A–2–a–(2)–(a)–(*2*)–(*a*). P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with purified nontransforming subgenomic DNA segments.[38]

III–A–2–a–(2)–(a)–(*2*)–(*b*). P2 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with (i) subgenomic DNA segments containing an entire transforming gene, (ii) the whole viral genome, or (iii) purified cDNA copies of viral mRNA,[37] or (iv) subgenomic segments that have not been purified to the extent required in footnote 38.

III–A–2–a–(2)–(b). *Negative Strand RNA Viruses.* P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with (i) cDNA copies of the whole genome, (ii) subgenomic cDNA segments, or (iii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(2)–(c). *Plus-Strand RNA Viruses.*

III–A–2–a–(2)–(c)–(*1*). *Types 1 and 2 Sabin Poliovirus Vaccine Strains and Strain 17D (Theiler) of Yellow Fever Virus.* P1 physical containment + and HV1 host-vector shall be used for DNA recombinants produced with (i) cDNA copies of the whole viral genome, (ii) subgenomic cDNA segments, or (iii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(2)–(c)–(*2*). *Other Plus-Strand RNA Viruses Belonging to Presently Classified Viral Families.[36]*

III–A–2–a–(2)–(c)–(*2*)–(*a*). P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with purified subgenomic cDNA segments.[38]

TABLE III.—RECOMMENDED CONTAINMENT FOR CLONING OF VIRAL DNA OR CDNA IN CERTAIN HV1 AND HV2 SYSTEMS SPECIFIED IN APPENDIX D

[See text for full details]

Virus class	Type of viral DNA segment to be cloned				
	Subgenomic[38]		Genamic*		
	Nontransforming segment	Segment containing an entire transforming gene	Nonsegmented genome	Segmented genome	cDNA from viral mRNA[37]
DNA:					
Nontransforming viruses:					
AAV, MVM, Mouse Adeno (Strain FL)	P1+HV1		P1+HV1		P1+HV1.
Plant Viruses	P1+HV1		P1+HV1		P1+HV1.
Hepatitis B	P1+HV1[38]		P2+HV2 or P3+HV1		P2+HV1.
Other	P1+HV1[38]		P1+HV1		P1+HV1.
Transforming Viruses:					
Herpes Saimiri, H. Ateles and EBV[39].	P1+HV1[38]	P2+HV1	P2+HV2 or P3+HV1		P2+HV1.
Other	P1+HV1[38]	P2+HV1	P2+HV1		P2+HV1*.
RNA:					
Retroviruses					
Gibbon Ape, Woolly Monkey FeLV and FeSV[39].	P1+HV1[38]	P2+HV1	P2+HV2 or P3+HV1		P2+HV2 or P3+HV1.
Other	P1+HV1[38]	P2+HV1	P2+HV1		P2+HV1.
Negative-Strand RNA	P1+HV1		P1+HV1	P1+HV1	P1+HV1.
Plus-Strand RNA					
Types 1 and 2 Sabin Polio, 17D Yellow Fever Vaccine Strains	P1+HV1		P1+HV1		P1+HV1.
Other	P1+HV1[38]		P2+HV1		P2+HV1.
Double-Stranded RNA	P1+HV1			P1+HV1	P1+HV1.
Plant Viruses + Viroids	P1+HV1		P1+HV1	P1+HV1	P1+HV1.
Intracellular Viral DNA	See text	See text	See text		

*See exception given at asterisk at end of Appendix D

III–A–2–a–(2)–(c)–(*2*)–(*b*). P2 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with (i) cDNA copies of the whole genome, or (ii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(2)–(d). *Double-Stranded Segmented RNA Viruses.* P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with (i) mixtures of subgenomic cDNA segments, (ii) a specific subgenomic cDNA segment, or (iii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(2)–(e). *RNA Plant Viruses and Plant Viroids.*[48] P1 physical containment + an HV1 host-vector shall be used for DNA recombinants produced with (i) cDNA copies of the whole viral genome, (ii) subgenomic cDNA segments, or (iii) purified cDNA copies of viral mRNA.[37]

III–A–2–a–(3). *Intracellular Viral DNA.* Physical and biological containment specified for shotgun experiments with eukaryotic cellular DNA [see Section III–A–(1)–(a)] shall be used for DNA recombinants produced with integrated viral DNA or viral genomes present in infected cells.

III–A–2–b. *Eukaryotic Organelle DNAs.* P2 physical containment + an HV1 host-vector, or P1 + HV2, for mitochondrial or chloroplast DNA from eukaryotes when the organelle DNA has been obtained from isolated organelles. Otherwise, the conditions given for shotgun experiments apply.

III–A–2–c. *Prokaryotic Plasmid and Phage DNAs.* The containment levels required for shotgun experiments with DNA from prokaryotes apply to their

plasmids or phages (See Section III–A–1–b.)

III–A–3. *Lowering of Containment Levels for Characterized or Purified DNA Preparations and Clones.* Many of the risks which might conceivably arise from some types of recombinant DNA experiments, particularly shotgun experiments, would result from the inadvertent cloning of a harmful sequence. Therefore, in cases where the risk of inadvertently cloning the "wrong" DNA is reduced by prior enrichment for the desired piece, or in which a clone made from a random assortment of DNAs has been purified and the absence of harmful sequences established, the containment conditions for further work may be reduced. The following section outlines the mechanisms for such reductions.

III–A–3–a. *Purified DNA Other than Plasmids, Bacteriophages, and Other Viruses.* The formation of DNA recombinants from cellular DNAs that have been purified[41] and in which the absence of harmful sequences has been established[3] can be carried out under lower containment conditions than used for the corresponding shotgun experiment.[42] The containment may be decreased one step in physical containment (P4 P3; P3 P2; P2 P1) while maintaining the biological containment specified for the shotgun experiment, or one step in biological containment (HV3 HV2; HV2 HV1) while maintaining the specified physical containment. The Institutional Biosafety Committee (IBC) must review such a reduction and the approval of the IBC and of the NIH must be secured before such a reduction may be put into effect. IBC approval is sufficient for such a reduction except for any lowering of containment under Section III–A–3–a to levels below P1+HV1, which requires prior NIH approval. (See Section IV–E–1–b–(3)–(e).)

III–A–3–b. *Characterized Clones of DNA Recombinants.* When a cloned DNA recombinant has been rigorously characterized and the absence of harmful sequences has been established[3], experiments involving this recombinant DNA may be carried out under lower containment conditions. Institutional Biosafety Committees (IBCs) may give approval for a single-step reduction in physical or biological containment on receipt of evidence of characterization of a clone derived from a shotgun experiment and its probable freedom from harmful genes. IBC approval is sufficient for such a reduction except for any lowering of containment under Section III–A–3–b to levels below P1+HV1, or reduction of containment levels by more than one step, which also requires prior NIH approval.(See Section IV–E–1–b–3–(e).)

III–B. *Experiments with Prokaryotic Host-Vectors Other Than E. coli K–12.*

III–B–1. *HV1 and HV2 Systems.* Certain certified HV1 and HV2 hostvector systems appear in Appendix D. The containment levels for these systems are given in the subsections of Section III–A. Other systems in the future may be certified as HV1 and HV2. At the time of certification, the classification of containment levels for experiments using them will be assigned by NIH.

III–B–2. *Return of DNA Segments to Prokaryotic Non–HV1 Host of Origin.* Certain experiments involving these prokaryotes that exchange genetic information with *E. coli* by known physiological processes will be exempt from these Guidelines if they appear on the "list of exchangers" set forth in Appendix A (see Section I–E–4). For a prokaryote which can exchange genetic information[35] with *E. coli* under laboratory conditions but which is not on the list (Host A), the following type of experiment may be carried out under P1 conditions without Host A having been approved as an HV1 host: DNA from Host A may be inserted into a vector and propagated in *E. coli* K–12. Subsequently. this recombinant DNA may be returned to Host A by mobilization, transformation, or transduction and may then be propagated in Host A in any desired vector under P1 conditions.

For a prokaryote which does not exchange genetic information with *E. coli* (Host B), the following type of experiment may be carried out without Host B having been approved as an HV1 host: DNA from Host B may be inserted into a vector and propagated in *E. coli* K–12. Subsequently. this recombinant DNA may be returned to Host B and propagated in Host B under P1 conditions.[43]

III–B–3. *Non-HV1 Systems.* Containment levels for other classes of experiments involving non-HV1 systems may be approved by the Director, NIH. (See Sections IV–E–1–b–(1)–(b), IV–E–1–b–(2)–(c), and IV–E–1–b–(3)–(b).)

III–C. *Experiments with Eukaryotic Host-Vectors.*

III–C–1. *Vertebrate Host-Vector Systems.[44]* The subsections of Sections III–C–1–a, –b, –c and –d involve the use of specific viral vectors, namely polyoma, SV40, human adenoviruses 2 and 5, and mouse adenovirus strain FL, respectively. The subsections of Section III–C–1–e involve the use of viral vectors including the specific viral vectors considered in the subsections of Sections III–C–1–a, –b, –c and –d, as well as any other viral vector. When the reader finds that the containment level given for a specific experiment in a subsection of Section III–C–1–e is different from the containment level given in a subsection of Section III–C–1–a, –b, –c or –d, he may choose which of the two containment levels he wishes to use for the experiment.

III–C–1–a. *Polyoma Virus.*

III–C–1–a–(1). *Productive Virus-Cell Interactions.*

III–C–1–a–(1)–(a). Defective or whole polyoma virus genomes, with appropriate helper, if necessary, can be used in P2 conditions to propagate DNA sequences:

III–C–1–a–(1)–(a)–(*1*). from bacteria of Class 1 or Class 2[1] or their phages or plasmids, except for those that produce potent polypeptide toxins;[34]

III–C–1–a–(1)–(a)–(*2*). from mice;

III–C–1–a–(1)–(a)–(*3*). from eukaryotic organisms that do not produce potent polypeptide toxins,[34] provided that the DNA segment is >99% pure.

III–C–1–a–(1)–(b). Defective polyoma genomes, with appropriate helper, if necessary, can be used in P2 conditions for shotgun experiments to propagate DNA sequences from eukaryotic organisms that do not produce potent polypeptide toxins.[34]

III–C–1–a–(1)–(c). Whole virus genomes with appropriate helper, if necessary. can be used in P3 conditions for shotgun experiments to propagate DNA sequences from eukaryotic organisms that do not produce potent polypeptide toxins.[34]

III–C–1–a–(1)–(d). Experiments involving the use of defective polyoma virus genomes to propagate DNA sequences from eukaryotic viruses will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–a–(2). *Nonproductive Virus-Cell Interactions.* Defective or whole polyoma virus genomes can be used as vectors in P2 conditions when production of viral particles cannot occur (e.g., transformation of nonpermissive cells or propagation of an unconditionally defective recombinant genome in the absence of helper): *Provided,* The inserted DNA sequences are not derived from eukaryotic viruses. In the latter case, such experiments will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–b. *Simian Virus 40.*

III–C–1–b–(1). *Productive Virus-Cell Interactions.*

III–C–1–b–(1)–(a). SV40 DNA, rendered unconditionally defective by a deletion in an essential gene, with appropriate helper, can be used in P2 conditions to propagate DNA sequences from:

III–C–1–b–(1)–(a)–(*1*). bacteria of Class 1 or Class 2,[1] or their phages or plasmids, except for those that produce potent polypeptide toxins;[34]

III–C–1–b–(1)–(a)–(*2*). uninfected African green monkey kidney cell cultures.

III–C–1–b–(1)–(b). SV40 DNA, rendered unconditionally defective by a deletion in an essential gene, with an appropriate helper, can be used in P3 conditions to propagate DNA sequences from eukaryotic organisms that do not produce potent polypeptide toxins[34] (shotgun experiments or purified DNA).

III–C–1–b–(1)–(c). Experiments involving the use of defective SV40 genomes to propagate DNA sequences from eukaryotic viruses will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–b–(2). *Nonproductive Virus-Cell Interactions.* Defective or whole SV40 genomes can be used as vectors in P2 conditions when production of viral particles cannot occur (e.g., transformation of nonpermissive cells or propagation of an unconditionally defective recombinant genome in the absence of helper): *Provided,* The inserted DNA sequences are not derived from eukaryotic viruses. In the latter case, such experiments will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–c. *Human Adenoviruses 2 and 5.*

III–C–1–c–(1). *Productive Virus-Cell Interactions.*

III–C–1–c–(1)–(a). Human adenoviruses 2 and 5, rendered unconditionally defective by deletion of at least two essential genes, with appropriate helper, can be used in P3 conditions to propagate DNA sequences from:

III–C–1–c–(1)–(a)–(*1*). bacteria of Class 1 or Class 2[1] or their phages or plasmids except for those that produce potent polypeptide toxins;[34]

III–C–1–c–(1)–(a)–(*2*). eukaryotic organisms that do not produce potent polypeptide toxins[34] (shotgun experiments or purified DNA).

III–C–1–c–(1)–(b). Experiments involving the use of unconditionally defective human adenovirus 2 and 5 genomes to propagate DNA sequences from eukaryotic viruses will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–c–(2). *Nonproductive Virus-Cell Interactions.* Defective or whole human adenovirus 2 and 5 genomes can be used as vectors in P2 conditions when production of viral particles cannot occur (e.g., transformation of nonpermissive cells or propagation of an unconditionally defective recombinant genome in the absence of helper); *Provided,* The inserted DNA sequences are not derived from eukaryotic viruses. In the latter case, such experiments will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–d. *Murine Adenovirus Strain FL.*

III–C–1–d–(1). *Productive Virus-Cell Interactions.*

III–C–1–d–(1)–(a). Unconditionally defective murine adenovirus strain FL genomes, with appropriate helper, can be used in P2 conditions to propagate DNA sequences from:

III–C–1–d–(1)–(a)–(*1*). bacteria of Class 1 or Class 2[1] or their phages or plasmids except for those that produce potent polypeptide toxins;[34]

III–C–1–d–(1)–(a)–(*2*). eukaryotic organisms that do not produce potent polypeptide toxins[34] (shotgun experiments or purified DNA).

III–C–1–d–(1)–(b). Experiments involving the use of whole murine adenovirus strain FL genomes to propagate DNA sequences from prokaryotic or eukaryotic organisms will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–d–(1)–(c). Experiments involving the use of unconditionally defective murine adenovirus strain FL genomes to propagate DNA sequences from eukaryotic viruses will be evaluated by NIH on a case-by-case basis[45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–d–(2). *Nonproductive Virus-Cell Interactions.* Defective or whole murine adenovirus strain FL genomes can be used as vectors in P2 conditions when production of viral particles cannot occur (e.g., transformation of nonpermissive cells or propagation of an unconditionally defective recombinant genome in the absence of helper); *Provided,* The inserted DNA sequences are not derived from eukaryotic viruses. In the latter case, such experiments will be evaluated by NIH on a case-by-case basis [45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–1–e. *All Viral Vectors.*

III–C–1–e–(1). Other experiments involving eukaryotic virus vectors can be done as follows:

III–C–1–(1)–(a). Recombinant DNA molecules containing no more than two-thirds of the genome of any eukaryotic virus [all viruses from a single Family (36) being considered identical (50)] may be propagated and maintained in cells in tissue culture using P1 containment. For such experiments, it must be shown that the cells lack helper virus for the specific Families of defective viruses being used. The DNA may contain fragments of the genomes of viruses from more than one Family but each fragment must be less than two-thirds of a genome.

III–C–1–e–(1)–(b). Recombinants with less than two-thirds of the genome of any eukaryotic virus may be rescued with helper virus using P2 containment if wild type strains of the virus are CDC Class 1 or 2 agents, or using P3 containment if wild type strains of the virus are CDC Class 3 agents (1).

III–C–1–e–(2). Experiments involving the use of other whole or defective virus genomes to propagate DNA sequences from prokaryotic or eukaryotic organisms (and viruses), or as vectors to transform nonpermissive cells, will be evaluated by NIH on a case-by-case basis [45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

NIH will also review on a case-by-case basis[45] all experiments involving the use of virus vectors in animals and will prescribed the physical and biological containment conditions appropriate for such studies. (See Section IV–E–1–b–(3)–(c).)

III–C–1–f. *Nonviral Vectors.* Organelle, plasmid, and chromosomal DNAs may be used as vectors. DNA recombinants formed between such vectors and host DNA, when propagated only in that host (or a closely related strain of the same species), are exempted from these Guidelines (see Section I–E). DNA recombinants formed between such vectors and nonviral DNA from cells other than the host species

require only P1 physical containment for cells in culture since vertebrate cells in tissue culture inherently exhibit a very high level of containment. Recombinants involving viral DNA or experiments which require the use of the whole animals will be evaluated by NIH on a case-by-case basis.[45]

III–C–2. *Invertebrate Host-Vector Systems.*

III–C–2–a. *Inverebrate Viral Vectors.* Experiments involving invertebrate virus vectors can be done as follows:

III–C–2–a–(1). Recombinant DNA molecules containing no more than two-thirds of the genome of any invertebrate virus (all viruses from a single Family (36) being considered identical (50)) may be propagated and maintained in cells in tissue culture using P1 containment. For such experiments, it must be shown that the cells lack helper virus for the specific Families of defective viruses being used. The DNA may contain fragments of the genomes of viruses from more one Family but each fragment must be less than two-thirds of a genome.

III–C–2–a–(2). Recombinants with less than two-thirds of the genome of any invertebrate virus may be rescued with helper virus using P2 containment unless it is classified by the CDC as a class 3 agent (1) in which case P3 containment is required.

III–C–2–a–(3). Experiments involving the use of other whole or defective virus genomes to propagate DNA sequences from prokaryotic or eukaryotic organisms (and viruses), or as vectors to transform nonpermissive cells, will be evaluated by NIH on a case-by-case basis [45] and will be conducted under the prescribed physical and biological containment condtions. (See Section IV–E–1–b–(3)–(c).)

NIH will also review on a case-by-case basis [45] all experiments involving the use of virus vectors in animals and will prescribe the physical and biological containment conditions appropriate for such studies. (See Section IV–E–1–b–(3)–(c).)

III–C–2–b. *Nonviral Vectors.* Organelle, plasmid, and chromosomal DNAs may be used as vectors. DNA recombinants formed between such vectors and host DNA, when propagated only in that the host (or a closely related strain of the same species), are exempt from these Guidelines (see Section I–E). DNA recombinants formed between such vectors and DNA from cells other than the host species require P1 physical containment for invertebrate cells in culture inherently exhibits a very high level of containment. Experiments which require the use of whole animals will be evaluated by NIH on a case-by-case basis.[45]

III–C–3. *Plant Viral Host-Vector Systems.* [48] The DNA plant viruses which could currently serve as vectors for coloning genes in plants and plant cell protoplasts are Cauliflower Mosaic Virus (CaMV) and its close relatives [2A] which have relaxed circular double-stranded DNA genomes with a molecular weight of 4.5×10^6, and Bean Golden Mosaic Virus (BGMV) and related viruses with small ($>10^6$ daltons) single-stranded DNA genomes. CaMV is spread in nature by aphids, in which it survives for a few hours. Spontaneous mutants of CaMV which lack a factor essential for aphid transmission arise frequently. BGMV is spread in nature by whiteflies, and certain other single-stranded DNA plant viruses are transmitted by leafhoppers.

The DNA plant viruses have narrow host ranges and are relatively difficulty to transmit mechanically to plants. For this reason, they are most unlikely to be accidentally transmitted from spillage of purified virus preparations.

When these viruses are used as vectors in intact plants, or propagative plant parts, the plants shall be grown under P1 conditions—that is, in either a limited access greenhouse or plant growth cabinet which is insect-restrictive, preferably with positive air pressure, [2A] and in which an insect fumigation regime is maintained. Soil, plant pots, and unwanted infected materials shall be removed from the greenhouse or cabinet in sealed insect-proof containers and sterilized. It is not necessary to sterilize run-off water from the infected plants, as this is not a plausible route for secondary infection. When the viruses are used as vectors in tissue cultures or in small plants in axenic cultures, no special containment is necessary. Infected plant materials which have to be removed from the greenhouse or cabinet for further research shall be maintained under insect-restrictive conditions. These measures provide an entirely adequate degree of containment. They are similar to those required in many countries for licensed handling of "exotic" plant viruses.

The viruses or their DNA may also be useful as vectors to introduce genes into plant protoplasts. The fragility of plant protoplasts combined with the properties of the viruses provides adequate safety. Since no risk to the environment from the use of the DNA plant virus/protoplast system is envisaged, no special containment is necessary, except as described in the following paragraph.

Experiments involving the use of plant genomes to propagate DNA sequences from eukaryotic viruses will be evaluated by NIH on a case-by-case basis [45] and will be conducted under the prescribed physical and biological containment conditions. (See Section IV–E–1–b–(3)–(c).)

III–C–4. *Plant Host-Vector Systems Other than Viruses.* [48] Organelle, plasmid, and chromosomal DNAs may be used as vectors. DNA recombinants formed between such vectors and host DNA, when propagated only in that host (or a closely related strain of the same species), are exempt from these Guidelines (see Section I–E). DNA recombinants formed between such vectors and DNA from cells other than the host species require P2 physical containment. The development of host-vector systems that exhibit a high level of biological containment, such as those using protoplasts or undifferentiated cells in culture, permit [2A] a decrease in the physical containment to P1.

Intact plants or propagative plant parts which cannot be grown in a standard P2 laboratory because of their large size may be grown under the P1 conditions described above in Section III–C–3, except that (i) sterilization of run-off water is required where this is a plausible route for secondary infection and (ii) the standard P2 practices are adopted for microbiological work, and (iii) negative air pressure should be employed in the greenhouse or growth chamber when infectious agents are used which generate airborne propagules.

III–C–5. *Fungal or Similar Lower Eukaryotic Host-Vector Systems.*

Certain certified HV1 and HV2 host-vector systems appear in Appendix D. The containment levels for these systems are given in the subsections of Section III–A. Other systems in the future may be certified as HV1 and HV2. At the time of certification, they may be added to Appendix D (and thus the containment levels for their use will be those of the subsections of Section III–A). Alternatively, at the time of their certification, another classification of containment levels for experiments using them may be assigned by NIH.

In addition to the experiments described above, the following experiments may be carried out without the eukaryotic host (Host C) having been approved as an HV1 host: DNA from Host C may be inserted into a vector and propagated in *E. coli* K–12. Subsequently, this recombinant DNA may be returned to Host C and propagated there under P1 conditions.[43]

Containment levels for other classes of experiments involving non-HV1 systems may be expressly approved by the Director, NIH. (See Sections IV–E–1–b–(1)–(b), IV–E–1–b–(2)–(c), and IV–E–1–b–(3)–(b).)

III–C–6. *Return of DNA Segments to a Higher Eukaryotic Host of Origin.* DNA from a higher eukaryote (Host D) may be inserted into a vector and propagated in *E. coli* K–12. Subsequently, this recombinant DNA may be returned to Host D and propagated under conditions of physical containment comparable to P1 and appropriate to the organism under study.[2A]

III–C–7. *Transfer of Cloned DNA Segments to Eukaryotic Organisms*

III–C–7–a. *Transfer to Non-human Vertebrates.* DNA from any nonprohibited source (Section I–D), except for greater than one quarter of a eukaryotic viral genome, which has been cloned and propagated in *E. coli* K–12, may be transferred with *E. coli* vector used for cloning to any eukaryotic cells in culture or to any non-human vertebrate organism and propagated under conditions of physical containment comparable to P1 and appropriate to the organism under study[2]. Transfers to any other host will be considered by the RAC on a case-by-case basis[45].

III–C–7–b. *Transfer to Higher Plants.* DNA from any nonprohibited source [Section I–D] which has been cloned and propagated in *E. coli* K–12 or *S. cerevisiae,* may be transferred with the *E. coli* or *S. cerevisiae* vector used for cloning to any higher plant organisms (Angiosperms and Gymnosperms) and propagated under conditions of physical containment comparable to P1 and appropriate to the organism under study [2A]. Intact plants or propagative plant parts may be grown under P1 conditions described under Section III–C–3. Containment must be modified to ensure that the spread of pollen, seed or other propagules is prevented. This can be accomplished by conversion to negative pressure in the growth cabinet or greenhouse or by physical entrapment by "bagging" of reproductive structures. Transfers to any other plant organisms will be considered on a case-by-case basis[45].

III–C–7–c. *Transfer to Invertebrates.* DNA from any nonprohibited source [Section I–D], except for greater than one quarter of a eukaryotic viral genome, which has been cloned and propagated in *E. coli* K–12, may be transferred with the *E. coli* vector used for cloning to any eukaryotic cells in culture or to any invertebrate organism and propagated under conditions of physical containment comparable to P1 and appropriate to the organism under study (2A). Transfers to any other host will be considered by the RAC on a case-by-case basis (45).

III–D. *Complementary DNAs.* Specific containment levels are given in Section III–A–2–a (see also last column of Table III) for complementary DNA (cDNA) of viral mRNA. For the other Sections of the Guidelines, where applicable, cDNAs synthesized *in vitro* are included within each of the above classifications. For example, cDNAs formed from cellular RNAs that are not purified and characterized are included under III–A–1, shotgun experiments; cDNAs formed from purified and characterized RNAs are included under III–A–3; etc.

Due to the possibility of nucleic acid contamination of enzyme preparations used in the preparation of cDNAs, the investigator must employ purified enzyme preparations that are free of viral nucleic acid.

III–E. *Synthetic DNAs.* If the synthetic DNA segment is likely to[2A] yield a potentially harmful polynucleotide or polypeptide (e.g., a toxin or a pharmacologically active agent), the containment conditions must be as stringent as would be used for propagating the natural DNA counterpart.

If the synthetic DNA sequence codes for a harmless product,[2A] it may be propagated at the same containment level as its purified natural DNA counterpart. For example, a synthetic DNA segment which corresponds to a nonharmful gene of birds, to be propagated in *Saccharomyces cerevisiae,* would require P2 physical containment plus an HV1 host-vector, or P1 + HV2.

If the synthetic DNA segment is not expressed *in vivo* as a polynucleotide or polypeptide product, the organisms containing the recombinant DNA molecule are exempt[4] from the Guidelines.

IV. Roles and Responsibilities

IV–A. *Policy.* Safety in activities involving recombinant DNA depends on the individual conducting them. The Guidelines cannot anticipate every possible situation. Motivation and good judgment are the key essentials to protection of health and the environment.

The Guidelines are intended to help the Institution, the Institutional Biosafety Committee (IBC), the Biological Safety Officer, and the Principal Investigator determine the safeguards that should be implemented. These Guidelines will never be complete or final, since all conceivable experiments involving recombinant DNA cannot be foreseen. Therefore, it is the responsibility of the Institution and those associated with it to adhere to the *purpose* of the Guidelines as well as to their specifics.

Each Institution (and the IBC acting on its behalf) is responsible for ensuring that recombinant DNA activities comply with the Guidelines. General recognition of institutional authority and responsibility properly establishes accountability for safe conduct of the research at the local level.

The following roles and responsibilities constitute an administrative framework in which safety is an essential and integral part of research involving recombinant DNA molecules. Further clarifications and interpretations of roles and responsibilities will be issued by NIH as necessary.

IV–B. *General Applicability.* The Guidelines are applicable to all recombinant DNA research within the United States or its territories which is conducted at or sponsored by an Institution that receives any support for recombinant DNA research from NIH. This includes research by NIH directly.

An individual receiving support for research involving recombinant DNA must be associated with or sponsored by an Institution that can and does assume the responsibilities assigned in these Guidelines.

The Guidelines are also applicable to projects done abroad if they are supported by NIH funds. If the host country, however, has established rules for the conduct of recombinant DNA projects, then a certificate of compliance with those rules may be submitted to NIH in lieu of compliance with the NIH Guidelines. NIH reserves the right to withhold funding if the safety practices to be employed abroad are not reasonably consistent with the NIH Guidelines.

IV–C. *General Definitions.* The following terms, which are used throughout the Guidelines, are defined as follows:

IV–C–1. "DNA" means deoxyribonucleic acid.

IV–C–2. "Recombinant DNA" or "recombinant DNA molecules" means either (i) molecules which are constructed outside living cells by joining natural or synthetic DNA segments to DNA molecules that can replicate in a living cell, or (ii) DNA molecules which result from the replication of a molecule described in (i) above.

IV–C–3. [Deleted]

IV–C–4. "Institution" means any public or private entity (including

Federal, State, and local government agencies).

IV–C–5. "Institutional Biosafety Committee" of "IBC" means a committee that (i) meets the requirements for membership specified in Section IV–D–2, and (ii) reviews, approves, and oversees projects in accordance with the responsibilities defined in Sections IV–D–2 and –3.

IV–C–6. "NIH Office of Recombinant DNA Activities" or "ORDA" means the office within NIH with responsibility for (i) reviewing and coordinating all activities of NIH related to the Guidelines, and (ii) performing other duties as defined in Section IV–E–3.

IV–C–7. "Recombinant DNA Advisory Committee" or "RAC" means the public advisory committee that advises the Secretary, the Assistant Secretary for Health, and the Director of the National Institutes of Health concerning recombinant DNA research. The RAC shall be constituted as specific in Section IV–E–2.

IV–C–8. "Director, NIH" or "Director" means the Director of the National Institutes of Health and any other officer or employee of NIH to whom authority has been delegated.

IV–C–9. "Federal Interagency Advisory Committee on Recombinant DNA Research" means the committee established in October 1976 to advise the Secretary, HHS, the Assistant Secretary of Health, and the Director, NIH, on the coordination of those aspects of all Federal programs and activities which relate to recombinant DNA research.

IV–C–10. "Administrative Practices Supplement" or "APS" means a publication to accompany the NIH Guidelines specifying administrative procedures for use at NIH and at Institutions.

IV–C–11. "Laboratory Safety Monograph" or "LSM" means a publication to accompany the NIH Guidelines describing practices, equipment, and facilities in detail.

IV–D. *Responsibilities of the Institution.*

IV–D–1. Each Institution conducting or sponsoring recombinant DNA research covered by these Guidelines is responsible for ensuring that the research is carried out in full conformity with the provisions of the Guidelines. In order to fulfill this responsibility, the Institution shall:

IV–D–1–a. Establish and implement policies that provide for the safe conduct of recombinant DNA research and that ensure compliance with the Guidelines. The Institution, as part of its general responsibilities for implementing the Guidelines, may establish additional procedures, as deemed necessary, to govern the Institution and its components in the discharge of its responsibilities under the Guidelines. This may include (i) statements formulated by the Institution for general implementation of the Guidelines and (ii) whatever additional precautionary steps the Institution may deem appropriate.

IV–D–1–b. Establish an Institutional Biosafety Committee (IBC) that meets the requirements set forth in Section IV–D–2 and carries out the functions detailed in Section IV–D–3.

IV–D–1–c. [Deleted]

IV–D–1–d. [Deleted]

IV–D–1–e. If the Institution is engaged in recombinant DNA research at the P3 or P4 containment level, appoint a Biological Safety Officer (BSO), who shall be a member of the IBC and carry out the duties specified in Section IV–D–4.

IV–D–1–f. Require that investigators responsible for research covered by these Guidelines comply with the provisions of Section IV–D–5, and assist investigators to do so.

IV–D–1–g. Ensure appropriate training for the IBC chairperson and members, the BSO, Principal Investigators (PIs), and laboratory staff regarding the Guidelines, their implementation, and laboratory safety. Responsibility for training IBC members may be carried out through the IBC chairperson. Responsibility for training laboratory staff may be carried out through the PI. The Institution is responsible for seeing that the PI has sufficient training, but may delegate this responsibility to the IBC.

IV–D–1–h. Determine the necessity, in connection with each project, for health surveillance of recombinant DNA research personnel, and conduct, if found appropriate, a health surveillance program for the project. (The Laboratory Safety Monograph (LSM) discusses various possible components of such a program—for example, records of agents handled, active investigation of relevant illnesses, and the maintenance of serial serum samples for monitoring serologic changes that may result from the employees' work experience. Certain medical conditions may place a laboratory worker at increased risk in any endeavor where infectious agents are handled. Examples given in the LSM include gastrointestinal disorders and treatment with steroids, immunosuppressive drugs, or antibiotics. Workers with such disorders or treatment should be evaluated to determine whether they should be engaged in research with potentially hazardous organisms during their treatment or illness.)

IV–D–1–i. Report within 30 days to ORDA any significant problems with and violations of the Guidelines and significant research-related accidents and illnesses, unless the institution determines that the PI or IBC has done so.

IV–D–2. *Membership and Procedures of the IBC.* The Institution shall establish an Institutional Biosafety Committee (IBC) meeting the following requirements:

IV–D–2–a. The IBC shall comprise no fewer than five members so selected that they collectively have experience and expertise in recombinant DNA technology and the capability to assess the safety of recombinant DNA research experiments and any potential risk to public health or the environment. At least two members (but not less than 20 percent of the membership of the committee) shall not be affiliated with the Institution (apart from their membership on the IBC) and shall represent the interest of the surrounding community with respect to health and protection of the environment. Members meet the requirement if, for example, they are officials of State or local public health or environmental protection agencies, members of other local governmental bodies, or persons active in medical, occupational health, or environmental concerns in the community. The Biological Safety Officer (BSO), mandatory when research is being conducted at the P3 and P4 levels, shall be a member (see Section IV–D–4).

IV–D–2–b. In order to ensure the professional competence necessary to review recombinant DNA activities, it is recommended that (i) the IBC include persons from disciplines relevant to recombinant DNA technology, biological safety, and engineering; (ii) the IBC include, or have available as consultants, persons knowledgeable in institutional commitments and policies, applicable law, standards of professional conduct and practice, community attitudes, and the environment; and (iii) at least one member be a nondoctoral person from a laboratory technical staff.

IV–D–2–c. The Institution shall identify the committee members by name in a report to the NIH Office of Recombinant DNA Activities (ORDA) and shall include relevant background information on each member in such form and at such times as ORDA may require. (See the Administrative Practices Supplement for further guidance.)

IV–D–2–d. No member of an IBC may be involved (except to provide information requested by the IBC) in the review or approval of a project in which he or she has been, or expects to be, engaged or has a direct financial interest.

IV–D–2–e. The Institution may establish procedures that the IBC will follow in its initial and continuing review of applications, proposals, and activities. (IBC review procedures are specified in Section IV–D–3–a.)

IV–D–2–f. Central to implementation of the Guidelines is the review of experiments by the IBC. In carrying out this responsibility, the Institution shall comply with instructions and procedures specified in the Administrative Practices Supplement.

IV–D–2–g. Institutions are encouraged to open IBC meetings to the public whenever possible, consistent with protection or privacy and proprietary interests.

IV–D–2–h. Upon request, the Institution shall made available to the public all minutes of IBC meetings and any documents submitted to or received from funding agencies which the latter are required to make available to the public (e.g., reports of Guideline violations and significant research-related accidents, and agency directives to modify projects). If comments are made by members of the public on IBC actions, the Institution shall forward to NIH both the comments and the IBC's response.

IV–D–3. *Functions of the IBC.* On behalf of the Institution, the IBC is responsible for:

IV–D–3–a. Reviewing for compliance with the NIH Guidelines all recombinant DNA research conducted at or sponsored by the Institution, and approving those research projects that it finds are in conformity with the Guidelines. This review shall include:

IV–D–3–a–(1). An independent assessment of the containment levels required by these Guidelines for the proposed research, and

IV–D–3–a–(2). An assessment of the facilities, procedures, and practices, and of the training and expertise of recombinant DNA personnel.

Note.—See Laboratory Safety Monograph (pages 187–190) for suggested guidance in conducting this review.

IV–D–3–b. Notifying the Principal Investigator (PI) of the results of their review.

IV–D–3–c. Reviewing periodically recombinant DNA research being conducted at the Institution, to ensure that the requirements of the Guidelines are being fulfilled.

IV–D–3–d. Adopting emergency plans covering accidental spills and personnel contamination resulting from such research.

Note.—Basic elements in developing specific procedures for dealing with major spills of potentially hazardous materials in the laboratory are detailed in the Laboratory Safety Monograph. Included are information and references on decontamination and emergency plans. NIH and the Centers for Disease Control are available to provide consultation, and direct assistance if necessary, as posted in the LSM. The Institution shall cooperate with the State and local public health departments, reporting any significant research-related illness or accident that appears to be a hazard to the public health.

IV–D–3–e. Reporting within 30 days to the appropriate institutional official and to the NIH Office of Recombinant DNA Activities (ORDA) any significant problems with or violations of the Guidelines, and any significant research-related accidents or illnesses, unless the IBC determines that the PI has done so.

IV–D–3–f. The IBC may not authorize initiation of experiments not explicitly covered by the Guidelines until NIH, (with the advice of the RAC when required) established the containment requirement.

IV–D–3–g. Performing such other functions as may be delegated to the IBC under Section IV–D–1.

IV–D–4. *Biological Safety Officer.* The Institution shall appoint a BSO if it engages in recombinant DNA research at the P3 or P4 containment level. The officer shall be a member of the Institutional Biosafety Committee (IBC), and his or her duties shall include (but need not be limited to):

IV–D–4–a. Ensuring through periodic inspections that laboratory standards are rigorously followed;

IV–D–4–b. Reporting to the IBC and the Institution all significant problems with and violations of the Guidelines and all significant research-related accidents and illnesses of which the BSO becomes aware, unless the BSO determines that the Principal Investigator (PI) has done so.

IV–D–4–c. Developing emergency plans fro dealing with accidential spills and personnel contamination, and investigating recombinant DNA research laboratory accidents;

IV–D–4–d. Providing advice on laboratory security;

IV–D–4–e. Providing technical advice to the PI and IBC on research safety procedures.

Note.—See Laboratory Safety Monograph for additional information on the duties of the BSO.

IV–D–5. *Principal Investigator.* On behalf of the Institution, the PI is responsible for complying fully with the Guidelines in conducting any recombinant DNA research.

IV–D–5–a. *PI-General.* As part of this general responsibility, the PI shall:

IV–D–5–a–(1). Initiate or modify no recombinant DNA research subject to the Guidelines until that research, or the proposed modification thereof, has been approved by the Institutional Biosafety Committee (IBC) and has met all other requirements of the Guidelines and the Administrative Practices Supplement (APS).

Note.—No prior approval by the IBC is required for most experiments described in Section III–O. Modify containment and experimental protocol according to recommendations of the IBC.

IV–D–5–a–(2). Report within 30 days to the IBC and NIH (ORDA) all significant problems with and violations of the Guidelines and all significant research-related accidents and illnesses;

IV–D–5–a–(3). Report to the IBC and to NIH (ORDA) new information bearing on the Guidelines;

IV–D–5–a–(4). Be adequately trained in good microbiological techniques;

IV–D–5–a–(5). Adhere to IBC-approved emergency plans for dealing with accidental spills and personnel contamination; and

IV–D–5–a–(6). Comply with shipping requirements for recombinant DNA molecules. (See Section II–C for shipping requirements, Laboratory Safety Monograph for technical recommendations, and the APS for administrative instructions and procedures. The requesting laboratory must be in compliance with the NIH Guidelines and under appropriate review by its IBC, and the sending investigator must maintain a record of all shipments of recombinant DNA materials.)

IV–D–5–b. *Submissions by the PI to NIH.* The PI shall:

IV–D–5–b–(1). Submit information to NIH (ORDA) in order to have new host-vector systems certified;

IV–D–5–b–(2). Petition NIH, with notice to the IBC, for exemptions to these Guidelines (see Sections I–E–4 and I–E–5 and, for additional information on procedures, the APS); and

IV–D–5–b–(3). Petition NIH, with concurrence of the IBC, for exceptions to the prohibitions under these Guidelines (see Section I–D and, for additional information on procedures, the APS).

IV–D–5–b–(4). Petition NIH for determination of containment for

experiments requiring case-by-case review.

IV–D–5–b–(5). Petition NIH for determination of containment for experiments not covered by the Guidelines.

IV–D–5–c. *Submissions by the PI to the IBC.* The PI shall:

IV–D–5–c–(1). Make the initial determination of the required levels of physical and biological containment in accordance with the Guidelines;

IV–D–5–c–(2). Select appropriate microbiological practices and laboratory techniques to be used in the research;

IV–D–5–c–(3). Submit the initial research protocol (and also subsequent changes—e.g., changes in the source of DNA or host-vector system) to the IBC for review and approval or disapproval, and

IV–D–5–c–(4). Remain in communication with the IBC throughout the conduct of the project.

IV–D–5–d. *PI Responsibilities After Approval but Prior to Initiating the Research.* The PI is responsible for:

IV–D–5–d–(1). Making available to the laboratory staff copies of the approved protocols that describe the potential biohazards and the precautions to be taken;

IV–D–5–d–(2). Instructing and training staff in the practices and techniques required to ensure safety and in the procedures for dealing with accidents; and

IV–D–5–d–(3). Informing the staff of the reasons and provisions for any precautionary medical practices advised or requested, such as vaccinations or serum collection.

IV–D–5–e. *PI Responsibilities During the Conduct of the Approved Research.* The PI is responsible for:

IV–D–5–e–(1). Supervising the safety performance of the staff to ensure that the required safey practices and techniques are employed:

IV–D–5–e–(2). Investigating and reporting in writing to ORDA, the Biological Safety Officer (where applicable), and the IBC any significant problems pertaining to the operation and implementation of containment practices and procedures;

IV–D–5–e–(3). Correcting work errors and conditions that may result in the release of recombinant DNA materials;

IV–D–5–e–(4). Ensuring the integrity of the physical containment (e.g., biological safety cabinets) and the biological containment (e.g., purity, and genotypic and phenotypic characteristics); and

IV–D–5–e–(5). *Publications.* PIs are urged to include, in all publications reporting on recombinant DNA research, a description of the physical and biological containment procedures employed.

IV–E. *Responsibilities of NIH.*

IV–E–1. *Director.* The Director, NIH, is responsible for (i) establishing the NIH Guidelines on recombinant DNA research, (ii) overseeing their implementation, and (iii) their final interpretation.

The Director has a number of responsibilities under the Guidelines that involve the NIH Office of Recombinant DNA Activities (ORDA) and the Recombinant DNA Advisory Committee (RAC). ORDA's responsibilities under the Guidelines are administrative. Advice from the RAC is primarily scientific and technical. In certain circumstances, there is specific opportunity for public comment, with published response, before final action.

IV–E–1–a. *General Responsibilities of the Director, NIH.* The responsibilities of the Director shall include the following:

IV–E–1–a–(1). Promulgating requirements as necessary to implement the Guidelines.

IV–E–1–a–(2). Establishing and maintaining the RAC to carry out the responsibilities set forth in Section IV–E–2. The RAC's membership is specified in its charter and in Section IV–E–2;

IV–E–1–a–(3). Establishing and maintaining ORDA to carry out the responsibilities defined in Section IV–E–3; and

IV–E–1–a–(4). Maintaining the Federal Interagency Advisory Committee on Recombinant DNA Research established by the Secretary, HEW, for advice on the coordination of all Federal programs and activities relating to recombinant DNA, including activities of the RAC.

IV–E–1–b. *Specific Responsibilities of the Director, NIH.* In carrying out the responsibilities set forth in this Section, the Director shall weigh each proposed action, through appropriate analysis and consultation, to determine that it complies with the Guidelines and presents no significant risk to health or the environment.

IV–E–1–b–(1). *The Director is responsible for the following major actions* (For these, the Director must seek the advice of the RAC and provide an opportunity for public and Federal agency comment. Specifically, the agenda of the RAC meeting citing the major actions will be published in the **Federal Register** at least 30 days before the meeting, and the Director will also publish the proposed actions in the **Federal Register** for comment at least 30 days before the meeting. In addition, the Director's proposed decision, at his discretion, may be published in the **Federal Register** for 30 days for comment before final action is take. The Director's final decision, along with response to the comments, will be published in the **Federal Register** and the *Recombinant DNA Technical Bulletin.* The RAC and IBC chairpersons will be notified of this decision):

IV–E–1–b–(1)–(a). Changing containment levels for types of experiments that are specified in the Guidelines when a major action is involved;

IV–E–1–b–(1)–(b). Assigning containment levels for types of experiments that are not explicitly considered in the Guidelines when a major action is involved;

IV–E–1–b–(1)–(c). Certifying new host-vector systems, with the exception of minor modifications of already certified systems. [The standards and procedures for certification are described in Section II–D–2–a. Minor modifications constitute, for example, those of minimal or no consequence to the properties relevant to containment. See the Administrative Practices Supplement (APS) for further information];

IV–E–1–b–(1)–(d). Promulgating and amending a list of classes of recombinant DNA molecules to be exempt from these Guidelines because they consist entirely of DNA segments from species that exchange DNA by known physiological processes, or otherwise do not present a significant risk to health or the environment (see Sections I–E–4 and –5 and the APS for further information);

IV–E–1–b–(1)–(e). Permitting exceptions to the prohibited experiments in the Guidelines, in order, for example, to allow risk-assessment studies; and

IV–E–1–b–(1)–(f). Adopting other changes in the Guidelines.

IV–E–1–b–(2). *The Director is also responsible for the following lesser actions* (For these, the Director must seek the advice of the RAC. The Director's decision will be transmitted to the RAC and IBC chairpersons and published in the Recombinant DNA Technical Bulletin):

IV–E–1–b–(2)–(a). Interpreting and determining containment levels, upon request by ORDA;

IV–E–1–b–(2)–(b). Changing containment levels for experiments that are specified in the Guidelines (see Section III);

IV–E–1–b–(2)–(c). Assigning containment levels for experiments not explicitly considered in the Guidelines (see Section III);

IV–E–1–b–(2)–(d). Designating certain class 2 agents as class 1 for the purpose

of these Guidelines (see Footnote 1 and Appendix B);

IV–E–1–b–(2)–(e). Assigning containment levels for experiments with recombinant DNA from Class 3 organisms[1] and assigning containment levels for experiments which increase the host-range and virulence of plant pathogens beyond that which occurs by natural genetic exchange.

IV–E–1–b–(3). *The Director is also responsible for the following actions.* (The Director's decision will be transmitted to the RAC and IBC chairpersons and published in the *Recombinant DNA Technical Bulletin):*

IV–E–1–b–(3)–(a). Interpreting the Guidelines for experiments to which the Guidelines specifically assign containment levels;

IV–E–1–b–(3)–(b). Determining appropriate containment conditions for experiments according to case precedents developed under Section IV–E–1–b–(2)–(c).

IV–E–1–b–(3)–(c). Determining appropriate containment conditions upon case-by-case analysis of experiments explicitly considered in the Guidelines but for which no containment levels have been set (see Footnote 45 in Part V; Sections III–C–1–a through –e; and Sections III–C–2 and –3);

IV–E–1–b–(3)–(d). Authorizing, under procedures specified by the RAC, large-scale experiments (i.e., involving more than 10 liters of culture) for recombinant DNAs that are rigorously characterized and free of harmful sequences (see Footnote 3 and Section I–D–6);

IV–E–1–b–(3)–(e). Lowering containment levels for characterized clones or purified DNA (see Sections III–A–3–a and –b, Footnotes 3 and 41);

IV–E–1–b–(3)–(f). Approving minor modifications of already certified host-vector systems. (The standards and procedures for such modifications are described in Section II–D–2); and

IV–E–1–b–(3)–(g). Decertifying already certified host-vector systems.

IV–E–1–b–(3)–(h). Assigning containment levels for experiments in which both donor and recipient are nonpathogenic prokaryotes and/or nonpathogenic lower eukaryotes (see Section III–0–2).

IV–E–1–b–(3)–(i). Adding new entries to the list of toxins for vertebrates (see Appendix G).

IV–E–1–b–(3)–(j). Approving the cloning of toxin genes in host-vector systems other than *E. coli* K–12 (see Appendix G).

IV–E–1–b–(4). The Director shall conduct, support, and assist training programs in laboratory safety for Institutional Biosafety Committtee members, Biological Safety Officers, Principal Investigators, and laboratory staff.

IV–E–1–b–(5). The Director, at the end of 36 months from the time these Guidelines are promulgated, will report on the Guidelines, their administration, and the potential risks and benefits of this research. In doing so, the Director will consult with the RAC and the Federal Interagency Committee. Public comment will be solicited on the draft report and taken into account in transmitting the final report to the Assistant Secretary for Health and the Secretary, HHS.

IV–E–2. *Recombinant Advisory Committee.* The NIH Recombinant DNA Advisory Committee (RAC) is responsible for carrying out specified functions cited below as well as others assigned under its charter or by the Secretary, HHS, the Assistant Secretary for Health, and the Director, NIH.

The members of the committee shall be chosen to provide, collectively expertise in scientific fields relevant to recombinant DNA technology and biological safety—e.g., microbiology, molecular biology, virology, genetics, epidemiology, infectious diseases, the biology of enteric organisms, botany, plant pathology, ecology, and tissue culture. At least 20 percent of the members shall be persons knowledgeable in applicable law, standards of professional conduct and practice, public attitudes, the environment, public health, occupational health, or related fields. Representatives from Federal agencies shall serve as nonvoting members. Nominations for the RAC may be submitted to the NIH Office of Recombinant DNA Activities, Bethesda, Md., 20205.

All meetings of the RAC will be announced in the **Federal Register,** including tentative agenda item, 30 days in advance of the meeting, with final agendas (if modified) available at least 72 hours before the meeting. No item defined as a major action under Section IV–E–1–b–(1) may be added to an agenda after it appears in the **Federal Register.**

IV–E–2–a. *The RAC shall be responsible for advising the Director, NIH, on the actions listed in Section IV–E–1–b–(1) and (2).*

IV–E–3. *The Office of Recombinant DNA Activities.* ORDA shall serve as a focal point for information on recombinant DNA activities and provide advice to all within and outside NIH, including Institutions, Biological Safety Committees, Principal Investigators, Federal agencies, State and local governments, and institutions in the private sector. ORDA shall carry out such other functions as may be delegated to it by the Director, NIH, including those authorities described in Section IV–E–1–b–(3). In addition, ORDA shall be responsible for the following:

IV–E–3–a. Review and approval of Institutional Biosafety Committee (IBC) membership;

IV–E–3–b through IV–E–3–c–(3). [Deleted]

IV–E–c–(4). Publish in the **Federal Register:**

IV–E–c–(4)–(a). Announcements of Recombinant DNA Advisory Committee (RAC) meetings and agendas 30 days in advance, with publication of the Director's proposed decision for 30 days of public and Federal agency comment followed by a published response, on any action listed in Section IV–E–1–(b)–(1); and

IV–E–3–c–(4)–(b). Announcements of RAC meetings and agendas 30 days in advance of any action listed in Section IV–E–1–b–(2).

Note.—If the agenda for an RAC meeting is modified, ORDA shall make the revised agenda available to anyone, upon request, at least 72 hours in advance of the meeting.

IV–E–3–c–(5). Publish the *Recombinant DNA Technical Bulletin;* and

IV–E–3–c–(6). Serve as executive secretary to the RAC.

IV–E–4. *Other NIH Components.* Other NIH components shall be responsible for:

IV–E–4–a. [Deleted]

IV–E–4–b. Certifying P4 facilities, inspecting them periodically, and inspecting other recombinant DNA facilities as deemed necessary; and

IV–E–4–c. Announcing and distributing certified HV2 and HV3 host-vector systems (see Section II–E–3).

(See Administrative Practices Supplement for additional information on the administrative procedures of ORDA and other NIH components.)

IV–F. [Deleted]

IV–G. *Compliance.* As a condition for NIH funding or recombinant DNA research, Institutions must ensure that such research conducted at or sponsored by the Institution, irrespective of the source of funding, shall comply with these Guidelines. The policies on noncompliance are as follows:

IV–G–1. All NIH-funded projects involving recombinant DNA techniques must comply with the NIH Guidelines. Noncompliance may result in (i) suspension, limitation, or termination of financial assistance for such projects and of NIH funds for other recombinant DNA research at the Institution, or (ii) a

requirement for prior NIH approval of any or all recombinant DNA projects at the Institution.

IV–G–2. All non-NIH funded projects involving recombinant DNA techniques conducted at or sponsored by an Institution that receives NIH funds for projects involving such techniques must comply with the NIH Guidelines. Noncompliance may result in (i) suspension, limitation, or termination of NIH funds for recombinant DNA research at the Institution, or (ii) a requirement for prior NIH approval of any or all recombinant DNA projects at the Institution.

IV–G–3. Information concerning noncompliance with the Guidelines may be brought forward by any person. It should be delivered to both NIH (ORDA) and the relevant Institution. The Institution, generally through the IBC, shall take appropriate action. The Institution shall forward a complete report of the incident to ORDA, recommending any further action indicated.

IV–G–4. In cases where NIH proposes to suspend, limit, or terminate financial assistance because of noncompliance with the Guidelines, applicable DHEW and Public Health Service procedures shall govern.

IV–G–5. *Voluntary Compliance:* Any individual, corporation, or institution that is not otherwise covered by the Guidelines is encouraged to conduct recombinant DNA research activities in accordance with the Guidelines, through the procedures set forth in Part VI.

V. Footnotes and References

(*1*) The reference to organisms as Class 1, 2, 3, 4, or 5 refers to the classification in the publication *Classification of Etiologic Agents on the Basis of Hazard*, 4th Edition, July 1974; U.S. Department of Health, Education, and Welfare, Public Health Service, Centers for Disease Control, Office of Biosafety, Atlanta, Georgia 30333. The list of organisms in each class, as given in this publication, is reprinted in Appendix B to these Guidelines.

The Director, NIH, with advice of the Recombinant DNA Advisory Committee, may designate certain of the agents which are listed as Class 2 in the *Classification of Etiologic Agents on the Basis of Hazard*, 4th Edition, July 1974, as Class 1 agents for the Purposes of these Guidelines (see Section IV–E–1–b–(2)–(d)). An updated list of such agents may be obtained from the Office of Recombinant DNA Activities (ORDA), National Institutes of Health, Bethesda, Maryland 20205.

The entire *Classification of Etiologic Agents on the Basis of Hazard* is in the process of revision.

(*2*) For experiments using Vesicular Stomatitis virus (VSV), contact the NIH Office of Recombinant DNA Activities.

(*2A*) In Parts I and III of the Guidelines, there are a number of places where judgments are to be made. These include: "cells known to be infected with such agents" (Section I–D–1); "known to acquire it naturally" (Section I–D–5); "known to produce a potent polypeptide toxin * * * or known to carry such pathogens * * * not likely to be a product of closely linked eukaryote genes * * * shown not to contain such agents" (Section III–A–1–a–(5)–(a)); "shown to be free of disease causing microorganisms" (Section III–A–1–a(5)–(b)); "close relatives" (Section III–C–3); and "produce a potent polypeptide toxin" (Footnote 34).

In all these cases the principal investigator is to make the initial judgment on these matters as part of his responsibility to "make the initial determination of the required levels of physical and biological containment in accordance with the Guidelines" (Section IV–D–7–a). In all these cases, this judgment is to be reviewed and approved by the Institutional Biosafety Committee as part of its responsibility to make "an independent assessment of the containment levels required by these Guidelines for the proposed research" (Section IV–D–3–a–(1)). If the IBC wishes, any specific cases may be referred to the NIH Office of Recombinant DNA Activities as part of ORDA's functions to "provide advice to all within and outside NIH" (Section IV–E–3), and ORDA may request advice from the Recombinant DNA Advisory Committee as part of the RAC's responsibility for "interpreting and determining containment levels upon request by ORDA" (Section IV–E–1–b–(2)–(a)).

(*3*) The following types of data should be considered in determining whether DNA recombinants are "characterized" and the absence of harmful sequences has been established: (a) The absence of potentially harmful genes (e.g., sequences contained in indigenous tumor viruses or sequences that code for toxins, invasins, virulence factors, etc., that might potentiate the pathogenicity or communicability of the vector and/or the host or be detrimental to humans, animals, or plants); (b) the type(s) of genetic information on the cloned segment and the nature of transcriptional and translation gene products specified; (c) the relationship between the recovered and desired segment (e.g., hybridization and restriction endonuclease fragmentation analysis where applicable); (d) the genetic stability of the cloned fragment; and (e) any alterations in the biological properties of the vector and host.

(*4*) In Section I–E, "exemptions" from the Guidelines are discussed. Such experiments are not covered by the Guidelines and need not be registered with NIH. In Section I–D on "prohibitions," the possibility of "exceptions" is discussed. An "exception" means that an experiment may be expressly released from a prohibition. At that time it will be assigned an appropriate level of physical and biological containment.

(*5*) Care should be taken to inactivate recombinant DNA before disposal. Procedures for inactivating DNA can be found in the "Laboratory Safety Monograph: A Supplement to the NIH Guidelines for Recombinant DNA Research."

(*20*) Biological safety cabinets referred to in this section are classified as *Class I, Class II,* or *Class III* cabinets. A *Class I* is a ventilated cabinet for personnel protection having an inward flow of air away from the operator. The exhaust air from this cabinet is filtered through a high-efficiency particulate air (HEPA) filter. This cabinet is used in three operational modes: (1) With a full-width open front, (2) with an installed front closure panel

(having four 8-inch diameter openings) without gloves, and (3) with an installed front closure panel equipped with arm-length rubber gloves. The face velocity of the inward flow of air through the full-width open front is 75 feet per minute or greater. A *Class II* cabinet is a ventilated cabinet for personnel and product protection having an open front with inward air flow for personnel protection, and HEPA filtered mass recirculated air flow for product protection. The cabinet exhaust air is filtered through a HEPA filter. The face velocity of the inward flow of air through the full-width open front is 75 feet per minute or greater. Design and performance specifications for *Class II* cabinets have been adopted by the National Sanitation Foundation, Ann Arbor, Michigan. A *Class III* cabinet is a closed-front ventilated cabinet of gas-tight construction which provides the highest level of personnel protection of all biohazard safety cabinets. The interior of the cabinet is protected from contaiminants exterior to the cabinet. The cabinet is fitted with arm-length rubber gloves and is operated under a negative pressure of at least 0.5 inches water gauge. All supply air is filtered through HEPA filters. Exhaust air is filtered through two HEPA filters or one HEPA filter and incinerator before discharged to the outside environment.

(*34*) We are specifically concerned with the remote possibility that potent toxins could be produced by acquiring a single gene or cluster of genes. See also footnote 2A.

(*35*) Defined as observable under optimal laboratory conditions by transformation, transduction, phage infection, and/or conjugation with transfer of phage, plasmid, and/or chromosomal genetic information. Note that this definition of exchange may be less stringent than that applied to exempt organisms under Section I–E–4.

(*36*) As classified in the Third Report of the International Committee on Taxonomy of Viruses: Classification and Nomenclature of Viruses, R. E. F. Matthews, Ed. Intervirology 12 (129–296) 1979. (As noted in the Prohibition Section, the use of viruses classified[1] as Class 4 or 5 is prohibited.)

(*37*) The cDNA copy of the viral mRNA must be >99% pure; otherwise as for shotgun experiments with eukaryotic cellular DNA.

(*37A*) For the purpose of these Guidelines, viruses of the families *Papovaviridae*, *Adenoviridae*, and *Herpetoviridae* (36) should be considered as "transforming" viruses. While only certain of these viruses have been associated with cell transformation *in vivo* or *in vitro*, it seems prudent to consider all members to be potentially capable of transformation. In addition, those viruses of the family *Poxviridae* that produce proliferative responses—i.e., myxoma, rabbit and squirrel fibroma, and Yaba viruses—should be considered as "transforming."

(*38*) >99% pure (i.e., less than 1% of the DNA consists of intact viral genomes); otherwise as for whole genomes.

(*39*) The viruses have been classified by NCI as "moderate-risk oncogenic viruses." See "Laboratory Safety Monograph—A Supplement to the NIH Guidelines for Recombinant DNA Research" for recommendations on handling the viruses themselves.

(*40*) [Deleted]

(*41*) The DNA preparation is defined as "purified" if the desired DNA represents at least 99% (w/w) of the total DNA in the preparation, provided that it was verified by more than one procedure.

(*42*) The lowering of the containment level when this degree of purification has been obtained is based on the fact that the total number of clones that must be examined to obtain the desired clone is markedly reduced. Thus, the probability of cloning a harmful gene could, for example, be reduced by more than 10^5-fold when a nonrepetitive gene from mammals was being sought. Furthermore, the level of purity specified here makes it easier to establish that the desired DNA does not contain harmful genes.

(*43*) This is not permitted, of course, if it falls under any of the Prohibitions of Section I–D. Of particular concern here is prohibition I–D–5, i.e., "Deliberate transfer of a drug resistance trait to micro-organisms that are not known to acquire it naturally if such acquisition could compromise the use of a drug to control disease agents in human or veterinary medicine or agriculture."

(*44*) Because this work will be done almost exclusively in tissue culture cells, which have no capacity for propagation outside the laboratory, the primary focus for containment is the vector. It should be pointed out that risk of laboratory-acquired infection as a consequence of tissue culture manipulation is very low. Given good microbiological practices, the most likely mode of escape of recombinant DNAs from a physically contained laboratory is carriage by an infected human. Thus the vector with an inserted DNA segment should have little or no ability to replicate or spread in humans.

For use as a vector in a vertebrate host cell system, an animal viral DNA molecule should display the following properties:

(i) It should not consist of the whole genome of any agent that is infectious for humans or that replicates to a significant extent in human cells in tissue culture. If the recombinant molecule is used to transform nonpermissive cells (i.e., cells which do not produce infectious virus particles), this is not a requirement.

(ii) It should be derived from a virus whose epidemiological behavior and host range are well understood.

(iii) In permissive cells, it should be defective when carrying an inserted DNA segment (i.e., propagation of the recombinant DNA as a virus must be dependent upon the presence of a complementing helper genome). In almost all cases this condition would be achieved automatically by the manipulations used to construct and propagate the recombinants. In addition, the amount of DNA encapsidated in the particles of most animal viruses is defined within fairly close limits. The insertion of sizable foreign DNA sequences, therefore, generally demands a compensatory deletion of viral sequences. It may be possible to introduce very short insertions (50–100 base pairs) without rendering the viral vector defective. In such a situation, the requirement that the viral vector be defective is not necessary, except in those cases in which the inserted DNA encodes a biologically active polypeptide.

It is desired but not required that the functional anatomy of the vector be known—that is, fL-re sLogld be a clear idea of the location within the molecule of:

(i) The sites at which DNA synthesis originates and terminates,

(ii) The sites that are cleaved by restriction endonucleases, and

(iii) The template regions for the major gene product.

If possible the helper virus genome should:

(i) Be integrated into the genome of a stable line of host cells (a situation that would effectively limit the growth of the vector recombinant to such cell lines) or

(ii) Consist of a defective genome, or an appropriate conditional lethal mutant virus, making vector and helper dependent upon each other for propagation.

However, neither of these stipulations is a requirement.

(*45*) Review by NIH on a case-by-case basis means that NIH must review and set appropriate containment conditions before the work may be undertaken. NIH actions in such case-by-case reviews will be published in the *Recombinant DNA Technical Bulletin.*

(*46*) Provided the inserted DNA sequences are not derived from eukaryotic viruses. In the latter case, such experiments will be evaluated on a case-by-case basis.

(*47*) >99% pure; otherwise as for shotgun experiments.

(*48*) A USDA permit, required for import and interstate transport of pathogens, may be obtained from the Animal and Plant Health Inspection Service, USDA, Federal Building, Hyattsville, MD 20782.

(*49*) A subset of non-conjugative plasmid vectors are also poorly mobilizable (e.g., pBR322, pBR313). Where practical, these vectors should be employed.

(*50*) i.e., the total of all genomes within a Family shall not exceed two-thirds of the genome.

VI. Voluntary Compliance

VI–A. *Basic Policy.* Individuals, corporations, and institutions not otherwise covered by the Guidelines are encouraged to do so by following the standards and procedures set forth in Parts I–IV or the Guidelines. In order to simplify discussion, references hereafter to "institutions" are intended to encompass corporations, and individuals who have no organizational affiliation. For purposes of complying with the Guidelines, an individual intending to carry out research involving recombinant DNA is encouraged to affiliate with an institution that has an Institutional Biosafety Committee approved under the Guidelines.

Since commercial organizations have special concerns, such as protection of proprietary data, some modifications and explanations of the procedures in Parts I–IV are provided below, in order to address these concerns.

VI–B. *IBC Approval.* The NIH Office of Recombinant DNA Activities (ORDA) will review the membership of an institution's Institutional Biosafety Committee (IBC) and, where it finds the IBC meets the requirements set forth in Section IV–D–2, will give its approval to the IBC membership.

It should be emphasized that employment of an IBC member solely for purposes of membership on the IBC does not itself make the member an institutionally affiliated member for purposes of Section IV–D–2–a.

Except for the unaffiliated members, a member of an IBC for an institution not otherwise covered by the Guidelines may participate in the review and approval of a project in which the member has a direct financial interest, so long as the member has not been and does not expect to be engaged in the project. Section IV–D–2–d is modified to that extent for purposes of these institutions.

VI–C. [Deleted]

VI–D. *Certification of Host-Vector Systems.* A host-vector system may be proposed for certification by the Director, NIH, in accordance with the procedures set forth in Section II–D–2–a.

Institutions not otherwise covered by the Guidelines will not be subject to Section II–D–3 by complying with these procedures.

In order to ensure protection for proprietary data, any public notice regarding a host-vector system which is designated by the institution as proprietary under Section VI–F–1 will be issued only after consultation with the institution as to the content of the notice.

VI–E. *Requests for Exceptions, Exemptions, Approvals.* Requests for exceptions from prohibitions, exemptions, or other approvals required by the Guidelines should be requested by following the procedures set forth in the appropriate sections in Parts I–IV of the Guidelines.

In order to ensure protection for proprietary data, any public notice regarding a request for an exception, exemption, or other approval which is designated by the institution as proprietary under Section VI–F–1 will be issued only after consultation with the institution as to the content of the notice.

VI–F. *Protection of Proprietary Data.* In general, the Freedom of Information Act requires Federal agencies to make their records available to the public upon request. However, this requirement does not apply to, among other things, "trade secrets and commercial and financial information obtained from a person and privileged or confidential." 18 U.S.C. 1905, in turn makes it a crime for an officer or employee of the United States or any Federal department or agency to publish, divulge, disclose, or make known "in any manner or to any extent not authorized by law any information coming to him in the course of his employment or official duties or by reason of any examination or investigation made by or return, report or record made to or filed with, such department or agency or officer of employee thereof, which information concerns or relates to the trade secrets, (or processes * * * of any person, firm, partnership, corporation, or association." This provision applies to all employees of the Federal Government, including special Government employees. Members of the Recombinant DNA Advisory Committee are "special Government employees."

VI–F–1. In submitting information to NIH for purposes of complying voluntarily with the Guidelines, an institution may designate those items of information which the institution believes constitute trade secrets or privileged or confidential commercial or financial information.

VI–F–2. If NIH receives a request under the Freedom of Information Act for information so designated, NIH will promptly contact the institution to secure its views as to whether the information (or some portion) should be released.

V–F–3. If the NIH decides to release this information (or some portion) in response to a Freedom of Information request or otherwise, the institution will be advised; and the actual release will not be made until the expiration of 15 days after the institution is so advised, except to the extent that earlier release, in the judgement of the Director, NIH, is necessary to protect against an imminent hazard to the public or the environment.

VI–F–4. Projects should be registered in accordance with procedures specified in the *Administrative Practices Supplement.* The following information will usually be considered publicly available information, consistent with the need to protect proprietary data:

a. The names of the institution and principal investigator.

b. The location where the experiments will be performed.

c. The host-vector system.

d. the source of the DNA.

e. The level of physical containment.

VI–F–5–a. Any institution not otherwise covered by the Guidelines, which is considering submission of data or information voluntarily to NIH, may request presubmission review of the records involved to determine whether, if the records are submitted, NIH will or will not make part or all of the records available upon request under the Freedom of Information Act.

VI–F–5–b. A request for presubmission review should be submitted to ORDA, along with the records involved. These records must be clearly marked as being the property of the institution, on loan to NIH solely for the purpose of making a determination under the Freedom of Information Act. ORDA will then seek a determination from the HEW Freedom of Information Officer, the responsible official under HEW regulations (45 CFR Part 5), as to whether the records involved (or some portion) are or are not available to members of the public under the Freedom of Information Act. Pending such a determination, the records will be kept separate from ORDA files, will be considered records of the institution and not ORDA, and will not be received as part of ORDA files. No copies will be made of the records.

VI–F–5–c. ORDA will inform the institution of the HEW Freedom of Information Officer's determination and follow the institution's instructions as to where some or all of the records involved are to be returned to the institution or to become a part of ORDA files. If the institution instructs ORDA to return the records, no copies or summaries of the records will be made or retained by HEW, NIH, or ORDA.

VI–F–5–d. The HEW Freedom of Information Officer's determination will represent the official's judgment, as of the time of the determination, as to whether the records involved (or some portion) would be exempt from disclosure under the Freedom of Information Act, if at the time of the determination the records were in ORDA files and a request were received from them under the Act.

Appendix A of Annex E.—Exemptions Under I–E–4

Section I–E–4 states that exempt from these Guidelines are "certain specified recombinant DNA molecules that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent. A list of such exchangers will be prepared and periodically revised by the Director, NIH, with advice of the Recombinant DNA Advisory Committee, after appropriate notice and opportunity for public comment (see Section IV–E–1–b–(1)–(d).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix A."

Under exemption I–E–4 of these revised Guidelines are recombinant DNA molecules that are (1) composed entirely of DNA segments from one or more of the organisms within a sublist and (2) to be propagated in any of the organisms within a sublist. (Classification of *Bergey's Manual of Determinative Bacteriology*, eighth edition. R.E. Buchanan and N.E. Gibbons, editors. Williams and Wilkins Company: Baltimore, 1974.)

Sublist A

1. Genus *Escherichia*
2. Genus *Shigella*
3. Genus *Salmonella* (including *Arizona*)
4. Genus *Enterobacter*
5. Genus *Citrobacter* (including *Levinea*)
6. Genus *Klebsiella*
7. Genus *Erwinia*
8. *Pseudomonas aeruginosa, Pseudomonas putida* and *seudomonas fluorescens*
9. *Serratia marcescens*

Sublist B

1. *Bacillus subtilis*
2. *Bacillus licheniformis*
3. *Bacillus pumilus*
4. *Bacillus globigii*
5. *Bacillus niger*
6. *Bacillus nato*
7. *Bacillus amyloliquefaciens*
8 *Bacillus aterrimus*

Sublist C

1. *Streptomyces aureofaciens*
2. *Streptomyces rimosus*
3. *Streptomyces coelicolor*

Sublist D

1. *Streptomyces griseus*
2. *Streptomyces cyaneus*
3. *Streptomyces venezuelae*

Sublist E

One way transfer of *Streptococcus mutans* or *Streptococcus lactis* DNA into *Streptococcus sanguis.*

Sublist F

1. *Streptococcus sanguis*
2. *Streptococcus pneumoniae*
3. *Streptococcus faecalis*
4. *Streptococcus pyogenes*

Appendix B of Annex E.—Classification of Microorganisms on the Basis of Hazard

I. *Classification of Etiologic Agents on the Basis of Hazard (1)*

A. Class 1 Agents

All bacterial, parasitic, fungal, viral, rickettsial, and chlamydial agents not included in higher classes.

B. Class 2 Agents

1. Bacterial Agents

Actinobacillus—all species except *A. mallei*, which is in Class 3
Arizona hinshawii—all serotypes
Bacillus anthracis
Bordetella—all species
Borrelia recurrentis, B. vincenti
Clostridium botulinum, Cl. chauvoei, Cl. haemolyticum, Cl. histolyticum, Cl. novyi, Cl. septicum, Cl. tetani
Corynebacterium diptheriae, C. equi, C. haemolyticum, C. pseudotuberculosis, C. pyogenes, C. renale
Diplococcus (Streptococcus) pneumoniae
Erysipelothrix insidiosa
Escherichia coli—all enteropathogenic serotypes
Haemophilus ducreyi, H. influenzae
Herellae vaginicola
Klebsiella—all species and all serotypes
Leptospira interrogans—all serotypes
Listeria—all species
Mima polymorpha
Moraxella—all species
Mycobacteria—all species except those listed in Class 3
Mycoplasma—all species except *Mycoplasma mycoides* and *Mycoplasma agalactiae*, which are in Class 5
Neisseria gonorrhoeae, N. meningitidis
Pasteurella—all species except those listed in Class 3
Salmonella—all species and all serotypes
Shigella—all species and all serotypes
Sphaerophorus necrophorus
Staphylococcus aureus
Streptobacillus moniliformis
Streptococcus pyogenes
Treponema carateum, T. pallidum, and T. pertenue
Vibrio fetus, V. comma, including biotype El Tor, and *V. parahemolyticus*

2. Fungal Agents

***Actinomycetes* (including *Nocardia* species and *Actinomyces species and Arachnia propionica)*
Blastomyces dermatitidis
Cryptococcus neoformans
Paracoccidioides brasilienis

3. Parasitic Agents

Endamoeba histolytica
Leishmania sp.
Naegleria gruberi
Toxoplasma gondii
Toxocara canis
Trichinella spiralis
Trypanosoma cruzi

4. Viral, Rickettsial, and Chlamydial Agents

Adenoviruses—human—all types
Cache Valley virus
Coxsackie A and B viruses
Cytomegaloviruses
Echoviruses—all types.
Encephalomyocarditis virus (EMC)
Flanders virus
Hart Park virus
Hepatitis-associated antigen material
Herpes viruses—except *Herpesvirus simiae* (Monkey B virus) which is in Class 4
Coroma viruses
Influenza viruses—all types except A/PR8/34, which is in Class 1
Langat virus
Lymphogranuloma venereum agent
Measles virus
Mumps virus

Parainfluenza virus—all types except Parainfluenza virus 3, SF4 strain, which is in Class 1
Polioviruses—all types, wild and attenuated
Poxviruses—all types except *Alastrim, Smallpox, Monkey pox, and Whitepox,* which depending on experiments, are in Class 3 or Class 4
Rabies virus—all strains except *Rabies street virus,* which should be classified in Class 3 when inoculated into carnivores
Reoviruses—all types
Respiratory syncytial virus
Rhinoviruses—all types
Rubella virus
Simian viruses—all types except *Herpesvirus simiae (Monkey B virus) and Marburg virus,* which are in Class 4
Sindbis virus
Tensaw virus
Turlock virus
Vaccinia virus
Varicella virus
Vole rickettsia
Yellow fever virus, 17D vaccine strain

C. Class 3 Agents

1. Bacterial Agents

*Actinobacillus mallei**
Bartonella—all species
Brucella—all species
Francisella tularensis
Mycobacterium avium, M. bovis, M. tuberculosis
Pasteurella multocide type B ("buffalo" and other foreign virulent strains*)
*Pseudomonas pseudomallei**
Yersenia pestis

2. Fungal Agents

Coccidioides immitis
Histoplasma capsulatum
Histoplasma capsulatum var. *duboisii*

3. Parasitic Agents

Schistosoma mansoni

4. Viral, Rickettsial, and Chlamydial Agents

***Alastrim, Smallpox, Monkey pox, and Whitepox,* when used *in vitro*
Arboviruses—all strains except those in Classes 2 and 4 (Arboviruses indigenous to the United States are in Class 3, except those listed in Class 2. *West Nile* and *Semliki Forest* viruses may be classified up or down, depending on the conditions of use and geographical location of the laboratory.)
Dengue virus, when used for transmission or animal inoculation experiments
Lymphocytic choriomeningitis virus (LCM)
Psittacosis-Ornithosis-Trachoma group of agents
Rabies street virus, when used in inoculations of carnivores (See Class 2)
Rickettsia—all species except *Vole rickettsia* when used for transmission or animal inoculation experiments
*Vesicular stomatitis virus**
Yellow fever virus—wild, when used *in vitro*

D. Class 4 Agents

1. Bacterial Agents

None

3. Fungal Agents

None

3. Parasitic Agents

None

Viral, Rickettsial, and Chlamydial Agents

****Alastrim, Smallpox, Monkey pox, and Whitepox,* when used for transmission or animal inoculation experiments
Hemorrhagic fever agents, including *Crimean hemorrhagic fever, (Congo), Junin,* and *Machupo* viruses, and others as yet undefined
Herpesvirus simiae (Monkey B virus)
Lassa virus
Marburg virus
Tick-borne encephalitis virus complex, including *Russian spring-summer encephalitis, Kyasanur forest disease, Omsk hemorrhagic fever,* and *Central European encephalitis viruses*
Venezuelan equine encephalitis virus, epidemic strains, when used for transmission or animal inoculation experiments
Yellow-fever virus—wild, when used for transmission or animal inoculation experiments

II. Classification of Oncogenic Viruses on the Basis of Potential Hazard (2)

A. Low-Risk Oncogenic Viruses

Rous Sarcoma
SV–40
CELO
Ad7–SV40
Polyoma
Bovine papilloma
Rat mammary tumor
Avian Leukosis
Murine Leukemia
Murine Sarcoma
Mouse mammary tumor
Rat Leukemia
Hamster Leukemia
Bovine Leukemia
Dog Sarcoma
Mason-Pfizer Monkey Virus
Marek's
Guinea Pig Herpes
Lucke (Frog)
Adenovirus
Shope Fibroma
Shope Papilloma

B. Moderate-Risk Oncogenic Viruses

Ad2–SV40
FeLV
HV Saimiri
EBV
SSV–1
GaLV
HV ateles
Yaba
FeSV

III. Animal Pathogens (3)

A. Animal disease organisms which are forbidden entry into the United States by Law (CDC Class 5 agents)

1. Foot and mouth disease virus

B. Animal disease organisms and vectors which are forbidfden entry into the United States by USDA Policy (CDC Class 5 Agents)

African horse sickness virus
African swine fever virus
Besnoitia besnoiti
Borna disease virus
Bovine infectious petechial fever
Camel pox virus
Ephemeral fever virus
Fowl plague virus
Goat pox virus
Hog cholera virus
Louping ill virus
Lumpy skin disease virus
Nairobi sheep disease virus
Newcastle disease virus (Asiatic strains)
Mycoplasma mycoides (contagious bovine pleuropneumonia)
Mycoplasma agalactiae (contagious agalactia of sheep)
Rickettsia ruminatium (heart water)
Rift valley fever virus
Rhinderpest virus
Sheep pox virus
Swine vesicular disease virus
Teschen disease virus
Trypanosoma vivax (Nagana)
Trypanosoma evansi
Theileria parva (East Coast fever)
Theileria annulata
Theileria lawrencei
Theileria bovis
Theileria hirci
Vesicular exanthema virus
Wesselsbron disease virus
Zyonema

Footnotes and References of Appendix B

*A USDA permit, required for import and interstate commerce of pathogens, may be obtained from the Animal and Plant Health Inspection Service, USDA, Federal Building, Hyattsville, MD. 20782.

**Since the publication of the classification in 1974 [1], the *Actinomycetes* have been reclassified as bacterial rather than fungal agents.

***All activities, including storage of variola and whitepox are restricted to the single national facility (World Health Organization (WHO) Collaborating Center for Smallpox Research, Center for Disease Control, in Atlanta).

Appendix C of Annex E.—Exemptions under I–E–5

Section I–E–5 states that exempt from these Guidelines are "Other classes of recombinant DNA molecules, if the Director, NIH, with advice of the Recombinant DNA Advisory Committee, after appropriate notice and opportunity for public comment, finds that they do not present a significant risk to health or the environment. (See Section IV–E–1–b–(1)–(d).) Certain classes are exempt as of publication of these Revised Guidelines."

The following classes of experiments are exempt under Section I–E–5 of the Guidelines:

1. *Recombinant DNAs in Tissue Culture.*

Recombinant DNA molecules derived entirely from non-viral components (that is, no component is derived from a eukaryotic virus), that are propagated and maintained in cells in tissue culture are exempt from these Guidelines with the exceptions listed below.

Exceptions.

Experiments described in Sections I–D–1 to I–D–5 as being prohibited.

Experiments involving DNA from Class 3 organisms [1] or cells known to be infected with these agents, or any recombinant DNA molecules which increase the virulence and host-range of a plant pathogen beyond that which occurs by natural genetic exchange. (See Section III–O–1.)

Experiments involving the deliberate introduction of genes coding for the biosynthesis of toxins potent for vertebrates. (See Appendix G.)

2. *Experiments Involving E. coli K–12 host-vector systems.*

Experiments which use *E. coli* K–12 host-vector systems, with the exception of those experiments listed below, are exempt from these Guidelines provided that (a) the *E. coli* host shall not contain conjugation proficient plasmids or generalized transducing phages, and (b) lambda or lambdoid or Ff bacteriophages or nonconjugative plasmids [49] shall be used as vectors. However, experiments involving the insertion into *E. coli* K–12 of DNA from prokaryotes that exchange genetic information [35] with *E. coli* may be performed with any *E. coli* K–12 vector (e.g., conjugative plasmid). When a nonconjugative vector is used, the *E. coli* K–12 host may contain conjugation-proficient plasmids either autonomous or integrated, or generalized transducing phages.

For these exempt experiments, P1 physical containment conditions are recommended.

Exceptions.

Experiments described in Sections I–D–1 to I–D–5 as being prohibited.

Experiments involving DNA from Class 3 organisms [1] or from cells known to be infected with these agents may be conducted at P3 containment. Lower containment levels may be specified by NIH. (See Section IV–E–1–b–(2)–(e).) Experiments in this category require prior IBC review and approval.

Experiments which increase the virulence and host range of a plant pathogen beyond that which occurs by natural genetic exchange. (See Section III–O–1.)

Large-scale experiments (e.g., more than 10 liters of culture) require prior IBC review and approval.

Experiments involving the deliberate cloning of genes coding for the biosynthesis of toxins potent for vertebrates. (See Appendix G.)

3. *Experiments Involving Saccharomyces cerevisiae host-vector systems.*

Experiments which use *Saccharomyces cerevisiae* host-vector systems, with the exception of experiments listed below, are exempt from these Guidelines provided that laboratory strains are used.

For these exempt experiments, P1 physical containment conditions are recommended.

Exceptions.

Experiments described in Sections I–D–1 to I–D–5 as being prohibited.

Experiments involving CDC Class 3 organisms [1] or cells known to be infected with these agents, or any recombinant DNA molecules which increase the virulence and host-range of a plant pathogen beyond that which occurs by natural genetic exchange. (See Section III–O–1.)

Large-scale experiments (e.g., more than 10 liters of culture) require prior IBC review and approval.

Experiments involving the deliberate cloning of genes coding for the biosynthesis of toxins potent for vertebrates. (See Appendix G.)

4. *Experiments Involving Bacillus subtilis host-vector systems.*

Any asporogenic *Bacillus subtilis* strain which does not revert to a sporeformer with a frequency greater than 10^{-7} can be used for cloning DNA from any nonprohibited source, with the exception of those experiments listed below. Indigenous *Bacillus* plasmids and phages, whose host-range does not include *Bacillus cereus* or *Bacillus anthracis*, may be used as vectors.

For these exempt experiments P1 physical containment conditions are recommended.

Exceptions.

Experiments described in Section I–D–1 to I–D–5 as being prohibited.

Experiments involving CDC Class 3 organisms [1] or cells known to be infected with these agents, or any recombinant DNA molecules which increase the virulence and host-range of a plant pathogen beyond that which occurs by natural genetic exchange. (See Section III–O–1.)

Large-scale experiments (e.g., more than 10 liters of culture) require prior IBC review and approval.

Experiments involving the deliberate cloning of genes coding for the biosynthesis of toxins potent for vertebrates. (See Appendix G.)

Appendix D of Annex E.—HV1 and HV2 Host-Vector Systems Assigned Containment Levels as Specified in the Subsections of Section III–A

As noted above at the beginning of Section III–A, certain HV1 and HV2 host-vector systems are assigned containment levels as specified in the subsections of Section III–A. Those so classified as of publication of these Revised Guidelines are listed below.

*HV1—The following specified strains of *Neurospora crassa* which have been modified to prevent aerial dispersion:

(1) inl (inositolless) strains 37102, 37401, 46316, 64001 and 89601.

(2) csp–1 strain UCLA37 and csp–2 strains FS 590, UCLA101 (these are conidial separation mutants).

(3) eas strain UCLA191 (an "easily wettable" mutant).

HV1—The following *Streptomyces* species: *Streptomyces coelicolor, S. lividans, S. parvulus,* and *S. griseus.* The following are accepted as vector components of certified *Streptomyces* HV1 systems: *Streptomyces* plasmids SCP2, SLP1.2, pIJ101, actinophage phi C31, and their derivatives.

Appendix E of Annex E.—Actions Taken Under the Guidelines

As noted in the subsections of Sections IV–E–1–b–(1) and IV–E–1–b–(2), the Director, NIH, may take certain actions with regard to the Guidelines after consideration by the RAC.

Some of the actions taken to date include the following:

1. The following experiment has been approved: The cloning in *B. subtilis*, under P2 conditions, of DNA derived from *Saccharomyces cerevisiae* using EK2 plasmid

*These follow the assigned containment levels as specified in the subsections of Section III–A with one exception. This exception is that experiments involving complete genomes of eukaryotic viruses will require P3 + HV1 or P2 + HV2 rather than the levels given in the subsections of Section III–A.

V 46 / 233 DEC 81 UMI

vectors provided that an HV1 *B. subtilis* host is used.

2. Unmodified laboratory strains of *Neurospora crassa* can be used in all experiments for which HV1 *N. crassa* systems are approved, provided that only DNA from Class 1 agents is used. For agents other than Class 1, unmodified laboratory strains of *N. crassa* can be used in all experiments for which HV1 *N. crassa* systems are approved, provided that these are carried out at physical containment one level higher than required for HV1. However, if P3 containment is specified for HV1 *N. crassa*, this level is considered adequate for unmodified *N. crassa*. Care must be exercised to prevent aerial dispersal of macroconidia, in accordance with good laboratory practice. Mutationally modified strains of *N. crassa* specified as HV1 in Appendix D can be used in all experiments for which HV2 *N. crassa* systems are approved, provided that only DNA from Class 1 agents is used.

3. P2 physical containment shall be used for DNA recombinants produced between members of the *Actinomycetes* group except for the species which are known to be pathogenic for man, animals, or plants.

4. Cloned desired fragments from any non-prohibited source may be transferred into *Agrobacterium tumefaciens* containing a Ti plasmid (or derivatives thereof), using a nonconjugative *E. coli* plasmid vector coupled to a fragment of the Ti plasmid and/or the origin of replication of an *Agrobacterium* plasmid, under containment conditions one step higher than would be required for the desired DNA in HV1 systems (i.e. one step higher physical containment than that specified in the subsections of Section III–A). However, DNA from plants and nonpathogenic prokaryotes may be cloned under P2 containment conditions; and the *Saccharomyces cerevisiae* alcohol dehydro-genase 1 gene and the gene coding for the maize (*Zea mays*) seed storage protein, zein, may be cloned under P1 conditions. Transfer into plant parts or cells in culture is permitted at the same containment level as is ued for the cloning in *Agrobacterium tumefaciens*.

5. *Bacillus subtilis* strains that do not carry an asporogenic mutation can be used as hosts specifically for the cloning of DNA derived from *E. coli* K–12 and *Streptomyces coelicolor, S. aureofaciens, S. rimosus, S. griseus, S. cyaneus*, and *s. venezuelae*, using NIH-approved *Staphylococcus aureau* plasmids as vectors under P2 conditions.

6. *Streptomyces coelicolor, S. auerofaciens, S. rimosus, S. griseus, S. cyaneus*, and *S. venezuelae* can be used as hosts for the cloning of DNA derived from *B. subtilis, E. coli*, K–12, or from *S. aureus* vectors that have been approved for use in *B. subtilis* under P2 conditions, using as vectors any plasmid indigenous to *Streptomyces* species or able to replicate in these hosts by natural biological mechanisms.

7. Certain cloned segments of *Anabena* DNA may be transferred into *Klebsiella* under P2 physical containment.

8. Permission is granted to clone foot-and-mouth disease virus in the EK1CV host-vector system consisting of *E. coli* K–12 and the vector pBR322, all work to be done at the Plumb Island Animal Disease Center.

9. Permission is granted to clone the Exotoxin A gene of *Pseudomonas aeruginosa* under P1 + EK1 conditions in *Escherichia coli* K–12 and under P1 conditions in *Pseudomonas aeruginosa*.

10. Permission is granted to return to the host of origin *Helminthosporanium maydis* (race O) DNA which has been cloned in yeast strain SHY2 using the hybrid *E. coli*—yeast plasmid Y1p5. The cloned DNA may be returned to, and propagated in, *Helminthosporanium maydis* at the P2 level of physical containment.

11. Permission is granted to return *Schizophyllum commune* DNA (or yeast DNA) cloned in *Saccharomyces cerevisiae* with YR or 2 mu circle vectors to *Schizophyllum commune*. The cloned DNA may be returned to, and propagated in, *Schizophyllum commune* at the P2 level of physical containment.

12. Permission is granted to return *Wangiella dermatitidis* DNA to *Wangiella dermatitidis* using an HV2 certified *Saccharomyces/E. coli* hybrid vector. The *Wangiella dermatitidis* may be propagated at the P3 level of physical containment.

13. Certain specified clones derived from segments of the Foot-and-Mouth Disease Virus may be transferred from Plum Island Animal Disease Center to the facilities of Genetech, Inc., of South San Francisco, California. Further development of the clones at Genentech has been approved under P1 + EK1 conditions.

14. *Saccharomycopsis lipolytica* may be used as a host for transformation with defined *Escherichia coli/Saccharomyces cerevisiae* hybrid plasmids and the hybrid plasmids may be used for cloning *S. lipolytica* DNA in *E. coli* and returning the cloned DNA to *S. lipolytica*.

15. Conjugative plasmids or transducing phages may be employed in recombinant DNA experiments when employing *E. coli* as host when a small defined segment of Adenovirus 2 DNA is employed as linker DNA.

16. Permission is granted to introduce DNA segments from aphid tramsmissible strains into non-aphid transmissible strains of Cauliflower mosiac virus in order to study the factors determining aphid transmissibility.

17. Permission is granted to return *Mucor racemosus* DNA which as been cloned in *Saccharomyces cerevisiae* host-vector systems to *Mucor racemosus*. In addition, permission is granted to transform *Mucor racemosus* with *S. cerevisiae* vectors with or without cloned *S. cerevisiae* sequences. These manipulations may be performed under P2 conditions.

18. DNA from nonpathogenic prokaryotes and nonpathogenic lower eukaryotes may be cloned into *Schizosaccharomyces pombe* species under P1 containment conditions. DNA from higher eukaryotes may be cloned in *S. pombe* species under P3 containment conditions.

19. The pyrogenic endotoxin type A (Tox A) gene of *Staphylococcus aureus* may be cloned in an HV2 *Bacillus subtilis* host-vector system under P3 containment conditions.

20. A hybrid plasmid composed of, (1) *E. coli* plasmid pBR325, (2) the origin of replication and transfer genes of *Agrobacterium tumefaciens* plasmid Ti, (3) the thiamine gene of *E. coli*, and (4) *Arabidopsis* DNA, may be transformed into *Agrobacterium tumefaciens* under P1 conditions. The *Agrobacterium tumefaciens* may subsequently be used to introduce the composite plasmid carrying *Arabidopsis* DNA and the *E. coli* thiamine gene into *Arabidopsis* plants under P1 containment conditions.

21. *Chlamydomonas reinhardi* can be used as a host for cloning defined DNA segments derived from *E. coli* and *Saccharomyces cerevisiae* using *E. coli/S. cerevisiae* hybrid vectors under P2 physical containment.

22. *Candida albicans* can be used as a host for cloning *Candida albicans* DNA following propagation of the DNA in *E. coli* K–12 or in *Saccharomyces cerevisiae* employing an *E. coli-S. cerevisiae* hybrid plasmid vector or the yeast 2 micron plasmid.

23. The Rd strain of *Hemophilus influenzae* can be used as a host for the propagation of the cloned Tn 10 tet R gene derived from *E. coli* K–12 employing the non-conjugative *Haemophilus* plasmid, pRSF0885, under P1 conditions.

24. *Zymomonas mobilis* may be used as a host under P2 conditions for transformation by recombinant DNA derived from *Pseudomonas* strains that are non-pathogenic for animals or plants, and that has been cloned in an *E. coli* K–12 host.

25. Protoplasts of *Streptosporangium brasiliense* may be transformed with a hybrid plasmid containing pBR322 plus a *Streptosporangium* plasmid into which have been incorporated specified DNA segments from *Streptomyces* species or an HV1 approved *Bacillus subtilis* cloning vector.

26. *Saccharomyces cerevisiae* DNA may be cloned in *Tetrahymena thermophila* using *E coli/S. cerevisiae* hybrid plasmids under P1 containment conditions.

27 All members of the nonpathogenic *Actinomycetes* genus *Streptomyces* and the plasmids native to this genus are approved as host-vector systems for the cloning under P1 conditions of DNA derived from other nonpathogenic prokaryotic organisms such as *Streptomyces* and other nonpathogenic *Actinomycetes* species. *Escherichia coli* K–12, *Bacillus subtilis, Bacillus licheniformis, Bacillus circulans*, and other nonpathogenic *Bacillus* species, and for the cloning of DNA derived from nonpathogenic unicellular eukaryotic microorganisms such as *Saccharomyces cerevisiae* and *Neurospora crassa*

28 *Bacillus subtilis* strains that do not carry an asporogenic mutation can be used under P2 conditions for the cloning of DNA from any CDC Class 1 organism, using indigenous plasmid and phage vectors whose host range does not include *Bacillus anthracis* or *Bacillus cereus*.

29. *Bacillus subtilis* strains that do not carry an asporogenic mutation can be used under P1 conditions for the cloning of DNA from any Class 1 *Bacillus* species, using indigenous plasmid and phage vectors whose host range does not include *Bacillus anthracis* or *Bacillus cereus*.

30. Permission is granted to clone in *E. coli* K–12, in high containment Building 550 at the Frederick Cancer Research Center, restriction fragments of *Corynephage Beta* carrying the structural gene for diphtheria toxin. Laboratory practices and containment equipment are to be specified by the IBC.

31. Permission is granted to clone certain subgenomic segments of Foot and Mouth Disease Virus in HV1 *Bacillus subtilis* and *Saccharomyces cerevisiae* host-vector systems under P1 conditions at Genentech, Inc., South San Francisco, California.

32. Permission is granted in principle to propagate in mammalian cell culture recombinant DNA molecules consisting of segments of Foot and Mouth Disease Virus and SV40 deletion vectors under P3 conditions at the Plum Island Animal Disease Center. Approval is subject to review by a RAC Working Group of individual experiments.

33. A conjugative plasmid may be used to transfer among *E. coli* K–12 strains, under P2 physical containment, the qa–2 of *Neurospora crassa* ligated to a mobilizable plasmid.

34. *E. coli* K–12 strain DF214 (or derivatives thereof) and plasmid vectors (e.g., pBR322, pBR325) may be used to clone rat cDNA under P2 conditions. After the clone of interest has been purified, it may be worked with under P1 containment.

35. Permission is granted to Dr. Ronald Davis of Stanford University to field test corn plants modified by recombinant DNA techniques under specified containment conditions.

36. Permission is granted to clone in *E. coli* K–12, under P1 physical containment conditions, subgenomic segments of Rift Valley Fever Virus Subject to conditions which have been set forth by the RAC.

37. Permission is given to transfer a recombinant lactose plasmid from *Streptococcus faecalis* to *S. lactis* by conjugation.

38. Attenuated laboratory strains of *Salmonella typhimurium* may be used under P1 physical containment conditions to screen for the *Saccharomyces cerevisiae* pseudouridine synthetase gene. The plasmid YEp13 will be employed as the vector.

39. Permission is granted to clone in *Haemophilus parainfluenzae* Moloney murine leukemia provirus and mouse cellular flanking sequences employing the plasmid vector, pRK290, under P2 containment conditions.

40. Permission is granted for the development, under P1 conditions, of a new host-vector system based on the use of *Corynebacterium glutamicum* as host and non-conjugative poorly mobilizable plasmids as vectors.

41. *Vibrio harveyi* DNA may be cloned in *Vibrio cholera*; plasmids may be used to transfer the cloned *V. harveyi* DNA between *E. coli* K–12, *V. cholera*, and *V. harveyi*. P2 physical containment conditions are required for those experiments involving *V. cholera*. P1 containment conditions may be used for other phases of the project.

Appendix F of Annex E.—Certified Host-Vector Systems

While many experiments using *E. coli* K–12, *Saccharomyces cerevisiae* and *Bacillus subtilis* are currently exempt from the Guidelines under Exemption I–E–5, some derivatives of these host-vector systems were previously classified as HV1 or HV2. A listing of those systems follows.

HV1—The following plasmids are accepted as the vector components of certified *B. subtilis* HV1 systems: pUB110, pC194, pS194, pSA2100, pE194, pT127, pUB112, pC221, pC223, and pAB124. *B. subtilis* strains RUB 331 and BGSC 1553 have been certified as the host component of HV1 systems based on these plasmids.

HV2—The asporogenic mutant derivative of *Bacillus subtilis*, ASB 298, with the following plasmids as the vector component: pUB110, pC194, pS194, pSA2100, pE194, pT127, pUB112, pC221, pC223, and pAB124.

HV2—The following sterile strains of *Saccharomyces cerevisiae*, all of which have the ste–VC9 mutation, SHY1, SHY2, SHY3, and SHY4. The following plasmids are certified for use: YIp1, YEp2, YEp4, YIp5, YEp6, YRp7, YEp20, YEp21, YEp24, YIp25, YIp26, YIp27, YIp28, YIp29, YIp30, YIp31, YIp32 and YIp33.

EK2 Plasmid Systems. The *E. coli* K–12 strain chi–1776. The following plasmids are certified for use: pSC101, pMB9, pBR313, pBR322, pDH24, pBR327, pGL101, pHB1. The following *E. coli/S. cerevisiae* hybrid plasmids are certified as EK2 vectors when used in *E. coli* chi–1776 or in the sterile yeast strains, SHY1, SHY2, SHY3 and SHY4: YIp1, YEp2, YEp4, YIp5, YEp6, YRp7, YEp20, YEp21, YEp24, YIp25, YIp26, YIp27, YIp28, YIp29, YIp30, YIp31, YIp32, YIp33.

EK2 Bacteriophage Systems: The following are certified EK2 systems based on bacteriophage lambda.

Vector	*Host*
λgt*WES*. λB′	DP50*supF*
λgt*WES*. λB*	DP50*supF*

Appendix G of Annex E.—Containment Conditions for Cloning of Genes Coding for the Biosynthesis of Toxins for Vertebrates

1. General Information

Appendix G specifies the containment to be used for the deliberate cloning of genes coding for the biosynthesis of toxins for vertebrates. Cloning of genes coding for toxins for vertebrates that have an LD_{50} of less than 100 nanograms per kilogram body weight (e.g., the botulinum toxins, tetanus toxin, diphtheria toxin, *Shigella dysenteriae* neurotoxin) is prohibited. No specific restrictions shall apply to the cloning of genes if the protein specified by the gene has an LD_{50} of 100 micrograms or more per kilogram of body weight. Experiments involving genes coding for toxins with an LD_{50} of 100 micrograms or less per kilogram body weight shall be registered with ORDA prior to initiating the experiments. A list of toxins classified as to LD_{50} is available from ORDA. Testing procedures for determining toxicity of toxins not on the list are available from ORDA. The results of such tests shall be forwarded to ORDA, which will consult with the *ad hoc* Working Group on toxins prior to inclusion of the toxin on the list. (See Section IV–E–1–b–(3)–(i).)

2. Containment Conditions for Cloning of Toxin Genes in E. coli K–12

(a) Cloning of genes coding for toxins for vertebrates that have an LD_{50} in the range of 100 nanograms to 1000 nanograms per kilogram body weight (e.g., abrin, *Clostridium perfringens* epsilon toxin) may proceed under P2 + EK2 or P3 + EK1 containment conditions.

(b) Cloning of genes for the biosynthesis of toxins for vertebrates with an LD_{50} in the range of 1 microgram to 100 micrograms per kilogram body weight may proceed under P1 + EK1 containment conditions (e.g., *Staphylococcus aureus* alpha toxin, *Staphylococcus aureus* beta toxin, ricin, *Pseudomonas aeruginosa* exotoxin A, *Bordatella pertussis* toxin, the lethal factor of *Bacillus anthracis*, the *Pasteurella pestis* murine toxins, the oxygen-labile hemolysins such as streptolysin O, and certain neurotoxins present in snake venoms and other venoms).

(c) Some enterotoxins are substantially more toxic when administered internally than parenterally. The following enterotoxins shall be subject to P1 + EK1 containment conditions: cholera toxin, the heat labile toxins of *E. coli*, *Klebsiella*, and other related proteins that may be identified by neutralization with an antiserum mono-specific for cholera toxin, and the heat stable toxins of *E. coli* and of *Yersinia enterocolitica*.

3. Containment Conditions for Cloning of Toxins Genes in Organisms Other Than E. coli K–12

Requests involving the cloning of genes coding for toxins for vertebrates in host-vector systems other than *E. coli* K–12 will be evaluated by ORDA, which will consult with the *ad hoc* working group on toxins. (See Section IV–E–1–b–(3)–(j).)

Appendix H of Annex E.—Experiments Covered by Section III–0

No experiments currently fall under Section III–0 of the Guidelines.

Note.—OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in Section 8–(b)–(4) and (5) of that Circular.

Dated: October 26, 1981.

Richard M. Krause,

Director, National Institute of Allergy and Infectious Diseases.

Part III

Department of Labor

Employment Standards Administration,
Wage and Hour Division

Minimum Wages for Federal and Federally-Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

*See ZONE DESCRIPTIONS - following TRUCK DRIVERS' Classifications

Group 1: General Laborer; Asphalt Plant Laborers; Asphalt Spreaders; Batch Weighman; Brroomers; Brush Burners and Cutters; Car and Truck Loaders; Carpenter Tender; Changehouse Man or Dry Shack Man; Choke Setter; Clean-up Laborers; Concrete Laborers; Culvert, hand labor; Curing, concrete; Demolition, wrecking and moving Laborers; Drillers' Tenders; Dumpers, road oil crew; Dumpman (for grading crew); Elevator Feeders; Fence Builder (including guard rail, median rail, reference post, guide post, right-of-way marker); Fine Graders; Form Strippers (not swinging stages); Leverman or Aggregate Spreader (Flaherty and similar types); Loading Spotters; Material Yard Man (including electrical); Powderman Tender; Pittsburgh Chipper Operator or similar types; Ribbon Setters (including steel forms); Rip Rap Man (hand placed); Road Pump Tender; Sewer Laborer; Signalman; Skipman; Slopers; Spraymen; Stake Chaser; Stockpiler; Timber Faller and Bucker (hand labor); Toolroom Man (at job site); Tunnel Bull Gang (above ground); Weightman - Crusher (aggregate whenused); Railroad Track Laborers

LABORERS (AREA 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, and Wahkiakum Counties;
and the Southern portion of Pacific County

Group 2: Applicator (including Pot Tender for same) applying protective material by hand or nozzle on utility lines or storage tanks on project; Brush Cutters (power saw); Burners; Choker Splicer; Clary, power spreader and similar types; Clean-up Nozzleman-Greencutter (concrete, rock, etc.); Concrete power Buggyman; Crusher Feeder; Demolition and wrecking charred materials; Grade Checker; Gunite Nozzleman Tender; Gunite and Sand Blasting Post Tender; Handlers or Mixers of all materials of an irritating nature (including cement and lime); Power Tool Operators, includes but not limited to: Dry Pack Machine, Jackhammer, Chipping Guns, Paving Breakers, Vibrators (less than 4" in diameter); Post Hole Digger, air, gas or electric; Vibrating Screed; Tampers; Ribbon Setter, head; Rip Rap Man, head, hand placed; Sand Blasting (wet); Stake Setter; Tunnel-Muckers; Brakemen; Concrete Crew; Bull Gang (underground)

Group 3: Asphalt Rakers; Bit Grinder; Drill Doctor; Drill Operators; Air Tracks; Cat Drills; Wagon Drills; Rubber - mounted Drills and other similar typed; Concrete Saw Operator; Gunite Nozzleman; High Scalers; Strippers and Drillers (covers work in swinging stages, chairs or belts, under extreme conditions unusual to normal drilling, blasting, barring-down or sloping and stripping); Laser Beam (pipe laying); Applicable when employee assigned to move, set up, align Laser Beam; Manhole Builder; Powdermen; Power Saw Operators (bucking and falling); Pumpcrete Nozzleman; Sandblasting (dry); Sewer (Pipe Layers); Sewer Timberman; Track Liners; Anchor Machines, Ballast Regulators, multiple Tampers, power Jacks; Tugger Operator; Tunnel Chuck Tenders; Nippers and Timbermen; Vibrators (4" and larger); Water Blaster; Welder

Group 4: Laser Beam (tunnel) - Tunnel Miners; Tunnel Powderman

POWER EQUIPMENT OPERATORS (AREA 3)
Clark, Cowlitz, Klickitat, Skamania, and Wahkiakum
Counties; and the Southern portion of Pacific County

Group 1: Oiler, including Plant, Crane, Crusher, Guardrail equipment, and Trenching Machine; Assistant Conveyor Operator; Crusher Feederman; Deckhand; Self-propelled Scaffolding Operator; Guardrail Punch Oiler; Pump Operator, under 4"; Brakeman; Switchman; Parts Man (tool room)

Group 2: Blade Operator, pulled type; Truck Crane Oiler - driver, 25 ton capacity or over; Crane Fireman (all equipment except floating); A-Frame Truck Operator, single drum; Tugger or Coffin type Hoist Operator; Driller Tender; Auger; Oiler; Boatman; Fork Lift or Lumber Stacker Operator (on job site); Oiler, combination Guardrail Machines; Temporary Heating Plant Operator; Grade Oiler, required to check grade; Grade Checker; Tar Pot Fireman; Tar Pot Fireman (power agitated); H.D. Repairman Tender; Helicopter Radioman (ground); Roller Operator, grading of base rock (not asphalt)

Group 3: Asphalt Plant Fireman; Pugmill Operator (any type); Truck mounted Asphalt Spreader, with Screed; Compressor Operator (any power), under 1,250 cu. ft. total capacity; Conveyor Operator; Mixer Box Operator (C.T.B., Dry Batch, etc.); Cement Hog; Concrete Saw; Concrete Curing Machine (riding type); Wire Mat or Brooming Machine; Ross Carrier Operator (on job site); Bucket Elevator Loader, Barber Greene and similar types; Hydraulic Pipe Press; Pump Operator (any power), 4" and over; Hydrostatic Pump; Motorman; Ballast Jack Tamper; Bell Boy, phones, etc.; Tamping Machine, mechanical self-propelled; Hydrographic Seeder Machine, straw, pulp or seed; Broom Operator, self-propelled (on job site); Air Filtration Equipment; Welding Machine Operator

Group 4: Screed Operator; Compactor, including Vibratory; Compressor (any power) over 1,250 cu. ft. total capacity; Combination Mixer and Compressor, Gunnite Work; Concrete Mixer Operator, single drum, under five bag capacity; Helicopter Hoist Operator; Floating Equipment Fireman; Lull Hi-lift Operator or similar type; Fork Lift, over 5 ton; Serivce Oiler (Greaser); Hydra Hammer or similar types; Pavement Breaker; Pump Operator, more than 5 (any size); Roller Operator, Oiling, C.T.B.

Group 5: Extrusion Machine; Wagner Pactor or similar type (without blade); Concrete Batch Plant Quality Control Operator; Power Jumbo, Setting Slip Forms, etc. in tunnels; Slip Form Pumps, Power driven Hydraulic Lifting Device for concrete forms; Hoist, single drum; Elevator Operator; Pulva-mixer or similar types; Chip Spreading Machine Operator; Lime Spreading (on job site); Sweeper (Wayne type) Self-propelled (on job site); Tractor, rubber-tired 50 H.P. Flywheel and under; Trenching Machine, maximum digging capacity 3 ft. depth

POWER EQUIPMENT OPERATORS (AREA 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, and Wahkiakum
Counties; and the Southern portion of Pacific County

Group 6: Asphalt Burner and Reconditioner; Pavement Grinder and/or Grooving Machine (riding type); Cast-in-place Pipe Laying Machine; Maginnis Internal Full Slab Vibrator; Concrete Finishing Machine, Clary, Johnson, Bidwell, Burgess Bridge Deck or similar type; Curb Machine, Mechanical Berm, Curb and/or Curb and Gutter; Concrete Joint Machine; Concrete Planer; Concrete Paving Machine; Concrete Spreader; Loaders, rubber-tired type, 2½ cu. yds. and under; Rock Spreaders, self-propelled

Group 7: Roller (any asphalt mix); Beltcrete; Pumpcrete Operator (any type); Fuller-Kenyon and similar; Concrete Pump; Grouting Machine; Concrete Mixer, single drum, five bag capacity and over; Tower Mobile Operator; A-Frame Truck, double drum; Boom Truck; Churn Drill and Earth Boring Machine; Hydraulic Backhoe, wheel type 3/8 cu. yds. and under with or without Front End attachments 2½ cu. yds. and under (Ford, John Deere, Case type); Elevating Grader, Tractor towed requiring Operator or Grader; Pot Rammer

Group 8: Diesel-electric Engineer, Plant, Crusher, Generator, Floating; Batch Plant and/or wet mix, one and two drum; Generator Operator; Belt Loader, Kolman and Ko Cal types; Asphalt Paver Operator

Group 9: Bulldozer; Drill Cat Operator; Side-boom Cat; Compactor, with blade; Concrete Cooling Machine; Chicago Boom and similar types; Lift Slab Machine; Boom type lifting device, 5 ton capacity or less; Cherry Picker or similar type Crane-hoist, 5 ton capacity or less; Grizzley Crusher; Crusher Plant; Drill Doctor; Boring Machine; Guardrail Punch and Auger (all types); Surface Heater and Planer; Hydraulic Backhoe, track type 3/8 cu. yds.; Loader, Front End and Overhead, 2½ cu. yds. and under 4 cu. yds.; Hammer Operator; Pipe Cleaning, Doping, Bending and Wrapping Machines; Bolt-threading Machine; Drill Doctor (bit grinder); H.D. Mechanic Machine Tool Operator; Stationary Drag Scraper; Tractor, rubber-tired over 50 H.P. Flywheel; Tractor with boom attachment; Trench Machine, maximum digging capacity over 3 ft. depth; Asphalt Plant Operator

Group 10: Bulldozer, twin engine (TC 12 and similar); Cable Plow (any type); Compactor, multi-engine; Jack Operator, Elevating Barges; Barge Operator, self-unloading; Rubber-tired Dozers and Pushers (Michigan, Cat, Hough type); Driller - Percussion, Diamond, Core, Cable, Rotary and similar type

Group 11: Mixer Mobile; Concrete Breaker; Crane Operator, 25 tons and under; Combination Guardrail Machines, i.e., Punch, Auger, etc.; Shovel; Dragline; Clamshell, Hoe, etc., under 1 cu .yd.; Grade-alls, under 1 cu. yd.; Mucking Machine (tunnel)

59472 Federal Register / Vol. 46, No. 233 / Friday, December 4, 1981 / Notices

POWER EQUIPMENT OPERATORS (AREA 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, and Wahkiakum
Counties; and the Southern portion of Pacific County

	Fringe Benefits Payments

POWER EQUIPMENT OPERATORS (AREA 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, and Wahkiakum Counties; and the Southern portion of Pacific County

Group 12: Blade Operator; Batch Plant and/or Wet Mix, 3 units or more; Reinforced Tank Banding Machine (K-17 or similar); Hoist, two or more drums; Elevating Loader, Athey and similar; Piledriver (not crane type); Rubber-tired Scraper, single and twin engine; Single Scraper, with Push-pull attachments, self-loader; Paddle Wheel, auger type; Blade mounted Spreaders, Ulrich and similar types; Shield Operator

Group 13: Blade Operator, finish; Blade, externally controlled by electronic, mechanical hydraulic means; Blade, multi-engine; Concrete Paving Road Mixer, Derrick, under 100 tons; Hoist, Stiff Leg, Guy Derrick or similar, 50 tons and over; Cableway Operator 25 ton and over; Crane, over 25 ton and including 40 tons; Piledriver Operator; Floating Clamshell, etc., under 3 cu. yds.; Floating Crane (Derrick Barge), less than 30 ton; Elevating Grader, operated by tractor operator, Sierra, Euclid, or similar; Back Filling Machine; Shovel, etc. 1 cu. yd. and less than 3 cu. yds.; Grade-all, 1 cu. yd. and over; Bridge Crane Operator

Group 14: Tower Crane Operator; Rubber-tired Scraper, with Tandem Scrapers, self-loading, Paddle Wheel, auger type, finish and/or 2 or more units

Group 15: Rock Hound Operator; Loader, 4 cu. yds., but less than 6 cu. yds.

Group 16: Autograder or "Trimmer"; Tandem Bulldozer, Quad-nine and similar; Automatic Concrete Slip Form Paver; Concrete Canal Line; Cableway, 25 ton and over; Crane, over 40 ton and including 100 ton; Whirley, 80 ton and under; Floating Clamshell, etc., 3 cu. yds. and over; Floating Crane (Derrick Barge) 30 ton but less than 80 ton; Loader, 6 cu. yds., but less than 12 cu. yds.; Rubber-tired Scraper, with Tandem Scrapers, multi-engine; Shovel, etc., 3 cu. yds. but less than 5 cu. yds.; Wheel Excavator, under 750 cu. yds. per hour

Group 17: Crane over 100 ton and including 200 ton; Whirley, over 80 ton and including 150 ton; Floating Crane (Derrick Barge), 80 ton, but less than 150 ton; Loader, 12 cu. yds. and over; Shovel, etc., 5 cu. yds. and over; Canal Trimmer

Group 18: Crane, over 200 ton; Whirley, 150 ton and over; Floating Crane, 150 ton but less than 250 ton; Wheel Excavator, over 750 cu. yds. per hour; Band Wagons, in connection with Wheel Excavator

Group 19: Helicopter, when used in erecting work; Floating Crane, 250 ton and over; Remote controlled earth moving equipment; Underwater equipment, remote or otherwise

POWER EQUIPMENT OPERATORS (AREA 4) (Cont'd)
DOE Hanford Site in Benton and Franklin Counties

Group 2: A-Frame Truck (single drum); Assistant Refrigeration Plant (under 1000 ton); Assistant Plant Operator, Fireman or Pugmixer (asphalt); Bagley or Stationary Scraper; Belt Finishing Machine; Blower Operator (cement); Cement Hog; Compressor (2000 CFM or over, 2 or more, gas, diesel or electric power); Concrete Saw (multiple cut); Distributor Leverman; Ditch Witch or similar; Elevator, hoisting materials; Dope Pots (power agitated); Fork Lift or Lumber Stacker, Hydra-lift and similar; Gin Trucks (pipeline); Hoist, single drum; Loaders (bucket, elevators and conveyors); Longitudinal Float; Mixer (portable - concrete); Pavement Breaker, Hydra-hammer and similar; Power Broom; Spray Curing Machine (concrete); Spreader Box (self-propelled); Straddle Buggy (Ross and similar on construction job only); Tractor (Farm type R/T with attachments, except Backhoe); Tugger Operator

Group 3: A-Frame Truck (2 or more drums); Assistant Regrigeration Plant and Chiller Operator (over 1000 ton); Backfillers (Cleveland and similar); Batch Plant and Wet Mix Operator, single unit (concrete); Belt-crete Conveyors with power pack or similar; Belt Loader (Kocal or similar); Bend Machine; Bob Cat; Boring Machine (earth); Boring Machine (rock under 8" bit) (Quarry Master, Joy or similar); Bump Cutter (Wayne, Saginau or similar); Canal Lining Machine (concrete); Cleaning and Doping Machine (pipeline); Deck Engineer; Elevating Belt-type Loader (Euclid, Barber Green and similar); Elevating Grader-type Loader (Dumor, Adams or similar); Generator Plant Engineers (diesel, electric); Gunite Combination Mixer and Compressor; Mixermobile; Posthole Auger or Punch; Pump (Grout or Jet); Soil Stabilizer (P & H or similar); Spreader Machine; Tractor (to D-6 or equivalent) and Traxcavator; Traverse Finish Machine; Turnhead Operator

Group 4: Blade Operator (Motor Patrol and attachments); Concrete Pumps (Squeeze-crete, Flow-crete, Pump-crete, Whitman and similar); Curb Extruder (asphalt or concrete); Drills (Churn, Core, Calyx, or Diamond); Equipment Serviceman, Greaser and Oiler; Hoist (2 or more drums or Tower Hoist); Loaders (Overhead and Front-end, under 4 yds. R/T); Refrigeration Plant Engineers (under 1000 ton); Rubber-tire Skidders (R/T with or without attachments); Screed Operator; Surface Heater and Planer Machine; Trenching Machines (under 7 ft. depth capacity); Turnhead (with re-screening); Vacuum Drill (Reverse Circulation Drill under 8" bit)

Group 5: Drilling Equipment (8" bit and over) (Robbins, Reverse Circulation and similar); Hoe Ram; Paving (dual drum); Refrigeration Plant Engineer (1000 tons and over); Signalman (Whirleys, Highline, Hammerheads or similar)

POWER EQUIPMENT OPERATORS (AREA 4) (Cont'd)
DOE Hanford Site in Benton and Franklin Counties

Group 6: Automatic Subgrader (Ditches and Trimmers)(Autograde, ABC, R.A. Hansen and similar on grade wire); Backhoe (under 1 yd.); Batch Plant (over 4 units); Batch and Wet Mix Operator (multiple units, 2 and including 4); Boat Operator; Cableway Controller (Dispatcher); Cranes (25 tons and under); Derricks and Stiffleg (under 65 tons); Drill Doctor; Multiple Dozer Units with single blade; Paving Machine (asphalt and concrete); Piledriving Engineers; Quad-track or similar equipment; Roller-man (finishing pavement); Trenching Machines (7 ft. depth and over)

Group 7: Asphalt Plant Operator (Backhoes (1 yd. to 3 yds.); Blade (finish and Bluetop) Automatic, CMI, ABC and similar when used as automatic; Boom Cats (side); Cableway Operators; Clamshell Operators (under 3 yds.); Concrete Slip Form Paver; Cranes (over 25 tons, including 45 tons); Crusher, Grizzle and Screening Plant Operator; Draglines (under 3 yds.); Elevating Belt (Holland type); H.D. Mechanic; H.D. Welder; Loader Operator (Front-end and Overhead, 4 yards, including 8 yards); Mucking Machine; Quad-track or similar equipment; Rubber-tired Scrapers; Shovels (under 3 yards); Tractors (D-6 and equivalent and over)

Group 8: Backhoes (3 yards and over); Cranes (over 45 tons, to 85 tons); Cranes (85 tons and over, and all climbing, rails and tower); Clamshell Operator (3 yards and over); Derricks and Stiffleg (65 tons and over); Draglines (3 yards and over); Loader (360 degrees revolving Koehring Scooper or similar); Loaders (Overhead and Front-end, over 8 yards); Helicopter Pilot; Shovels (3 yards and over); Whirleys and Hammerheads, all

Group 9: Transi-lift

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Submission of State Programs, Procedures and Criteria for Approval or Disapproval of Program Submissions, Maintenance of State Programs, Procedures for Substituting Federal Enforcement of State Programs, and for Establishing a Federal Program in a State

V 4 6 / 2 3 3 D E 4 8 1 UMI

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 730, 731, 732, 733 and 736

Submission of State Programs, Procedures and Criteria for Approval or Disapproval of Program Submissions, Maintenance of State Programs, Procedures for Substituting Federal Enforcement of State Programs, and for Establishing a Federal Program in a State

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rules.

SUMMARY: The Office of Surface Mining is proposing to amend 30 CFR Parts 730, 731, 732, 733 and 736, which set forth the procedures for the submission, review, approval or disapproval, and maintenance of State programs, for substituting Federal enforcement of State programs and for establishing a Federal program in a State.

OSM has drafted these revisions in response to both the Secretary's goal of removing burdensome or counter-productive regulations and comments from the States and the general public.

DATES: Comments must be received by January 18, 1982, not later than 5:00 p.m., at the address listed below. A public hearing on the proposed amendments will be held on January 5, 1982 at 9:30 a.m. Representatives of OSM will be available to meet with interested persons upon request until January 18, 1982. Persons wishing to testify at the hearing should contact the person listed below under "FOR FURTHER INFORMATION CONTACT."

ADDRESSES: Written comments must be mailed or hand-delivered to: Administrative Record (SPA–03), Office of Surface Mining, U.S. Department of the Interior, Room 153, South Interior Building, 1951 Constitution Avenue N.W., Washington, D.C. 20240.

The public hearing will be held in the main auditorium, Department of the Interior, 18th and C Streets N.W., Washington, D.C. 20240. A transcript of the public hearing, all written comments received, summaries of meetings with representatives of OSM, and other documents constituting the administrative record on the proposed amendments will be made available for public review during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Carl C. Close, Acting Assistant Director, Program Operations and Inspection, Office of Surface Mining, 1951 Constitution Avenue, N.W., Washington, D.C. 20240, Telephone: (202) 343–4225.

SUPPLEMENTARY INFORMATION:

I. Public Hearing

A public hearing on these proposed amendments will be held at 9:30 a.m. on January 5, 1982 in the main auditorium, Department of the Interior, 18th and C Streets, N.W., Washington, D.C. 20240.

Individual testimony at this hearing will be limited to 15 minutes. The hearing will be transcribed. Filing of a written statement at the time of giving oral testimony would be helpful to the panel and would facilitate the job of the court reporter. Submission of written statements in advance of the hearing would greatly assist OSM officials by providing them an opportunity to consider appropriate questions which could be asked for clarification or to request more specific information from the person testifying. Persons wishing to testify or submit statements in advance should contact Mr. Carl C. Close at the address or phone number indicated above.

The public hearing will continue until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak and wish to do so will be heard following the scheduled speakers. The hearing will end after all persons present in the audience who wish to speak have been heard. Persons not scheduled to testify, but wishing to do so, assume the risk of having the public hearing adjourned unless they are present in the audience at the time all scheduled speakers have been heard.

II. Background

The Secretary of the Interior has decided to review all regulations promulgated by the Department under the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.* (the Act). The Secretary believes that fundamental changes in these regulations may be necessary. He intends to administer the Act in a manner that does not unnecessarily restrict coal development or improperly intrude on the role of the States. This approach will reflect the potentially competing mandates of the Act which require the Secretary (1) to establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining (section 102(a)); (2) to recognize that the primary governmental responsibility for developing, authorizing, issuing and enforcing regulations for surface coal mining and reclamation operations should rest with the States (section 101(f)); and (3) to assure that coal supplies are adequate to meet the Nation's requirements (section 102(f)).

One area of the Secretary's concern is the process of approving State regulatory programs under section 503 of the Act and implementing Federal regulatory programs under section 504 for those States not wishing to assume jurisdiction or whose programs have not been approved.

To implement the provisions of sections 503 and 504 and to insure a balance among the competing mandates of the Act, the Secretary promulgated Parts 730–736 in the permanent regulatory program (44 FR 15323–15332, March 13, 1979). Under the current regulations a State must submit its proposed permanent program to OSM under procedures contained in 30 CFR Part 731 to assume primary jurisdiction under the Act for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders. OSM reviews the proposal and recommends approval or disapproval to the Secretary of the Interior of each State program according to procedures contained in 30 CFR Part 732. Part 733 establishes requirements for the maintenance of approved State programs and procedures for substituting Federal enforcement of State programs and withdrawing approval of State programs. Part 736 establishes standards and procedures for the promulgation, implementation, and administration of a Federal program for a State.

III. Proposed Changes

The proposed amendments to Parts 730–736 are designed to streamline the regulations, remove burdensome or counter-productive requirements, and provide greater editorial clarity. One change made throughout these proposed regulations would substitute the words "Director" or "Office" for "Regional Director" or "Regional Office" wherever appropriate to reflect the restructuring of the OSM organization ordered by the Secretary on May 20, 1981. In addition, the Secretary proposes to revise the following rules in the ways discussed below.

Part 730—General Requirements

1. *Section 730.2 Objectives.*

Section 730.2 is proposed to be deleted in its entirety for editorial clarity. This section contains no substantive requirements and is merely explanatory of requirements which follow. In an effort to streamline the

Chapter, this section and other similar ones are proposed to be deleted.

2. *Section 730.4 Responsibilities.*

Section 730.4 is proposed to be deleted in its entirely for editorial clarity. The rationale for this proposed change is the same as that provided in the preceding discussion of § 730.2.

3. *Section 730.5 Definitions.*

Section 730.5(b) has been amended in a separate rulemaking action. 46 FR 53376–53384 (October 28, 1981). The amendment makes clear that the States are not required to parallel all applicable provisions of the Secretary's regulations. Under the amendment, the State laws and regulations included in a State program have to be as effective as the Secretary's regulations in meeting the requirements of the Act.

4. *Section 730.11 Inconsistent and more stringent State laws and regulations.*

Three amendments are proposed to § 730.11(a), which requires the Director to publish in the **Federal Register** any State law or regulation determined to be inconsistent with the Act or the provisions of 30 CFR Chapter VII. The first proposed amendment is necessary to make § 730.11(a) consistent with the change to § 730.5(b) (See discussion above at § 730.5). The proposed change to § 730.11(a) would have the effect of paralleling § 730.5(a) and 730.5(b). Sections 730.5(a) and (b) define the terms "consistent with" and "in accordance with" such that with regard to the Act, the State laws and regulations must be no less stringent than, meet the requirements of and include all applicable provisions of the Act. As recently amended, § 730.5(b) provides that with regard to the Secretary's regulations, the State laws and regulations must be no less effective than the Secretary's regulations in meeting the requirements of the Act. Thus, the term "no less stringent" is no longer the standard for the Secretary's regulations and would be replaced in § 730.11(a) with the term "inconsistent with," which applies the "no less effective than" standard. The proposed amendment would incorporate in the regulation the term used in section 505(a) of the Act, "inconsistent with." Under proposed § 730.11(a), no State law or regulation would be superseded by any provision of the Act or the Secretary's regulations, except to the extent that the State law or regulation is inconsistent with the requirements of the Act or Chapter VII of 30 CFR.

The second proposed amendment to § 730.11(a) would require the Director to provide an opportunity for comments by interested parties prior to a final determination to set aside as inconsistent any State law or regulation. This would provide early notice to the State and afford the State an opportunity to respond before any final decision by the Director that the State law or regulation must be set aside as inconsistent. A further change would delete the requirement that the Director make his determination with the concurrence of the Solicitor. The Solicitor will provide legal advice on any such action.

Under the third proposed amendment to § 730.11(a), the Director could publish either the complete text or a summary of the State law or regulation, rather than the complete text as presently required. This change is being proposed in order to provide a less costly alternative for the Director to use when notifying the public of an inconsistent State law or regulation. When the material to be printed is brief, the Director intends to include the complete text in the **Federal Register** notice. In cases where the material is voluminous, the Director would publish a summary of the State law or regulation in the **Federal Register** and indicate where copies of the complete text will be available for inspection and how copies of it may be obtained free of charge.

This proposed amendment would provide a more efficient alternative for handling voluminous materials. This proposed amendment would ensure that the Director will provide adequate public notice in the most cost effective manner available.

Part 731—Submission of State Programs

5. *Section 31.11 Eligibility.*

Section 731.11 is proposed to be deleted in its entirety for editorial clarity. The rationale for this proposed change is the same as that provided under the preceding discussion of § 730.2.

6. *Section 731.12 Submission of State programs.*

Section 731.12 is proposed to be amended to eliminate any reference to dates by which a State shall submit a State program. These dates are largely of historical interest as all those States wishing to regulate surface coal mining have already submitted programs or are preparing to do so. All of the requirements of §731.12 would be consolidated into a single paragraph.

Section 731.12(b) was recently amended in a separate rulemaking action (46 FR 50018–50019, October 8, 1981) to provide that a State which has not received approval of its State program by a final decision of the Secretary may submit a State program at any time, if (1) the State program is finally disapproved, or (2) a Federal program has been implemented, or (3) there have been no surface mining operations, but exploration or mining is anticipated, or (4) the State program has been enjoined.

Section 731.12(b) is proposed to be amended further to make it clear that a State may submit a proposed program at any time. As discussed in the preamble to the October 8 final rules, § 732.14 is based in part on the express language of section 504(e) of the Act, which provides that a "State which has failed to obtain approval of a State program prior to implementation of a Federal program may submit a State program at any time *after such implementation*" (emphasis added). As the preamble to the October 8 final rule concluded, however, the Secretary interprets the language in section 504(e) to be permissive in that it states that a State *may* submit a new program after the Federal program is implemented. The legislative history reveals that this provision was simply intended to ensure that a State would not be precluded from submitting a program because a Federal program had been implemented. *See* H. Rep. No. 94–896, 94th Cong., 2d Sess. 35 (1976); H. Rep. No. 94–1445, 94th Cong., 2d Sess. 39, 112 (1976); H. Rep. No. 94–45, 94th Cong., 1st Sess. 80 (1975).

The purpose of allowing a State to resubmit at any time is to address a situation in which, although a State program has been disapproved, much of the original program submission was approved or is approvable and could be resubmitted in less time than would be needed to develop and implement a Federal program for that State. The Secretary believes that Section 504(e) was intended to provide that the permanent program be implemented in a timely manner and that the October 8 amendments can ensure, in some cases, earlier implementation of the permanent program in a given State. Allowing a State to resubmit its program before a Federal program is implemented, particularly if much of the State program was approved earlier, could result in a shortened rulemaking period and an earlier implementation of the permanent regulatory program in that State. A Federal program, by contrast, involves publishing both proposed and final rules and could take considerably longer to implement.

The Secretary did not intend by those October 8 amendments to delay implementation of the permanent regulatory program. There are eight States, Alabama, Illinois, Indiana, Kentucky, Ohio, Pennsylvania, Tennessee and Virginia, which were or are enjoined from resubmitting their

programs under section 503(d) of the Act. Section 503(d) provides for a single maximum period of one year during which a Federal program may not be imposed in a State enjoined from taking any action the purpose of which is to prepare, submit or enforce a State program. At the end of one year or when the injunction terminates, whichever is earlier, either a State or a Federal program must be implemented. As announced in the Secretary's general policy statements of August 26, 1981 (46 FR 43041–43043) and November 2, 1981 (46 FR 54495), those States enjoined from resubmitting have 60 days after the date the injunction is lifted, or 60 days after the one-year anniversary of the date the injunction was initially issued, whichever is earlier, in which to resubmit. Two of the eight States, Indiana and Virginia, have resubmitted their programs within the required time period. If a State fails to resubmit its program, § 732.13(g) requires the Secretary to render a final decision disapproving the initial program submission in its entirety

The States, industry, and the public should clearly understand the consequences if a State chooses not to resubmit, if the resubmitted program is disapproved pursuant to § 732.13(f), or if an injunction extends beyond the period stipulated in section 503(d) of the Act. First, under section 502(f) of the Act and § 771.13(a) of the permanent program regulations, the interim program continues in effect until a Federal program is implemented and during this period no new permits shall be issued by the State whose program has been disapproved. Any permits issued by such a State would not be in compliance with the Act.

Second, the Secretary will take immediate action to develop and implement a Federal program for that State. The Secretary is committed to the timely implementation of the permanent regulatory program and intends to use all available means to ensure that the intent of Congress is carried out.

7. Section 731.13 Standards and procedures for approval of alternatives to provisions of the regulations of this Chapter

Section 731.13 was deleted under a separate rulemaking action (46 FR 53376–53384, October 28, 1981). See preceding discussion under § 730.5.

8. Section 731.14 Content requirements for program submissions.

30 CFR 731.14 establishes content requirements for program submissions. Existing § 731.14(c) requires a legal opinion form the State Attorney General that the State has the legal authority to administer the State program and regulate surface coal mining operations, including a section-by-section comparison of the State's laws and regulations with the Act and the Secretary's regulations. An amendment is proposed to separate this requirement into two subsections so that the Attorney General's opinion would not have to include the section-by-section comparison. The section-by-section comparison is essential to a thorough understanding of the State's program, but it is a time-consuming task that need not be prepared by the Attorney General in order to be useful. Under this proposed rule, the comparison could be prepared by the State regulatory authority staff or other entity with greater resources and a comprehensive knowledge of the program.

A further amendment to 30 CFR 731.14 is proposed to consolidate all the content requirements concerning the structure and staffing of the State regulatory authority. The amendment would combine the requirements of § 731.14 (e), (i), (j), and (k) into a new § 731.14(e). No substantive requirements would be affected. The amendment would eliminate duplication by reducing the number of Subsections where similar information is requested. Existing § 731.14 (i), (j), and (k) would be deleted.

Subsection (g) requires narrative descriptions, flow charts or other appropriate documents indexed according to Sections and Subsections of the Act and sections and subsections of 30 CFR Chapter VII. An amendment is proposed to eliminate the requirement to have the narrative descriptions indexed according to Sections and Subsections of the Act and the Chapter. This requirement did not prove helpful during the initial program submissions and may be an unduly burdensome editorial requirement on the States.

A change is proposed to 30 CFR 731.14 (g)(16) to make it consistent with the format for (g) (1) through (15) of the required State program systems by eliminating the specific language requiring that the small operator assistance program be consistent with 30 CFR Part 795. This change would be editorial, not substantive, in nature, as the requirement is stated in § 732.15(b)(13).

A change is proposed to 30 CFR 731.14(h) which requires statistical information concerning coal exploration and surface coal mining operations in the State. The proposed amendment would eliminate subsections (h)(1)–(h)(8), which list types of statistical information which may be included in a State's submission. These items are suggestions only and do not add anything substantive to the basic requirement of statistical information.

An amendment is proposed to combine § 731.14(l) and 631.14(m) into a new § 741.14(i). Subsections (l) and (m) concern budgetary and equipment requirements, which can be consolidated into a single subsection. No substantive requirements would be changed. Existing § 731.14 (l) and (m) would thus be deleted.

An amendment is proposed to § 731.14 to eliminate Subsections (n), (o), and (p). These Subsections require, respectively, information concerning special environmental performance standards, a brief description of other programs administered by the regulatory authority, and such other information as the Director may require. Each of these information requirements duplicates information which is already or can be made available to the Office under other provisions of this Chapter, including proposed § 731.14 (a), (e) and (g).

Part 732—Procedures and Criteria for Approval or Disapproval of State Program Submissions

9. Section 732.4 Responsibility.

Section 732.4 is proposed to be deleted in its entirety for editorial clarity The rationale for this proposed change is the same as that provided in the preceding discussion of § 730.2.

10. Section 732.11 Review by the Regional Director Section 732.12 Notice and public hearing requirements.

Existing § 732.11 Establishes detailed procedures for receipt and review of State program submissions by the Office. Existing § 732.12 establishes requirements for notice and public hearings regarding the review of State programs. These procedures have proven to be very detailed and possibly not necessary for achieving the requirement of section 503(b)(3) of the Act to provide appropriate procedures for public participation in the development of State programs.

The existing arrangement calls for two separate review efforts conducted in series, the first to include a public meeting (Section 732.11(a)(4), the second a public hearing (Section 732.12(b)). The first review is limited to a determination of completeness and the second is directed at substantive matters. In practice, the first review has probably not been worthwhile and in most cases was in fact expanded to include substantive matters. The arrangement was confusing to OSM, the States and the public. Under the regulations being proposed today, the separate completeness review and first public meeting would not be required. Instead,

V 46 / 233 DEC 4 81 UMI

there would be just one review period for both completeness and substantive matters. There would also be just one required public hearing.

The existing arrangement provides in § 732.12(b)(2) that if enacted laws and regulations are not submitted as part of the program submission on or before the 104th day from the date of submission, the public hearing will still be held, but the program shall be disapproved pursuant to the procedures for the Secretary's initial decision in 30 CFR 732.13.

The purpose of this requirement was to force States to enact laws and regulations prior to the Secretary's decision on the program submission in an effort to allow the public time to review and comment on fully enacted provisions. The arrangement has proved to be perhaps unnecessarily inflexible at times. Enactments of law by State legislatures and promulgation of rules by State administrators are variable and sometimes inflexible processes. The rule being proposed today would provide the flexibility for States to adopt necessary provisions within established State time frames without the need to call special legislative sessions so long as an opportunity can be provided to the public to assure meaningful input.

Under the proposed arrangement, when the program is submitted, draft State laws and regulations must be submitted in the form in which they are expected to become final. Should it be necessary to revise the State laws and regulations during the public comment period or before the Secretary's decision, OSM would give notice and provide an adequate opportunity for review and comment on the revisions. The length of time provided would vary depending on the extent and complexity of the changes. State laws and regulations would be enacted prior to or simultaneously with program approval.

Existing §§ 732.11 and 732.12 are therefore proposed to be combined into a revised § 732.11 which would be retitled "Review by the Director."

11. *Section 732.13 Decision by the Secretary.*

The Office published in the **Federal Register** on October 1, 1980 (45 FR 64961), a proposed amendment to Section 732.13(f), which contains procedures for the submission of a revised program to the Secretary within 60 days following an initial disapproval. Existing § 732.13(f) requires, by reference to the procedures of § 732.12, that a resubmitted State program must be disapproved if the State fails to submit all necessary laws and regulations within 60 days of an initial decision disapproving its original program submission.

Experience has shown that such a requirement with respect to program resubmissions may be unnecessarily inflexible in that its limits a State's ability to make the changes in its laws and regulations identified as necessary during Departmental and public review of its program. The Secretary believes that it may be appropriate and beneficial to make it clear that States may make changes in their laws and regulations after resubmission as long as there is an adequate opportunity for public comment.

Accordingly, the Secretary is proposing to amend § 732.13(f), by reference to § 732.11, to establish the same requirements for enactment of laws and regulations in program resubmissions as are proposed today for program submissions. (See discussion above under §§ 731.11 and 732.12.) State laws and regulations therefore must be enacted by the date of program approval.

By proposing this approach, the Secretary is rejecting an approach proposed earlier. On October 1, 1980, § 732.13 was proposed to be amended by adding provisions to allow enactment of laws and regulations up until the date established for the Secretary to make the final decision on a State's revised program, provided that the law or regulation is submitted to the Office at least fifteen (15) days prior to that date in the exact form in which it has been or will be enacted (45 FR 64961). This proposed amendment is not being reproposed.

A further change to § 732.13 for the purpose of greater clarity was proposed on October 1, 1980 (45 FR 64961), to redesignate as a separate Section the last two sentences of § 732.13(f) relating to announcement and effects of the Secretary's final decision on a State's program submission. This proposed amendment is being reproposed with these two sentences becoming new proposed § 732.13(g). Existing subsection (g) would be redesignated as subsection (h).

A change is proposed to existing § 732.13(h) (to be redesignated § 732.13(i)) which provides that an approved State program becomes effective on the date of publication of the Secretary's decision in the **Federal Register**. The proposed change would allow the Secretary to specify a different effective date. Experience has demonstrated that a given State may request, for administrative or other reasons, that the effective date not necessarily coincide with publication of the Secretary's decision. The proposed change would allow the Secretary to accommodate a State's request.

Existing § 732.13(i) would be redesignated as subsection (j) and would be amended to provide that there are a number of actions available should a State fail to correct the deficiencies in its conditionally approved State program by the date set forth in the Secretary's decision. The existing rule, § 732.13(i)(4), provides that the conditionally approved program terminates if the deficiencies have not been corrected. The proposed amendment would provide that the Director is required to notify the Secretary and take specific action if the deficiencies are not corrected. The Director's options would include: (1) Immediate withdrawal of approval of all or part of the State program, (2) immediate direct Federal enforcement of those portions of the State program the State has failed to implement, (3) initiation of procedures under Parts 733 and 736 to withdraw State program approval and implement a Federal program, or (4) any combination of these actions. The Director's decision on what particular action or set of actions is required would be made based upon the seriousness of the deficiencies which remain uncorrected, the State's attitude and demonstrated intent to remedy the problems, and an evaluation of the risks to the environment and public health and safety.

12. *Section 732.14 Resubmission of State programs.*

Section 732.14 was recently amended in a separate rulemaking action (46 FR 50018–50019, October 8, 1981) as discussed in the preamble to § 731.12(b). As with § 731.12(b), the Secretary now proposes to amend § 732.14 to make it clear that there are no limitations on when a program may be submitted. The rationale for this amendment and related proposed rule changes is provided in the preceding discussion of § 731.12.

13. *Section 732.15 Criteria for approval of State programs.*

Section 732.15(b)(7) requires that a State provide for civil and criminal sanctions for violations of the State law or regulations in accordance with section 518 of the Act and consistent with 30 CFR Part 845, including the same or similar procedural requirements. The Secretary does not believe that any change in the wording of the regulations is necessary, but would like to reiterate his policy, which reflects the decision of the U.S. District Court for the District of Columbia. This policy was stated in each **Federal Register** notice announcing the Secretary's decision on a State

program decision (See, for example, 45 FR 79430–79451, December 1, 1980), and is reprinted here for the convenience of the reader.

On February 26, 1980, the U.S. District Court for the District of Columbia issued its first round decision in the litigation on the permanent program regulations (*In re: Permanent Surface Mining Regulation Litigation*, Civil Action No. 79–1144). In that decision, the court held that the Secretary could not require a point system for assessing civil penalties. On May 16, 1980, in its second round decision, the court answered the Secretary's request for clarification regarding the round one decision remanding the penalty point system. The court stated that the Secretary may not require the States to develop a system to assess penalties at least as stringent as those imposed under the penalty point system set forth in the Federal regulations. The Secretary has interpreted the court's decision concerning penalty systems in such a way that that State need only develop a penalty system incorporating: (1) Four criteria similar to those in Section 518(a) of the Act, (2) procedural requirements similar to those in 30 CFR 845.17 through 845.20, (3) a requirement similar to that in 30 CFR 845.12 that a civil penalty must be assessed for each cessation order, and (4) a requirement similar to that in 30 CFR 845.15(b) that a minimum of $750.00 per day be assessed for all cessation orders issued for failure to abate a violation.

Section 732.15(b)(10) requires that State programs contain provisions for public participation "consistent with the public participation requirements of the Act and this chapter." The existing preamble to this provision states that OSM interprets the regulation to provide for citizens' suits in State courts. 44 FR 14965 (March 13, 1979); *see* 44 FR 15297 (March 13, 1979). The United States District Court for the District of Columbia upheld this as a reasonable interpretation of the Act. *In re Permanent Surface Mining Regulation Litigation*, Civ. No. 79–1144 (D.D.C. Feb. 26, 1980), slip op. at 11–13. The District Court's ruling is now on appeal. Examination of this issue in the course of litigation has led OSM to question the validity of its existing interpretation of the Act's public participation requirements. OSM proposes to alter its interpretation of § 732.15(b)(10) so that State programs need not provide for citizens; suits in State courts, and hereby solicits comment on this proposed change.

Additionally, the preamble to § 723.15(b)(10) explains that the regulation is intended to require that citizens have the right to accompanying State inspectors onto the mine site when the inspection is a result of a citizen's request. 44 FR 14965 (March 13, 1979); *see* 44 FR 15297 (March 13, 1979). The United States District Court for the District of Columbia has upheld this interpretation as a reasonable construction of the Act. *In re Permanent Surface Mining Regulation Litigation, supra*, slip op. at 13–14. This ruling is now on appeal. Examination of this issue in the course of litigation has led OSM to question the validity of its existing interpretation of this issue. Accordingly, OSM proposes to delete the requirement that State programs contain this requirement, and hereby solicits comment on this proposed change.

On November 4, 1981, OSM published a notice in the **Federal Register** (46 FR 54761–54762) postponing consideration of a petition by the State of Colorado to amend 30 CFR 840.15 by deleting the requirement that each State program provide for public participation consistent with 43 CFR 4.1294(b). The regulations at 43 CFR Part 4 describe the procedures applicable to surface coal mining hearings and appeals. Specifically, 43 CFR 4.1294(b) permits the award of appropriate costs and expenses, including attorneys' fees, from OSM to any person other than a permittee or his or her representative, if the person initiates or participates in any proceeding under the Act, upon a finding that the person made a substantial contribution to a full and fair determination of the issues. 30 CFR 840.15 operates to make this provision a requirement of each State program.

In the November 4, 1981 **Federal Register** notice, OSM determined that it would make sense to consider this petition as part of the overall rule changes to 30 CFR Subchapter L, and to solicit public comments at that time. Proposed amendments to Subchapter L were published in the **Federal Register** on December 1, 1981. A more comprehensive discussion of the petition and related proposed rule changes is contained in that **Federal Register** notice.

Section 732.15(b)(14) requires that a State provide protection for employees of the State "* * * regulatory authority in accordance with the protection afforded Federal employees under section 704 of the Act." The preamble to the permanent program rules (44 FR 14964, March 13, 1979) noted the objections of several commenters that this requirement was neither justified under the Act nor specifically required. Those suggestions were not accepted at that time on the basis that section 503(a) of the Act specifically requires that the State program demonstrate that the State has the capability of carrying out the provisions of the Act and the Act requires certain protections.

Section 704 on its face addresses only Federal employees. Most of the other provisions of the Act, for example, sections 509, 514, and 522(a), address either the regulatory authority (which includes State regulatory authorities) or both the Federal and State governments. Further, section 704 does not fall into any of the categories listed in section 503(a) (2)-(6) as requirements for State programs. For these reasons, the Secretary believes that section 704 may be a requirement which Congress intended to impose only on the Federal government and not on the States. Accordingly, this requirement is proposed to be deleted.

Section 732.15(b)(15) is proposed to be amended by moving the requirement that State programs provide for administrative review of State program actions to § 732.15(b)(14). Present § 732.15(b)(15) would be further amended to provide that judicial review of State program actions be in accordance with State law, as provided in section 526(e) of the Act. After careful review, it appears that section 526 may apply to decisions of the Secretary, acting as a Federal officer. By contrast, section 526(e) specifically provides that "Action of the State regulatory authority pursuant to an approved State program shall be subject to judicial review by a court of competent jurisdiction *in accordance with State law** * *" (emphasis added). The proposed change would clarify that the Act specifies that judicial review within approved State programs is to be in accordance with State, not Federal, law.

However, section 521(d) of the Act requires as a condition of approval of any State program that its "enforcement provisions * * * incorporate sanctions no less stringent than those set forth in this Section, and shall contain the same or similar procedural requirements relating thereto." The standards for judicial review of any Secretarial decision, including enforcement actions, contain several provisions which may not be included in some State laws. For instance, temporary relief is required under section 526(c) of the Act. Section 526(c) differs from many State laws on the subject of temporary relief in that section 526(c) does not allow temporary relief in any case where such relief would adversely affect public health or safety or cause significant imminent

environmental harm to land, air, or water resources. Many State laws regarding temporary relief provide that public health and safety is only one factor to be considered. Consequently, there may be circumstances where, under State law, the granting of temporary relief would be allowable even though it would adversely affect public health and safety or harm the environment. Such a result may appear to be inconsistent with the requirement of section 521(d) of the Act that State programs incorporate enforcement sanctions no less stringent than those of the Act. Accordingly, comments are invited on the legality of the proposed amendment and alternatives the Secretary may consider in promulgating a final rule.

14. *Section 732.17 State program amendments.*

Section 732.17 establishes procedures for amending approved State programs whether the process for amendment is initiated by the State regulatory authority or by the Director. This Section was recently revised to streamline, shorten and simplify the State program amendment process, partly in response to a petition from Governor Ed Herschler of Wyoming. The rationale for those revisions, as explained in the preamble to the final rule, is incorporated herein by reference to the extent that it is consistent with the changes being proposed today. *See* 46 FR 7906–7909, January 23, 1981. Further changes proposed for this Section are discussed below.

Section 732.17(f) requires the State regulatory authority to submit a written amendment within 60 days after notification by the Director that an amendment is required. This requirement imposes a difficult administrative burden on the States because it does not take into account the varied legislative and regulatory procedures which individual States must follow, nor the complexities of drafting amendments of broad scope. The proposed change to § 732.17(f) would allow the State to submit either a proposed written amendment or, in the case of a complex or lengthy amendment, a description of the amendment to be proposed, together with a timetable for enactment that is consistent with established administrative or legislative procedures in the State. The Director would not make decisions on amendments based on descriptions alone; there would be an opportunity under § 732.17(f)(2) for public comment on the actual language of any amendment.

Section 732.17(g) provides that whenever the State wishes to initiate changes to the approved State program, the State shall submit the proposed changes to the Director for approval as an amendment. Several States have suggested that this Section be amended to provide for some form of automatic approval if the proposed amendments involve only minor changes to State programs or are in response to changes in the corresponding Federal regulations. A proposed change to this Section would provide that proposed amendments shall be considered approved by the Director unless the Director notifies the State in writing within 60 days of receipt of the amendment that the amendment should be subject to the usual procedures for approving State program amendments. If a program amendment was approved under this proposed change, the State would notify the Director of the date that the proposed amendment is finally enacted or promulgated under State administrative or legislative procedures. The date of notification would then be the effective date for the inclusion of the program amendment in the State program. Comments are specifically invited on the legality of this proposed change, its impact upon public participation, and the criteria to be used by the Director in determining whether proposed State program amendments are minor or should be subject to the normal amendment process of 30 CFR 732.17(h).

Part 733—Maintenance of State Programs and Procedures for Substituting Federal Enforcement of State Programs and Withdrawing Approval of State Programs

15. *Section 733.4 Responsibilities.*

Section 733.4 is proposed to be deleted in its entirety for editorial clarity. The rationale for this proposed rule change is the same as that provided in the preceding discussion of § 730.2.

16. *Section 733.12 Procedures for substituting Federal enforcement of State programs or withdrawing approval of State programs.*

In § 733.12(b)(3) the word "any" is proposed to be inserted before the phrase "necessary remedial actions" to make it clear that remedial action may not always be necessary. This change would also be made to illustrate that the State has an opportunity to address the Director's assertions under the informal conference procedure set forth in § 733.12(c).

Section 733.12(c) would be amended to clarify that the informal conference may be used to discuss both the facts supporting the Director's assertions and the time period provided by the Director for the State to take any necessary remedial actions. In § 733.12(d), the last line would be amended by adding the phrase "or as modified as the informal conference held under paragraph (c) of this section." This proposed phrase is intended to keep paragraph (d) consistent with the proposed amendment to paragraph (c) allowing for possible modification of the time period for the State to complete remedial actions.

An additional change to § 733.12(c) is proposed to provide that the informal conference must be requested within 15 days after the expiration of the time period specified for the State to accomplish any necessary remedial actions. The purpose of the proposed change is to clarify that the conference may be requested at any time, but not later than 15 days after the expiration of the time period.

Section 733.12(e) would be rewritten by making editorial changes to the language. While no substantive change is intended, the new language would help avoid any misinterpretation of when Federal enforcement of a State program or the withdrawal of approval of a State program becomes necessary.

Section 733.12(f) specifies the Director's responsibilities when substituting Federal enforcement of a State program. The term "enforcement" is interpreted to include administration and implementation of all or part of a State program by the Office under section 521(b) of the Act. (For further discussion, see the preamble to the proposed permanent regulatory program at 43 FR 41678, September 18, 1978.)

Several changes to § 733.12(f)(2) are proposed to help define the broad use of the term "enforcement" as it applies to this section. A phrase would be added to the first sentence to clarify that the Director may substitute enforcement of all or part of the State program. A similar phrase would be inserted in the beginning of the third sentence. No substantive changes to these sentences would be made by these added phrases.

The present language of § 733.12(f)(2)(ii) requires that the Director issue any new or revised permit required by any new regulation promulgated during the time of substituted Federal enforcement. This language may be confusing because it does not specify whether the State regulatory authority or the Office will be the regulatory authority for the purpose of issuing new or revised permits should the Director promulgate a new regulation.

The Secretary has considered alternative ways of resolving the ambiguity and believes that it would probably best serve the industry and public to consolidate all permitting responsibilities with the Office in situtations where the Director has issued new rules. Confining the Office to reviewing only those aspects of permit decisions that relate to new rules promulgated by the Director, while allowing the other permitting responsibilities to remain with the State, would create a dual permit authority. The Secretary believes such a dual authority might confuse the public and the industry on whether the State or the Office was enforcing the State program. The proposed language in § 733.12(f)(2)(ii) would specify that the Office would become the regulatory authority for purposes of administering and implementing the permit requirements of the State program in the event the Director issues new regulations affecting existing or new permit.

17. *Section 733.13 Criteria for substituting Federal enforcement for State programs or withdrawing approval of State programs.*

The title of § 733.13 would be changed to describe more accurately the subject matter of this Section. The proposed title, "Factors to be considered in deciding whether to substitute Federal enforcement for State programs or to withdraw approval of State programs" avoids the use of the word "criteria." This Section sets forth the kind of facts and documents to be considered by the Director or the Secretary in decisions concerning substitution of direct Federal enforcement of a State program or the withdrawal of approval of part or all of a State program. The present title may be confusing in that some persons may misinterpret "criteria" to mean far more specific guidelines for these decisions that can realistically be established in the Federal rules.

Part 736—Federal Program for a State

18. *Section 736.2 Objectives.*
Section 736.3 Responsibility.
Section 736.4 Authority.

Sections 736.2, 736.3 and 736.4 are proposed to be deleted in their entirety for editorial clarity. The rationale for these proposed changes is the same as that provided in the preceding discussion of § 730.2.

19. *Section 736.11 General procedural requirements.*

The reference to June 3, 1980, in § 736.11(a)(1) is proposed to be deleted for the reasons discussed in the preamble to proposed § 731.12.

20. *Section 736.12 Public notice requirements.*
Section 736.13 Public comment.

Part 763 establishes standards and procedures for the promulgation, implementation, maintenance, administration, revision and termination of a Federal program for a State for coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands within that State. Section 736.12 establishes public notice requirements for promulgation of a Federal program, including the requirement at § 736.12(a) (5) that prior to the revision of a Federal program the Director shall hold a public hearing. The proposed change would insert the words "if applicable" at the beginning of § 736.12(a)(5) to make the hearing requirement discretionary in certain situations, as discussed below.

The Office realizes that Federal programs will be revised regularly to reflect changes in the Act or the permanent program regulations. Some revisions may not be of sufficient magnitude to justify automatically holding a public hearing. Section 736.13(c) is therefore proposed to be amended so that for each revision to a Federal program, holding a public hearing would be discretionary. Under the amendment the Office would base a decision to hold a hearing on the anticipated public response to and interest in the revision. The opportunity to request a public hearing would be provided and if such a request were made, a public hearing would be held.

21. *Section 736.22 Contents of a Federal program.*

Section 736.22(b) establishes the minimum content requirements for Federal programs. They include, but are not limited to, 30 CFR Parts 700, 701, 707, 760, 761, 762, 765, Subchapter G, Subchapter J, Subchapter K, 30 CFR 842, 843 and Subchapter M. A proposed change would add two sections to this list of minimum provisions, 30 CFR 764 and 845. Section 764 contains procedures for processing petitions to designate areas unsuitable for surface coal mining operations. Section 845 contains procedues for the assessment of civil penalties under section 518 of the Act.

There is currently active coal exploration, but no mining, in at least four States. With mining not anticipated in the near future, the Office has found it advantageous to limit Federal programs in these States only to the provisions which are necessary for coal exploration activities. Should mining be anticipated at a later date, the program would be revised. A further proposed change to § 736.22(b) would allow Federal programs covering only coal exploration activities to be limited to those necessary provisions including 30 CFR Parts 700, 701, 761, 762, 764, 770, 776, 787, 815, 842, 843 and 845. It would not be necessary to include all of Subchapters G and J and Part 816 of Subchapter K dealing with permitting, bonding and underground mining performance standards.

22. *Section 736.23 Federal program effect on State law or regulations.*

The existing regulation provides that State statutes or regulations shall be preempted and superseded by the Federal program insofar as they are "inconsistent, less stringent or preclude compliance with the purposes and requirements of the Act and the Federal program." This provision, which is based on section 504(g) of the Act, is proposed to be amended to be consistent with the proposed amendments to §§ 730.5 and 730.11, as discussed above under those Sections. The proposed amendment would reflect the requirement of section 504(g) that State statutes or regulations shall be superseded "insofar as they interfere with the achievement of the purposes and the requirements of the Act and the Federal program." Section 504(g) must be read in light of section 505(a) of the Act which further requires that no State law or regulation be superseded except insofar as the State law or regulation is *inconsistent with* the provisions of the Act (emphasis added). As noted above under § 730.11, § 730.5 defines the term "inconsistent with" with regard to both the Act and the Secretary's regulations. The proposed change to § 736.23 is thus intended to make it clear that the definition of "consistent with" applies under a Federal program as well as under a State program for purposes of superseding a State law or regulation.

IV. Additional Information

A draft of the rules being proposed today was made available to State regulatory authorities and groups representing industry and citizens. Comments were invited on the draft rules and several meetings were held. All written comments and minutes of meetings are on file in the Administrative Record at the address listed above. Oral and written comments were used as general background information in refining the proposed rules being published today. All comments, including those received in response to this announcement, will be addressed in the preamble to the final rule.

The information collection requirements in existing 30 CFR Subchapter C were approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3507 and assigned clearance numbers 1029–0022, 1029–0023, 1029–0024 and 1029–0025. Those approvals were identified in "notes" and the introductions to 30 CFR Parts 730, 731, 732 and 733. OSM will delete those "notes" and codify the OMB approvals under a new section 10 in each of those Parts that contains information collection requirements. OSM is requesting OMB reapproval of the information collection requirements.

The information required by 30 CFR Part 730 is needed by OMB to assure that surface coal mining operations in States with injunctions will be regulated by the State in accordance with the interim regulatory program in section 502 of Pub. L. 95–87.

The information required by 30 CFR Part 731 is needed to determine whether a State which wishes to assume exclusive jurisdiction over the regulation of surface coal mining within its borders has demonstrated its capability to carry out the provisions of Pub. L. 95–87.

The information required by 30 CFR Part 732 is needed to afford a State the opportunity to resubmit, modify or amend its State program and will be used by OSM to determine whether the program meets the provisions of the Act.

The information required by 30 CFR Part 733 is needed by OSM to verify the allegations in a citizen request to evaluate a State program and to determine whether an evaluation should be undertaken.

The information required by 30 CFR Part 730, 731, 732 and 733 is mandatory.

OSM has prepared a draft environmental assessment (EA) on this rule that reaches an interim conclusion that this rule should not significantly affect the quality of the human environment. The draft EA is on file in the OSM Administrative Records Office at the address listed in the "Addresses" section of the preamble. A final EA will be completed before issuance of the final rule. OSM may determine at a later date that this rulemaking and related rulemakings under Pub. L. 95–87 have cumulative effects on the environment. At that time, OSM will prepare any further environmental analysis required by the National Environmental Policy Act.

I have determined that these rules are not major rules under Executive Order 12291. I have further certified, in accordance with the Regulatory Flexibility Act, that the proposed rules will not have a significant effect on a substantial number of small entities.

Primary authors of this document are Valerie Bael, Richard Bryson, Mary Crouter, James Fulton, George Stone, and Mary Tisdale, State Program Assistance, Office of Surface Mining.

Dated: November 17, 1981.

Daniel N. Miller,

Assistant Secretary, Energy and Minerals.

For the reasons set forth in the preamble, Parts 730, 731, 732, 733 and 736 of Chapter VII, Title 30 of the Code of Federal Regulations are proposed to be amended as set forth below.

PART 730—GENERAL REQUIREMENTS

1. The authority for Part 730 is:

Authority: Sec. 501(b), 503, 504, 505, and 521 of Pub. L. 95–87 (30 U.S.C. 1251(b), 1253, 1254, 1255, and 1271).

§ 730.2 [Removed]

2. Part 730 is amended by removing § 730.2.

§ 730.4 [Removed]

3. Part 730 is amended by removing § 730.4.

4. 30 CFR 730.11 is amended by revising paragraph (a) to read as follows:

§ 730.11 Inconsistent and more stringent State laws and regulations.

(a) No State law or regulation shall be superseded by any provision of the Act or the regulations of this Chapter, except to the extent that the State law or regulation is inconsistent with, or precludes implementation of, requirements of the Act or this Chapter. The Director shall publish in the **Federal Register** the text or a summary of any State law or regulation determined by him to be inconsistent with the Act or this Chapter. Prior to a final determination by the Director concerning inconsistent laws or regulations, an opportunity for comment by interested parties will be provided.

* * * * *

PART 731—SUBMISSION OF STATE PROGRAMS

5. The authority for Part 731 is:

Authority: Sec. 501(b) and 503, of Pub. L. 95–87 (30 U.S.C. 1251(b) and 1253).

§ 731.11 [Removed]

6. Part 731 is amended by removing § 731.11.

7. 30 CFR 731.12 is revised to read as follows:

§ 731.12 Submission of State programs.

Each State that wishes to regulate coal exploration and surface coal mining and reclamation operations or non-Federal and non-Indian lands within its boundaries shall submit three copies of a proposed program to the Director. A State may submit a proposed program at any time. The State shall retain sufficient copies of the program for public inspection under 30 CFR 732.11(a).

8. 30 CFR 371.14 is amended by revising paragraphs (c), (e), (g)(16), (h), and (i) amending (g) introductory text and removing paragraphs (j)–(p) to read as follows:

§ 731.14 Content requirements for program submissions.

* * * * *

(c)(1) A legal opinion from the Attorney General of the State or the chief legal officer of the State regulatory authority stating that the State has the legal authority under existing laws and regulations, or will have authority under amendments to laws and regulations which are in the process of enactment, to implement, administer and enforce the program and to regulate coal exploration and surface coal mining and reclamation operations in accordance with the Act and consistent with this Chapter.

(2) A section-by-section comparison of the State's laws and regulations and amendments which are in the process of enactment with the Act and this Chapter, explaining any differences and their legal effect;

* * * * *

(e)(1) A description, including appropriate charts, of the existing and proposed structural organization of the agency designated as the regulatory authority and of other agencies or applicable divisions or departments of those agencies which will have duties in the State program. The description must indicate the coordination system between these agencies and lines of authority and the staffing functions within each agency and between agencies.

(2) A summary table of the existing and proposed State program staff, showing job functions, titles and required job experience and training, and a description of how the staffing proposed for the State program will be adequate to carry out the functions, including permitting, inspection and legal actions for the projected workload to ensure that coal exploration and surface coal mining and reclamation operations will be regulated in accordance with the requirements of the Act and this Chapter;

* * * * *

(g) Narrative descriptions, flow charts or other appropriate documents of the proposed systems for * * *

(16) Providing a small operator assistance program.

(h) Statistical information describing coal exploration and surface coal mining and reclamation operations in the State, adequate to demonstrate that the provisions of the State program and the resources available to it are sufficient when compared to the current and projected coal mining activities in the State;

(i) A description of the actual capital and operating budget, including source of funds, used or proposed to be used to administer the State program for the prior and current fiscal years, and the projected annual budget for each of the next two fiscal years, assuming supplemental funding pursuant to an approved State program and grants under 30 CFR Part 735; and a description of the existing and proposed physical resources for use in the program.

PART 732—PROCEDURES AND CRITERIA FOR APPROVAL OR DISAPPROVAL OF STATE PROGRAM SUBMISSIONS

9. The authority for Part 732 is:

Authority: Secs. 501(b), 503, 504, 506, 507 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 521, and 522 (30 U.S.C. 1251(b), 1253, 1254, 1256, 1257 1258, 1259, 1260, 1261, 1262, 1263, 1264, 1265, 1266, 1267, 1268, 1269, 1271, and 1272).

§ 732.4 [Removed]

10. Part 732 is amended by removing § 732.4.

11. 30 CFR 732.11 is amended by revising the section heading to read:

§ 732.11 Review by the Director.

* * * * *

12. 30 CFR 732.11 (a) is amended by revising (1), (2), and (3) and removing (4), and revising (b), (c), and (d) as follows:

§ 732.11 Review by the Director.

(a) * * *

(1) The notice shall include the date of the submission of the program and a summary of the program's contents. It shall also indicate that the full test of the program submission is available for review and shall identify the location of each OSM office and State office where copies are available for public inspection.

(2) The notice shall afford interested persons an opportunity to submit written comments. The comment period shall end on a date following the public hearing scheduled to be held under paragraph (b) of this section and that date shall be specified in the notice.

(3) The notice shall identify the time and location within the State at which the Office will hold the public hearing under paragraph (b) of this section.

(b) A public hearing shall be held by the Director no sooner than 25 days following the publication of the notice required by paragraph (a) of this section. The hearing shall be informal and follow legislative procedures.

(1) The format and the rules of procedure for each hearing shall be determined by the Director and published in the **Federal Register** notice required by paragraph (a).

(2) When the program is submitted, State laws and regulations must be submitted in their final form or in the form in which they are expected to become final. Should revisions to any of the laws or regulations be necessary during the public comment period or before the Secretary's decision, OSM will give notice and provide an opportunity for review and comment. State laws and regulations must be enacted by the date of program approval.

(c) Copies of written comments shall be available for public inspection and copying at appropriate OSM offices.

(d) The Director shall consider all relevant information, including information obtained from public hearings and comments, and shall recommend to the Secretary that the program be approved or disapproved, in whole or in part. The recommended decision shall specify the reasons for the recommendation.

§ 732.12 [Removed]

13. Part 732 is amended by removing § 732.12.

14. 30 CFR 732.13 is amended by revising (f), (g), (h), (i) and (j) to read as follows:

§ 732.13 Decision by the Secretary.

* * * * *

(f) If the Secretary disapproves a program, in whole or in part, the State shall have 60 days from the date of publication of the **Federal Register** notice to submit a revised program to the Director for reconsideration. The procedures of § 732.11 will then apply to the revised State program, except that the time allowed between publication of notice and the public hearing for public review and comment may be shortened to not less than 15 days.

(g) The Secretary shall either approve or disapprove the revised program within 60 days from the date of submission of the revised program and publish that decision and reasons for the decision in the **Federal Register**. A decision disapproving the revised program constitutes that final decision by the Department disapproving that program in its entirety.

(h) If a revised State program is not submitted by a State within sixty days of an initial disapproval under § 732.13(a), the Secretary shall disapprove the initial program submission in its entirety. This decision shall constitute the final decision by the Secretary. This decision and the basis for it shall be published in the **Federal Register**.

(i) A decision by the Secretary approving a program submission establishes a State program for the State which submitted it and constitutes the final decision by the Department. The State program becomes effective on the date of publication of the decision in the **Federal Register** unless otherwise specified by the Secretary. The Secretary shall not give his approval unless the program submission can be approved in whole, except as provided in subsection (j).

(j) The Secretary may conditionally approve a State program where the program is found to have minor deficiencies, provided:

(1) The deficiencies are of such a size and nature so as to render no part of a proposed State program incomplete;

(2) The State has initiated and is actively proceeding with steps to correct the deficiencies;

(3) The State agrees in writing to correct such deficiencies within a time established by the Secretary and stated in the conditional approval; and

(4) If the deficiencies have not been corrected by the date set forth in the Secretary's decision under paragraph (j)(3) of this section, the Director shall notify the Secretary that the deficiencies have not been corrected and shall—

(i) Withdraw approval of the State program in whole or in part, and specify the extent to which approval of the State program is being withdrawn;

(ii) Substitute direct Federal enforcement of those portions of the permanent regulatory program that the State has failed to implement;

(iii) Initiate procedures in accordance with Parts 733 and 736 to withdraw State program approval and implement a Federal program for the State, including specifying necessary remedial actions to correct continued deficiencies; or

(iv) Take any combination of actions under (i) through (iii) above.

15. 30 CFR 732.14 is revised to read as follows:

§ 732.14 Resubmission of State programs.

If, by a final decision, the program is disapproved, the State may submit

another proposed State program to the Director at any time. Resubmitted State programs must meet the requirements of 30 CFR 731.14 and will be acted upon pursuant to 30 CFR 732.11–732.16.

16. 30 CFR 732.15 is amended by revising paragraphs (b)(10), (b)(14), and (b)(15) to read:

§ 732.15 Criteria for approval or disapproval of State programs.

* * * * *

(b) * * *

(10) Provide for public participation in the development, revision and enforcement of State regulations and the State program, consistent with public participation requirements of the Act and this Chapter, except that State programs are not required to: Provide citizens with the right to participate in inspections which result from citizens' requests; or authorize legal actions by citizens in State courts similar to the citizens' legal actions which section 520 of the Act authorizes in the Federal courts;

* * * * *

(14) Provide for administrative review of State program actions, in accordance with section 525 of the Act and Subchapter L of this Chapter;

(15) Provide for judicial review of State program actions in accordance with State law, as provided in section 526(e) of the Act;

* * * * *

17. 30 CFR 732.17 is amended by revising paragraphs (f), (g), (h)(5) and (h)(6) to read as follows:

§ 732.17 State program amendments.

* * * * *

(f)(1) If the Director determines that a State program amendment is required, the State regulatory authority shall, within 60 days after notification of that decision, submit to the Director either a proposed written amendment or a description of an amendment to be proposed that meets the requirements of the Act and this Chapter, and a timetable for enactment which is consistent with established administrative or legislative procedures in the State.

(2) If the State regulatory authority does not submit the proposed amendment or description and the timetable for enactment within 60 days from the receipt of the notice, or does not subsequently comply with the submitted timetable, or if the amendment is not approved under this Section, the Director shall begin proceedings under 30 CFR part 733, to either enforce that part of the State program affected or withdraw approval, in whole or in part, of the State program and implement a Federal program.

(g) Whenever changes to laws or regulations that make up the approved State program are proposed by the State, the State shall immediately submit the proposed changes to the Director as an amendment. Such changes to laws and regulations shall be considered approved by the Director unless the Director notifies the State in writing within 60 days that the proposed amendment is not minor and thus will be subject to the procedures of 30 CFR 732.17(h). If the Director so notifies the State, the change to the State's laws or regulations shall not take effect for purposes of the State program until approved as an amendment. If a proposed amendment is approved under this Subsection, the State shall promptly notify the Director of the date when the proposed amendment is enacted or promulgated and the date of notification shall be the effective date for the amendment of the State program.

(h) * * *

(5) Upon the close of the public comment period, the transcript, written presentations, exhibits and copies of all comments shall be transmitted to the Director.

(6) The Director shall consider all relevant information, including any information obtained from public hearings and comments, and shall approve or disapprove the amendment request within 30 days after the close of the public comment period established in accordance with § 732.17(h)(3).

* * * * *

PART 733—MAINTENANCE OF STATE PROGRAMS AND PROCEDURES FOR SUBSTITUTING FEDERAL ENFORCEMENT OF STATE PROGRAMS AND WITHDRAWING APPROVAL OF STATE PROGRAMS

18. The authority for Part 733 is:

Authority: Secs. 501(b), 503, 504, 517, and 521 of Pub. L. 95–87 (30 U.S.C. 1251(b), 1253, 1254, 1267, and 1271).

§ 733.4 [Removed]

19. Part 733 is amended by removing § 733.4.

20. 30 CFR 733.12 is amended by revising (b)(3), (c), (d), (e) introductory text, and (f)(2) to read as follows:

§ 733.12 Procedures for substituting Federal enforcement of State programs or withdrawing approval of State programs.

* * * * *

(b) * * *

(3) Specify the time period for the State regulatory authority to accomplish any necessary remedial actions.

(c) The Director shall provide the State regulatory authority an opportunity for an informal conference if the State requests an informal conference within 15 days after the expiration of the time period specified in paragraph (b)(3) of this Section. The informal conference may pertain to the facts or the time period for accomplishing remedial actions as specified by the Director's notification.

(d) If an informal conference is not held under paragraph (c) of this section, or if, following such a conference, the Director still has reason to believe that the State is failing to adequately implement, administer, maintain or enforce a part or all of a State program, the Director shall give notice to the State and to the public, specifying the basis for that belief and shall hold a public hearing in the State within 30 days of the expiration of the time period specified in paragraph (b)(3) of this section or as modified at the informal conference held under paragraph (c) of this Section.

(e) The State will continue to enforce its approved program unless upon completion of the hearing under paragraph (d) of this Section and based upon the review of all available information, including the hearing transcipt, written presentations and written comments, the Director finds that the State has failed to implement, administer, maintain or enforce effectively all or part of its approved State program. If the Director finds further that the State is unable or does not intend to administer the State program, the Director shall either—

* * * * *

(f) * * *

(2) During the period beginning with the public notice and ending when the State satisfies the Director that it will enforce the State program effectively, the Director shall enforce those portions of the State program not being enforced by the State, or the entire State program if necessary, and any additional regulations that the Office has adopted as necessary to enable the Director to perform his or her duties. To the extent the Director has assumed direct Federal enforcement in order to administer and implement all or part of the State program, the Director shall—

(i) Enforce any permit condition required under the Act;

(ii) Issue any new or revised permit pursuant to any additional regulation that the Director may promulgate at the time enforcement is assumed, in which case the Office will become the regulatory authority for issuing all new permits and approving revisions,

modifications, or renewals for existing permits; and

(iii) Conduct inspections and issue notices, orders and assessments of penalties as may be necessary for compliance with those permit conditions, the Act and the State program in accordance with Subchapter L.

21. 30 CFR 733.13 is amended by revising the Section heading to read:

§ 733.13 Factors to be considered in deciding whether to substitute Federal enforcement for State programs or to withdraw approval of State programs.

* * * * *

PART 736—FEDERAL PROGRAM FOR A STATE

22. The authority for Part 736 is:

Authority: Secs. 501, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 521, 522, 525, and 705 of Pub. L. 95–87 (30 U.S.C. 1251, 1253–1269, 1271, 1272, 1275, and 1295).

23. Part 736 is amended by removing § 736.2

§ 736.3 [Removed]

24. Part 736 is amended by removing § 736.3

§ 736.4 [Removed]

25. Part 736 is amended by removing § 736.4

26. 30 CFR 736.11 is amended by revising paragraph (a)(1)(i) to read:

§ 736.11 General procedural requirements.

(a) *Promulgation.* (1) The Director shall promulgate and, subject to the provisions of this Part, implement a Federal program for a State if the Director reasonably expects coal exploration or surface coal mining and reclamation operations to exist on non-Federal and non-Indian lands within the State at any time before June 1985, and the State fails to—

(i) Submit a State program for regulation of coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands within that State to the Director as provided in 30 CFR 731.12; or

* * * * *

27. 30 CFR 736.12 is amended by revising paragraphs (a)(4) and (a)(5) to read:

§ 736.12 Public notice requirements.

* * * * *

(a) * * *

(4) The location of the OSM office and public office in the capital city of the State where the text of the proposed program or revision and any supporting information may be reviewed or copied;

(5) If applicable, the date, time, and location in the State where the Office will hold at least one public hearing under the supervision of the Director;

* * * * *

28. 30 CFR 736.13 is amended by revising paragraphs (c), (e), and (f) to read:

§ 736.13 Public comment.

* * * * *

(c) Before promulgation of a Federal program for a State, the Director shall hold at least one public hearing within the State for the purpose of affording interested persons an opportunity to submit data and comments on the proposed Federal program. In the case of a revised Federal program for a State, the opportunity to request a hearing will be provided and if sufficient interest is demonstrated, a public hearing will be held. The hearings shall follow legislative procedures and include a presentation of the proposed program or revision by the Director and the compilation of an open record of the hearing.

* * * * *

(e) Upon completion of the hearings, the hearing transcripts, exhibits submitted, written presentations, and copies of all public comments shall be transmitted to the Director.

(f) Copies of all written comments received and the transcripts of the public hearing shall be made available for public inspection and copying at the appropriate OSM office and at a public office in the capital city of the State.

29. 30 CFR 736.22 is amended by revising paragraph (b) to read as follows:

§ 736.22 Contents of a Federal program.

* * * * *

(b) (1) Any Federal program for a State, including appropriate portions of a partial Federal program which is promulgated or revised by the Director, shall provide for Federal regulation of coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands within the State in accordance with the requirements of the Act and this Chapter, including, at a minimum, the following provisions: 30 CFR Parts 700, 701, 707, 760, 761, 762, 764, 765, Subchapter G, Subchapter J, Subchapter K, 30 CFR 842, 843, 845, and Subchapter M.

(2) An exception to these requirements may be made where there is exploration but no mining in the State. In such a case, the Federal program which is promulgated must regulate coal exploration, but not mining, and shall include, at a minimum, the applicable sections of the following provisions: 30 CFR Parts 700, 701, 761, 762, 764, 770, 776, 787, 815, 842, 843 and 845.

30. 30 CFR 736.23 is amended by revising paragraph (a) to read:

§ 736.23 Federal program effect on State law or regulations.

(a) Whenever a Federal program is promulgated or revised for a State, any statutes or regulations of the State regulating coal exploration or surface coal mining and reclamation operations subject to the Act shall be preempted and superseded by the Federal program insofar as they interfere with the achievement of the purposes and the requirements of the Act and the Federal program. In promulgating or revising a Federal program for a State, the Director shall set forth in the **Federal Register** any State statute or regulation which is preempted and superseded by the Federal program.

* * * * *

31. In addition to the amendments set forth above, 30 CFR Parts 732 and 736 are amended by removing the words "Regional Director" and inserting, in their place, the word "Director" in the following places:

§ 732.11, 732.13, 732.17, 736.12, and 736.13 [Amended]

(a) 30 CFR 732.11(a);

(b) 30 CFR 732.13(d);

(c) 30 CFR 732.17(h)(1), (h)(2), and (h)(4);

(d) 30 CFR 732.12 (a) introductory text, (a)(1), (a)(3), and (b);

(e) 30 CFR 736.13(b) and (d).

Part V

Department of Housing and Urban Development

Office of Assistant Secretary for Housing—Federal Housing Commissioner

General Prototype Housing Costs for One- to Four-Family Dwelling Units

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-81-1103]

General Prototype Housing Costs for One- to Four-Family Dwelling Units

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: On August 14, 1980, the Department published, "General Prototype Housing Costs for One- to Four-Family Dwelling Units." The Department is revising for all areas the prototype costs, based on cost data and other current information received from HUD Field Offices and the public.

EFFECTIVE DATE: December 4, 1981.

FOR FURTHER INFORMATION CONTACT: John J. Coonts, Director, Single Family Development Division, Office of Single Family Housing, Department of Housing and Urban Development, Washington, D.C. 20410, telephone (202) 755-6720 (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Section 904 of the Housing and Community Development Act of 1977 requires HUD to publish prototype housing costs for a broad variety of one- to four-family housing in each market area. These prototype figures serve merely as an aid to the general public and *are not* applicable to prototype determinations required for public housing under the United States Housing Act of 1937. The costs for land and site improvements are included in the Section 904 prototype cost figures.

In order to cover various economic situations, prototype costs are divided into three cost ranges: low, medium and high. The information source for developing the figures include data from HUD Field Offices, the public, and the basic Section 203(b) mortgage insurance program. The prototype costs are generally representative of the sales prices.

Due to the lack of information on two-, three-, and four-family dwelling units, generally costs shown are for one-family dwellings. The market areas, as designated, are the base and Key Localities and cover both the urban and rural areas of each market area. Every HUD Field Office has maps of these designated areas. The typical low-range, one-family dwelling will contain three bedrooms and one full bath. The medium range one-family dwelling will contain three or four bedrooms and two full baths. The high range one-family dwelling will contain three to five bedrooms and two or three full baths.

The figures shown below the cost range designations are the typical square-foot areas of a one-family dwelling in the captioned market area.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement Section 102(2)(c) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410

(Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d); sec. 904, Housing and Community Development Act of 1977 (42 U.S.C. 3540))

Issued at Washington, D.C., November 27, 1981.

Philip D. Winn,

Assistant Secretary for Housing-Federal Housing Commissioner.

Department of Justice

Bureau of Prisons

Control, Custody, Care, Treatment and Instruction of Inmates; Final and Proposed Regulations

V 46 / 233 DEC 4 81 UMI

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Parts 503, 522, 527, 543, 551, and 571

Control, Custody, Care, Treatment and Instruction of Inmates; Final Rules

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rules.

SUMMARY: This document contains Bureau of Prisons rules relating to the control, custody, care, treatment, and instruction of inmates. Included are final and amended rules on (1) Admission and Orientation Program, (2) Transfer of Offenders to or from Foreign Countries, (3) Grooming, (4) Inmate Legal Activities, and (5) Release Gratuities. This document also updates the list of Bureau of Prisons institutions and staff training centers.

The rule on Admission and Orientation Program requires that newly committed inmates be offered an orientation to the institution. The rule on Transfer of Offenders to or from Foreign Countries establishes Bureau of Prisons procedures to receive custody of, and to transfer to and from the United States, offenders in compliance with the conditions of any existing treaty with a foreign government. The amended rule on Grooming incorporates correctional standards on hair care services and personal hygiene. The amended rule on Inmate Legal Activities deletes reference to the now closed Federal Community Treatment Centers and Federal Detention Center, El Paso, Texas. The rule on Release Gratuities is amended to delete reference to the Federal Community Treatment Centers and to reflect the minimum amount of money the Immigration and Naturalization Service allows aliens to retain upon deportation. This document is intended to provide the public with notice of the rules in each of these areas, not just changes from prior policy.

EFFECTIVE DATES: The changes to Parts 503, 543, 551, and 571 concerning amendments to grooming regulations, inmate legal activities, release gratuities, and list of Bureau of Prisons institutions and staff training centers are effective on December 4, 1981; the amendments to Parts 522 and 527 on admission and orientation program and transfer of offenders to or from foreign countries are effective on January 4, 1982.

ADDRESS: Office of General Counsel, Bureau of Prisons, Room 760, 320 1st Street, N.W., Washington, D.C. 20534.

FOR FURTHER INFORMATION CONTACT: Mike Pearlman, Office of General Counsel, Bureau of Prisons, phone 202-724-3062.

SUPPLEMENTARY INFORMATION: In this document the Bureau of Prisons is publishing its final rules on (1) Admission and Orientation Program and (2) Transfer of Offenders to or from Foreign Countries. These subjects were published in the **Federal Register** as proposed rules June 12, 1981 (at 46 FR 31210 et seq.). No public comment was received. On the basis of internal staff review of Bureau policies, some changes have been made.

This document also contains amendments to Bureau of Prisons final rules on Grooming, Inmate Legal Activities, and Release Gratuities. These subjects were published in the **Federal Register** as final rules June 29, 1979 (at 44 FR 38236 et seq.). The amended rule on Grooming places in writing the Bureau's expectation that inmate hair care services comply with applicable health and sanitation requirements, and that Wardens make available to inmates those articles necessary for maintaining personal hygiene. The amended rule on Inmate Legal Activities deletes reference to the now-defunct Federal Community Treatment Centers and the Federal Detention Center, El Paso, Texas. The amended rule on Release Gratuities deletes reference to Federal Community Treatment Centers and provides that aliens released to immigration authorities retain at least $10.00. As revised, this latter change is consistent with the policy of the Immigration and Naturalization Service in respect to deportation. Amendments to the list of Bureau of Prisons institutions and staff training centers, published in the **Federal Register** May 1, 1981 (at 46 FR 24898), reflect the closing of one institution and two staff training centers, as well as the opening of a new staff training center and redesignation of an existing institution.

The present amendments place no increased burden on either the inmate or the public. They are intended to either clarify the scope of the Bureau's present rules, to delete information that is no longer current, or to be consistent with the policies of a related federal agency. For these reasons, the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are inapplicable.

Members of the public may submit comments concerning these final and amended rules by writing the previously cited address. These comments will be considered but will receive no response in the **Federal Register.**

The Bureau of Prisons has determined that these rules are not major rules for the purpose of EO 12291. The Bureau of Prisons has determined that EO 12291 does not apply to this set of rulemaking since the rules involve agency management. After review of the law and the regulations, the Director, Bureau of Prisons has certified that these rules, for the purpose of the Regulatory Flexibility Act (PL 96-354), do not have a significant impact on a substantial number of small entities.

Summary of Changes

Part 503—Bureau of Prisons Central Office, Regional Offices, Institutions, and Staff Training Centers

1. *Section 503.6*—Section 503.6(d) is redesignated "USP, Lompoc, California 93438". Section 503.6(e) is deleted, as the Bureau of Prisons no longer has an institution at McNeil Island, Steilacoom, Washington. These revisions reflect Attorney General Order No. 954-81, published in the **Federal Register** September 14, 1981 (at 46 FR 45714). Based on the deletion of § 503.6(e), existing § 503.6(f)-(i) become new final § 503.6(e)-(h).

2. *Section 503.7*—The Bureau of Prisons has consolidated its training program. As a result, the staff training centers in Atlanta, Georgia and Dallas, Texas have been closed. In their stead, the Bureau of Prisons has established a new training program at the Federal Law Enforcement Training Center in Glynco, Georgia (this facility is used by over 40 federal agencies). This reorganization reflects the Bureau of Prisons' efforts to reduce costs while maintaining a quality training program. As a result of these revisions, § 503.7(a) is revised to read the Federal Law Enforcement Training Center, Glynco, Georgia. Present § 503.7(c) is deleted, with present § 503.7(d) becoming new final § 503.7(c).

Part 522—Subpart E—Admission and Orientation Program

1. *Section 522.41*—New § 522.41(c) requires staff involved in the A&O Program to notify the A&O staff coordinator of any new arrival who appears to be experiencing significant emotional stress. The staff coordinator, upon being notified, is expected to take appropriate action.

2. *Section 522.42*—For clarification, § 522.42(a) inserts the word "ordinarily". Revised § 522.42(g) requires staff documentation that the inmate has

received a copy of the institution's inmate handbook.

Part 527.43—Subpart E—Transfer of Offenders to or From Foreign Countries

1. *Section 527.43*—The identifying phrase "Criminal Division" is added to § 527.43(c). Reference to the Department of Justice is deleted from subsection (d) as the full organizational title is now included in final subsection (c). Section 527.43(g) is clarified to read prior to the inmate's transfer "from" rather than "to" the departure institution. In this same section, the authorization to conduct a verification hearing is expanded to include "or other appointed U.S. official". Section 527.43(h)(2) is clarified by substituting the phrase "required documentation" for "appropriate documentation" and by requiring that the judgment and commitment be a certified copy.

2. *Section 527.45*—Section 527.45(b) is expanded to reference 28 CFR 0.96b as the Bureau's authority to transport offenders.

Part 543—Subpart B—Inmate Legal Activities

1. *Section 543.10*—The last sentence of § 543.10 is deleted as both the Federal Detention Center at El Paso, Texas and the Federal Community Treatment Centers have been closed.

Part 551—Subpart A—Grooming

1. *Section 551.2*—The final rule states the Warden "shall", as opposed to "may", require a beard covering to be worn when an inmate is working in food service or in any other location where a beard could result in the likelihood of work injury. As amended, the rule recognizes safety and health concerns and is consistent with the existing requirements in § 551.4(b)

2. *Section 551.4*—New § 551.4(c) requires that each institution's inmate hair care services comply with applicable health and sanitation requirements.

3. *Section 551.6*—New § 551.6, Personal Hygiene, requires the Warden to make available to inmates those articles necessary for maintaining personal hygiene. As a result of new § 551.6, existing § 551.6, Bathing and Clothing, is redesignated § 551.7.

Part 571—Subpart B—Release Gratuities

1. *Section 571.21*—Based on the closing of the Federal Community Treatments Centers, § 571.21(c) is deleted, with § 571.21(d)–(f) becoming new final § 571.21(c)–(e). New § 571.21(e) is amended as the Immigration and Naturalization Service has notified the Bureau of Prisons that aliens being processed for removal are allowed to retain at least $10.00. The Bureau's existing rule specified at least $20 cash. For compatibility with INS policy, § 571.21(e) is amended to read $10.00.

Conclusion

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(q), 28 CFR Chapter V is amended as set forth below:

In Subchapter A, Part 503 is amended:

In Subchapter B, Part 522, Subpart E and Part 527, Subpart E are added;

In Subchapter C, Part 543, Subpart B and Part 551, Subpart A are amended; and

In Subchapter D, Part 571, Subpart C is amended.

Dated: November 30, 1981.

Norman A. Carlson,

Director, Bureau of Prisons.

A. Subchapter A, Part 503 is amended as follows:

PART 503—BUREAU OF PRISONS CENTRAL OFFICE, REGIONAL OFFICES, INSTITUTIONS, AND STAFF TRAINING CENTERS

1. The authority citation for Part 503 reads as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4003, 4042, 4081, 4082, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99; Attorney General Orders 646–76 (41 FR 14805), 842–79 (44 FR 44629), 854–79 (44 FR 58002), 860–79 (44 FR 64922), 904–80 (45 FR 52284), 938–81 (46 FR 22296), 954–81 (46 FR 45714).

2. In § 503.6, paragraph (d) is revised, paragraph (e) is removed, and paragraphs (f) through (i) are redesignated as new paragraphs (e) through (h) respectively, to read as follows:

§ 503.6 Bureau of Prisons Western Regional Office.

* * * * *

(d) USP, Lompoc, California 93438.

(e) FCI, Pleasanton, California 94568.

(f) FPC, Safford, Arizona 85546.

(g) MCC, San Diego, California 92101.

(h) FCI, Terminal Island, California 90731.

3. In § 503.7, paragraph (a) is revised, paragraph (c) is removed, and paragraph (d) is redesignated as new paragraph (c) to read as follows:

§ 503.7 Bureau of Prisons Staff Training Centers.

* * * * *

(a) Federal Law Enforcement Training Center, Building 67, Glynco, Georgia 31524.

* * * * *

(c) Food Service Training Center, c/o FCI, Oxford, Wisconsin 53952

PART 522—ADMISSION TO INSTITUTION

B. Subchapter B is amended as follows:

1. In part 522, Subpart E is added; and

* * * * *

Subpart E—Admission and Orientation Program

Sec.

522.40 Purpose and scope.

522.41 Responsibility.

522.42 Guidelines for an admission and orientation program.

Authority: 5 U.S.C. 301, 18 U.S.C. 4001, 4042, 4081, 4082, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart E—Admission and Orientation Program

§ 522.40 Purpose and scope.

(a) Each inmate committed or transferred to a Bureau of Prisons institution shall become involved in the institution's Admission and Orientation (A&O) Program. The Warden shall ensure that staff involved with this program offer each newly committed inmate an orientation to the institution, to include information on institutional requirements and, whenever practicable, visits to the various areas of the institution. The institution admission and orientation program also shall provide the inmate with an awareness of the:

(1) Inmate's rights and responsibilities;

(2) Institution's program opportunities; and

(3) Institution's disciplinary system.

(b) Staff shall develop orientation materials (for example, a pamphlet) to supplement lectures and discussions.

(c) Pre-trial inmates and inmates in holdover status (en route to a different institution) are excluded from the provisions of this rule.

§ 522.41 Responsibility.

(a) The Warden shall assign to a staff member the responsibility to co-ordinate the institution's A&O Program.

(b) Staff involved in the lecture portion of the A&O Program shall develop an outline of the information they wish to include in their presentation.

(c) A staff member involved in the A&O Program who considers an inmate

to be experiencing significant emotional stress shall notify the A&O staff coordinator of this determination so that the inmate may be offered appropriate assistance.

§ 522.42 Guidelines for an admission and orientation program.

(a) Location—Each Warden shall determine the appropriate location for the institution's A&O Program.

(b) Quarters—Each Warden shall establish procedures for the assignment of living quarters.

(c) Inmate Participation—The newly committed inmate is to be provided the opportunity to see and participate in institutional activities.

(d) Activities—The A&O staff coordinator is to ensure that the admission and orientation program provides a full schedule of activities for the newly committed inmate. Scheduled activities shall include exposure to programs responsive to a specialized need of the inmate, as well as exposure to various work assignments, education programs, and physical and social activity.

(e) Telephone Calls—Newly committed inmates shall ordinarily be permitted to complete at least two local or collect long distance phone calls during the admission process.

(f) Length of Admission and Orientation Program—An inmate's involvement in the institution's A&O program is based on the time necessary to accomplish the program's objectives.

(g) Documentation of A&O Program Involvement—Staff shall prepare documentation that the inmate has received a copy of the institution's inmate handbook and has completed the institution's admission and orientation program. Staff shall have the inmate sign and date a copy of this document. The original of this document shall be placed in the inmate central file.

PART 527—TRANSFERS

2. In Part 527, Subpart E is added.

Subpart E—Transfer of Offenders to or From Foreign Countries

Sec.

527.40 Purpose and scope.
527.41 Definitions.
527.42 Notification of Bureau of Prisons inmates.
527.43 Transfer of Bureau of Prisons inmates to other countries.
527.44 Transfer of State prisoners to other countries.
527.45 Receiving United States citizens from other countries.

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 4100–4115, 4161–4166, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart E—Transfer of Offenders to or From Foreign Countries

§ 527.40 Purpose and scope.

Public Law 95–144 (18 U.S.C. 4100 et seq.) authorizes the transfer of offenders to or from foreign countries, pursuant to the conditions of a current treaty which provides for such transfer. 18 U.S.C. 4102 authorizes the Attorney General to act on behalf of the United States in regard to such treaties. In accordance with the provisions of 28 CFR 0.96b the Attorney General has delegated to the Director of the Bureau of Prisons, and to designees of the Director, the authority to receive custody of, and to transfer to and from the United States, offenders in compliance with the conditions of the treaty.

§ 527.41 Definitions.

For purpose of this rule the following definitions apply.

(a) Treaty nation—A country which has entered into a treaty with the United States on the Execution of Penal Sentences.

(b) State prisoner—An inmate serving a sentence imposed in a court in one of the states of the United States, or in a territory or commonwealth of the United States.

(c) Departure institution—The Bureau of Prisons institution to which an eligible inmate is finally transferred for return to his or her country of citizenship.

(d) Admission institution—The Bureau of Prisons institution where a United States citizen-inmate is first received from a treaty nation.

§ 527.42 Notification of Bureau of Prisons inmates.

(a) The Warden shall ensure that the institution's admission and orientation program includes information on international offender transfers.

(b) The case manager of an inmate who is a citizen of a treaty nation shall inform the inmate of the treaty and provide the inmate with an opportunity to inquire about transfer to the country of citizenship. The inmate is to be given an opportunity to indicate on an appropriate form whether he or she is interested in transfer to the country of citizenship.

§ 527.43 Transfer of Bureau of Prisons inmates to other countries.

(a) An inmate who is qualified for and desires to return to his or her country of citizenship for service of a sentence imposed in a United States Court shall indicate his or her interest by completing and signing the appropriate form and forwarding it to the Warden at the institution where the inmate is confined.

(b) Upon verifying that the inmate is qualified for transfer, the Warden shall forward all relevant information, including a complete classification package, to the Assistant Director, Correctional Programs Division.

(c) The Assistant Director, Correctional Programs Division shall review the submitted material and forward it to the Office of International Affairs (OIA), Criminal Division, Department of Justice, for review.

(d) The Assistant Director, Correctional Programs Division shall ensure that the inmate is advised of the decision of OIA.

(1) When the Department of Justice determines that transfer is not appropriate, the Assistant Director, Correctional Programs Division shall ensure that the inmate is advised of this determination and informed that the inmate may request the reason(s) for such action from OIA.

(2) When the Department of Justice determines that transfer is appropriate, the Assistant Director, Correctional Programs Division shall ensure that the inmate is advised of the determination and of the probability that the inmate will be given an interview with his or her nation's consular officials.

(e) Upon notification from OIA of the treaty nation's decision in regard to the inmate's transfer, the Assistant Director, Correctional Programs Division shall arrange for the inmate to be informed of that decision.

(f) At an appropriate time subsequent to notification by the Department of Justice of an inmate's approval for transfer, the Assistant Director shall arrange for the inmate to be transferred to an appropriate departure institution.

(g) Prior to the inmate's transfer from the departure institution, the inmate shall receive a verification hearing before a U.S. Magistrate or U.S. Judge or other appointed U.S. official to document the inmate's voluntary consent for transfer. Counsel is provided the inmate for purpose of this hearing. Where requested, the Warden shall allow counsel to interview the inmate prior to the hearing.

(h) Following the verification hearing, the Assistant Director, Correctional Programs Division shall arrange a schedule for delivery of the inmate to the authorities of the country of citizenship.

(1) The Assistant Director shall advise the Warden of those arrangements.

(2) The Warden shall arrange for the inmate to be transported to the foreign authorities. The Warden shall assure

that required documentation (for example, a certified copy of the judgment and commitment order, current progress report, summary face sheet, and proof of citizenship) accompanies each inmate transported.

§ 527.44 Transfer of state prisoners to other countries.

The Bureau of Prisons may assume custody of a state prisoner who has been approved for transfer to a treaty nation for the purpose of facilitating the transfer to the treaty nation. Once approved, the state is not required to contract for the placement of the prisoner in federal custody, nor to reimburse the United States for the cost of confinement (as would ordinarily be required by 18 U.S.C. 5003).

§ 527.45 Receiving United States citizens from other countries.

(a) Staff accepting custody of American inmates from a foreign authority shall ensure that the following documentation is available prior to accepting custody of the inmate:

(1) A certified copy of the sentence handed down by an appropriate, competent judicial authority of the transferring country and any modifications thereof;

(2) A statement (and a copy translated into English from the language of the country of origin if other than English), duly authenticated, detailing the offense for which the offender was convicted, the duration of the sentence, and the length of time already served by the inmate. Included should be statements of credits to which the offender is entitled, such as work done, good behavior, pre-trial confinement, etc.; and

(3) Citizenship papers necessary for the inmate to enter the United States.

(b) The Warden shall direct in writing specific staff, preferably staff who speak the language of the treaty nation, to transport the offender from the transporting country to the admission institution. The directive shall cite 28 CFR 0.96b as the authority to transport the offender. When the admission institution is not able to accept the inmate (for example, a female inmate transported to a male institution), the Warden shall make appropriate housing arrangements with a nearby jail.

(c) As soon as practicable after the inmate's arrival at the admission institution, staff shall initiate the following actions:

(1) Arrange for the inmate to receive a complete physical examination;

(2) Advise the local U.S. Probation Office of the inmate's arrival; and

(3) Notify the U.S. Parole Commission of the inmate's arrival. Inmates returning from other countries are by law immediately eligible for parole. Staff at the admission institution shall determine if each inmate received at that institution should be retained at the admission institution for the initial parole hearing or promptly transferred to a more appropriate institution.

(d) If upon computation of sentence staff determine that an inmate is entitled to immediate release via mandatory release or expiration of sentence with credits applied, release procedures shall be implemented but only after receiving a medical clearance and the results of an FBI fingerprint check.

c. Subchapter C is amended as follows:

1. In Part 543, Subpart B is amended.

2. In Part 551, Subpart A is revised.

PART 543—LEGAL MATTERS

1. The authority citation for Part 543, Subpart B reads as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 5015, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart B—Inmate Legal Activities

2. By revising § 543.10 to read as follows:

§ 543.10 Purpose and scope.

The Bureau of Prisons affords an inmate reasonable access to legal materials and counsel, and reasonable opportunity to prepare legal documents. The Warden shall establish an inmate law library, and procedures for access to legal reference materials and to legal counsel, and for preparation of legal documents.

PART 551—MISCELLANEOUS

The authority citation for Part 551 reads as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 4161–4166, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart A—Grooming

1. By amending the table of contents by adding a new § 551.6, and renumbering present § 551.6 as new § 551.7 to read as follows:

Sec.
551.1 Policy.
551.2 Mustaches and beards.
551.3 Hairpieces.
551.4 Hair length.
551.5 Restrictions and exceptions.
551.6 Personal hygiene.
551.7 Bathing and clothing.
* * * * *

2. By revising § 551.2 to read as follows:

§ 551.2 Mustaches and beards.

An inmate may wear a mustache or beard or both. The Warden shall require an inmate with a beard to wear a beard covering when working in food service or where a beard could result in increased likelihood of work injury

3. By adding a new paragraph (c) to § 551.4 to read as follows:

§ 551.4 Hair length.

* * * * *

(c) The Warden shall make available to an inmate hair care services which comply with applicable health and sanitation requirements.

4. By adding a new § 551.6 and redesignating existing § 551.6 as new final § 551.7 to read as follows:

§ 551.6 Personal hygiene.

The Warden shall make available to an inmate those articles necessary for maintaining personal hygiene.

§ 551.7 Bathing and clothing.

Each inmate must observe the standards concerning bathing and clothing that exist in the institution as required by standards of § 551.1.

PART 571—RELEASE FROM CUSTODY

D. Subchapter D, Part 571, Subpart C is amended as follows:

1. The authority citation for Part 571 reads as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 4161–4166, 4201–4218, 5006–5024, 5031–5042; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart C—Release Gratuities

2. By removing § 571.21(c) and redesignating present § 571.21 (d) through (f) new § 571.21 (c) through (e) to read as follows:

* * * * *

§ 571.21 Procedures.

* * * * *

(c) The inmate who is without personal funds may receive a gratuity when transferred to a contract halfway house. The amount shall enable the inmate to care for needs in transit and allow for the purchase of necessary personal items upon arrival.

(d) Staff shall provide the inmate released to a detainer with information on how to apply for a gratuity if released prior to expiration of the federal sentence.

(e) The Warden shall insure that each alien released to immigration authorities has $10 cash. This provision does not apply to aliens serving 60 days or less in contract facilities.

[FR Doc. 81-34888 Filed 12-3-81; 8:45 am]
BILLING CODE 4410-05-M

V 46 / 233 DE 4 81 UMI

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 571

Control, Custody, Care, Treatment and Instruction of Inmates; Petitions for Commutation of Sentence; Proposed Rulemaking and Request for Comments

AGENCY: Bureau of Prisons, Justice.

ACTION: Proposed rule.

SUMMARY: The Bureau of Prisons is proposing a new rule for the management of inmates in Federal correctional institutions. This proposal is part of the Bureau's program to publish in the **Federal Register**, and subsequently in the Code of Federal Regulations, Bureau rules relating to the control, custody, care, treatment, and instruction of inmates. This installment encompasses the Bureau of Prisons' proposed rule on Petitions for Commutation of Sentence. The proposed rule provides current information on the procedures for an inmate to file a petition for a commutation of sentence.

DATE: Comments must be received on or before January 15, 1982.

ADDRESS: Office of General Counsel, Bureau of Prisons, Room 760, 320 1st Street, NW., Washington, D.C. 20534.

FOR FURTHER INFORMATION CONTACT: Mike Pearlman, Office of General Counsel, Bureau of Prisons, phone 202/724/3062.

SUPPLEMENTARY INFORMATION: Pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director of the Bureau of Prisons in 28 CFR 0.96(q), notice is hereby given that the Bureau of Prisons intends to publish in the **Federal Register** its proposed rule on Petitions for Commutation of Sentence. The rule provides to inmates instructions on how to obtain the appropriate forms for filing a petition and on the role of the Bureau of Prisons in the commutation of sentence process.

The Bureau of Prisons has determined that this rule is not a major rule for the purpose of EO 12291. The Bureau of Prisons has determined that EO 12291 does not apply to this rule since the rule involves agency management. After review of the law and the regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354) does not have a significant impact on a substantial number of small entities.

Interested persons may participate in this proposed rulemaking by submitting data, views, or arguments in writing to the Bureau of Prisons, Room 760, 320 1st Street, NW., Washington, D.C. 20534. Comments received on or before January 15, 1982 will be considered before final action is taken. Copies of all written comments received will be available for examination by interested persons at the Bureau of Prisons, Room 760, 320 1st Street, NW., Washington, D.C. 20534. The proposed rule may be changed in light of the comments received. No oral hearings are contemplated.

In consideration of the foregoing, it is proposed to amend 28 CFR Chapter V as follows: In Subchapter D, add Subpart E to Part 571.

SUBCHAPTER D—COMMUNITY PROGRAMS AND RELEASE

By adding Subpart E to Part 571 to read as follows:

PART 571—RELEASE FROM CUSTODY

* * * * *

Subpart E—Petitions for Commutation of Sentence

Sec.
571.40 Purpose and scope.
571.41 Procedures

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 4161–4166, 5006–5024, 5039; 28 U.S.C. 509, 510; U.S. Const., Art. II, Sec. 2; 28 CFR 0.95–0.99, 1.1–1.9.

* * * * *

Subpart E—Petitions for Commutation of Sentence

§ 571.40 Purpose and scope.

An inmate may file a petition for commutation of sentence in accordance with the provisions of 28 CFR Part 1.

(a) An inmate may request from the inmate's case manager the appropriate forms (and instructions) for filing a petition for commutation of sentence.

(b) When specifically requested by the U.S. Pardon Attorney, the Director, Bureau of Prisons will forward a recommendation on the inmate's petition for commutation of sentence.

§ 571.41 Procedures.

(a) Staff shall suggest that an inmate who wishes to submit a petition for commutation of sentence do so through the Warden to the U.S. Pardon Attorney. This procedure allows institution staff to forward with the application the necessary supplemental information (for example, sentencing information, presentence report, progress report, pertinent medical records if the petition involves the inmate's health, etc.). Except as provided in paragraph (b) of this section, no Bureau of Prisons recommendation is to be forwarded with the package of material submitted to the U.S. Pardon Attorney.

(b) When specifically requested by the U.S. Pardon Attorney, the Director, Bureau of Prisons shall submit a recommendation on the petition. Prior to making a recommendation, the Director may request comments from the Warden at the institution where the inmate is confined. Upon review of those comments, the Director will forward a recommendation on the petition to the U.S. Pardon Attorney.

(c) When a petition for commutation of sentence is granted, the U.S. Pardon Attorney sends the warrant of clemency to the Warden at the detaining institution, with a copy to the Director, Bureau of Prisons. The Warden shall take action as indicated on the warrant of clemency.

(1) If immediate parole eligibility is granted, the inmate is to be placed on the next parole docket.

(2) If a petition for commutation of sentence is granted, institutional staff shall recalculate the inmate's sentence in accordance with the terms of the commutation order.

(d) When a petition for commutation of sentence is denied, the U.S. Pardon Attorney ordinarily notifies the Warden, requesting that the Warden notify the inmate of the denial.

Dated: November 30, 1981.

Norman A. Carlson,

Director, Bureau of Prisons.

Part VII

Department of Energy

Bonneville Power Administration

Proposed Long-Term Energy Conservation Contract

V 46 / 233
DE 4 81
UMI

DEPARTMENT OF ENERGY

Bonneville Power Administration

Proposed Long-Term Energy Conservation Contract; Request For Public Comment

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of Proposed Long-Term Energy Conservation Contract, Request for Public Comment.

SUMMARY: Energy conservation contracts are among the contracts that BPA has negotiated with its customers pursuant to the Pacific Northwest Electric Power Planning and Conservation Act (Regional Act). The conservation contract complies with Regional Act provisions for BPA to acquire cost-effective conservation and direct-application renewable resources to serve its new and existing loads.

This Notice summarizes the history of the negotiation process, defines the eligibility requirements for participation in the programs offered under the long-term agreement, and describes the impact of this long-term contract on the conservation programs offered under the short-term contract. This Notice also includes, in Attachment 1, the November 19 draft of the "side-by-side" version of the long-term energy conservation contract.

BPA initially negotiated a short-term energy conservation contract to allow its customers and potential utility customers to begin implementation of conservation throughout the region while issues affecting a long-term contract offer were being considered in negotiations of utility power sales contracts and in the 1981 BPA rate hearing. Meetings for negotiation of the short-term contract began on February 24, 1981, in Portland. Schedules announcing more meetings were published in BPA's weekly calendar. Any written handouts used during the meetings were made available upon request.

The short-term conservation contract was offered on August 14, 1981, to all BPA utility and Federal agency customers as well as potential BPA utility customers in the Pacific Northwest. (Further references to a "utility" in this Notice will include these three groups.)

The initial phase of negotiations between BPA and utility representatives on the long-term conservation contract began on September 23, 1981 and ended on November 13, 1981. It is proposed that the long-term agreement, as well as the conservation program exhibits to be attached to it, be offered only to firm requirements power sales and Federal agency customers of BPA. The program offerings would include those programs that are currently offered under the short-term agreement. The short-term conservation agreement is due to expire on September 8, 1982, or 60 days after the offering of the long-term contract, whichever comes first.

During the negotiations of the proposed long-term contract, the participants developed what is referred to as a "side-by-side" version of the contract. This version incorporates the provisions proposed by the negotiating parties. When the parties have not come to an agreement, the differing proposals and their sponsors are identified. The provisions in the proposed contract that are without authorship identification have been preliminarily agreed to by the parties as joint provisions.

This Notice begins a public review and comment period on the proposed long-term energy conservation contract. After December 10, 1981, BPA will make available upon request (1) an explanatory summary of the proposed contract provisions, (2) statements of the positions of the parties where there has been disagreement on proposed contract provisions, and (3) exhibits for existing conservation programs. Requests for this material should be made to the Public Involvement Coordinator, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212.

Public meetings to receive oral comments on the proposed contracts will be held on January 7, 1982, in Seattle, Washington; on January 12, 1982, in Portland, Oregon, and in Boise, Idaho. Written comments are encouraged. The comments and materials that result from the public review process will be made available to the contract negotiation parties. In February, BPA plans to publish the final long-term conservation contract and offer it to firm requirements power sales customers and Federal agency customers of the agency.

DATES: Meetings to receive public comment on the proposed long-term conservation contract will be held on January 7, 1982, in Room A of the Center House, Seattle Center, 1st North and Republican Street, Seattle, Washington. Registration to provide oral comment will begin at 6:30 p.m., and the meeting will begin at 7 p.m. The meetings on January 12, 1982, will be held in the BPA Auditorium, 1002 NE. Holladay Street, Portland, Oregon; and in the Bonneville Room of the Boise City Hall, 55 West Fort Street, Boise, Idaho. Registration for both meetings will begin at 7 p.m. and the meetings will begin at 7:30 p.m.

Written Comments will be accepted until January 18, 1982.

EFFECTIVE DATE: December 4, 1981.

ADDRESSES: Written comments should be submitted to the Public Involvement Coordinator, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212.

FOR FURTHER INFORMATION CONTACT:
Donna L. Geiger, Public Involvement Coordinator, P.O. Box 12999, Portland, Oregon 97212, 503–234–3361, extension 4261. Oregon callers outside of Portland may use the toll-free number 800–452–8429; callers in California, Idaho, Montana, Nevada, Utah, Wyoming, and Washington may use 800–547–6048.

SUPPLEMENTARY INFORMATION: 1. *Short-Term Energy Conservation Contract.* The Regional Act requires BPA to acquire cost-effective conservation and direct-application renewable resources to serve its new and existing loads. In January, BPA held an organizational meeting to begin the negotiation process for conservation contracts as well as other contracts, such as the power sales and residential exchange contracts. BPA initially designed the short-term conservation contract to allow utilities to meet the Regional Act's mandate to begin implementation of conservation programs while issues that would affect the long-term contract were being considered in the power sales contract negotiation and in BPA's 1981 transmission and wholesale power rate

hearings. The short-term energy conservation contract negotiations began February 24, 1981, and continued during regularly scheduled meetings between BPA and representatives of customer groups. BPA announced the process for public participation and acceptance of public comments in the contracts negotiation process (46 FR 18331, March 25, 1981). All sessions were open to the public and any written handouts used during the meetings were made available upon request.

The short-term contract was offered to all regional utilities on August 14, 1981, and is due to expire on September 8, 1982, or 60 days after the offering of the long-term conservation contract, whichever is earlier.

Five conservation programs have been offered under the short-term conservation agreement. These are: the Shower Flow Restrictor Program, the Water Heater Wrap Program, the Street and Area Lighting Program, the Commercial Lighting and Water Heating Conservation Program, and Residential Weatherization (Energy Buy-Back and Zero Interest Loan Options). Each utility that signs the short-term conservation agreement with BPA may participate in any of these programs which, if accepted by the utility, are attached to that utility's contract as a program exhibit.

It is proposed that each of the programs offered under the short-term contract be offered under the proposed long-term energy conservation agreement.

2. *Proposed Long-Term Energy Conservation Contract.* The initial phase of negotiations between BPA and utility representatives on the long-term energy conservation contract began on September 23, 1981, and ended on November 13, 1981. The publicly owned utilities were represented by the Northwest Public Power Association (NWPPA). The investor-owed utilities were represented by the Intercompany Pool (ICP).

It should be noted that the long-term contract is not a programmatic document. It does, however, assign responsibilities and describe basic procedures that will govern BPA and the utilities as they implement the conservation programs.

As with the short-term contract negotiations, meetings were open to the public and announced in BPA's weekly calendar. Any written handouts used during the meetings were made available upon request. The persons requesting such handouts received individual notice from the Public Involvement Coordinator of a final negotiation session held November 9–13, 1981, in Portland.

As a result of these negotiations, the parties compiled the "side-by-side" version of the proposed long-term conservation contract (see Attachment 1). The provisions in the proposed contract that are without authorship identification have been preliminarily agreed to by the parties as joint provisions. When the parties have not come to an agreement, the differing proposals and their sponsors are identified. These proposed contract provisions have not been finally approved by any of the parties.

BPA is currently preparing an explanatory summary of the contract provisions and statements of the positions of the parties when there has been disagreement on the proposed contract provisions. The summary, statements of positions, and exhibits for existing conservation programs will be available after December 10, 1981, upon request to the Public Involvement Coordinator.

BPA has scheduled meetings to receive oral comments on the proposed long-term conservation contract. The meetings will be held on January 7, 1982, in Room A of the Center House, Seattle Center, 1st North and Republican Street, Seattle, Washington. Registration to provide oral comment will begin at 6:30 p.m., and the meeting will begin at 7 p.m. The meetings on January 12, 1982, will be held in the BPA Auditorium, 1002 NE. Holladay, Portland, Oregon; and in the Bonneville Room of the Boise City Hall, 55 West Fort Street, Boise, Idaho. Registration for both meetings will begin at 7 p.m. and the meetings will begin at 7:30 p.m.

Written comments will also be accepted and should be sent to the Public Involvement Coordinator by January 18, 1982.

The comments and materials that result from the public review process will be made available to the contract negotiation parties: In February BPA plans to publish the final long-term energy conservation contract and offer the contract to the qualifying utilities.

3. *Eligibility Requirements for Participating in the Proposed Long-Term Energy Conservation Contract and the Program Exhibits.* All utilities that are firm requirements power sales customers of BPA, including Federal agency customers, would be eligible to sign the long-term conservation agreement and to participate in the conservation programs offered under the contract.

Other contracts will be used for conservation programs with direct-service industrial customers, State and local governments, and other entities. BPA plans to develop these contracts at a future date.

4. *Impact of the Proposed Provisions of the Long-Term Energy Conservation Contract on the Programs Offered Under the Short-Term Energy Conservation Contract.* The five conservation programs offered under the short-term conservation contract will also be offered under the proposed long-term conservation contract. For the most part, the program details will not be affected. However, the proposed long-term contract requires a utility to establish program implementation goals which will be compared to regional goals BPA will establish for conservation to be achieved under each program.

Under the short-term conservation agreement, the programs did not contain a regional goal, and the right of a utility to receive BPA funds and the amount of funds to be received under the programs were not conditioned on the utility successfully achieving any given amount of conservation in its service area.

Under the proposed long-term contract, BPA will establish regional goals for each program that it offers. Initially, these regional goals will be based on the program planning assumptions (see tables 1–5). The planning assumptions consist of two components. First, they estimate the amount of conservation that is available in the region under the program. Secondly, they estimate the amount of that potential conservation that which utility can reasonably expect to achieve in its service area under the program.

TABLE 1.—SHOWER FLOW RESTRICTOR PROGRAM

[1-year program to distribute two shower flow restrictors per residence]

Number available residences	[1] 1,961,346
Number achevable installations	[2] 392,269

[1] 80% of residential customers with electric water heaters do not have shower flow restrictors (Pacific Northwest Residential Energy Survey, August 1980)
[2] About 20% of those customers who receive the shower flow restrictors will actually install them (BPA staff estimate).

TABLE 2.—WATER HEATER WRAP

[2-year program to install wraps on electric water heaters.]

Electric water heaters	Public [illegible]	Investor-owned utilities	Total
Number available	[1] 781,120	[1] 1,171,680	[2] 1,952,800
Number achievable	[3] 586,000	[4] 659,0900	1,245,000

[1] 40% of total electric water heaters are in public utilities and 60% are in investor-owned utilities (Pacific Northwest Residential Energy Survey, August 1980)
[2] 80% of region's water heaters are available for wrap (Pacific Northwest Residential Energy Survey, August 1980)
[3] 75% achievable (BPA staff estimate).
[4] 56% will be wrapped under BPA program which assumes approximately 220,000 heaters independently wrapped since data collection of PNW Residential Energy Survey (BPA staff estimate).

TABLE 3.—STREET AND AREA LIGHTING PROGRAM

[5-year program to convert street and area lighting to lower wattage lights]

Number available lights	[1] 446,800
Number achievable conversions	[2] 335,000

[1] BPA staff estimate.
[2] 75% of available lights (BPA staff estimate)

TABLE 4.—COMMERCIAL LIGHTING AND WATER HEATING CONSERVATION PROGRAM

[2-year porogram to install water heater wraps, shower-flow restrictors, and replace standard lamps, and distribute energy conservation information to commercial consumers.]

Number	Water heater wraps	Shower flow restrictors	Lamps
Available commercial entities	[1] 500,000	[1] 500,000	[1] 500,000
Achievable	[2] 150,000	[3] 500,000	[4] 4,500,000

[2] 30% of available (BPA staff estimate)
[3] Average one restrictor per consumer (BPA staff estimate).
[4] Nine lamps per consumer (BPA staff estimate)

TABLE 5.—RESIDENTIAL WEATHERIZATION

[Energy buy-back and zero interest loan options]

10-year program to weatherize single-family,* electrically space-heated residences.

Residences	Public utilities	Investor owned utilities	Total
Number available	[1] 300,800	[2] 272,450	573,250
Number achievable	[3] 135,360	[4] 177,070	[5] 312,430

*While the planning assumptions only include single-family dwellings, the program is available for all buildings used for residential purposes including multiunit buildings and mobile homes.

[1] BPA Residential Sector Resource Assessment
[2] Investor-Owned Utilities.
[3] 30% market penetration by 1985 and 45% by 1990 (BPA staff estimate)
[4] Estimated 60–70% market penetration by 1985 (IOU estimate)
[5] 55% market penetration (BPA staff estimate)

While BPA will use the above planning assumptions initially to measure performance under the programs, these estimates of the amount of conservation available in the region for the various programs have various degrees of reliability. For example, in the residential sector the number of candidates for water heater wraps can be predicted with reasonable accuracy based on the statistical information that is available on the housing stock in the region. However, there is very little information on the number of candidates for wraps in the commercial sector of the region. So, the regional goal based on the number of candidates for wraps in the residential sector is much more reliable than the regional goal based on the number of candidates for water heater wraps in the commercial sector.

The estimates of the amount of the potential conservation that is actually achievable is subject to even greater uncertainty than the estimates of the potential conservation. For example, the rate of implementation of the program measures depends on the marketing of the program and the level of consumer incentive. It also depends upon the level of incentives and resources available to the entities implementing the programs. BPA feels that the regional goal for the amount of potential conservation should be realistic. If that goal is not being met, then changes should be made in the programs so that the goal is achieved. However, the regional goal is an estimate; it may be too low or too high. If necessary, BPA will change the regional goal to reflect the operating experience of the programs.

Under the proposed long-term contract, the utilities will submit to BPA their implementation goals for each program that they accept. The implementation goals will describe the units of accomplishment that are available in the utility's service area under the program, and an expected level of implementation specified in terms of the units of accomplishment the utility expects to complete during each budget year for the life of the program. For example, a small utility may determine that 5,000 water heaters are available for wraps in its service area. Of those 5,000 potential candidates for wraps, they will be able to wrap 2,000 each year for the 2-year life of the program.

Then, BPA will compare the utility's implementation goal with the regional goal BPA has established for each program.

To encourage the utility's forceful implementation of the program measures, BPA has proposed that if the utility's implementation plan represents a good faith effort to accomplish that portion of the regional goal that applies to that utility's service area, BPA will agree not to offer that program to another entity in the utility's service area without the agreement of the utility.

If the utility falls short of the implementation goal that it has established, then BPA may revoke the exclusivity agreement, and may restrict that utility's future requests for funding.

BPA believes that the regional goals and the utility implementation goals for the conservation programs offered under the long-term energy conservation contract will provide an effective measure of achievable conservation and will facilitate rapid and reliable development of the conservation resource in the region.

Dated: November 27, 1981.

James J. Jura,

Acting Administrator.

This is a preliminary draft of language negotiated by the InterCompany Pool (ICP), Northwest Public Power Association (NWPPA), and Bonneville except where indicated.

Energy Conservation Agreement Executed By the United States of America Department of Energy Acting By and Through the Bonneville Power Administration and

This agreement, executed ————, 19—, by the United States of America, Department of Energy, acting by and through the Bonneville Power Administration (Bonneville), and ———————— (Utility), a ————————.

Witnesseth

Whereas Bonneville is required by the Pacific Northwest Electric Power Planning and Conservation Act, P.L. 96–501 (Regional Act), to acquire cost-effective conservation and cost-effective

direct application renewable resources and to implement cost-effective conservation measures; and

Whereas Bonneville, to the extent conservation measures or acquisition of resources require direct arrangements with consumers, is obligated by the Regional Act to make maximum practicable use of its customers in administering and carrying out such arrangements; and

Whereas the parties intend to jointly implement conservation measures and provide for the acquisition of conservation and direct application renewable resources to achieve reductions in electric power consumption;

Now, Therefore, the parties hereto mutually agree as follows:

1. *Definitions.*—( ) "Approved Budget" means the total amount which Bonneville is bound to pay the Utility under a Program during a Budget Year.

( ) "Budget Year" means the period commencing each year on October 1 and ending the following September 30, except that the Budget Year during the initial year that the Utility participates in a Program means the period commencing on the date the Utility accepts the offer of the Program and ending on the following September 30.

( ) "Conservation" means any reduction in Electric Power consumption as a result of installation of direct application renewable resources or increases in the efficiency of energy use, production, or distribution.

( ) "Consumer" means any end user of Electric Power in the Region.

( ) "Consumer Incentive" means any payment made to or benefit received by a Consumer under a Program

( ) "Council" means the Pacific Northwest Electric Power and Conservation Planning Council established pursuant to Section 4 of the Regional Act.

( ) "Effective Date" means 2400 hours on the date of the signing of this Agreement by the Utility.

( ) "Electric Power" means electric peaking capacity, or electric energy, or both.

( ) [NWPPA/BPA] "Electric Utility" means either a utility which is a firm requirements power sales customer of Bonneville which sells Electric Power to Consumers in the Region or a Federal agency customer of Bonneville.

( ) [ICP] "Electric Utility" means a utility selling Electric Power to Consumers in the Region or a Federal agency customer of Bonneville.

( ) "Measure" means the installation or distribution of materials or devices or the provision of services, as decribed in a Program, which are intended to accomplish a reduction in Electric Power consumption.

( ) "Plan" means the Regional Electric Power and Conservation Plan (including any amendments thereto) adopted pursuant to the Regional Act.

( ) "Prior Agreement" means the short-term Energy Conservation Agreement offered by Bonneville on July 10, 1981.

( ) "Program" means a Conservation or direct application renewable Resource program offered or accepted by Bonneville pursuant to this Agreement.

( ) "Region" means the same as defined in the Regional Act, including any amendments thereto.

( ) "Resource" means actual or planned load reduction resulting from direct application of a renewable energy resource by a Consumer or from a Conservation Measure.

( ) "Utility Costs" means all costs related to the implementation and administration of a Program other than Consumer Incentives or special incentives that are described in section 11(c).

( ) "Utility-Designed Program" means any Program for energy savings designed for, or on behalf of, the Utility for implementation within its own service area, and which is not similar to any Program previously developed and offered to all Electric Utilities pursuant to this Agreement.

3. *Termination of Prior Agreement.* The Prior Agreement, if executed by the Utility, is hereby terminated as of the Effective Date, except that, pursuant to Section 2 of the Prior Agreement, all obligations arising therefrom shall be preserved until satisfied.

4. *Entire Agreement.* This Agreement sets forth the entire agreement of the parties and supersedes any and all prior agreements with respect to the subject matter of this Agreement, except with respect to agreements for pilot programs in which the Utility is participating with Bonneville on the date of offering of this Agreement. The rights and obligations of the parties hereunder shall be subject to and governed by this Agreement, including the Exhibits attached hereto. The headings used in this Agreement and in the Exhibits are for convenient reference only and shall not affect the interpretation of this Agreement.

5. *Amendment of Agreement.*—(a) Except as provided in subsections (b), (c), (d), and (i) below, and, except with respect to Utility-Designed Programs established under section 7(f), the provisions of this Agreement may be amended only by mutual written agreement of the parties subsequent to the completion of the following:

(1) Distribution of a copy of the proposed amendment to all Electric Utilities or their representatives for their review and comment;

(2) Good faith negotiations between Bonneville and all Electric Utilities or their representatives pursuant to subsection (h) below; and

(3) Offer of the amendment to all Electric Utilities.

(b) Except for initial offering of Programs, Bonneville may restrict the offering of any amendment if:

(1) [BPA Provision] The Utility fails to achieve the expected units of accomplishment contained in the Utility's implementation goal for any Budget Year under a Program; or

(2) The Utility has been terminated for nonconformance as indicated in section 25(b)(1).

(c) Bonneville may amend Exhibit A to reflect the listing of new, revised, or terminated Programs.

(d) [BPA Provision] If Bonneville determines that any Program presents a health or safety threat to Consumers, Bonneville shall notify all Electric Utilities of the health or safety threat and provide all Electric Utilities with a proposed amendment to remove the health or safety threat. The proposed amendment shall contain such revised terms and conditions as are appropriate. The proposed amendment shall be accompanied by a detailed description of the health and safety threat perceived by Bonneville, together with a list of the scientific, medical, or other references upon which Bonneville has based its conclusions. All Electric Utilities participating in such Program shall have 30 days within which to comment on the proposed amendment. Upon the expiration of such 30-day period, Bonneville shall consider the comments, revise the proposed amendment if appropriate, and provide the amendment to all Electric Utilities. To the extent that the amendment provided by Bonneville causes an increase in cost by the Utility, the amendment shall provide for reimbursing the Utility for such additional reasonable costs.

(d) [NWPPA/ICP Provision] If Bonneville, based upon a finding or determination of a state or federal agency having jurisdiction, determines that any Program presents a health or safety threat to Consumers, Bonneville shall notify all Electric Utilities of the health or safety threat and provide all Electric Utilities with a proposed amendment to remove the health or safety threat. The proposed amendment shall contain such revised terms and conditions as are appropriate. The proposed amendment shall be

accompanied by a detailed description of the health and safety threat perceived by Bonneville, together with a list of the scientific, medical, or other references upon which Bonneville has based its conclusions, and a copy of the agency finding or determination. All Electric Utilities participating in such Program shall have 30 days within which to comment on the proposed amendment. Upon the expiration of such 30-day period, Bonneville shall consider the comments, revise the proposed amendment if appropriate, and provide the amendment to all Electric Utilities. To the extent that the amendment provided by Bonneville causes an increase in cost by the Utility, the amendment shall provide for reimbursing the Utility for such additional reasonable costs.

(e) The parties shall negotiate, pursuant to subsection (a) above, amendments as may be necessary to:

[BPA Provision] (See Section 32.)

(1) [NWPPA/ICP Provision] Permit the Plan adopted by the Council to be effective in the manner and for the purposes set forth in sections 4 and 6 of the Regional Act;

(2) Accommodate the analysis made by the Council as specified in section 4(k) of the Regional Act; and

(3) Accommodate the results of the periodic review of this Agreement, which shall be conducted no less frequently than every five years during the term hereof, and the periodic review of the provisions of each Program, which shall be conducted no less frequently than every two years during the term thereof.

(f) Whenever possible, amendments, other than the initial offering of Programs, shall be offered no later than March 1 of each year.

(g) All amendments shall be effective on the date specified therein.

(h) Representatives from Bonneville and those Electric Utilities that desire to participate shall meet quarterly each year for the purposes of negotiating amendments to or conducting periodic review of this Agreement. Notice of the specific date, time, place, and agenda for such meetings shall be given by Bonneville to all Electric Utilities no later than 15 days prior to such meeting. The Utility shall have the opportunity to add items to the agenda. Upon seven days notice of the time, place and agenda, to all Electric Utilities, Bonneville may call special meetings for the same purposes.

(i) Bonneville may amend a Program to revise the regional Program goal for such Program at any time after it has consulted with the entities referred to in section 8(a) concerning the reasons for such revision.

6. *Exhibits.* Exhibit A (Program Offerings), Exhibit B (Utility-Designed Programs), Exhibit C (Payment Methods), Exhibit D (Form BPA–1418–F, Monthly Financial Summary), and Exhibit E (Provisions Required by Statute or Executive Order) are hereby made a part of this Agreement.

7. *Programs.*—(a) The attached Exhibit A lists all Programs available under this Agreement. Bonneville represents that the Programs listed on Exhibit A have been offered to all Electric Utilities.

(b) Each Program selected by the Utility is attached hereto and incorporated herein by reference, effective upon the date of signing by the Utility. Participation in any Program shall be in such Program as it exists on the date of signing by the Utility.

(c) The parties may develop additional Programs by following the procedures in section 5(a).

(d) Bonneville, in initially offering Programs hereunder and in proposing additional Programs, shall distribute to all Electric Utilities a description of the proposed Program along with an economic evaluation of the Program pursuant to the cost-effective criteria defined in section 3 of the Regional Act.

(e) Notwithstanding this Agreement, Bonneville and the Utility may execute contracts, pursuant to section 6(d) of the Regional Act, to conduct experimental, developmental, demonstration, or pilot projects.

(f) Notwithstanding subsection (c) above, the Utility may, by complying with the procedures and standards set forth in Exhibit B to this Agreement, offer to Bonneville Utility-Designed Programs for implementation within its own service area. Amendments to such Programs shall be by mutual written agreement of the parties. A Utility-Designed Program may be made available to all Electric Utilities by following the procedures in section 5(a).

8. *Implementation Goals.*—(a) *Regional Program Goals.* Each Program shall contain a regional Program goal which estimates the amount of reduction in Electric Power consumption which is achievable in the Region under that Program. Such goal shall be based on Bonneville's best estimate of such amount available in the Region under the Program and Bonneville's projection of the units of accomplishment it expects to be completed under the Program. Bonneville shall consult with the Electric Utilities and other interested entities prior to establishing or revising the goal for any Program.

(b) *Utility Implementation Goal.* Either by May 1 of the initial Budget Year or upon execution of a Program by the Utility if the initial Budget Year is less than five months, the Utility shall submit to Bonneville an implementation goal for accomplishing the reduction in Electric Power consumption achievable in its service area under each Program which the Utility elects to accept. Such goal shall consist of the Utility's best estimate of: (1) the units of accomplishment available in its service area under the Program; and (2) an expected level of implementation specified in terms of units of accomplishment the Utility expects to complete during each Budget Year in its service area during the term of the Program. The Utility shall consult with Bonneville in the development of its goal for implementation of each Program and shall include the expected level of implementation in the budget request for the Program submitted pursuant to section 9(b) for any Budget Year other than the initial Budget Year.

(c) *Consistency Review.* Bonneville, in consultation with the Utility, shall review the implementation goal provided pursuant to subsection (b) above to determine whether the Utility's expected units of accomplishment are consistent with the regional Program goal. Such review shall be completed no later than 60 days after the Utility submits an implementation goal. If Bonneville during such consultation determines that the Utility's implementation goal is consistent with that portion of the regional Program goal which is achievable in the Utility's service area, Bonneville agrees to contract exclusively with the Utility, or with entities approved by the Utility, to achieve reductions in Electric Power consumption under the Program in the Utility's service area for such Budget Year. In making such determination Bonneville shall consider similar programs undertaken by the Utility which achieve comparable savings.

(d) *Revised Implementation Goal.* (1) The Utility may submit a revised implementation goal for any Program at any time. Such revised implementation goal shall be effective for any Budget Year which commences no sooner than five months after the date the Utility submits such revised goal or on a date mutually agreed to by the parties. Bonneville shall review such revised goal in the manner described in subsection (c) above.

(2) To the extent that the Utility's Approved Budget is less than the amont requested by the Utility pursuant to section 9(b), the expected units of

accomplishment in the Utility's implementation goal shall be adjusted to reflect the Utility's Approved Budget.

9. *Submittal and Approval of the Utility's Budget.*—(a) *Initial Budget Request.* Prior to or at the time of the initial offering of a Program, Bonneville shall advise the utility of the allocated share of initial Program funds which Bonneville has established for such Utility. If the Utility accepts the Program and submits a budget request within the 60-day period commencing with the date of offering a Program, the Utility's minimum Approved Budget for the initial Budget Year shall be such Utility's allocated share unless the Utility requests a lower budget amount. During the initial Budget Year all budget requests submitted within the 60-day period shall have priority over all other budget requests. Late budget request submittals shall be considered by Bonneville in order of their receipt.

(b) *Subsequent Budget Requests.* The Utility shall submit all subsequent budget requests to Bonneville by May 1 preceding each Budget Year. Late budget request submittals shall be considered by Bonneville in order of their receipt.

(c) *Budget Approval.* Within 30 days of submittal of a budget request for the initial Budget Year or prior to August 1 before any other Budget Year, Bonneville shall approve the Utility's budget request, approve a portion of the Utility's budget request, or inform the Utility that no funds are currently available. Bonneville may approve less than the Utility's entire budget request if:

(1) There are currently not enough funds available to meet the Utility's budget request and the budget requests of other participating Electric Utilities;

(2) Bonneville has determined that the Utility's budget request does not meet the expected units of accomplishment contained in the Utility's implementation goal;

(3) The Utility's budget request does not meet the requirements of subsection (g) below; or

(4) Bonneville has not completed its review of the Utility's budget request and the requests of other participating Electric Utilities. Bonneville shall advise the Utility in writing of its Approved Budget and inform the Utility of the reasons if less than the Utility's entire budget request is approved.

(d) *Use of Funds.* If Bonneville has approved a portion of the Utility's budget request, such funds shall be used for Measures installed during the next Budget Year unless otherwise agreed by the parties. Subject to the provisions of subsection (a) above, if Bonneville is unable, by reason of subsection (c)(1) above, to meet the entire budget requests of all Electric Utilities participating in a Program, Program funds shall be used for Measures installed during the next Budget Year.

(e) *Reduction of Approved Budget.* If the Utility fails to achieve its expected units of accomplishment during any Budget Year, Bonneville may reduce the Approved Budget during the subsequent Budget Year to reflect the units of accomplishment Bonneville expects the Utility can achieve unless the Utility demonstrates to Bonneville that its failure to achieve its expected units of accomplishment was caused by events beyond its control. Bonneville shall notify the Utility in writing of any reduction of its Approved Budget.

(f) *Budget Adjustments.* (1) If Bonneville is able to increase the Utility's Approved Budget due to a change in the conditions specified in (c)(1) through (c)(4) above, Bonneville shall notify the Utility of its new Approved Budget, based on the amount requested by the Utility pursuant ot subsection (b) above, as soon as possible.

(2) At any time during a Budget Year, the Utility may request a change in its Approved Budget for such year. Bonneville may agree to change the Utility's Approved Budget for such Budget Year. To the extent that Bonneville has approved the budget requests of the Utility and other participating Electric Utilities established pursuant to subsection (a) or (b) above, Bonneville shall approve requests for increases in an Approved Budget by the Utility and other participating Electric Utilities in order of their receipt by Bonneville.

(g) *Budget Submittal Requirements.* All budgets submitted pursuant to this Agreement shall comply with the following requirements:

(1) Budgets shall reflect the expected units of accomplishment contained in the Utility's implementation goal except during the initial Budget Year of a Program and as otherwise agreed by the parties.

(2) Budgets shall separately estimate Utility Costs, Consumer Incentives, and requests for retroactive reimbursement pursuant to section 12.

(3) Budgets shall include nonbinding quarterly estimates of the items specified in (2) above.

(4) Budgets shall conform to any requirements for budget requests contained in a Program.

10. *Limitation of Program Funds.*—(a) Bonneville shall notify the Utility upon determining that the amount of funds available for any Program may be exhausted before the normal termination of such Program. Such notice shall be given no later than 90 days before the date of projected exhaustion of funds. Bonneville, to the extent of its authority, shall use its best efforts to obtain further funds to cover all Program expenses.

(b) Within the total amounts established in the Utility's Approved Budget, Bonneville shall pay for Measures that are completed pursuant to the Program within 60 days following the notice given pursuant to subsection (a) above.

(c) If the available Program funds for a Budget Year are exhausted prior to the Utility completing the work in its Approved Budget, the Program term will be extended as mutually agreed by the parties.

11. *Compensation Levels.*—(a) Compensation levels for Utility Costs and Consumer Incentives for a Program shall be determined according to the terms specified in the Program. Bonneville may request and the Utility shall provide such information on actual Utility Costs and actual costs of Measures installed which a Program specifies should be maintained.

(b) Bonneville and the Electric Utilities participating in a Program shall jointly review the compensation levels for Utility Costs and Consumer incentives on an annual basis. Such review shall consider but not be limited to the following criteria:

(1) Effectiveness of the Program;

(2) Inflation;

(3) Interest rates;

(4) Costs of a Measure;

(5) Cost effectiveness of a Measure; and

(6) Cost of other resources.

Any change in the compensation levels shall be considered an amendment to this Agreement, requiring compliance with section 5(a).

(c) *Special Incentive Level.* The parties recognize the potential need for special incentives over and above regionwide Utility Costs and Consumer Incentives. If and when needed, special incentives will be developed by the amendment process contained in section 5(a).

12. *Payment.*—(a) Subject to sections 9 and 10, Bonneville shall pay the Utility for Measures accomplished on or after the effective date of the applicable Program, the amount determined pursuant to such Program;

(b) Subject to sections 9 and 10, Bonneville shall pay the Utility for measures which are similar to those Measures under the Program selected by the Utility, and which were accomplished under a Utility program

on or after December 5, 1980, and prior to the effective date of the applicable Program, or within another retroactive reimbursement period after the effective date of the Program, specified in such Program, the amount determined pursuant to the following conditions:

(1) A measure must be "similar" to a Measure selected by the Utility under this Agreement. "Similar" means that a measure accomplishes the same purpose as and is comparable to a Measure covered by this Agreement in enough ways that its effectiveness can be evaluated to a reasonable degree of certainty.

(2) [NWPPA Provision] Retroactive reimbursement amounts and the Utility's use of such funds shall be governed by provisions in the applicable Programs; but, in no event, shall the Utility be retroactively reimbursed for Utility Costs.

(2) [BPA/ICP Provision] retroactive reimbursement amounts and the Utility's use of such funds shall be governed by provisions in the applicable Programs.

(3) Retroactive reimbursement amounts for each Measure completed shall be those provided for in the Program Exhibit: (i) when the Program was initially offered to Electric Utilities; or (ii) at the time the measure was completed, whichever comes later.

(4) When the Utility has received funds from Bonneville for the accomplishment of Measures either under the Prior Agreement, under a Utility Designed Program, or under a Bonneville pilot program, no retroactive payments shall be made with respect to such measures.

(5) For measures installed after the date of offering of a Program but before the Utility has executed such Program, retroactive payments shall be made only for those measures which reduce Electric Power consumption to an equal or greater degree than is provided by Measures under the Program, and which otherwise substantially conform to or exceed the Program materials and installation specifications, which are in effect as of the date of installation.

(6) [BPA/NWPPA Provision] Retroactive reimbursement shall be made for measures installed prior to the date the Utility is a party to a firm requirements power sales contract with Bonneville pursuant to the provisions of this section to the extent such measures reduce the load obligations of Bonneville. Bonneville shall apply a ratio to the payment levels contained in the Program for such measures, the numerator being the whole number of years remaining in the useful life of the measure on the date the Utility executes a firm requirements power sales contract with Bonneville and the denominator being the total whole number of years in the useful life of the measure.

(7) The Utility shall request retroactive reimbursement using the same form or format as pertains to the appropriate Program. Such request shall clearly indicate that it is a request for retroactive reimbursement. The Utility shall maintain records that will allow verification of the items that are required under the Program. The Utility shall also maintain supporting documents and records for verification of costs retroactively reimbursed pursuant to this section.

(c)(1) For measures that qualify for retroactive reimbursement pursuant to the subsection (b) above, Bonneville shall pay the amount owing to the Utility in a lump sum or in no more than six equal monthly installments, without interest, commencing on the date Bonnevilles advises the Utility that its claims for retroactive reimbursement have been included in the Utility's Approved Budget.

(2) For Measures accomplished on or after the effective date of a Program, the methods of payment available to the Utility are set forth in Exhibit C. Unless the Utility selects the Letter of Credit payment method, Exhibit C, Table 2, which requires that if the Letter of Credit method is used, all Utility Programs be funded by the Letter of Credit method, the Utility shall select one of the payment methods in Exhibit C for each Program in which the Utility participates. The selected payment method shall be referenced in each Program.

13. [NWPPA/BPA Provision] *Consideration.* The Utility represents and warrants that it is a party to a firm requirements power sales contract with Bonneville. In consideration for Bonneville's payments to the Utility pursuant to the terms and conditions of this Agreement, the Utility agrees to the following:

If the Utility ceases to be a firm requirements power sales customer of Bonneville during the useful life of any Measure accomplished pursuant to this Agreement, the Utility shall return Bonneville's payments to the Utility to the extent provided by the following formula:

$$R = (\text{Bonneville payments to the Utility}) \times \frac{L_m - Y}{L_m}$$

where:
R = reimbursement to Bonneville
L_m = useful life of Measure
Y = number of years expended in useful life.

Reimbursement shall be made in a lump sum payment within three months of termination of the firm requirements power sales contract, or, at the Utility's discretion, in no more than twelve equal monthly installments. If reimbursement is accomplished by installments, interest shall be charged on the outstanding balance at Bonneville's Treasury borrowing interest rate for the period of time between approval of the Utility's budget request for the initial Budget Year pursuant to section 9(c) and the last payment made to the Utility for which reimbursement to Bonneville is being made pursuant to this section.

If the Utility, after initiating such installment payments, executes a firm requirements power sales contract with Bonneville, the Utility shall, from the date of such execution, no longer be obligated to make any further installment payments to Bonneville under this section, and Bonneville shall forgive all remaining installment payments due after the date of such execution.

B. [ICP Provision]

Note.—The ICP's position is that all electric utilities in the Region and thus all Consumers in the Region should be eligible to participate in Bonneville's Conservation Programs. Under this position, no contractual provision regarding "Consideration or Eligibility" is needed, and the BPA/NWPPA definition of "Electric Utility" is not appropriate. The ICP's alternative position is that all electric utilities in the Region, who sign either an exchange contract or a firm power sales contract with Bonneville after passage of the Regional Act, are eligible. With respect to this alternative position, Section 13 of the contract should be entitled "Eligibility" and should read:

13. *Eligibility.* The eligibility of Electric Utilities to enter into this Agreement is limited to those Electric Utilities who, pursuant to section 5 of the Regional Act and on or after August 28, 1981, execute either (1) a firm requirements power sales contract or (2) a residential exchange contract.

If Bonneville rejects these positions and intends to offer consideration language along the lines of what it has proposed in its draft contract, the ICP urges Bonneville to change its language to read as set forth below. In so rewriting Bonneville's draft, the ICP in no way agrees with the concept it presents. The revision would read as follows:

13. *Consideration.* The Utility represents and warrants that it has executed a firm requirements power sales contract with Bonneville pursuant to Section 5 of the Regional Act, on or after August 28, 1981. In consideration for Bonneville's payments to the Utility under this Agreement, the Utility agrees that, if it ceases to be such a firm

requirements power sales customer of Bonneville during the useful life of any Measures accomplished pursuant to this Agreement, the Utility shall return Bonneville's payments to the Utility for those Measures, but only to the extent that Bonneville's payments have not been recovered through its wholesale power rates. Reimbursement shall be made in a lump sum payment within three months of termination of the firm requirements power sales contract, or, at the Utility's discretion, in no more than twelve equal monthly installments. If the Utility thereafter executes a new firm requirements power sales contract with Bonneville, Bonneville shall promptly return to the Utility any such reimbursement it has received from the Utility.

14. *Arrangements with Consumers and Electric Utilities.* The Utility shall not unreasonably discriminate among its Consumers in implementing Programs. Bonneville shall not unreasonably discriminate among Electric Utilities in implementing this Agreement.

15. *Publicity and Advertising.*—(a) Bonneville may inform the general public within the Region of the existence of the Programs encompassed by this Agreement by such means as press releases, speeches, public service announcements, or the like. When applicable, such information shall indicate that the availability of Programs may vary from area to area. To the extent that any such information indicates that the Utility is participating in a Program, Bonneville, prior to its distribution, shall advise the Utility and shall confirm that the Utility is prepared to implement that Program.

(b) In carrying out activities authorized under subsection (a) above, Bonneville shall not:

(1) Directly solicit participation in a Program by the Utility's Consumers; or

(2) Mail informational materials to the Utility's Consumers regarding a Program.

(c) Bonneville may, at its expense and upon request of the Utility, make available to the Utility informational materials regarding the Programs.

(d) Local advertising regarding the Programs available pursuant to this Agreement and all direct distribution of materials to the Utility's Consumers shall be the responsibility of the Utility. The Utility shall advertise or publicize each Program to the extent necessary to stimulate Consumer interest subject to any limitations on expenditures recoverable through rates, established by the Utility's state regulatory body.

(e) The Utility shall not include in any Program advertising or publicity representations concerning (1) warranties; or (2) the terms of financing which are offered to Consumers by Bonneville through the Utility, without Bonneville's prior approval. Any such representations shall be sent to Bonneville for review and shall be deemed approved unless objected to in writing within 15 days after receipt.

(f) Bonneville shall reimburse the Utility for its costs of publicizing and advertising Programs to the extent specified in each Program.

16. *Program Records.*—(a) Records maintained by the Utility for each Program in which the Utility is participating shall contain the information specified in such Program. Unless otherwise specified in a Program, the records shall be maintained by the Utility in a form determined solely by the Utility, so long as the requirements of subsection (b) below are met. The Utility shall keep all records required by each Program for three years after termination of such Program, unless otherwise specified in such Program. Further, the Utility shall provide 90 days' written notice to Bonneville prior to destruction of any such records.

(b) Program records shall be established and maintained in accordance with generally accepted accounting principles consistently applied, and in conformance with applicable laws and Federal regulations, including the provisions of the Privacy Act of 1974. A summary of the system of records developed by Bonneville to comply with the Privacy Act shall be supplied by Bonneville.

17. *Program Reports.* The Utility shall submit to the appropriate Bonneville official, no later than the 10th calendar day of each month, a completed Exhibit C and the appropriate Program schedules, unless otherwise agreed by the parties.

18. *Program Audits.* Bonneville may, upon reasonable notice, conduct such audits, examinations, or inspections of the Utility's Program records, and of the Utility's procedures under the terms of this Agreement as it deems appropriate. The number, timing, and extent of such audits will be at the discretion of Bonneville, may be conducted by Bonneville staff or its designee, and shall be in accordance with audit standards established by the Comptroller General of the United States.

19. [BPA Provision] *Evaluation.* The Utility shall supply Bonneville with information on participating and nonparticipating Consumers in order to evaluate the Programs in which the Utility is participating. Individually identifiable Consumer information shall be made available with the Consumer's permission. The Utility shall assist Bonneville in obtaining such permission from Consumers. Any reasonable additional cost incurred by the Utility in assisting such evaluation shall be reimbursed by Bonneville. When feasible, the Consumer information shall be selected by the use of a valid statistical sampling methodology accepted or provided by Bonneville. Bonneville shall, to the extent practicable, work with the Electric Utilities in developing and implementing Program evaluation procedures.

19. [NWPPA/ICP Provision] *Evaluation.* The Utility shall supply Bonneville with information on participating and nonparticipating Consumers which is reasonably necessary to evaluate adequately the Programs in which the Utility is participating. Individually identifiable Consumer information shall be made available with the Consumer's permission. Each Program shall be evaluated using standards and methods unique to that Program. Any reasonable additional costs incurred by the Utility in assisting such evaluation shall be reimbursed by Bonneville. When feasible, the Consumer information shall be selected by the use of a valid statistical sampling methodology accepted or provided by Bonneville. Bonneville shall, to the extent practicable, work with the Electric Utilities in developing and implementing Program evaluation procedures. Bonneville shall, upon completing the evaluation, distribute the results of the evaluation to the Utility.

20. *Indemnification.* Each party shall indemnify and hold harmless the other party and its respective officers, agents, and employees from and against any and all claims, actions, losses, damages, liability, and expenses, including but not limited to reasonable attorney's fees, arising from such party's negligent or other tortious actions or omissions or those of its officers, agents, or employees.

21. *Disclaimer of Liability.*—(a) Neither Bonneville nor the Utility shall be liable to the other party, or to a Consumer, for the acts or omissions of an independent contractor. Independent contractors participating in any of the Programs under this Agreement shall not be considered officers, agents, or employees of either Bonneville or the Utility.

(b) Independent contractors contracting with the Utility or Bonneville to implement the provisions of this Agreement shall be required to indemnify and hold the Utility and Bonneville harmless for all claims,

damages, losses, and expenses arising from the negligent or other tortious acts or omissions of such independent contractors, their officers, agents, or employees.

22. *Compliance with Law.* This Agreement is subject to the provisions contained in Exhibit E to the extent required by applicable law, regulation, or Executive order.

23. *Notices and Other Communications.* Any notice, request, approval, consent, instruction, or other communication given by either party to the other party shall be in writing and shall be delivered in person or mailed to the address and to the attention of the person specified below:

If to Bonneville: Bonneville Power Administration

_____

_____

Attn: _____

If to the Utility:_____

_____

_____

Attn: _____

Either party may from time to time change such address by giving the other party written notice of such change.

24. *Termination.* (a) The Utility may, for its convenience, terminate this Agreement or terminate its participation in any of the Programs under this Agreement by giving Bonneville 30 days' written notice of such termination. In the event of such termination, the Utility shall use its best efforts to minimize the compensation payable under this Agreement.

(b) Bonneville may terminate this Agreement or a Program hereunder:

(1) If Bonneville determines that the Utility's Program procedures, records, or accounts do not conform with the requirements of this Agreement and that the Utility has failed to correct the nonconformance within a reasonable time after written notice of the nonconformance from Bonneville.

(2) [BPA/NWPPA Provision] If the Utility ceases to be a firm requirements power sales customer as specified in section 13.

(3) [BPA/ICP Provision] Bonneville may, for its convenience, terminate this Agreement or terminate any of the Programs under this Agreement by giving the Utility one year's written notice of such termination. In the event of such termination, the Utility shall use its best efforts to minimize the compensation payable under this Agreement.

[NWPPA Provision]

(c) For reasonable justification, Bonneville may, upon one year's notice to the Utility, terminate any of the Programs which cannot be corrected by amending the Program or amending the cost reimbursement levels of the Program.

25. *Assignment of Agreement.* The Utility may assign any of the rights, benefits, and remedies conferred upon it by this Agreement to a third person or entity, when such assignment would assist the Utility in financing any portion of the cost of a Program being implemented under this Agreement. Any other assignment by the Utility shall not be made without the prior written consent of Bonneville, which consent shall not be unreasonably withheld. All assignments shall be in writing.

26. *Governing Law.* To the extent State law is applicable or is utilized by a court to interpret, implement, or construe this Agreement, the rights and obligations of the parties under this Agreement shall be governed by the laws of the state in which the headquarters of the Utility are located.

[BPA Provision] No section.

27. [NWPPA Provision] *Allocation of Costs.* Bonneville, in establishing rates to recover the costs of Programs, shall take into account the benefits from the reduction in Electric Power consumption under the Programs, in allocating costs to rate groups.

27. [ICP Provision] *Allocation of Costs.* The costs of the Programs, including all Bonneville administrative costs and all payments made by Bonneville to Electric Utilities, Consumers, local entities and others, shall be amortized over a period of years not exceeding the average useful life of Measures. Such amortized amounts shall be recovered by Bonneville through its rates by means of a uniform charge to all kilowatthours sold by Bonneville.

28. *Training.* (a) The Utility shall be responsible for training and qualifying the personnel necessary to implement each Program in accordance with procedures, standards, and certification requirements specified in such Program.

(b) Bonneville shall pay the Utility or the Utility's designee for the cost of training to the extent specified in each Program.

29. *Arrangements With Other Entities.* (1) If the Utility supplies firm power for resale to an entity that has not entered into an Energy Conservation Agreement with Bonneville and that places a load on the Utility which is part of the Utility's firm load under the Utility's firm requirements power sales contract with Bonneville, the Utility may, with prior approval by Bonneville and with consent of such entity, offer any of the Programs to Consumers of such entity.

(2) Bonneville shall have the right to revoke its approval if the power sales contractual relationship between the Utility and the entity changes in such a way so as to decrease the potential for energy savings to Bonneville from Programs.

(3) The terms and conditions of such arrangement shall be determined by the Utility and the entity and shall be consistent with the terms and conditions of this Agreement.

30. [BPA Provision] *Coordination.* Bonneville shall inform the Utility when Programs are offered to third parties within the Utility's service area.

30. [NWPPA/ICP Provision] *Coordination.* Bonneville agrees to inform the Utility when Programs are offered to third parties within the Utility's service area. Further, Bonneville shall in its contracts with third parties, require that such third parties periodically inform the Utility or Program development and implementation in the Utility's service area. The timing and information to be exchanged shall be as agreed to by the Utility and the third party. Programs offered to third parties shall contain the same rights and obligations as similar Programs offered to the Utility.

31. [BPA Provision] *Double Payments.* Notwithstanding any other section of this Agreement, Bonneville shall not be obligated to pay funds on behalf of any Consumer or pay the Utility that portion of any reimbursement which would result in paying more than the actual cost of a Measure, due to payments made or to be made to the Utility or Consumer which originate from another governmental entity. Should the Utility receive, pass through to the Consumer, expect to receive or pass through such payments, or become aware of double payments, it shall notify Bonneville. Bonneville shall then consult with the Utility in determining if any reduction in reimbursements is appropriate.

31. [ICP Provision] *Double Payments.* If the sum of payments made on a Consumer's behalf with respect to a Measure both under a Program and from another governmental source would exceed the actual cost of the Measure, Bonneville may reduce its payment so that only the actual cost is paid on the Consumer's behalf, provided that Bonneville's reduction shall not be greater than the payment from the other governmental source. Should the Utility be aware of such payments, it shall notify Bonneville. Bonneville shall then consult with the Utility to determine if any payment reduction is appropriate,

V 46 / 233 DE 4 81 1 UMI

provided that no reduction shall be made if the Utility has made a contractual commitment with the Consumer concerning payment of the Measure.

31. [NWPPA Provision] *Double Payments.* Bonneville may reduce payment to a Utility or Consumer based on reimbursement from another governmental agency so as to limit the total reimbursement from all governmental sources to the Utility or Consumer to the actual cost of the Measure or the Bonneville Consumer Incentive, whichever is greater. Should the Utility be aware of double payments, it shall notify Bonneville. Bonneville shall then consult with the Utility to determine if reduction of future Consumer Incentives is appropriate.

32. [BPA Provision] *Cooperation with the Council.* The parties will negotiate amendments to this Agreement as may be necessary to permit the plan or program adopted by the Council pursuant to the Regional Act, including but not limited to provisions pertaining to conservation, renewable resources, and fish and wildlife, to be effective in the manner and for the purposes set forth in sections 4 and 6 of the Regional Act.

Program Offerings

1. Shower Flow Restrictor Program
2. Water Heater Wrap Program
3. Street and Area Lighting Efficiency Improvement Program
4. Commercial Conservation Program—Lighting and Water Heating
5. Energy Buy-Back Weatherization Program/Zero Interest Loan Weatherization Program

EXHIBIT B, CONTRACT NO. DE–MS79–81BP, ENERGY CONSERVATION AGREEMENT NOVEMBER 19, 1981

Utility-Designed Programs

1. The Utility may, by submitting the information specified below, request that Bonneville acquire Conservation and direct-application renewable Resources from a Utility-Designed Program:

(a) *General Information.*

(I) Utility's name, address, phone number and the name of the person within the Utility to be contacted regarding the proposal.

(II) A narrative description of the program, identifying:

(A) The measures to be implemented,

(B) The energy use sector (residential, commercial, industrial, agricultural or utility) to which the program is directed,

(C) The end uses affected by the implemented measures,

(D) The date of proposed initiation of the program, and its proposed duration, and

(E) The manner in which the program will be operated and administered.

(b) *Energy Savings Information.* (In responding to these items, the Utility will state all pertinent assumptions and document information sources.)

(I) Provide an estimate of the reliability of the measures to be implemented.

(II) Provide an estimate of the market for the proposed program, including the availability of supplies and the mechanisms for distributing the measures.

(III) Estimate the annual energy savings per measure installed.

(IV) Estimate the useful life of an installed measure.

(VI) Describe when, on an hourly, daily, and seasonal basis, the energy savings produced by installed measures will be expected to occur.

(VII) Describe the means proposed to monitor and verify the energy savings expected to be produced by the program.

(c) *Program Cost Information.* (In responding to these items, the Utility will state all pertinent assumptions and document information sources.)

(I) Provide an annual breakdown, over the expected duration of the program, of the estimated direct costs of implementing the program.

(II) Provide an estimate, in quantitative terms to the extent practicable, of the environmental impacts of the program. To the extent mitigation is proposed with respect to any adverse environmental impacts, estimate the cost of such mitigation.

(III) Describe the type and amount, if any, of financial assistance the Utility intends to provide to Consumers installing measures under the program, and the total cost of installation to the Consumer.

(IV) Describe the amount which the Utility requests that Bonneville pay to it for energy saved by the program.

2. Bonneville shall upon receipt of an application:

(a) Verify the information submitted to it by the Utility. The Utility shall cooperate fully in the verification process;

(b) Conduct such other review of the proposal as may be required by the Regional Act; and

(c) Thereafter, determine whether the proposal is consistent with the Plan or, if no Plan is in effect, consistent with the criteria in section 4(e)(1) and the conditions of section 4(e)(2) of the Regional Act.

3. Within days after receipt of the application, Bonneville shall either:

(a) Accept the application and offer to negotiate a Program; or

(b) Reject the application. A rejection shall be accompanied by an explanation of the reasons therefor.

4. *Protection of Confidential Information.* If the application includes confidential information or trade secrets, the Utility should clearly indicate that this type of information is contained in the application, specifically identify that information, and state that the information is being submitted in confidence. Every reasonable effort will be made by Bonneville to protect this information from disclosure beyond those Bonneville employees or agents involved in reviewing the application, consistent with the Federal Privacy Act, the Federal Freedom of Information Act, and other laws.

5. *Retention of Documents.* Bonneville will retain all documents submitted. The Utility should make a copy for its own records and future reference. Bonneville reserves the right to make copies of any documents submitted to support its program development and resources assessment activities.

EXHIBIT C, TABLE 1, PAGE 1 OF 1, CONTRACT NO. DE–MS79–81BP, ENERGY CONSERVATION AGREEMENT NOVEMBER 19, 1981

Payment Methods

Cost Remibursement Method

1. Payment shall be computed based upon levels of reimbursement specified in each Program.

2. The Utility shall submit monthly to Bonneville a completed Form BPA–1418–F, Monthly Financial Summary, with applicable schedules.

3. Within 30 days of receipt of the Monthly Financial Summary, Bonneville shall reimburse the Utility.

EXHIBIT C, TABLE 2, CONTRACT NO. DE–MS79–81BP, ENERGY CONSERVATION AGREEMENT NOVEMBER 19, 1981

Payment Methods

Letter of Credit Method

1. This is a method whereby Bonneville provides operating funds to the Utility to fund its conservation activities. Funds are provided in advance of actual expenditures by the Utility and provide the Utility with control over its daily financial

operations. This method is available if Bonneville has, or expects to have, a contractual relationship under this Agreement with the Utility which will last one year and involve annual advances aggregating at least $120,000. One letter of credit will be used to provide funding for all Utility Programs. The Utility may utilize the Revolving Working Capital Advance Method of payment until the Letter of Credit Method is fully operational for the Utility.

2. *Duties of the Utility.* (a) The Utility shall notify Bonneville of the name and address of the commercial bank (Bank) which has agreed to receive payment vouchers (TSF 5401) and shall request an amount computed pursuant to Bonneville issued instructions.

(b) The Utility shall submit properly completed signature card (SF 1194) to Bonneville. The Utility shall also submit properly completed payment vouchers to the Bank for the amount of the advance desired. Such payment vouchers shall be submitted to the Bank as close as is administratively possible to the issuance of checks for program disbursements.

(c) The Utility shall make timely reports of cash disbursements and balances to Bonneville.

(d) The Utility shall provide for effective control over and accountability for all Federal funds.

(e) The Utility shall establish internal operating procedures including but NOT limited to:

(1) The correct preparation and distribution of prescribed forms;

(2) Monitoring of drawdowns and reviewing of other financial practices to insure against excessive withdrawals of Federal funds; and

(3) Remedial measures to correct excessive withdrawals of cash.

(f) Subsections (a) through (e) above shall apply to any agent of the Utility authorized to use such letter of credit.

3. *Duties of Bonneville.* (a) Bonneville shall establish the amount of the letter of credit (SF 1193) and record an obligation in its accounts equal to such amount.

(b) Bonneville shall transmit a certified letter of credit and signature card (SF 1194) to the Department of Treasury (DOT). The DOT shall then transmit a letter of credit and signature card to the appropriate Federal Reserve Bank.

(c) Bonneville shall designate one of its own officials as a liaison officer with the DOT.

(d) Bonneville shall furnish instructions to the Utility which provide the procedures for the letter of credit method of payment.

(e) Bonneville shall revoke any unobligated portion of the letter of credit upon determination that the Utility has failed to comply with the instructions referenced in subsection (d) above. A timely reconciliation of expenditures and advances shall be made and disbursement made to the appropriate party.

EXHIBIT C, TABLE 3, CONTRACT NO. DE–MS79–81BP, ENERGY CONSERVATION AGREEMENT, NOVEMBER 19,1981

Payment Methods

Treasury Check Advance Method

1. This is a method whereby Bonneville authorizes advances by direct Treasury check to the Utility immediately prior to disbursement. This method is available when the annual aggregate advance is less than $120,000 or the term of the Program Exhibit does not exceed 1 year.

2. *Duties of the Utility.* (a) The Utility shall request an amount by submitting to Bonneville a completed Form BPA–1418–F, Monthly Financial Summary.

(b) The Utility shall submit a certified monthly estimate of reimbursable expenditures to Bonneville at least 20 days in advance of disbursement. The Utility shall reduce the amount so requested by the amount of any undisbursed advance which is outstanding to the Utility.

(c) The Utility shall deposit the Treasury check and shall limit disbursements to only those for Program expenses incurred.

(d) The Utility shall submit to Bonneville a completed Monthly Financial Summary with applicable schedules showing the amount of Program disbursements made each day, and the dates and amounts of Program advances received.

(e) Within 30 days of revocation of the award the Utility shall return to Bonneville any undisbursed advance funds.

3. *Duties of Bonneville.* (a) Bonneville shall review the Utility's request for an advance and make the necessary award. Bonneville shall record such award as an obligation in its accounts.

(b) Bonneville shall designate a Bonneville employee as Program Officer. The Program Officer shall review payment requests and shall authorize advances as warranted.

EXHIBIT D, CONTRACT NO. DE–MS79–81BP, ENERGY CONSERVATION AGREEMENT, NOVEMBER 19, 1981

Provisions Required by Statute or Executive Order

1. *Contract Work Hours and Safety Standards.* This contract, to the extent that it is of a character specified in the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333), is subject to the following provisions and to all other applicable provisions and exceptions of such Act and the regulations of the Secretary of Labor thereunder.

(a) *Overtime Requirements.* No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers, mechanics, apprentices, trainees, watchmen, and guards shall require or permit any laborer, mechanic, apprentice, trainee, watchman, or guard in any workweek in which he is employed on such work to work in excess of eight hours in any calendar day or in excess of 40 hours in such workweek on work subject to the provisions of the Contract Work Hours and Safety Standards Act unless such laborer, mechanic, apprentice, trainee, watchman, or guard receives compensation at a rate not less than one and one-half times his basic rate of pay for all such hours worked in excess of eight hours in any calendar day or in excess of 40 hours in such workweek, whichever is the greater number of overtime hours.

(b) *Violation; liability for unpaid wages; liquidation of damages.* In the event of any violation of the provisions of subsection (a), the Contractor and any subcontractor responsible therefor shall be liable to any affected employee for his unpaid wages. In addition, such Contractor and subcontractor shall be liable to the United States for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer, mechanic, apprentice, trainee, watchman, or guard employed in violation of the provisions of subsection (a) in the sum of $10 for each calendar day on which such employee was required or permitted to be employed on such work in excess of 8 hours or in excess of his standard workweek of 40 hours without payment of the overtime wages required by subsection (a).

(c) *Withholding for unpaid wages and liquidated damages.* The Administrator may withhold from the Government Prime Contractor, from any moneys payable on account of work performed

by the Contractor or subcontractor, such sums as may administratively be determined to be necessary to satisfy any liabilities of such Contractor or subcontractor for unpaid wages and liquidated damages as provided in the provisions of subsection (b) above.

(d) *Subcontracts.* The Contractors shall insert subsections (a) through (d) of this section in all subcontracts, and shall require their inclusion in all subcontracts of any tier.

(e) *Record.* The Contractor shall maintain payroll records containing the information specified in 29 CFR 516.2(a). Such records shall be preserved for 3 years from the completion of the contract.

2. *Convict Labor.* In connection with the performance of work under this contract, the Contractor agrees not to employe any person undergoing sentence of imprisonment except as provided by Public Law 89-176, September 10, 1965, (18 U.S.C. 4082(c)(2)) and Executive Order 11755, December 29, 1973.

3. *Equal Employment Opportunity.* (The following clause is applicable unless this contract is exempt under the rules, regulations, and relevant orders of the Secretary of Labor (41 CFR, ch. 60)).

During the performance of this contract, the Contractor agrees as follows:

(a) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff, or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Administrator setting forth the provisions of this clause.

(b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(c) The Contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the Administrator, advising the labor union or workers' representative of the Contractor's commitments under this Equal Opportunity clause, and shall post copies of the notice in conspicuous places available to employees and applicants for employemnt.

(d) The Contractor will comply with all provisions of Executive Order No. 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(e) The Contractor will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(f) In the event of the Contractor's noncompliance with the Equal Opportunity clause of this contract or with any of the said rules, regulations, or orders, this contract may be cancelled, terminated, or suspended, in whole or in part, and the Contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, or by rule, regulations, or order of the Secretary of Labor, or as otherwise provided by Law.

(g) The Contractor will include the provisions of paragraphs (a) through (g) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order No. 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; *Provided, however,* That in the event the Contractor becomes involved in or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

4. *Interest of Member of Congress.* No member of or delegate to Congress, or resident commissioner shall be admitted to any share or part of this contract or to any benefit that may arise therefrom, but this provision shall not be construed to extend to this contract if made with a corporation for its general benefits.

5. *Affirmative Action for Handicapped Workers.* (a) The Contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap in regard to any position for which the employee or aplicant for employment is qualified. The Contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified handicapped individuals without discrimination based upon their physical or mental handicap in all employment practices such as the following: Employment upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) The Contractor agrees to comply with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(c) In the event of the contractor's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(d) The contractor agrees to post in conspicuous places, available to employees and applicants for employment notices in a form to be prescribed by the Director, provided by or through the contracting officer. Such notices shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified handicapped employees and applicants for employment, and the rights of applicants and employees.

(e) The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or other contract understanding, that the contractor is bound by the terms of section 503 of the Rehabilitation Act of 1973, and is committed to take affirmative action to employ and advance in employment physically and mentally handicapped individuals.

(f) The contractor will include the provisions of this clause in every subcontract or purchase order of $2,500 or more unless exempted by rules, regulations, or orders of the Secretary issued pursuant to section 503 of the Act, so that such provisions will be binding upon each subcontractor or

vendor. The contractor will take such action with respect to any subcontract or purchase order as the Director of the Office of Federal Contract Compliance Programs may direct to enforce each provisions, including action for noncompliance.

6. *Affirmative Action for Disabled Veterans and Veterans of the Vietnam Era.* (a) The contractor will not discriminate against any employee or applicant for employment because he or she is a disabled veteran or veteran of the Vietman era in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified disabled veterans and veterans of the Vietnam era without discrimination based upon their disability or veterans status in all employment practices such as the following: Employment upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rate of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) The contractor agrees that all suitable employment openings of the contractor which exist at the time of the execution of this contract and those which occur during the performance of this contract, including those not generated by this contract and including those occurring at an establishment of the contractor other than the one wherein the contract is being performed but excluding those of independently operated corporate affiliates, shall be listed at an appropriate local office of the State employment service system wherein the opening occurs. The contractor further agrees to provide such reports to such local office regarding employment openings and hires as may be required.

State and local government agencies holding Federal contracts of $10,000 or more shall also list all their suitable openings with the appropriate office of the State employment service, but are not required to provide those reports set forth in paragraphs (d) and (e).

(c) Listing of employment openings with the employment service system pursuant to this clause shall be made at least concurrently with the use of any other recruitment source or effort and shall involve the normal obligations which attach to the placing of a bona fide job order, including the acceptance of referrals of veterans and nonveterans. The listing of employment openings does not require the hiring of any particular job applicant or from any particular group of job applicants, and nothing herein is intended to relieve the contractor from any requirements in Executive Orders or regulations regarding nondiscrimination in employment.

(d) The reports required by paragraph (b) of this clause shall include, but not be limited to, periodic reports which shall be filed at least quarterly with the appropriate local office or, where the contractor has more than one hiring location in a State, with the central office of that State employment service. Such reports shall indicate for each hiring location (1) the number of individuals hired during the reporting period; (2) the number of nondisabled veterans of the Vietnam era hired; (3) the number of disabled veterans of the Vietnam era hired; and (4) the total number of disabled veterans hired. The reports should include covered veterans hired for on-the-job training under 38 U.S.C. 1787. The contractor shall submit a report within 30 days after the end of each reporting period wherein any performance is made on this contract identifying data for each hiring location. The contractor shall maintain at each hiring location copies of the reports submitted until the expiration of one year after final payment under the contract, during which time these reports and related documentation shall be made available, upon request, for examination by any authorized representatives of the contracting officer or of the Secretary of Labor. Documentation would include personnel records respecting job openings, recruitment and placement.

(e) Whenever the contractor becomes contractually bound to the listing provisions of this clause, it shall advise the employment service system in each State where it has establishments of the name and location of each hiring location in the State. As long as the contractor is contractually bound to these provisions and has so advised the State system, there is no need to advise the State system of subsequent contracts. The contractor may advise the State system when it is no longer bound by this contract clause.

(f) This clause does not apply to the listing of employment openings which occur and are filled outside of the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands.

(g) The provisions of paragraphs (b), (c), (d), and (e) of this clause do not apply to openings which the contractor proposed to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement. This exclusion does not apply to a particular opening once an employer decides to consider applicants outside of his own organization or employer-union arrangement for that opening.

(h) As used in this clause:

(1) "All suitsable employment openings" includes, but is not limited to, openings which occur in the following job categories: Production and nonproduction; plant and office; laborers and mechanics; supervisory and nonsupervisory; technical; and executive, administrative, and professional openings as are compensated on a salary basis of less than $25,000 per year. This term includes full-time employment, temporary employment of more than 3 days' duration, and part-time employment. It does not include openings which the contractor proposed to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement nor openings in an educational institution which are restricted to students of that institution. Under the most compelling circumstances an employment opening may not be suitable for listing, including such situations where the needs of the Government cannot reasonably be otherwise supplied, where listing would be contrary to national security, or where the requirement of listing would otherwise not be for the best interest of the Government."

(2) "Appropriate office of the State employment service system" means the local office of the Federal-State national system of public employment offices with assigned responsibility for serving the area where the employment opening is to be filled, including the District of Columbia, Guam, Puerto Rico, and the Virgin Islands."

(3) "Openings which the contractor proposed to fill from within his own organization" means employment openings for which no consideration will be given to persons outside the contractor's organization (including any affiliates, subsidiaries, and the parent companies) and includes any openings which the contractor proposed to fill from regularly established "recall" lists."

(4) "Openings which the contractor proposes to fill pursuant to a customary and traditional employer-union hiring arrangement" means employment openings which the contractor proposes to fill from union halls, which is part of the customary and traditional hiring relationship which exists between the contractor and representatives of his employees."

(i) The contractor agrees to comply with the rules, regulations, and relevant

V 4 6 / 2 3 3 D E 4 8 1 UMI

orders of the Secretary of Labor issued pursuant to the Act.

(j) In the event of the contractor's noncompliance with the requirements of this clause, actions for concompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(k) The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices in a form to be prescribed by the Director, provided by or through the contracting officer. Such notice shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era for employment, and the rights of applicants and employees.

(l) The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or other contract understanding, that the contractor is bound by the terms of the Vietnam Era Veterans Readjustment Assistance Act, and is committed to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era.

(m) The contractor will include the provisions of this clause in every subcontract or purchase order of $10,000 or more unless exempted by rules, regulations, or orders of the Secretaty issued pursuant to the Act, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the Director of the Office of Federal Contract Compliance Programs may direct to enforce such provisions, including action for noncompliance.

7. *Utilization of Minority Business Enterprises.* (a) It is the policy of the Government that minority business enterprises shall have the maximum practicable opportunity to participate in the performance of Government contracts.

(b) The Contractor agrees to use his best efforts to carry out this policy in the award of his subcontracts to the fullest extent consistent with the efficient performance of this contract. As used in this contract, the term "minority business enterprise" means a business, at least 50 percent of which is owned by minority group members or, in case of publicly owned businesses, at least 51 percent of the stock of which is owned by minority group members. For the purposes of this definition, minority group members are Negroes, Spanish-speaking American persons, American-Orientals, American-Indians, American-Eskimos, and American Aleuts. Contractors may rely on written representations by subcontractors regarding their status as minority business enterprises in lieu of an independent investigation.

8. *Small Business Concerns.* (a) It is the policy of the United States that small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals shall have the maximum practicable opportunity to participate in the performance of contracts let by any Federal agency.

(b) The contractor hereby agrees to carry out this policy in the awarding of subcontracts to the fullest extent consistent with the efficient performance of this contract. The contractor further agrees to cooperate in any studies or surveys as may be conducted by the United States Small Business Administration or the awarding agency of the United States as may be necessary to determine the extent of the contractor's compliance with this clause.

(c) As used in this contract, the term, "small business concern" shall mean a small business as defined pursuant to section 3 of the Small Business Act (15 USCS Section 632) and relevant regulations promulgated pursuant thereto. The term "small business concern owned and controlled by socially and economically disadvantaged individuals" shall mean a small business concern—

(1) Which is at least 51 per centum owned by one or more socially and economically disadvantaged individuals; or, in the case of any publicly owned business, at least 51 per centum of the stock of which is owned by one or more socially and economically disadvantaged individuals; and

(2) Whose management and daily business operations are controlled by one or more of such individuals.

The contractor shall presume that socially and economically disadvantaged individuals include Black Americans, Hispanic Americans, Native Americans, and other minorities, or any other individual found to be disadvantaged by the Administration pursuant to section 8(a) of the Small Business Act (15 USCS section 637(a)).

(d) Contractors acting in good faith may rely on written representations by their subcontractors regarding their status as either a small business concern or a small business concern owned and controlled by socially and economically disadvantaged individuals.

9. *Certification of Nonsegregated Facilities.* (Applicable to (1) contracts; (2) subcontracts; and (3) agreements with applicants who are themselves performing federally assisted construction contracts, exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity clause.)

By the submission of this bid, the bidder, offeror, applicant, or subcontractor certifies that he does not maintain or provide for his employees any segregated facilities at any of his establishments, and that he does not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. He certifies further that he will not maintain or provide for his employees any segregated facilities at any of his establishments, and that he will not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. The bidder, offeror, applicant, or subcontractor agrees that a breach of this certification is a violation of the Equal Opportunity clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants, and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, creed, color, or national origin, because of habit, local custom, or otherwise. He further agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity clause; that he will retain such certifications in his files; and that he will forward the following notice to such proposed subcontractors (except where the proposed subcontractors have submitted identical certifications for specific time periods).

10. *Notice to Prospective Subcontractors of Requirement for Certifications of Nonsegregated Facilities.* Certification of Nonsegregated Facilities must be submitted prior to the award of a subcontract exceeding $10,000 which is not exempt from the provisions of the Equal Opportunity clause. The certification may be submitted either for

each subcontract or for all subcontracts during a period (i.e., quarterly, semiannually, or annually).

11. *Administrator's Obligations Not General Obligations of the United States.*

All offerings of obligations, and all promotional materials for such obligations, which may be offered by the Utility to finance Measures installed pursuant to this Agreement shall include the language contained in the second sentence of subsection 6(j)(i) of the Regional Act.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited.

Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last Listing December 3, 1981

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

59934 **Surface Mining** Interior/SMREO suspends self-bonding and surface protection bonding rules. (Part VI of this issue)

59643 **Continental Shelf** Interior/GS temporarily closes application period for certified verification agents.

59537 **Hazardous Waste Management** EPA issues summary of petitions on system established by Resource Conservation and Recovery Act.

59630 **Air Pollution Control** EPA announces release of draft control techniques guidelines for large petroleum dry cleaners and synthetic organic chemical, polymer, and resin manufacturing equipment.

59550 **Noise Control—Highways and Roads** DOT/FHWA proposes to revise procedures for abatement of traffic and construction noise.

59533 **Highways and Roads** DOT/FHWA revises requirements for participation in Federal-Aid Research and Development Program.

59545 **Motor Carriers** ICC adopts accounting principles for intangible assets.

59689 **Motor Vehicle Safety** DOT/NHTSA removes reference to pedals from definition of mopeds.

59638 **Federal Reserve System** FRS publishes Federal Open Market Committee Domestic Policy Directive of October 5–6, 1981.

59547 **Foreign Trade Agreements** Trade Representative issues proposal on submission of representations by foreign countries on alleged barriers to trade.

59930 **Grain Elevators** USDA/AMS proposes to require warehousemen to file annual financial statements. (Part V of this issue)

Rules and Regulations

Federal Register
Vol. 46, No. 234
Monday, December 7, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

7 CFR Part 201

Federal Seed Act Regulations; Changes in Botanical Names, Testing Methods and Certification Standards

Correction

In FR Doc. 81-31459 appearing on page 53634 in the issue of Thursday, October 29, 1981, make the following corrections:

Under the amendments to Table 2 of § 201.58(c), in the third column of page 53639, in the seventh line, "supsp. unguiculata" should have read "subsp. unguiculata."

In Table 5 to § 201.76, on page 53640, the entry for "Triticale; Registered; Land" now reading "7 7" should have read "7 1."

BILLING CODE 1505-01-M

Animal and Plant Health Inspection Service

9 CFR Parts 71 and 83

Screwworms; Lifting of Restrictions

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document relieves restrictions no longer deemed necessary to prevent the spread of screwworms (myiasis) in the United States. Surveillance activity indicates that screwworm infestations no longer occur in the United States. This action removes regulations no longer considered necessary for the control of recurring screwworm infestations and identifies recurring screwworm infestations as a disease not known to exist in the United States rather than a disease which is endemic to the United States.

EFFECTIVE DATE: January 6, 1982.

FOR FURTHER INFORMATION CONTACT: Dr. Floyd E. Smith, USDA, APHIS, VS, Room 733, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8233.

SUPPLEMENTARY INFORMATION: This action has been reviewed in conformance with Executive Order 12291, and has been determined to be not a "major rule." The Department has determined that this rule will not have an annual effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and should have no adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

On Wednesday, July 15, 1981, there was published in the **Federal Register** (46 FR 36711-36712), proposed amendments to the regulations (9 CFR Parts 71 and 83) to remove regulations no longer considered necessary for the control of recurring screwworm infestations and to identify recurring screwworm infestations as a disease not known to exist in the United States rather than a disease which is endemic to the United States.

A 60-day comment period was provided for receipt of comments which expired on September 14, 1981. No comments were received.

There is no feasible alternative to this final rule. Surveillance activity indicates that screwworm infestations no longer occur in the United States. Therefore, this final rule relieves restrictions no longer deemed necessary to prevent the spread of screwworms (myiasis) in the United States.

This document amends 9 CFR Part 71, to reflect the change in status of recurring screwworm infestations from a disease endemic to the United States to a disease not known to exist in the United States and removes Part 83 from Title 9, Code of Federal Regulations (9 CFR).

Screwworms are obligate parasites of all warmblooded animals. The larvae feed in wounds of living warmblooded animals causing severe tissue damage and oftentimes death if untreated.

A Federal program to eradicate the pest from the southeastern part of the country using the sterile fly technique was successful in 1958 to 1959. Another campaign to free the southwestern States was declared successful in 1964 to 1965; however, migrations of wild flies from Mexico continued to reinfest the United States in spite of a barrier of sterile flies maintained along the common border between the two countries. The Government of Mexico and the United States entered into a Cooperative Agreement in 1972 to eradicate screwworms from Mexico down to the Isthumus of Tehuantepec and there reestablish the barrier.

The joint program has succeeded to the point that recurring screwworm infestations have been eliminated from the United States and infestations in Mexico have been pushed sufficiently far south to provide protection to the United States.

Currently, Part 83 states that screwworm infestations usually exist from April 15 through November 30 of each year in portions of the States of Arizona, California, New Mexico, and Texas, as designated in paragraphs (a), (b), (c), and (d) of section 83.2 (9 CFR, Part 83.2). This action removes the restrictions presently imposed on these areas.

Also, Part 71.3(a) identifies "screwworms" as a disease endemic to the United States. Any animals or poultry affected by such diseases are not permitted to be moved interstate. The Department maintains surveillance for screwworm infestations in the United States. During Fiscal Year 1980, only two cases of screwworms occurred in the country. During Fiscal Year 1981, only three cases involving five animals occurred in this country. These cases were individual and isolated, and no further cases occurred following treatment with sterile flies, the Screwworm Adult Suppression System (SWASS), and animal and herd treatment.

This action removes Part 83 from Title 9, Code of Federal Regulations and deletes the word "screwworms" from § 71.3(a) and adds the word "screwworms" to § 71.3(b), thereby identifying "screwworms" as a disease not known to exist in the United States. Animals and poultry affected by such

diseases are also prohibited from moving interstate. The change simply reflects the fact that screwworm infestations are no longer considered by the Department to be endemic to the United States.

Part 71 of the regulations contains general provisions relating to the interstate transportation of animals (including poultry) and animal products. Section 71.3 generally prohibits the interstate movement of diseased animals and poultry with certain limited exceptions not applicable to screwworms. Section 71.3(f) requires anyone that transports livestock interstate to exercise "reasonable diligence" to ascertain whether such animals or poultry are affected with any contagious, infectious, or communicable disease, or have been exposed to the contagion or infection of such disease. . ."

The differences between Part 71 and Part 83 can be viewed as a lessening of the regulatory burden on livestock owners and shippers. However, if outbreaks of screwworms become widespread once more, the lack of strict procedures to control them could result in severe losses for these same owners and shippers. The applicable laws and regulations (9 CFR 71.2), however, do provide the Secretary with authority to issue quarantines, if he deems them necessary. Such quarantines should be adequate to control any outbreaks of screwworms.

Accordingly, Parts 71 and 83, Title 9, Code of Federal Regulations, are amended in the following respects.

PART 71—GENERAL PROVISIONS

§ 71.3 [Amended]

1. In § 71.3(a), the word "screwworms" is deleted.

2. In § 71.3(b), the word "screwworms" is added after the term "vesicular exanthema," and before the words "and glanders."

PART 83—SCREWWORMS [REMOVED]

3. 9 CFR Part 83—Screwworms, is removed in its entirety.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264 and 1265, as amended; (21 U.S.C. 111–113, 115, 117, 120, 123–126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141)

Done at Washington, D.C., this 1st day of December 1981.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

[FR Doc. 81-34894 Filed 12-4-81; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. 21905, Special Condition No. 25-102-NM-7]

Special Conditions: Cessna Model 650 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to Final Special Conditions.

SUMMARY: This amendment corrects errors made when the special conditions for the Cessna 650 series airplane were printed in the **Federal Register** (46 FR 51729) on October 22, 1981. This amendment is required to complete the description of the altitude depressurization requirements which were inadvertently omitted from Special Conditions No. 25-102-NM-7. Additionally, the Code of Federal Regulations citation is corrected to 14 CFR Part 25.

EFFECTIVE DATE: November 23, 1981.

FOR FURTHER INFORMATION CONTACT: Iven Connally, Lead Region Staff, FAA Northwest Mountain Region, FAA Building, Boeing Field, Seattle, Washington 98108. Telephone (206) 767-2565.

SUPPLEMENTARY INFORMATION: When final Special Conditions No. 25-102-NM-7 were published, Figures 3 and 4 were inadvertently omitted. These illustrations provide the necessary design criteria for the Cabin repressurization system. Also, the Code of Federal Regulations citation was published as 14 CFR Part 21. The correct citation is 14 CFR Part 25.

PART 25—AIRWORTHINESS STANDARDS; TRANSPORT CATEGORY AIRPLANES

Adoption of the Amendment

Accordingly, Part 25 of the Federal Aviation Regulations (14 CFR Part 25) is amended to include Figures 3 and 4.

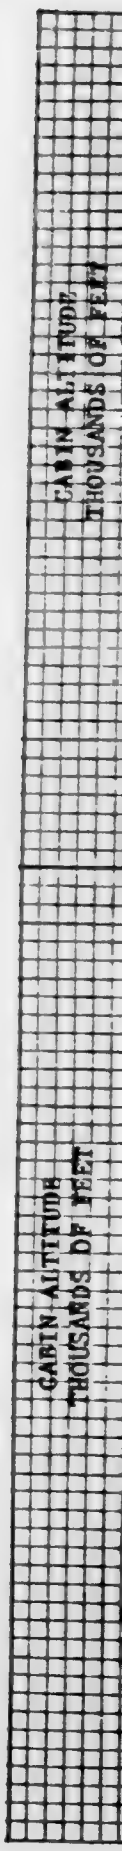
Note.—The FAA has determined that this document involves a regulation which is not a major rule under Executive Order 12291 or a significant regulation under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). Since this regulatory action corrects an inadvertent omission and does not make a substantive change, the anticipated impact is so minimal that it does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on November 25, 1981.

M. Craig Beard,

Director of Airworthiness.

BILLING CODE 4910-13-M



[FR Doc. 81-34
BILLING COD

For Figures 3 and 4, time starts at the moment cabin altitude exceeds 8,000 feet during depressurization. Areas wherein the actual cabin altitude–time history falls below the curve may be used to compensate, by integration, for areas wherein the actual cabin altitude–time history reasonably exceeds the curve. Time is concluded when cabin altitude returns to 8,000 feet.

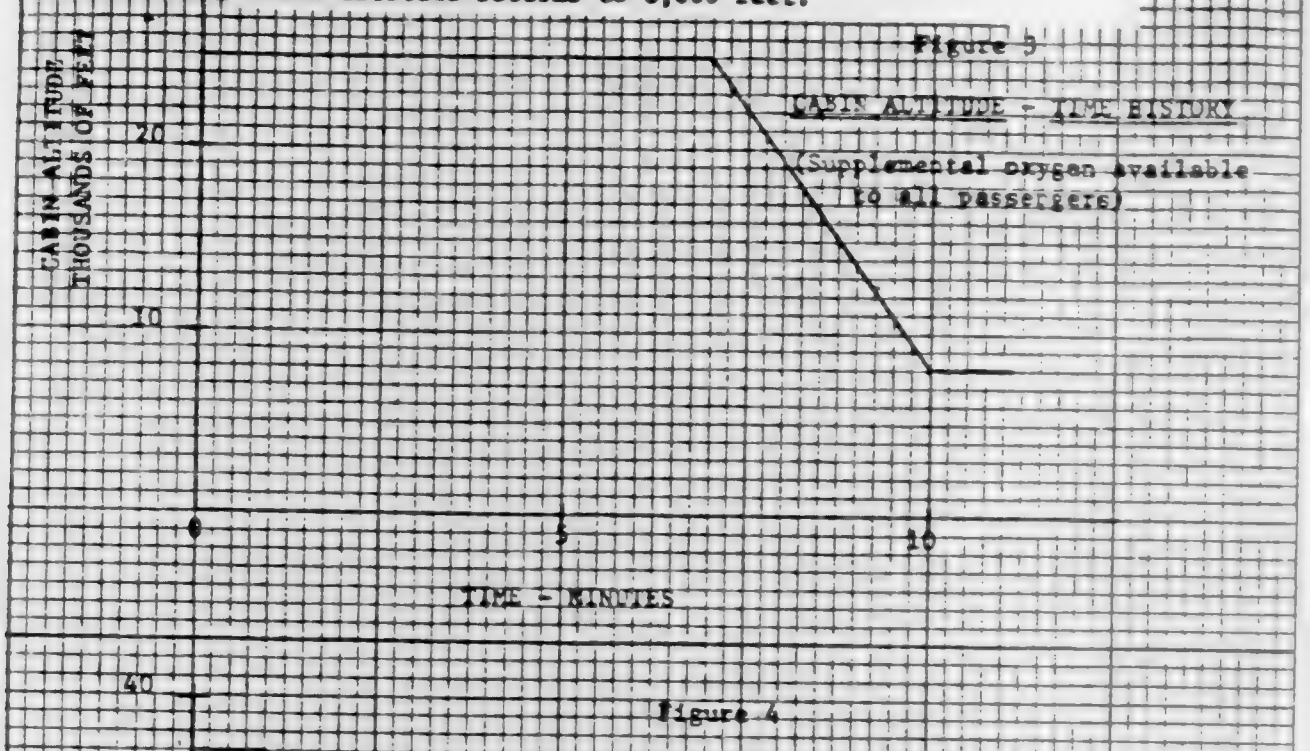

Figure 4

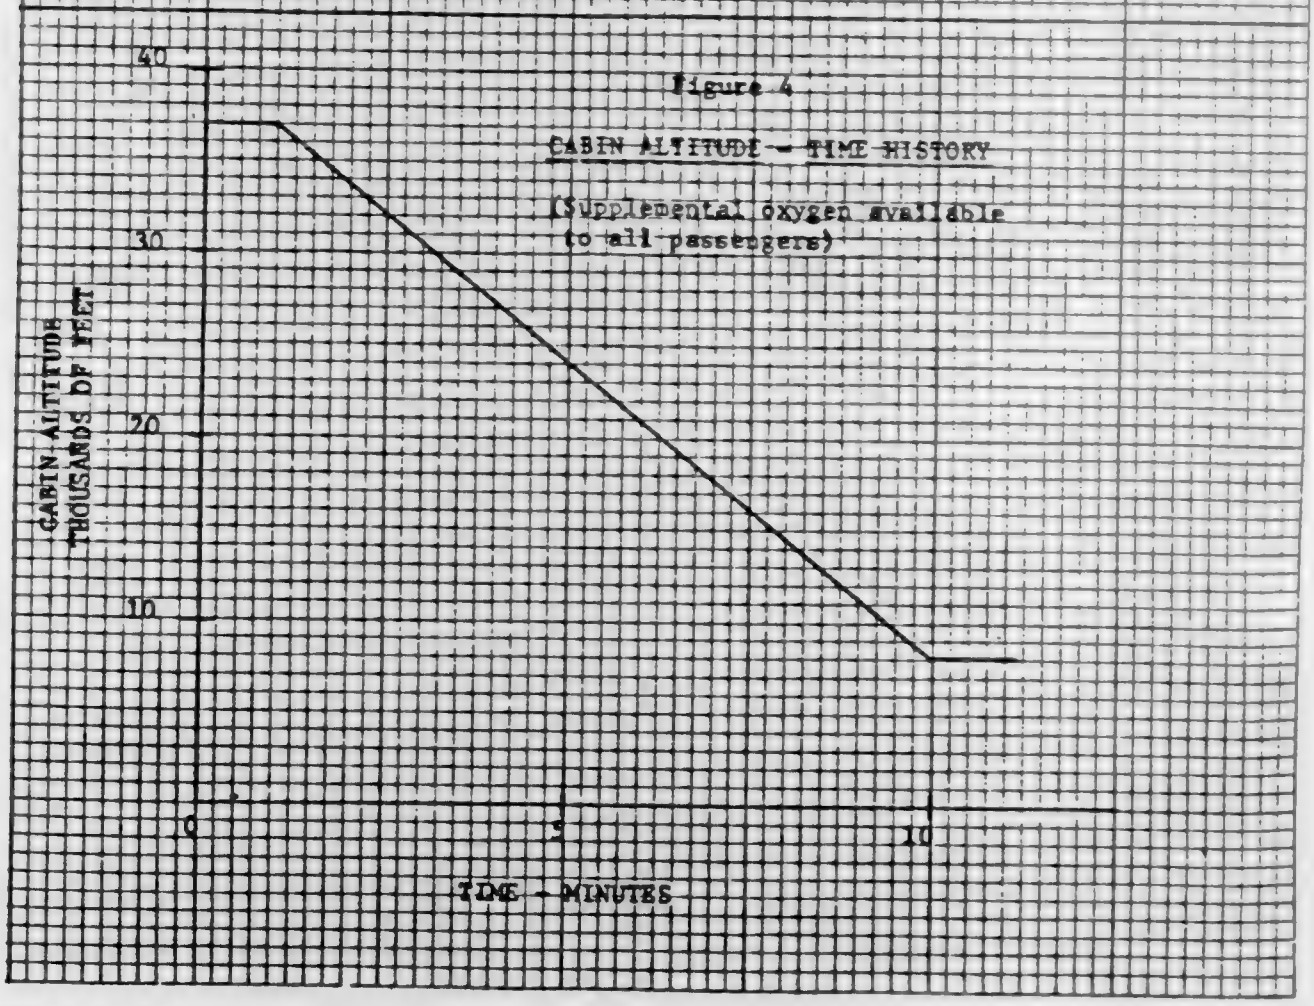

[FR Doc. 81-34929 Filed 12-4-81; 8:45 am]
BILLING CODE 4910-13-C

14 CFR Part 39

[Docket No. 81-EA-67; Amdt. 39-4272]

Airworthiness Directives; Piper PA-38-112

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This directive amends Airworthiness Directive (A.D.) 81-04-07 applicable to Piper PA-38-112 fin forward spar assemblies and fuselage bulkhead assemblies. This A.D., which requires the inspection and repair, if necessary, of the fin forward spar assembly and the fuselage bulkhead assembly, is amended to limit its requirements to aircraft S/N 38-78A0001 through 38-80A0198. This amendment is made to reflect the modifications made by Piper Aircraft Corp. to these assemblies in 1981 and subsequent models.

EFFECTIVE DATE: December 9, 1981. Compliance is required as set forth in the A.D.

ADDRESSES: Piper Service Bulletins may be acquired from the manufacturer at Piper Aircraft Corporation, 820 East Bald Eagle Street, Lock Haven, Pennsylvania 17745.

FOR FURTHER INFORMATION CONTACT: J. Maher, Airframe Section, AEA-212, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Tel. 212-995-2875.

SUPPLEMENTARY INFORMATION: This A.D. was originally prompted to avoid possible hazards in flight associated with cracks in the fin forward spar, P/N 77601-03, and the fuselage bulkhead assembly, P/N 77553-02. The original A.D. applied to all PA-38-112 aircraft.

It has now been determined that this A.D. is not necessary in 1981 and subsequent models of this aircraft because of modifications made to the fin forward spar and fuselage bulkhead assemblies.

In view of the fact that this amendment relaxes present requirements, and imposes no additional burdens on anyone, notice and public procedure are unnecessary and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Section 39.13 of Part 39 of the Federal Aviation Regulations, 14 CFR 39.13 is amended, by amending AD 81-04-07 as follows:

Amend AD 81-04-07 as follows:

(a) In the applicability section, insert after Model PA-38-112 "Serial Nos. 38-78A0001 thru 38-80A0198."

Effective Date: This amendment is effective December 9, 1981.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, 1423, and 1431(b); Sec. 6(c), Dept. of Trans. Act, 49 U.S.C. 1655(c) and 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this regulation is an emergency regulation that is not major under Executive Order 12291. It has been further determined that this document involves an emergency regulation under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified above under the caption "For Further Information Contact."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the court of appeals of the United States or the United States Court of Appeals for the District of Columbia.

Issued in Jamaica, New York, on November 25, 1981.

Timothy L. Hartnett,

Acting Director, Eastern Region

[FR Doc. 81-34932 Filed 12-4-81; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 81-SO-66]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Designation of Transition Area, Parsons, Tennessee

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This rule designates the Parsons, Tennessee, Transition Area and lowers the base of controlled airspace from 1200 to 700 feet AGL in the vicinity of Scott Municipal Airport. This action, which was inadvertently omitted in 1980, provides controlled airspace protection for aircraft instrument flight operations at the airport.

DATES: Effective date: 1900 G.m.t., November 20, 1981; comments on the rule must be received before January 10, 1982.

ADDRESSES: Send comments on the proposal to:

Federal Aviation Administration, Attn: Chief, Airspace and Procedures Branch, ASO-530, P.O. Box 20636, Atlanta, Georgia 30320

The official public docket will be available for examination in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Harlen D. Phillips, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On January 24, 1980, the FAA authorized use of the VOR/DME-A standard instrument approach procedure utilizing the Jacks Creek VORTAC for aircraft at Scott Municipal Airport, Parsons, Tennessee. Designation of the required controlled airspace for protection of aircraft instrument flight operations at the airport was inadvertently omitted. This rule corrects the deficiency. In conjunction with the issuance of this rule, a Notice to Airmen was issued which advised of the existence of the Parsons, Tennessee, 700-foot Transition Area.

Request for Comments on the Rule

Although this action is in the form of a Final Rule and was not preceded by notice and public procedure, comments are invited on the rule. The FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, rulemaking proceedings will be initiated to amend the regulation.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations designates the Parsons, Tennessee, 700-foot Transition Area. Under the circumstances presented, the FAA concludes that there is an immediate need for a regulation to provide controlled airspace for protection of instrument flight operations in the vicinity of Scott Municipal Airport. Therefore, I find that notice or public procedure under 5 U.S.C. 553 is impractical and good cause exists for

making the rule effective in less than thirty days of publication.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181, Subpart G, of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (and amended) (46 FR 540) is further amended, effective 1900 G.m.t., November 20, 1981, by adding the following:

Parsons, Tennessee

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Scott Municipal Airport (Lat. 35°38'20"N., Long. 88°07'43"W.), excluding the portion within the Lexington, Tennessee, transition area.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), sec. 6(c), Dept. of Trans. Act (49 U.S.C. 1655(c)))

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a major rule under Executive Order 12291; (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

This action involves only a small alteration of navigable airspace and air traffic control procedures over a limited area.

Issued in East Point, Georgia, on November 20, 1981.

George R. LaCaille,

Acting Director, Southern Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 80-AGL-52]

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: On July 16, 1981, the Federal Aviation Administration published in the **Federal Register** (46 FR 36837), FR Doc. 81-20793, the establishment of a transition area near Ortonville, Minnesota, to be effective October 1, 1981. The nature of this action is to correct discrepancies subsequently noted in the Ortonville, Minnesota, transition area description.

EFFECTIVE DATE: January 21, 1982.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to make minor revisions to the Ortonville, Minnesota, transition area description so as to better correlate the area to be charted with areas currently charted in regards to arc definition and latitude coordinates associated with airspace extending upward from 1200 feet above the surface.

Discussion of Comments

On page 12004 of the **Federal Register** dated February 12, 1981, the Federal Aviation Administration published a Notice of Proposed Rulemaking which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Ortonville, Minnesota. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the notice of proposed rulemaking.

Adoption of Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective January 21, 1982 as follows:

In § 71.181 (46 FR 540) the following transition area is added:

Ortonville, Minnesota

That airspace extending upward from 700' above the surface within 6.5 miles of the Ortonville Municipal Airport (latitude 45°18'05" N, longitude 96°25'25" W), extending south 3 miles either side of the 182° bearing from Ortonville Municipal Airport from 6.5 to 8.5 miles, and that airspace extending upward from 1200' above the surface from 45°57'30" N, 97°01'00" W, counterclockwise along the 28 mile arc of the Wahpeton, North Dakota Airport to the Minnesota State Line; thence south along the Minnesota State Line; to 44°32'30" N, excluding that portion that overlies the Ortonville Municipal Airport 700-foot transition area; thence west to 44°33'00" N, 96°45'00" W; thence northwest to 44°40'30" N, 96°50'00" W, thence counterclockwise along the 26-mile arc of the Watertown, South Dakota, VOR to the Watertown 086° radial; thence west to the 14.5 mile point on the Watertown 086° radial; thence counterclockwise on the 14.5 mile arc of the Watertown VOR to the Watertown 001° radial; thence north to the point of beginning.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.61 of the Federal Aviation Regulations (14 CFR 11.61))

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on November 18, 1981.

Paul K. Bohr,

Acting Director, Great Lakes Region.

BILLING CODE 1505-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 8959]

RSR Corporation; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order reopens the proceeding and modifies the Commission's order issued on December 2, 1976 (42 FR 4; 88 F.T.C. 800), so as to relieve respondent of the obligation of divesting the lead recycling plants specified in the original order, since no purchaser(s) could be found. Among other things, the modified order requires respondent to timely divest or auction at no minimum price all the assets and properties (with certain specified exceptions) constituting the lead recycling plants in Dallas, Texas and Seattle, Washington; and offer to license all of its patented sulphur removal and battery recycling process to a qualified purchaser(s).

DATES: Order issued December 2, 1976. Modifying order issued November 13, 1981.

FOR FURTHER INFORMATION CONTACT: FTC/CC, Selig Merber, Washington, D.C. 20580. (202) 376-2891.

SUPPLEMENTARY INFORMATION: In the Matter of RSR Corporation, a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, and appearing at 42 FR 4, remain unchanged.

The Order Modifying Order To Divest and To Cease and Desist, including further order requiring report of compliance therewith, is as follows:

On April 17, 1981, respondent RSR Corporation filed a "Petition for Relief From Divestiture Order," seeking to be relieved of its obligation to divest Quemetco, Inc. on the ground that it has been unable to find an acquirer for Quemetco's lead recycling plants at any price. Based upon respondent's petition, supplemental information submitted by respondent, and other information available to it, the Commission has determined that it is in the public interest to reopen and modify the order in this case. The Commission also has considered a draft agreement between its staff and respondent concerning modification of the order and has determined that the agreed-to modification is in the public interest. Accordingly,

It is ordered, That the proceeding be, and it hereby is, reopened.

It is further ordered, That Paragraphs I, II and VII of the Final Order to divest and to cease and desist issued by the Commission on December 2, 1976 be, and they hereby are, modified to read as follows:

I.

It is ordered, That Respondent, RSR Corporation (hereinafter "RSR"), a corporation, and its officers, directors, agents, representatives, employees, subsidiaries, affiliates, successors and assigns, shall divest all assets, title, properties, interest, rights and privileges, of whatever nature, tangible and intangible, including without limitation all buildings, machinery, equipment, customer lists, and other property of whatever description that comprise the lead recycling plants owned by RSR subsidiaries in Dallas, Texas and Seattle, Washington, except as listed in Appendix A hereto. The plants may be divested either as a unit or separately. In the event that divestiture is not accomplished by other means, RSR must auction the plants, at no minimum price, to an acquirer or acquirers who represent that the plants will be used as lead recycling plants. The divestiture required by this Paragraph shall be absolute, shall be accomplished no later than one (1) year from the date when this modified order shall become final, and shall be subject to the prior approval of the Federal Trade Commission.

II.

It is further ordered, That such divestiture shall be accomplished absolutely and in good faith to an acquirer or acquirers approved in advance by the Federal Trade Commission so as to transfer the plants as operable and viable plants engaged in the production of recycled bulk lead, lead alloys and lead products. RSR shall grant to the acquirer or acquirers of the plants ordered to be divested under this order, at the option of such acquirer or acquirers, a non-exclusive license, subject to a reasonable royalty not to exceed 2 percent, to all of RSR's patented sulphur removal and battery recycling processes; *provided, however,* That in the event the acquirer of either of the plants to be divested is a battery manufacturer RSR shall only be required to grant such patent licenses to such an acquirer for use at the acquired plant; and *further provided,* That RSR is not required to grant such licenses to an acquirer that is a primary lead producer.

VII.

It is further ordered, That within thirty (30) days from the effective date of this modified order and every sixty (60) days thereafter until it has fully complied with Paragraph I of this modified order, RSR shall submit a verified report in writing to the Federal Trade Commission setting forth in detail the manner and form in which it intends to comply, is complying or has complied therewith. All such reports shall include, in addition to such other information and documentation as may hereafter be requested, (a) a specification of the steps taken by RSR to make public its desire to divest the Dallas, Texas and Seattle, Washington plants, (b) a list of all persons or organizations to whom notice of divestiture has been given, (c) a summary of all discussions and negotiations together with the identity and address of all interested persons or organizations, and (d) copies of all reports, internal memoranda, offers, counteroffers, communications and correspondence concerning said divestiture.

By the Commission.

Carol M. Thomas,

Secretary.

Research and Development Studies Conducted by State Agencies; Revision of Regulations

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: As part of a continuing effort to reduce paperwork burdens imposed on the States, the FHWA is revising the policies and procedures applicable to federally funded research and development studies conducted by State highway agencies. These revisions clarify and reduce existing requirements for participating in the Federal-Aid Research and Development Program, and provide greater flexibility for program participants.

EFFECTIVE DATE: December 7, 1981.

FOR FURTHER INFORMATION CONTACT: Harry H. Hersey, Offices of Research and Development, 703-285-2057; or Lee Burstyn, Office of the Chief Counsel, 202-426-0791, Federal Highway Administration, 400 Seventh Street, SW, Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: In 1970, the Federal Highway Administration established the Federally Coordinated Program of Research and Development in Highway Transportation to improve the coordination of research work being done by FHWA and the State highway agencies (SHA's). Part of that program is the Federal Aid Research Program (R&D Program) which was established to provide financial assistance to SHA's that are conducting research studies on highway design, construction, and operation.

To date, the regulatory policies and procedures governing federally aided R&D by the States appear in eight parts (Parts 520, 522, 524, 530, 540, 542, 544, and 560) in Subchapter F, Chapter I of Title 23, Code of Federal Regulations. This rulemaking action will consolidate those eight parts into one part (Part 511) as follows: Current Part 520 (Management of R&D Program—General) will be covered in §§ 511.1 (Purpose) and 511.4 (Policy). All the definitions from throughout the current CFR parts will be consolidated into one section (§ 511.3—Definitions). Part 522 (Research and Development Property Management) will be covered in new § 511.7 (Equipment and Patents). The material in Part 524 (R&D Management Option) will be found in § 511.10 under the same title. Part 530 (R&D Annual Work Program) will become § 511.5 (Work Program and Changes), and Part 540 (R&D New Studies) will become § 511.6 (Study Proposals and Changes). In addition, most of the material in Part 542 (R&D Studies—Changes and Terminations) will be transferred to §§ 511.5 and 511.6 just mentioned above. The material in Part 544 (Reports on R&D Studies) will be found in § 511.8 (R&D Reports). Material from Part 560 (Federal-Aid Funds without State Matching on Special R&D Projects) will be transferred to § 511.9 (Criteria for Cooperatively Funded Studies). A table summarizing these revisions is included at the end of this preamble.

New Part 511 will correspond to Volume 5, Chapter 1, Section 1 of the Federal-Aid Highway Program Manual.

The purpose of the final rule is to revise and simplify the policies and procedures applicable to R&D programs in order to reduce unnecessary requirements and paper work. Among other changes, the final rule will (1) relieve participants of the requirement of an individual statement for each study in the work program, (2) reduce burdens on small-scale (Type B) programs by raising their budget limits and eliminating the work program limits for completing studies, (3) eliminate the requirement that technical papers and articles have FHWA review and acceptance, and (4) modify the requirements for the submission of progress reports.

On September 19, 1979, the Federal Highway Administration issued a proposed rule, published at 44 FR 55766, FHWA Docket No. 79-21. Comments to the docket and internal FHWA coordination resulted in the changes reflected in the final rule. The significant changes and comments are discussed in the following paragraphs.

Some comments indicated that defining "major change" (proposed § 511.3) as any cost modification of more than 15 percent annually would be too burdensome for participants in small studies. Accordingly, the definition of "major change" has been narrowed to include only annual cost modifications that are both $10,000 greater and 15

percent greater than the initial estimated cost.

Another response recommended that the Type B (small-scale) study category in proposed § 511.3(h) be expanded to include studies with costs up to $75,000 rather than $50,000. This recommendation was adopted in the final rule, thus increasing the number of studies that qualify for reduced burdens.

Finally, a comment noted that proposed § 511.11(c), regarding budget items such as "Administration" and "Implementation," does not establish what level of cost increase in those items requires FHWA approval. The final rule provides in this regard that cost increases of more than 15 percent for these types of budget items shall be submitted to FHWA for approval.

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under DOT regulatory procedures. Under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation is available for inspection in the public docket and may be obtained by contacting Harry H. Hersey of the program office at the address specified above.

Because this amendment relieves a regulatory burden, the FHWA finds good cause to make this amendment effective in less than 30 days under DOT regulatory procedures. A delay in effective date is not required under the Administrative Procedure Act because the matters affected relate to grants, benefits, or contracts pursuant to 5 U.S.C. 553(a)(2). Accordingly, this amendment is effective upon publication.

SUMMARY OF REVISIONS

Former designation	Present designation
Purpose and policy:	
Part 520	§§ 511.1 and 511.4.
Definitions:	
Throughout R&D Parts	§ 511.3.
Equipment and patents:	
Part 522	§ 511.7.
R&D management option:	
Part 524	§ 511.10.
Work program and changes:	
Part 530	§ 511.5.
Study proposals and changes:	
Part 540	§ 511.6.

PARTS 511, 520, 522, 524, 530, 542, 544 and 560 [Removed]

Accordingly, Chapter I, Subchapter F of Title 23, Code of Federal Regulations is revised by removing all of its current parts (520, 522, 524, 530, 540, 542, 544, and 560) and by substituting a new Part 511 to read as set forth below.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The provisions of OMB circular No. A-95 regarding State and local clearinghouse review of Federal and federally assisted program and projects apply to this program)

Issued on: November 24, 1981.

R. A. Barnhart,

Federal Highway Administrator.

SUBCHAPTER F—RESEARCH AND DEVELOPMENT

PART 511—RESEARCH AND DEVELOPMENT (R&D) STUDIES AND PROGRAMS; GENERAL

Sec.

511.1 Purpose.
511.2 [Reserved]
511.3 Definitions.
511.4 Policy.
511.5 R&D work program and changes.
511.6 Study proposals and changes.
511.7 Equipment and patents.
511.8 R&D reports.
511.9 Criteria for cooperatively funded studies.
511.10 R&D management option.

Authority: 23 U.S.C. 307(c), 315; 49 CFR 1.48(b).

§ 511.1 Purpose.

The purpose of this regulation is to prescribe policies and procedures for R&D federally funded studies and programs.

§ 511.2 [Reserved]

§ 511.3 Definitions.

(a) *"Budget item"*—A short descriptive title in the budget tabulation with its associated budget estimate.

(b) *"Final report"*—A report documenting a completed study.

(c) *"Highway Research Information Service (HRIS)"*—A computerized storage and retrieval system for two types of information:

(1) Resumes of ongoing R&D studies, and

(2) Abstracts of R&D reports and articles.

(d) *"Implementation"*—The translation and followup of research results to provide the basis for adopting the innovations into practice.

(e) *"Major change"*—A change, including termination, in a study's objective, scope, work plan, or principal investigator, which significantly alters the course or expected results of the study. Any change which increases the initial estimated annual cost by more than $10,000 and 15% shall be considered a major change.

(f) *"Minor change"*—Any other change in the study.

(g) *"National Cooperative Highway Research Program (NCHRP)"*—A pooled fund program directed toward problems of national significance sponsored by the State highway agencies (SHA's) and FHWA, and administered by the Transportation Research Board, National Academy of Sciences.

(h) *"Nonexpendable equipment"*—Equipment having a useful life of more than 1 year and an acquisition cost of more than $300 per unit.

(i) *"Pooled funding"*—The cooperative funding of a study or program by two or more SHA's.

(j) *"Proposal"*—An outline of specific research or development to be conducted which includes such items as description of the objectives, work plan, cost estimate, and time schedule.

(k) *"R&D Work Program"*—An annual or biennial listing of proposed work and estimated cost.

(l) *"Type B Study"*—A small-scale study which does not exceed $75,000 or require more than 2 years to complete (this time limit may be extended for reasonable delays not to exceed 1 year or for experimental construction studies) and is one of the following types: (1) Short-term study related to local or regional problems; (2) exploratory, survey, or feasibility study; (3) experimental construction study (see Federal-Aid Highway Program Manual, Volume 6, Chapter 4, Section 2, Subsection 4 (FHPM 6-4-2-4). Construction Projects Incorporating Experimental and/or Evaluation Features);[1] or (4) implementation effort.

(m) *"Type A Study"*—A study which addresses regional or national problems or exceeds the limitations of a Type B study defined above.

§ 511.4 Policy.

(a) *R&D Programs*—Each SHA is encouraged to maintain a viable research and development program, adequately funded, to address their most urgent short- and long-range problems. To promote effective utilization of available resources, SHA's are encouraged to cooperate with FHWA and other SHA's to achieve R&D objectives established at the national level. An SHA R&D program is primarily a problem-solving service to the practicing engineers and other users. It can best be justified as a continuing activity when it is demonstrated that

[1] The Federal-Aid Highway Program Manual is available for inspection and copying as prescribed in 49 CFR Part 7, Appendix D.

R&D results and end-products are used and pay dividends to the highway program as a whole.

(b) *Technology Transfer*—In order to benefit from the results of research and development, each SHA is encouraged to develop an active technology transfer program to promote the use of those results.

(c) *R&D Reports*—All studies shall be completely documented in a timely manner. When the work is not normally expected to result in a final report, this provision will not apply.

(d) *Cooperatively Funded Studies & Programs*—When widespread national or regional interest is shown in the solution of a significant problem, FHWA encourages arrangements by which an R&D study may be cooperatively sponsored by two or more SHA's. The study may be administered by a lead SHA under its own procedures, by NCHRP, or by the FHWA Washington Headquarters under the Federal Procurement Regulations (41 CFR).

(e) *Civil Rights*—The implementation of these program activities shall be in accordance with the policy of the Federal Highway Administration to ensure compliance with Title VI of the Civil Rights Act of 1964, 49 CFR Part 21, and Related Statutes and Regulations, as stated in 23 CFR Part 200.

§ 511.5 R&D work program and changes.

(a) An SHA desiring Federal aid for R&D work must prepare an R&D work program and submit it to FHWA for approval. It shall cover each approved Type A and Type B study until either the study's draft final report has been accepted by FHWA as fulfilling the technical requirements, or the study has been terminated. It shall include the following information in tabular form for each budget item.

(1) State study number.
(2) Study type (A or B).
(3) Study title.
(4) Budget estimate for program year.
(5) Estimated cost for previous year for continuing studies.

(b) Individual budget items for "Administration," "Research Correlation Service," "Implementation," and "Contingencies" may be included as needed in each SHA R&D work program, in addition to the budget items for Type A and Type B studies, and a listtng of proposed studies. Cost increases of more than 15% in the non-study items shall be submitted to FHWA for approval.

§ 511.6 Study proposals and changes.

(a) An SHA desiring Federal aid initiates a request for a Type A or Type B study by submitting the study proposal to the Federal Highway Administration (FHWA) for approval except as provided in § 511.10, *R&D management option*. A research study proposal shall establish the necessity for a research undertaking, clearly define the objective, provide a detailed work plan for achieving the objective, and indicate how the research findings are expected to be used. An HRIS or other literature search shall be made for Type A studies to minimize duplication of work. Such a search is encouraged for Type B studies.

(b) *Major Changes*—Major changes in the objective, scope, work plan, principal investigator, or cost shall be fully documented and for Type A studies shall be submitted to FHWA for prior approval. An SHA may make major changes in Type B studies without prior FHWA approval.

(c) *Minor Changes*—Minor cost changes may be made by the SHA without FHWA approval except for the purchase of nonexpendable equipment costing over $1,000. FHWA shall be promptly informed of all actions taken by the SHA.

§ 511.7 Equipment and patents.

(a) Nonexpendable equipment for an R&D study shall be purchased and managed in such a manner that only those equipment costs reasonably attributable to the study are charged to that study. Nonexpendable equipment purchased with Federal-aid funds shall be properly disposed of at the completion of the study and the residual value credited to the study. The SHA shall obtain prior FHWA approval on all equipment purchased, rented, or disposed or which exceeds $1,000. This approval may be requested as a part of the proposal submission, or as a separate submission.

(b) Each SHA shall maintain an inventory record for each piece of nonexpendable equipment purchased or built under the Federal-aid R&D program including equipment acquired by a contractor. Property records shall include:

(1) A description of the property including the manufacturer's serial number, model number, or other identification number.
(2) Source of the property including the study number or title.
(3) Acquisition date and unit acquisition cost.
(4) Location, use and condition of the property and the date the information was reported.
(5) Ultimate disposition data, including date of disposal and sales price or the method used to determine current fair market value.

(c) When nonexpendable property is acquired with Federal-aid funds, the title shall rest with the SHA.

(d) If an R&D study is expected to produce patents, patent rights processes or inventions, the SHA shall insert one of the clauses for domestic contracts set forth in 41 CFR 1–9.1, Patents, or a substitute approved by FHWA, to assure the preservation of the public's rights in inventories resulting from these studies. The SHA shall promptly report to FHWA the fact of any invention or discovery which occurs in the course of the study and shall consult with FHWA regarding the disposition of the matter.

§ 511.8 R&D reports.

(a) *Progress Reports*—For all studies in an approved work program, progress reports shall be submitted to FHWA as specified in FHWA's approval of the study. A minimum of two progress reports shall be submitted each year. These reports shall contain sufficient information to evaluate the progress and possible future course of study.

(b) *Interim Reports*—These reports shall be submitted to FHWA for review and acceptance prior to publication. They shall be submitted when major phases of a study are completed as stipulated in the approved work plan, or when significant scientific breakthroughs are realized.

(c) *Final Reports*—A final report shall completely document all data gathered, analyses performed, and the results achieved. For a study where a number of interim reports have been published, a summary final report is satisfactory, provided adequate detailed documentation of the work completed has been published previously. The SHA's shall determine if a study produced implementable results. If so, the study report shall recommend procedures for implementation, and indicate expected benefits. The final report shall be sent to FHWA for review and acceptance prior to publication.

(d) The author shall be free to copyright material developed under the contract with the provision that the SHA and FHWA reserve a royalty-free, nonexclusive, and irrevocable license to reproduce, publish or otherwise use, and to authorize others to use, the work for Government purposes.

(e) Reports of nonprofitmaking organizations may be published if FHWA fails to complete its review within 4 months from submission. Reports of nonprofitmaking organizations may be published even though the FHWA does not concur with the findings and conclusions in the report, provided FHWA has the right to

include technical comments in the report in a clearly identified section such as "sponsors comments."

(f) Adherence to the DOT document "Standards for the Preparation and Publication of DOT Scientific and Technical Reports" is encouraged in the preparation of all R&D interim and final reports.

(g) An SHA shall include in each report a credit reference to FHWA such as, "prepared in cooperation with the U.S. Department of Transportation, Federal Highway Administration."

(h) An SHA shall include in each report a disclaimer statement equivalent to the following:

> The contents of this report reflect the views of the author(s) who is (are) responsible for the facts and the accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the (SHA or the) Federal Highway Administration at the time of publication. This report does not constitute a standard specification, or regulation.

§ 511.9 Criteria for cooperatively funded studies.

(a) The following criteria are used by FHWA for determining when Federal-aid funds used for R&D studies and programs without State matching would best serve the interest of the Federal-aid highway program:

(1) The proposed study or program addresses a national or regional problem of high priority, and the results are expected to be immediately implementable.

(2) The study proposal satisfies the requirements in § 511.6(a) of this regulation.

(b) The National Cooperative Highway Research Program (NCHRP) satisfies the criteria set forth in § 511.9(a), and Federal-aid funds without State matching may be used in this program.

§ 511.10 R&D management option

(a) Any SHA operating under the R&D management option may initiate new Type B studies without prior FHWA approval except those which require FHWA approval of the proposed work in accordance with 23 CFR Part 172, Administration of Negotiated Contracts. The FHWA shall be fully informed of all such actions by transmittal of the initiating documents to FHWA.

(b) If an SHA desires to manage its Federal-aid R&D program under this option, the SHA shall submit a request to FHWA for approval. FHWA will review the SHA's request and will determine if the SHA is capable of accomplishing the legislative objectives of the Federal-aid R&D Program (23 U.S.C. 307(c)) without FHWA review and approval of Type B studies. The FHWA review will be based on the following criteria:

(1) The SHA has established internal reporting and review procedures to accomplish the legislative objectives of 23 U.S.C. 307(c).

(2) The SHA has documented its current internal operating procedures which include the requirements of 23 CFR Subchapter F.

(3) The SHA has designated R&D manager to direct and control the Federal-aid program.

(c) If the SHA's request satisfies the criteria, its request to operate under the R&D management option shall be approved by FHWA. If the SHA's R&D management is in substantial (but not complete) agreement with the criteria, the SHA's request may be approved on a provisional basis.

BILLING CODE 4910-22-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-8-FRL 1985-1]

Approval and Promulgation of State Implementation Plans; Colorado

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The purpose of this notice is to announce EPA's approval of Colorado's amended regulations limiting sulfur dioxide emissions from certain oil shale production facilities. EPA proposed to approve those regulations on July 27, 1981 and requested public comments. No comments were received. These revisions were submitted by the State of Colorado for inclusion in the State plan.

DATE: This action is effective January 6, 1982.

ADDRESSES: Copies of the revision are available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday at the following offices:

Environmental Protection Agency, Region VIII, Air Programs Branch, 1860 Lincoln Street, Denver, Colorado 80295

Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460

The Office of the Federal Register, 1110 L Street, N.W., Room 8401, Washington, D.C. 20408.

FOR FURTHER INFORMATION CONTACT: Eliot Cooper, Air Programs Branch, Environmental Protection Agency, 1860 Lincoln Street, Denver, Colorado 80295, (303) 837-6131.

SUPPLEMENTARY INFORMATION: On March 23, 1981, following several public hearings, the Governor of Colorado submitted to EPA amended regulations limiting sulfur dioxide emissions from oil shale production facilities which employ combined modified in-situ retorting and above ground retorting. On July 27, 1981, (46 FR 38381), EPA published the text of the amended regulations (Regulation No. 1—"Emission Control Regulations for Particulates, Smoke and Sulfur Oxides for the State of Colorado," Section III.B.4f; and Regulation No. 6—"Standards of Performance for New Stationary Sources," Section VI,C.3) and proposed to approve the revisions. Public comments were requested on EPA's proposed action until August 26, 1981. No public comments were received. Consequently, EPA is now approving the revised regulations. However, if a new source performance standard is promulgated for oil shale production facilities, EPA may have to reconsider the State's regulations. Finally, since EPA currently has responsibility for Prevention of Significant Deterioration in Colorado and will be determining Best Available Control Technology (BACT) for oil shale facilities on a case-by-case basis, the revised State regulations will not be binding on EPA in its BACT determination for specific sources, although the agency will of course work closely with the state in making these determinations.

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), I hereby certify that this action will not have a significant economic impact on a substantial number of small entities. This action only approves state actions. It imposes no new requirements.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged

later in civil or criminal proceedings brought by EPA to enforce these requirements.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not Major because it imposes no new requirements. It only approves requirements adopted by the State.

(Sec. 110 of the Clean Air Act (42 U.S.C. 7410))

Note.—Incorporation by reference of the State Implementation Plan for the State of Colorado was approved by the Director of the Federal Register on July 1, 1981.

Dated: November 20, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF STATE IMPLEMENTATION PLAN

Title 40, Part 52 of the Code of Federal Regulations is amended as follows:

Subpart G—Colorado

1. In § 52.320, paragraph (c)(26) is added as follows:

§ 52.320 Identification of plan.

* * * * *

(c) * * *

(26) On March 23, 1981, the Governor submitted revised regulations limiting sulfur dioxide emissions from certain oil shale production facilities.

[FR Doc. 81-35009 Filed 12-4-81; 8:45 am]

BILLING CODE 6560-38-M

40 CFR Part 260

[SWH-FRL-1997-5]

Hazardous Waste Management System Implementation, Summary of Rulemaking Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Public notice of rulemaking petitions filed with EPA concerning the Resource Conservation and Recovery Act.

SUMMARY: This notice sets forth a summary of all petitions received in response to the regulations implementing the hazardous waste management system established by the Resource Conservation and Recovery Act (RCRA). Petitions cover both requests to make general changes to the regulations and specific requests to exclude, on a site-specific basis, wastes from regulation as hazardous. This notice provides a summary of all petitions received by the Agency as of October 31, 1981; it will be updated on a regular basis. The notice informs of the receipt and purpose of each petition and thereby allows interested parties to comment or respond on appropriate petitions.

FOR FURTHER INFORMATION CONTACT: Matt Strauss, (202) 755-9187. For information on any of these petitions, the reader should contact the RCRA Hotline at (800) 424-9346 or (202) 554-1404.

SUPPLEMENTARY INFORMATION: On May 19, 1980, EPA promulgated the first phase of regulations implementing the hazardous waste management system established by Subtitle C of the Resource Conservation and Recovery Act of 1976, as amended ("RCRA") by publishing 40 CFR Parts 260 to 265 and 122 to 124. Among other things, these regulations set forth informal rulemaking procedures whereby persons may (1) petition the Administrator to modify or revoke any provision in 40 CFR Parts 260 through 265 (see § 260.20); (2) petition the Administrator to add new testing or analytical methods to Parts 261, 264 or 265 if the person demonstrates that the proposed method is equal to or superior to the corresponding method prescribed in Parts 261, 264 or 265 (see § 260.21); or (3) petition the Administrator to obtain, on a site-specific basis, an exclusion of his listed waste from regulation as hazardous (see § 260.22).

Some commenters have indicated that they are prejudiced because the Agency does not publish any notice of receipt of a RCRA rulemaking petition (although the petitions are immediately available in the public docket). EPA agrees that publication in the **Federal Register** noticing receipt of petitions could better serve the legitimate interests of potential commenters and of the Agency. Accordingly, we will begin to publish in the **Federal Register** approximately monthly a list of all petitions filed with the Agency during the previous month. This present notice is the first to be published in the **Federal Register** and contains all rulemkaing petitions filed as of October 31, 1981 under either §§ 260.20, 260.21 or 260.22, and a brief summary of the substance of the petition.

PETITIONS FILED UNDER 40 CFR 260.20 AND 40 CFR 260.21 [1] (GENERAL RULEMAKING AND PETITIONS FOR EQUIVALENT TESTING OR ANALYTICAL METHODS

Log No.	Company	Address	Brief summary of petition
R001	Celanese Plastics & Specialities Co.	1065 West Hill Street, Louisville, KY 40208	a. Requests same 90 day time limit for transportation or storing prior to use, reuse, recycle or reclamation as generators prior to needing a storage permit. b. Request that Agency allow the landfilling of nonpumpable barrelled, volatile and reactive wastes.
R002	Dept. of the Army	Office of the Deputy Chief of Staff, Engineer Headquarters, U.S. Army Training & Doctrine Command, Fort Monroe, VA 22180.	Requests amendment to permit the disposal of small quantities of acutely toxic drugs in trash without a permit.
R003	J. Shockor	P.O. Box 67, Woodstock, VT 95091	Requests that precious metal electroplating wastes be excluded from F006.
R004	Chemical Products Co	P.O. Box 449, Cartersville, GA 30120	Requests removal of P107 (Strontium sulfide) from Appendix VII and § 261.33(e)
R005	National Paint & Coatings Assn.	1500 Rhode Island Avenue, N.W., Washington, D.C. 20005	Requests modification of the ignitability characteristic to encompass sustained burning rather than flash point. Also expand exemption to include low concentrations of other water soluble organic solvents.
R006	Ralston Purina Co	Checkerboard Square, St. Louis, MO 63188	Requests removal of products containing famphur, methamyl, warfarin and dimethoate from § 261.33(e)
R007	National Pest Control Assn.	Suite 1100, 8150 Leesburg Pike, Vienna, VA 22180	Requests removal of rat bait products from § 261.33(e).
R008	National Food Proces. Assn.	1133 Twenteth Street N.W., Washington, D.C. 20036.	Requests exemption of caustic (pH >12.5) rinse water and solid peel removal waste generated from the food processing industry from the hazardous waste rules.
R009	American Iron & Steel Institute	1000 16th Street, NW., Washington, DC 20036	Request industry-wide exclusion for lime treated spent pickle liquor sludge from the hazardous waste rules.
R010	Sterling Drug Co	90 Park Avenue, New York, NY 10016	Request removal of warfarin containing rat baits from § 261.33(e)
R011	National Pest Control Assn.	Suite 1100, 8150 Leesburg Pike, Vienna, VA 22180	Requests removal of zinc phosphide containing pesticides from § 261.33(e).

I. Petitions Filed Under 40 CFR 260.20 and 40 CFR 260.21 [1] (General Rulemaking and Petitions for Equivalent Testing or Analytical Methods)—(Continued)

Log No	Company	Address	Brief summary of petition
R012	P. J. Higgins	26140 Mullinix Mill Rd., Mt. Airy, MD 21771	Requests for extention of comment period for gray iron foundary report.
R013	Diamond Shamrock	351 Phelps Court, Irving, TX 75061	Requests for amendment to § 261.24 to allow use of a neutral water extraction when testing wastes disposed of in neutral or alkaline environments.
R014	Dept. of the Interior	Office of the Secretary, Washington, DC 20240	Requests that the Agency: a. expand the household exemption to include household type wastes generated at federally owned facilities; b. revise the certification statement for Federally-owned-contractor-operated (FOCO) hazardous waste management facilities; c. allow for the disignation of signature responsibility within a government agency.
R015	American Cast Iron Pipe Co	P.O. Box 2727, Birmingham, AL 35202	Requests an exemption to § 261.24 to use neutral water instead of acidic extractant.
R016	General Motors Corp	Danville Plant, Danville, IL 61832	Requests an exemption to § 261.24 to use neutral water instead of acidic extractant for their foundry sludge.
R017	Dept. of Argiculture	P.O. Box 2417, Washington, DC 20013	Requests inclusion of household type activities at federal facilities within household exemption.
R018	American Retail Federation	1616 H Street, N.W., Washington, D.C. 20006	Requests an exemption for consumer household products disposed of by retail stores.
R019	E.I. duPont deNemours and Co., Inc	Louviers Works, Louviers, CO Pompton Lake Works, Pompton Lakes, NJ	Requests amendment to § 265.382 to permit burning 600 pound lots of explosives within 743 feet from the property line.
R020	Triangle Resource Industries	3527 Whiskey Bottom Rd., P.O. Box 599, Laurel, MD 20810.	Requests relief from requirement to obtain a permit for adding liquid waste to drummed adsorbant, to comply with ban on landfill disposal of containerized liquid waste.
R021	Findly Chemical Disposal, Inc	9680 Primrose Drive, Riverside, CA 92503	Requests relief to allow generator to: 1. landfill lab packs. 2. store lab wastes six months without a permit. 3. amend listing to simplify reporting for laboratory chemicals.

[1] A petition has also been submitted by the National Solid Waste Management Association (NSWMA) which requested that the Agency impose recordkeeping, labeling and manifest requirements for small quantity generators. A notice, summarizing this rulemaking petition and requesting comments was published in the Federal Register on October 15, 1980 (45 FR 68409).

II. Petitions Filed Under 40 CFR 260.22 (Petitions To Amend Part 261 To Exclude a Waste Produced at a Particular Facility)

Log No.	Company	Address	Waste listings to be excluded
0001	Fred A. Snow Co.	1942 West Kinzie, Chicago, IL 60622	F010.
0002	Bio-Lab Inc	Plant #2, 1700 Old Covington Hwy., Conyers, GA 30207	Petitioned to exclude non-listed waste
		Plant #4, 1735 Dogwood Drive, Conyers, GA 30207	Petitioned to exclude non-listed waste.
0003	Firestone Wire and Cable Company	Highway 127 Bypass, P.O. Box 908, Danville, KY 40422.	F006.
0004	Massillon Steel Casting Company	577 Oberlin Avenue, SW., Massillon, OH 44646	K061
0005	Fosbrink Machine Company, Inc	Ridge Blvd., P.O. Box 645, Connellsville, PA 15425	K063.
0006	Compo Industries, Inc	125 Roberts Road, Waltham, MA 02154	F017, F018.

BILLING CODE 6560-30-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6090

[OR-19181]

Oregon; Powersite Restoration No. 735; Partial Revocation of Powersite Classification No. 383

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes a U.S. Geological Survey Order in part as to 507.68 acres of land withdrawn for a powersite classification. This action will restore the lands to operation of the public land laws generally.

EFFECTIVE DATE: December 22, 1981.

FOR FURTHER INFORMATION CONTACT: Champ C. Vaughan, Jr., Oregon State Office, 503-231-6905.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and pursuant to the determination by the Federal Energy Regulatory Commission in DA-562-Oregon, it is ordered as follows:

1. The U.S. Geological Survey Order of August 15, 1947, which created Powersite Classification No. 383 is hereby revoked insofar as it affects the following described lands:

Willamette Meridian

Powersite Classification No. 383

T. 7 S., R. 19 E.,
Sec. 28, NW¼NE¼;
Sec. 31, SE¼SW¼ and SW¼SE¼.
T. 8 S., R. 19 E.,
Sec. 3, lot 2;
Sec. 4, lot 7;
Sec. 10, SE¼SW¼;
Sec. 22, SE¼SW¼;
Sec. 25, SW¼SE¼.
T. 9 S., R. 19 E.,
Sec. 1, SE¼NE¼ and NE¼SE¼;
Sec. 12, SE¼NE¼.
T. 8 S., R. 20 E.,
Sec. 31, lot 4 and SW¼NE¼.

The areas described aggregate 507.68 acres in Jefferson, Wasco, and Wheeler Counties.

2. The State of Oregon has waived its preference right for highway rights-of-way or material sites as provided by the Federal Power Act of June 10, 1920, 16 U.S.C. 818.

3. At 10 a.m. on December 22, 1981, the lands will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable laws. All valid applications received at or prior to 10 a.m. on December 22, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. The lands have been open to applications and offers under the mineral leasing laws and to location under the United States mining laws subject to the provisions of the Act of August 11, 1955, (69 Stat. 682; 30 U.S.C. 621).

Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

November 16, 1981.

[FR Doc. 81-35003 Filed 12-4-81; 8:45 am]

BILLING CODE 4310-84-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[BC Docket No. 81-388; RM-3794]

Radio Broadcast Services; FM Broadcast Station in North Muskegon, Michigan; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns Channel 252A to North Muskegon, Michigan, in response to a petition filed by LDM Broadcasting, Inc. The proposed station would provide a first local FM broadcast service to North Muskegon.

DATE: Effective February 1, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Report and Order (Proceeding Terminated)

Adopted: November 18, 1981.

Released: December 1, 1981.

By the Acting Chief, Policy and Rules Division.

1. The Commission has under consideration a notice of proposed rule making 46 FR 35131, published July 7, 1981, proposing the assignment of Channel 252A to North Muskegon, Michigan, as that community's first FM assignment. Supporting comments were filed by the petitioner restating its intent to apply for the channel, if assigned. No oppositions to the proposal were received.

2. North Muskegon (population 4,243),[1] in Muskegon County (population 157,426), is located approximately 272 kilometers (170 miles) northwest of Detroit, Michigan. It has no local aural broadcast service.

3. In comments to the proposal, the petitioner incorporated by reference the information in the *Notice* which demonstrated the need for an FM assignment. Petitioner noted that North Muskegon has sufficient size and growth potential to support an FM station.

[1] The population figures are taken from the 1970 U.S. Census.

4. Canadian concurrence in the assignment of Channel 252A to North Muskegon, Michigan, has been obtained.

5. The Commission believes that the public interest would be served by assigning Channel 252A to North Muskegon, Michigan, since it would provide that community with an opportunity for its first local FM broadcast service. The transmitter site is restricted to 4 kilometers (2.4 miles) northwest of the city to avoid short spacing to Station WGRD (Channel 250) Grand Rapids, Michigan. WGRD is in the process of relocating its transmitter site, and once effectuated, the mileage separation requirements would be met, thereby eliminating the imposition of a site restriction.

6. Accordingly, pursuant to the authority contained in sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules, it is ordered, That effective February 1, 1982, the FM Table of Assignments, § 73.202(b) of the Commission's rules, is amended with regard to the following community:

City	Channel No.
North Muskegon, Michigan	252A.

7. It is further ordered, That this proceeding is terminated.

8. For further information concerning this proceeding, contact Montrose H. Tyree, Broadcast Bureau, (202) 632–7792.

(Secs. 4, 303, 48 Stat., as amended, 1096, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Martin Blumenthal,

Acting Chief, Policy and Rules Division, Broadcast Bureau.

BILLING CODE 6712–01–M

---

47 CFR Part 73

[BC Docket No. 81–406; RM–3793]

Radio Broadcast Services; FM Broadcast Station in Leone, American Samoa; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns Class C FM Channel 266 to Leone, American Samoa, in response to a petition filed by Radio Samoa, Ltd. The assignment could provide Leone with a first local FM service.

DATE: Effective February 1, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Broadcast Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION:

Adopted: November 18, 1981.

Released: December 1, 1981.

By the Acting Chief, Policy and Rules Division.

1. Before the Commission is a notice of proposed rule making, 46 FR 34605, published July 2, 1981, proposing the assignment of Class C FM Channel 266 to Leone, American Samoa, as that community's first FM allocation, in response to a petition filed by Radio Samoa, Ltd. ("petitioner"). Supporting comments were filed by petitioner in which it reaffirmed its intent to apply for the channel, if assigned. No oppositions to the proposal were received.

2. Leone (population 1,657)[1] is located in Lealataua County (population 3,145), on the Island of Tutuila (population 24,548). It is presently served by full-time AM Station WVUV, which is licensed to the petitioner. The assignment can be made consistent with the minimum distance separation requirements (§ 73.207) and the Table of Frequency Allocations (§ 2.106) of the Commission's Rules.

3. As stated in the notice, petitioner's engineering statement indicated that there are no FM broadcast stations operating in either American or Western Samoa at the present time, and the nearest operational one is located approximately 700 miles distant at Suva, in the Fiji Islands.

4. Additionally, the notice pointed out that Channel 266 (101.1 MHz), was selected for use in American Samoa since, according to petitioner, it is one of the Class C channels without second-harmonic conflicts with television channels presently in use there.

5. Petitioner's supporting comments incorporated by reference the information contained in the notice, which established the need for a first FM assignment to Leone, American Samoa.

6. In view of the above, we believe that the public interest would be served by the assignment of Channel 266 to Leone, American Samoa. An interest has been expressed for its use and such an assignment could provide the community with a first FM and second nighttime aural broadcast service.

7. Accordingly, pursuant to the authority contained in sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules, it is ordered, That effective February 1, 1982, the FM Table of Assignments, § 73.202(b) of the Commission's rules, is amended with respect to the following community:

City	Channel No.
Leone, American Samoa	[redacted]

8. It is further ordered, That this proceeding is terminated.

9. For further information concerning the above, contact Nancy V. Joyner, Broadcast Bureau, (202) 632–7792.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

47 CFR Part 73

[BC Docket No. 81–169; RM–3776]

FM Broadcast Station in Oroville, California; Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns UHF television Channel 28 to Oroville, California, in response to a petition filed by Sacramento Valley Family Television, Inc. (now Golden Valley Communications). The assignment could provide Oroville with a first local television service.

DATE: Effective February 1, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Broadcast Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION:

Adopted: November 18, 1981.

Released: December 1, 1981.

By the Acting Chief, Policy and Rules Division.

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Oroville, California); Report and order (Proceeding Terminated).

1. The Commission herein considers a *Notice of Proposed Rule Making*, 46 FR 17645, published March 26, 1981, which

proposed the assignment of UHF television Channel 28 to Oroville, California, as that community's first television assignment, in response to a petition filed by Sacramento Valley Family Television, Inc.[1] ("petitioner"). Supporting comments were filed by petitioner reiterating its intention to apply for authority to construct and operate a station on Channel 28 at Oroville, California, if assigned. Comments were also filed by Abe Theissen ("Theissen") indicating an interest in applying for the proposed channel.

2. In his comments, Theissen states that according to his information, he believes that the petitioner, Sacramento Valley Family Television, Inc., is no longer interested in the proposed assignment. However, this assumption may be a result of the petitioner's name change (see fn. 1, *supra*). As reflected above, the petitioner has indeed filed comments indicating its continuing interest in the proposed assignment.

3. Oroville (population 8,683),[2] in Butte County (population 143,851), is located approximately 112 kilometers (70 miles) north of Sacramento. It presently has no local television service.

4. The Commission believes that the public interest would be served by assigning UHF television Channel 28 to Oroville. An apparent need for a first local television service to the community has been shown, and the assignment can be made consistent with the minimum distance separation requirements of § 73.610 of the Commission's Rules.

5. Accordingly, pursuant to the authority contained in sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's Rules, it is ordered, that effective February 1, 1982, the Television Table of Assignments, § 73.606(b) of the Commission's Rules, is amended as follows:

City	Channel No.
Oroville, California	[redacted]

6. It is further ordered, That this proceeding is terminated.

7. For further information concerning the above, contact Nancy V. Joyner, Broadcast Bureau, (202) 632-7792.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Martin Blumenthal,

Acting Chief, Policy and Rules Division, Broadcast Bureau.

47 CFR Part 73

[BC Docket No. 80-316; RM-3564]

FM Broadcast Station in Fountain, Colo.; Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns FM Channel 292A to Fountain, Colorado, in response to a petition for reconsideration filed by Fountain Broadcasting Company. This assignment could provide Fountain with a first local aural broadcast service.

DATE: Effective February 1, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: November 18, 1981.

Released: December 1, 1982.

By the Acting Chief, Policy and Rules Division.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Fountain, Colorado); Memorandum opinion and order.

1. On May 19, 1981, the Commission adopted a *Report and Order*, herein, 46 FR 30516, published June 9, 1981, which terminated the above-captioned proceeding for failure of Kurt M. Grow ("petitioner"), to make the requisite showings of initial and continuing interest in his proposal to assign FM Channel 292A to Fountain, Colorado, as that community's first local aural broadcast service.

2. In response to the *Report and Order*, an unopposed petition for reconsideration was filed by Fountain Broadcasting Company ("Fountain"), a recently-formed partnership, in which it states it was previously unaware of the contemplated assignment to Fountain. It notes that its interest is particularly strong since the earlier lack of interest in the channel may lessen the likelihood that a comparative proceeding will be required before this service could be initiated in Fountain.

3. Fountain (Population 8,324)[1] is located in El Paso County (population 309,424), approximately 24 kilometers (15 miles) southwest of Colorado Springs, Colorado. It presently has no local aural broadcast service.

4. We believe that the public interest would be served by the assignment of Channel 292A to Fountain, Colorado, since it would provide the community an opportunity to obtain its first local aural broadcast service. Additionally, since the channel would have been assigned heretofore had it not been for the lack of an expression of interest, which we now have, we believe that a reversal of our earlier action is warranted, and accordingly, we will assign Channel 292A to Fountain, Colorado. The assignment can be made consistent with the minimum distance separation requirements of § 73.207 of the Commission's Rules.

5. Accordingly, it is ordered, that effective February 1, 1982, the FM Table of Assignments, § 73.202(b) of the Commission's Rules, is amended with regard to the community listed below, as follows:

City	Channel No.
Fountain, Colorado	292A

6. Authority for the adoption of the above amendment is contained in §§ 4(i), 5(d)(1), 303(g) and (r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's Rules.

7. It is further ordered, that the *Report and Order* herein is reversed and this proceeding is hereby terminated.

8. For further information regarding the above, contact Nancy V. Joyner, Broadcast Bureau, (202) 632-7792.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Martin Blumenthal,

Acting Chief, Policy and Rules Division, Broadcast Bureau.

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1206 and 1207

[No. 37337]

Accounting for Intangible Assets of Motor Carriers

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Interstate Commerce Commission is formally adopting generally accepted accounting principles related to intangible assets. This includes Financial Accounting Standards Board Statement No. 44, Accounting for Intangible Assets of Motor Carriers (FASB No. 44, December 1980), and Accounting Principles Board Opinion No. 17, Intangible Assets (APB No. 17, August 1970). FASB No. 44 requires motor carriers of property to charge to income all unamortized costs of interstate operating rights. This write-off is the result of the Motor Carrier Act of 1980 (Pub. L. 96–296) which removes most route restrictions and eases carrier entry into new routes and expanding routes. APB No. 17 states that identifiable intangible assets and goodwill shall be amortized over a period not to exceed 40 years from date of acquisition. All motor carriers subject to the Commission's uniform systems of accounts will no longer operate under the premise that intangible assets should be amortized only when the term or existence of the asset has become limited or its value impaired.

DATE: Effective for the reporting year beginning January 1, 1980.

ADDRESS: Copies of this notice may be obtained by writing to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423; or by calling toll-free, 800–424–5403.

FOR FURTHER INFORMATION CONTACT: Bryan Brown, Jr. (202) 275–7448.

SUPPLEMENTARY INFORMATION:

Background

In accordance with 49 CFR 1200.2 on adoption of generally accepted accounting principles, the Bureau of Accounts issued Accounting Series Circular No. 182 on Accounting for Intangible Assets (ASC 182, August 15, 1980). ASC 182 advised carriers of the Bureau's intention to adopt the provisions of Accounting Principles Board Opinion (APB) No. 17, Intangible Assets. It repealed the Bureau's February 9, 1972, notice prohibiting amortization of carrier operating rights unless their term of existence became limited or their value permanently impaired.

In December 1980, the Financial Accounting Standards Board released FASB Statement No. 44, Accounting for Intangible Assets of Motor Carriers. This statement required motor carriers of property to immediately charge to expense unamortized costs of interstate operating rights. Further, it requires other identifiable intangible assets and goodwill related to motor carrier operations to be accounted, for in accordance with Accounting Research Bulletin (ARB) No. 43, Chapter 5, or APB Opinion No. 17, as appropriate.

In response to this statement, the Bureau issued on February 13, 1981, ASC 188, Accounting for Intangible Assets of Motor Carriers, which superseded ASC 182. It requires motor carriers of property to assign the cost of all intangible assets acquired on or before July 1, 1980, to interstate operating rights, other identifiable intangible assets (including intrastate operating rights) and goodwill. Costs assigned to operating rights were charged to income and, if material, to account 8810, Extraordinary items. Costs assigned to other identifiable assets or goodwill are treated in accordance with FASB No. 44.

Motor carriers of passengers are also required to follow generally accepted accounting principles for identifiable intangible assets and goodwill.

Review of Responses

The Bureau of Accounts received comments from one respondent, West Coast Truck Lines, Inc., on ASC 188. It addressed two issues: the recognition and reporting of tax benefits related to the write-off of interstate operating rights and the accounting for other identifiable intangible assets and goodwill.

Tax benefits related to the write-off of operating rights were unresolved when ASC 188 was issued. Consequently, ASC 188 recommended that carriers not recognize any tax benefits which might develop from pending tax legislation or attempt to sustain a case for a casualty loss on Federal and State income tax returns. Subsequently, Section 266 of the Economic Recovery Tax Act of 1981 (August 13, 1981) allows carriers in computing taxable income to deduct ratably over a 60-month period the adjusted basis of motor carrier operating authorities held on July 1, 1980.

Since ASC 188 adopts FASB Statement No. 44, carriers should be accounting for other identifiable intangible assets and goodwill accordingly.

Discussion and Conclusions

Motor carriers are accounting for intangible assets as directed by Accounting Series Circular 188. This final rule incorporates all of FASB Statement No. 44 and APB Opinion No. 1 requirements into the appropriate uniform system of accounts.

Regulatory Flexibility Act: Pursuant to 5 U.S.C. 605(b), the Secretary of the Commission has certified that the requirements of the Regulatory Flexibility Act do not apply to this final rule since it will not have a significant impact on a substantial number of small businesses. This rule requires regulated carriers to account for intangible assets in accordance with generally accepted accounting principles. This accounting is an accepted accounting practice required by the Financial Accounting Standards Board. For Commission reporting, the carriers should not incur significant expense or unduly utilize other resources to comply with this disclosure requirement.

This action does not significantly affect the quality of the human environment or the conservation of energy resources.

This action is taken under authority of 49 U.S.C. 553 and 49 U.S.C. 10321.

We adopt the changes to 49 CFR Parts 1206 and 1207 set forth in Appendix A to this final rule.

Decided: November 27, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,
Secretary.

Appendix A

PART 1206—COMMON AND CONTRACT MOTOR CARRIERS OF PASSENGERS

1. Amend 49 CFR Part 1206 as detailed below:

a. In Instruction 2–31, Amortization of intangibles, revise paragraphs (a) and (b) and add paragraph (c):

2–31 Amortization of intangibles.

(a) For intangible assets acquired after December 31, 1979, the cost of the asset shall be amortized by systematic charges to Account 5100, Amortization of Carrier Operating Property, or Account 7500, Other Deductions, as prescribed by the account texts for accounts in the 1500 series. Systemtic charges shall be made over the period of useful life not to exceed 40 years from the date of acquisition. Such charges shall be based on the straight line method of amortization unless the carrier demonstrates that another method more adequately reflects the

decline in economic service value of the asset.

(b) For unamortized intangible assets acquired after October 31, 1970, but before December 31, 1979, the cost of the assets shall be adjusted in the accounts to retroactively reflect the generally accepted accounting principle of amortization of intangible assets. Subsequent accounting shall be in accordance with (a) above.

(c) For intangible assets held before November 1, 1970, the carrier shall consider the life expectancy of the asset to determine the appropriate accounting. Intangible assets with limited lives shall be amortized over their estimated period of future use. A retroactive adjustment shall be necessary if the particular intangible asset has never been amortized. Intangible assets with indeterminate lives may remain unamortized or may be amortized prospectively over a period of 40 years from date of acquisition.

b. Add the following note to the account texts listed below:

(Note: See Instruction 2–31)

(1) Account 1500, Organization, franchises and permits.

(2) Account 1501, Organization (Note D).

(3) Account 1511, Franchises (Note B, amend existing Note to read "Note A").

(4) Account 1541, Patents.

(5) Account 1550, Other intangible property.

PART 1207—CLASS I AND CLASS II COMMON AND CONTRACT MOTOR CARRIERS OF PROPERTY

2. Amend 49 CFR Part 1207 as follows:

a. In Instruction 23, Depreciation and amortization, revise paragraphs (d)(1) and (2) and add (d)(3):

23 Depreciation and amortization.

* * * * *

(d)(1) Intangible items with fixed terms included in Account 1310—Organization, Franchises and Permits (class II), and Accounts 1321—Franchises (class I), and 1331—Permits and Patents (class I), shall be amortized by means of systematic charges to Account 5390/8220—Amortization Expense (Other). The cost of acquiring long-term leaseholds and easements for use in motor carrier operations, included in Account 1341—Other Intangible Property (classes I and II), shall be amortized in the same manner as above. Concurrent credits shall be made to Account 1312—Accumulated Amortization—Organization, Franchises, Permits (class II), Account 1322—Accumulated Amortization—Franchises (class I), Account 1332—Accumulated Amortization—Permits and Patents (class I), or Account 1342—Accumulated Amortization—Other Intangible Property (classes I and II). The amortization period shall be over the estimated useful life of the particular asset not to exceed 40 years from the date of acquisition.

(2) Amortization or entire write-off for costs of acquiring perpetual leaseholds and for intangible items carried in Accounts 1310 and 1341 (class II), and Accounts 1313, 1321, 1331, and 1341 (class I), that are not restricted to fixed terms (except those items relating to the acquisition of the distinct operating unit for which specific provision is made in Instruction 30), shall be debited to Account 8400/9400—Other Nonoperating Income (net) (class II), and Account 8422/9422—Amortization (franchises, permits, and other) (class I), with concurrent credits made to the appropriate accumulated depreciation and amortization accounts [Accounts 1312 or 1342 (class II), and Accounts 1314, 1322, 1332 or 1342 (class I)]. The amortization period for intangible assets having an indeterminate life shall be the maximum period of 40 years from date of acquisition.

(3) Carriers shall follow generally accepted accounting principles in acquiring, amortizing and disposing of identifiable intangible assets and goodwill.

* * * * *

b. Revise Instruction 30, Amortization of other intangible property, to read:

30. Amortization of other intangible property.

(a) When it becomes reasonably evident that the term of existence of an intangible property, the cost of which is included in Account 1341—Other Intangible Property, has become limited or its value impaired, its remaining unamortized cost shall be amortized over the remaining life or entirely written-off by charges to Account 8400/9400—Other Nonoperating Income (net) (class II), and Account 8422/9422—Amortization (other nonoperating deductions) (class I), depending on the remaining estimated period of usefulness with concurrent credit to Account 1342—Accumulated Amortization—Other Intangible Property (classes I and II).

(b) The amount retained in Account 1341—Other Intangible Property, less accumulated amortization, shall not exceed the fair value of the intangibles as of the time of acquisition. Fair value of intangibles acquired in purchase of a distinct operating unit means the amount by which total consideration paid exceeds fair market value of tangible property and other net assets (except intangibles), in conformity within instruction 20.

c. In Account 1321, Franchises (class I), revise paragraphs (a), (b), and (c) and add paragraph (e):

1321 Franchises (class I).

(a) This account shall include amounts actually paid to a State or political subdivision thereof, or to other governmental authorities in consideration of franchises, consents, or certificates representing the cost of acquisition of intrastate operating rights and running in perpetuity or for a specified term of more than 1 year. (See Note A.)

(b) This account shall also be charged with expenditures incident to applications for intrastate franchises, consents, or certificates if such applications are acted upon favorably by the regulatory body, including fees for legal and auditing services, expenses of witnesses, cost of newspaper and other advertisements, et cetera, and pay and expenses of employees engaged in preparing exhibits and other data for hearings.

(c) When a franchise, consent, or certificate for intrastate operating rights is acquired by assignment, the charge to this account shall not exceed its actual cost to the original holder as set out in paragraphs (a) and (b) of this account. Payments by the acquiring carrier in excess of the cost to the original holder, together with any expenses incurred in effecting the transfer, shall be debited to Account 1341—Other Intangible Property. (See, however, Instruction 20.)

* * * * *

Proposed Renumbering of Federal Airways

Correction

In FR Doc 81-33979 appearing on page 57913 in the issue of Friday November 27, 1981, make the following correction:

In the first column of page 57914, under "5. V-162 [Amended]" change "Harrisburg 0.87°" to read "Harrisburg 087°".

BILLING CODE 1505-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

15 CFR Part 2009

Submission of Representations Concerning Standards-Related Activity

AGENCY: United States Trade Representative.

ACTION: Proposed rule and request for comments.

SUMMARY: The Office of the United States Trade Representative proposes to issue these regulations to provide for the proper submission of representations by certain foreign countries concerning standards-related activities viewed by such countries as barriers to trade. These proposed regulations implement the Agreement on Technical Barrier to Trade, which was entered into by the United States in the Tokyo Round of Multilateral Trade Negotiations, and Section 422 of the Trade Agreements Act of 1979.

DATE: Comments must be submitted on or before February 5, 1982.

ADDRESS: Comments may be mailed to the Assistant U.S. Trade Representative for GATT Affairs, United States Trade Representative, 600 17th Street, NW., Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT: Donald S. Abelson, Chairman, Trade Policy Staff Committee, Standards Subcommittee (202/395-3063).

SUPPLEMENTARY INFORMATION:

Background

The Agreement on Technical Barriers to Trade (the "Agreement") was approved by Congress in section 2(a) of the Trade Agreements Act of 1979 (19 U.S.C. 2503(a)) and entered into force for the United States on January 1, 1980. Article 14:2 of the Agreement provides:

> If any Party considers that any benefit accruing to it, directly or indirectly, under this Agreement is being nullified or impaired, or that the attainment of any objective of this Agreement is being impeded by another Party or Parties, and that its trade interests are being significantly affected, the Party may make written representations or proposals to the other Party or Parties which it considers to be concerned. Any Party shall give sympathetic consideration to the representations or proposals made to it, with a view to reaching a satisfactory resolution of the matter.

This provision was implemented in domestic law by section 422 of the Trade Agreements Act of 1979 (19 U.S.C. 2552), which provides that the United States Trade Representative shall receive all such standards-related representations. The proposed regulations further implement Article 14.3 and section 422.

Authority

The authority for the proposed regulations published below is 5 U.S.C. 301; the Trade Agreements Act of 1979, sections 3(b) (19 U.S.C. 2504(b)) and 401-422 (19 U.S.C. 2251-54); E.O. 11846 of March 27, 1975 (40 FR 69173); Reorganization Plan No. 3 of 1979 (44 FR 69173), and E.O. 12188 of January 2, 1980 (45 FR 989).

Drafting Information

The principal authors of this document were Amelia Porges and Clifford Marshall of the Office of the General Counsel, Office of the United States Trade Representative.

Regulatory Impact Analysis

The Office of the United States Trade Representative has determined that these regulations are issued with respect to a foreign affairs function of the United States. Accordingly, section 3 of E.O. 12291 does not apply and a Regulatory Impact Analysis is not required.

Accordingly, 15 CFR Chapter XX is proposed to be amended by adding a new Part 2009, reading as set forth below:

William E. Brock,

United States Trade Representative.

PART 2009—PROCEDURES FOR REPRESENTATIONS UNDER SECTION 422 OF THE TRADE AGREEMENTS ACT OF 1979

Sec.

2009.0 Submission of representation.
2009.1 Information required in representation.
2009.2 Adequacy of representation.

Authority: 5 U.S.C. 301; 19 U.S.C. 2504(b), 2251-54; E.O. 11846, 40 FR 14291; Reorganization Plan No. 3 of 1979, 44 FR 69173; E.O. 12188, 45 FR 989.

§ 2009.0 Submission of representation.

(a) Any—

(1) Party to the Agreement; or

(2) Foreign country that is not a Party to the Agreement but is found by the United States Trade Representative ("Trade Representative") to extend rights and privileges to the United States that are substantially the same as those that would be so extended if that foreign country were a Party to the Agreement,

may make a representation to the Trade Representative alleging that a standards-related activity engaged in within the United States violates the obligations of the United States under the Agreement on Technical Barriers to Trade.

(b) All representations under section 422 of the Trade Agreements Act of 1979 ("the Act") shall be addressed to the United States Trade Representative, Office of the United States Trade Representative, 600 17th Street, NW., Washington, D.C. 20506. Alternatively, such a representation may be made by diplomatic correspondence and may be accepted by the Trade Representative.

(c) "The Agreement", a "Party to the Agreement" and "standards-related activity" are defined as in section 451 of the Act (19 U.S.C. 2571)

(d) Representations shall be submitted in 10 copies.

§ 2009.1 Information required in representation.

(a) Each representation submitted under section 422 shall state clearly on the first page that the representation is a request for action with respect to the obligations of the United States under the Agreement, and shall contain the following information:

(1) The foreign country making the representation, the division of the foreign country's government representing that country's interest, the person(s) within that division who is (are) coordinating the foreign country's representation.

(2) A description of the standards-related activity at issue, including, whenever possible, copies of the standards-related activity's provisions.

(3) Identification of the foreign goods or services affected by the standards-related activity at issue.

(4) A statement of how the standards-related activity concerned is alleged to violate the obligations of the United States under the Agreement. This statement must indicate with particularity which such obligations are alleged to be violated.

(5) Information sufficient to provide a reasonable indication that the standards-related activity concerned is having a significant trade effect, including (but not limited to) the volume of trade in the goods and services concerned.

(6) Indication as to whether the foreign country has officially petitioned, filed or complained for relief concerning the same subject matter as this representation to any international forum.

§ 2009.2 Adequacy of representation.

(a) If the representation filed under § 2009.0 does not conform substantially to the requirements of §§ 2009.0 and 2009.1, the Trade Representative may return the representation to the foreign country which submitted it with written guidance as to how to make the representation conform to the requirements, or determine that there is nevertheless sufficient information on which to proceed. A resubmission in conformity with the requirements shall be sufficient to initiate process. Upon a finding of sufficiency, the Trade Representative shall notify the foreign government of the sufficiency of the representation.

(b) At any time the Trade Representative may find that it is clear from the available information that the representation does not warrant further consideration and the representation may be returned to the petitioner with a written statement of the reasons it was found not to warrant further consideration.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 792 3213]

D'Arcy-MacManus & Masius, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, would require, among other things, a St. Louis, Missouri advertiser to cease disseminating advertisements for any denture products, toothache drop or gel which contains representations that contradict or negate the health, safety, or efficacy statements appearing on the product's label. Any claims regarding the duration of use of such product would trigger a disclosure of any labeling warning. The order would further require that any representation that Snug Denture Cushions can be worn "for weeks" or any period of time, be accompanied by a statement that denture cushions should only be used "temporarily, until a dentist can be seen."

DATE: Comments must be received on or before February 5, 1982.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St. and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/PF, Leslie Rossen, Washington, D.C. 20580. (202) 724-1496.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

[File No. 792 3213]

Agreement Containing Consent Order To Cease and Desist

In the matter of D'Arcy-MacManus & Masius, Inc., a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of D'Arcy-MacManus & Masius, Inc., a corporation, and it now appearing that D'Arcy-MacManus & Masius, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices under investigation,

It is hereby agreed by and between D'Arcy-MacManus & Masius, Inc. by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent D'Arcy-MacManus & Masius, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at One Memorial Drive, St. Louis. Missouri 63102.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby and related material pursuant to Rule 2.34, will be placed on the public record for a period of sixty days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of the complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist shall have the same force

and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent, by its duly authorized officer, has read the proposed complaint and order contemplated hereby. It is understood that once the order has been issued, proposed respondent will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered That respondent, D'Arcy-MacManus & Masius, Inc., a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device (hereinafter "respondent"), in connection with the advertising, offering for sale, sale or distribution of any denture product or toothache drops or gel, forthwith cease and desist from disseminating or causing the dissemination of any advertisement by any means in or affecting commerce which makes any representation directly or indirectly that is inconsistent with, negates or contradicts any statement concerning matters of health, safety or efficacy set forth on the labeling of any such product or which in any way limits or qualifies any such statement appearing on the labeling of any such product.

II

It is further ordered That respondent, in connection with the advertising, offering for sale, or distribution of any denture product or toothache drops or gel (except denture cushions as provided for in Paragraph 3) shall, in disseminating or causing the dissemination by any means in or affecting commerce of any advertisement which makes any representation directly or indirectly (other than those prohibited in I above) regarding duration of use of any such product, disclose clearly and conspicuously any labeling warning regarding duration of use of such a product.

It is agreed, for the purposes of this Order, that in the event a label or packaging warning regarding duration of use is no longer utilized for any such product, advertisements for said product need not bear a disclosure regarding duration of use.

III

It is further ordered That respondent, in connection with the advertising, offering for sale, sale or distribution of the product Snug Denture Cushions or any other denture cushion, when making any representation regarding the duration of use of said product (other than those prohibited in I, above), shall disclose clearly and conspicuously that said product is only appropriate for short-term use until a denture wearer is able to see a dentist for the adjustment of his or her loose or ill-fitting dentures. For the purposes of this Order, it is agreed that respondent may use the term "for weeks" in the advertising of denture cushion products so long as the terms "temporary" and "only until a dentist can be seen" are included, and the advertisement does not imply the product should be used on a long term basis.

For the purposes of this Order, in the event that the Snug Denture Cushion product is no longer regarded by the Federal Food and Drug Administration as suitable only for short-term, nonregular use, the respondent may seek from the Commission amendment of this portion of this Order.

IV

It is further ordered That respondent shall forthwith distribute a copy of this Order to each of its operating divisions.

It is further ordered That respondent notify the Commission at least thirty (30) days prior to any proposed change in its corporate status such as dissolution, emergence of a successor corporation, the creation or dissolution of any subsidiaries, and assignment or sale of the business, or any other change in the corporate respondent that may affect compliance obligations arising out of this Order.

It is further ordered That respondent shall, within sixty (60) days after this Order becomes final, and annually thereafter for three (3) years, file with the Commission a report, in writing, signed by respondent, setting forth in detail the manner and form in which it has complied with this Order.

D'Arcy-Macmanus and Masius, Inc., Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from the D'Arcy-Macmanus and Masius, Inc.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint charged respondent with disseminating advertisements containing false, unfair and deceptive representations regarding proper duration of use of the product, Snug Denture Cushions. In particular, the complaint alleged that respondent's advertisements tended to contradict and negate the import of certain health and safety warnings which appeared in the labeling of the product, Snug Denture Cushions. Those warnings specifically informed users of the dangers of long term use of ill fitting dentures or cushions as such use could lead to swelling or faster bone resorption. In addition, the label warning advised that the product be used on a temporary basis only until a dentist could be seen. The complaint further alleged that respondent failed to mention such label warnings in its advertisements, thus misleading consumers into believing that no such warnings exist. The existence of the warnings was alleged to be a material fact which would likely affect a consumer's purchase or use of the product. Failure to disclose such a material fact rendered the challenged advertisements false, deceptive and unfair.

The consent order contains the following provisions designed to remedy the violations charged. Part I prohibits respondent from including in advertising for any denture products or toothache drops or gel representations which are inconsistent with, negate or contradict health, safety or efficacy statements included in the product's labeling.

Part II addresses the problem of misleading duration of use claims for denture products or toothache drops or gel, by providing for a triggered disclosure. Where respondent makes any duration of use claim for such products, the label warning must be disclosed clearly and conspicuously. However, if that label warning is no longer required, there need be no such disclosure.

Part III deals specifically with the challenged Snug Denture Cushion advertisements. Those ads must clearly and conspicuously disclose that the product is for short term use. In doing so, respondent may still use the term "for weeks" in describing the term of use of Snug but must at the same time include the words "temporary" and "only until a dentist can be seen." This provision was included to protect against the misleading implication that Snug Denture Cushions may be used on a long term basis. This requirement is in recognition of the findings of the Food and Drug Administration that Snug Denture Cushions are appropriate only for short term use. If the FDA changes its position, respondent may seek to have this part of the order amended.

Part IV of the consent order requires respondent to distribute the order to each of its operating divisions; to notify the Commission prior to any proposed change in its corporate status which may affect compliance with the consent order; and to file a compliance report within sixty (60) days after the order becomes final.

A consent order with Metholatum Co, the manufacturer of Snug Denture Cushions, was accepted by the Commission on October 6, 1980.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Carol M. Thomas,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 772

[FHWA Docket No. 78-33; Notice 2]

Procedures for Abatement of Highway Traffic Noise and Construction Noise

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes a revision to the existing noise abatement regulation and requests comments on the revision and related issues. The proposed revision is intended to simplify noise abatement procedures and eliminate unnecessary requirements.

DATE: Comments must be received on or before February 5, 1982.

ADDRESS: Submit written comments to FHWA Docket No. 78-33, Notice 2, Federal Highway Administration, Room 4205, HCC-10, 400 Seventh Street SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. et, Monday through Friday. Those desiring notification of receipt of comments must include a self-addressed stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry Reagan, Noise and Air Analysis Division, Office of Environmental Policy (202-426 4836), or Mr. Thomas Holian, Office of the Chief Counsel (202-426-0761), Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m et, Monday through Friday.

SUPPLEMENTARY INFORMATION: The FHWA has reviewed its current procedures for the abatement of highway traffic noise and construction noise, published on April 23, 1976 (41 FR 16936), and appearing as Part 772 of Title 23 of the Code of Federal Regulations and Volume 7, Chapter 7, Section 3 of the Federal-Aid Highway Program Manual (FHPM 7-7-3). Based on this review, it was determined that these procedures should be simplified in order to achieve the Administration's stated goals of reducing unnecessary burdens upon the States and the public and reducing redtape whenever possible.

Consequently, on December 6, 1978, the FHWA published an advance notice of proposed rulemaking (ANPRM) (43 FR 57161) raising nine issues concerning these procedures for consideration by affected persons and the general public and soliciting their comments. These nine issues are restated below followed by a summary and discussion of the responses received.

Discussion of Comments

Twenty-eight comments were received, 22 of which were from State highway agencies. The remaining six commenters included two State environmental agencies, two counties, the U.S. Environmental Protection Agency (EPA), and the National Association of Noise Control Officials.

The first issue raised in the ANPRM was whether requirements not specifically included in the Federal-aid highway statutes should be deleted, specifically the requirements for coordination of approximate generalized future noise levels, information on noise compatible development, and FHWA procedures on Type II projects with local officials and discussion of construction noise. Eleven commenters recommended retention of the first requirement and four favored deletion. Nine recommended keeping the second requirement and three recommended against it. It is proposed to retain both requirements.

The second issue concerned the detailed procedures contained in the current regulation. The 15 commenters on this issue were evenly divided among those who recommended maintaining the detail, deleting the detail, and increasing the flexibility of the procedures. Consistent with FHWA policy to simplify procedures and provide greater flexibility, it is proposed to delete the detailed procedures.

The exception process was the third topic on which comments were solicited. It is clear that this issue was not adequately explained in the ANPRM. Many respondents mistakenly believed that removal of the exception procedure would rigidly require noise abatement in every instance, regardless of cost, feasibility, practicability, or neighborhood desires. The intention of eliminating the exception procedure was not to eliminate the flexibility in noise abatement decisions, but rather to eliminate the requirement for formal documentation and approval of exceptions in those instances where abatement is not warranted. The majority view favored this less formal approach, and the FHWA is now proposing to delete the exception process.

The fourth issue concerned whether the criteria for determining noise impact based upon health and welfare effects should be added. Eight of 11 respondents were against including such criteria in the regulation. The existing criteria remain unchanged in this proposal.

The fifth question was whether the actual costs of noise abatement measures should be listed separately from economic effects in considering the overall social, economic, and environmental effects of noise abatement. All 12 comments received on this question urged that cost be stated separately. To clarify the current provision, the term "cost of abatement" is listed separately from economic effects in the revised regulation.

The sixth issue was whether to permit Federal participation in the cost of noise insulation of private buildings on a routine basis. Fourteen of the 20 comments on this issue recommend participation only in exceptional cases, not on a routine basis. On the basis of these comments, the FHWA is not proposing any change in its current policy on Federal participation in noise insulation of private buildings.

The seventh question asked if there were too many definitions in the regulation. Eight respondents thought the current definitions necessary, four requested additional definitions, and only one thought there were too many. If the detailed procedures are deleted as proposed, many terms currently defined would no longer be used in the regulation. Also, definition of common terms was felt unnecessary and inconsistent with other FHWA regulations. Therefore, it is proposed to delete most definitions.

The eighth issue concerned eliminating the list of factors which may be considered in establishing a relative priority for Type II projects. There were only seven responses to this issue. Six commenters thought the list should be retained. The EPA's comment is discussed in item #3 in the section "Request for Additional Comments," which follows. The list of factors has been eliminated in this proposal because it contained only some suggested items to be considered and was neither complete nor binding in nature.

The last issue raised in the ANPRM was whether there was a need for clarification of the types of projects to which the noise standards apply. Eight of nine respondents to this issue agreed that clarification was needed. The proposed section on applicability has been rewritten to clarify the types of projects to which the regulation applies.

Comments are invited on the FHWA's proposed response to the foregoing issues.

Discussion of Proposed Regulation

As previously noted, it is FHWA policy that regulations should provide for maximum flexibility and discretion on the part of FHWA field elements and the States, and include only those requirements which are clearly necessary for effective implementation of the program and can reasonably be accomplished. Major changes to the noise regulation which are proposed in response to this policy include elimination of both the exception process and the requirement for FHWA concurrence in the noise study report for individual projects. Because the exception process would be eliminated, there would no longer be a need to divide Type I projects into two categories based on access control. The noise analysis and abatement requirements would remain unchanged, but the established processes of environmental assessment documentation together with the normal consultation and reviews which occur continuously throughout the project development phase of a highway improvement would be used in place of the specific noise documentation requirements. This should give more flexibility in managing the highway program while achieving the same purpose of evaluation and mitigation of noise impacts. These revisions should reduce the paperwork burden on State highway agencies and expedite the development process.

Much of the information in Part 772 that is explanatory or offers detailed guidance (such as definitions, measurement techniques, noise reduction factors, and the list of considerations for relative priority of Type II projects) would be deleted. Most of this is presently available in other sources such as American Association of State Highway and Transportation Officials' "Guide on Evaluation and Attenuation of Traffic Noise" dated 1974. The remainder will be issued in nonregulatory directives easily updated.

The noise level criteria in Table 1 of the proposed revision are unchanged from those in the existing regulation (currently called design noise levels). One of the main purposes of the regulation is to help protect the public health and welfare. However, the noise impact criteria attempt to strike a balance between that which is most desirable for health and welfare (i.e., the levels identified in "Information on Levels of Environmental Noise Requisite to Protect Public Health and Welfare with an Adequate Margin of Safety" EPA Document No. 550/9–74–004), and that which is feasible and reasonable. Factors such as technical feasibility, the unique characteristics of highway-generated noise, cost, the overall public interest, and other program objectives as set forth in the various provisions of 23 U.S.C. 109 are all important elements in the standard-setting process used by FHWA in establishing these levels. The FHWA did not develop the noise criteria in this regulation for application in other land use planning situations. This must be recognized by those who attempt to use these criteria in situations other than the planning and design of highways.

While the proposed § 772.9 is considerably different from the existing § 772.11, no change in meaning or end result is intended. All reasonable and feasible abatement measures are currently required and would continue to be required under the proposed rule. One factor in determining reasonableness is cost. Adding the word "cost" to the existing "social, economic and environmental" phrase is meant to clarify but not change the meaning of the phrase.

Request for Additional Comments

Consultation with EPA pursuant to the Noise Control Act of 1972 has begun and will continue until a final regulation is promulgated. This consultation and the earlier comments received from others have raised three specific questions on which FHWA is soliciting additional comments at this time.

1. The use of dual descriptors, L_{10} and L_{eq} in the regulation, has created some concern. Both terms are defined in § 772.5 of the proposed regulation. The L_{eq} descriptor was added to Part 772 in 1976 for several reasons. The L_{eq} descriptor is more statistically reliable than L_{10} for low-volume roadways, is simpler in most instances for highway designers to work with, and is more flexible in terms of permitting noise levels from different sources to be included in the analysis of noise impact. However, it has been suggested that L_{eq} is difficult for lay people to understand. Since its addition to Part 772, most highway agencies have adopted the L_{eq} descriptor as their sole descriptor of highway noise. Pursuant to a suggestion by EPA and several State highway agencies, the FHWA solicits comments on whether the L_{10} descriptor should be deleted from this regulation.

2. It has been suggested that the procedures for coordination with local officials be changed by adding the following sentence:

"The FHWA encourages highway agencies to obtain an agreement from the local officials to control future development next to highways so that noise impacts are minimized."

The FHWA solicits comments on this suggested addition.

3. Proposed projects for noise abatement on existing highways (Type II projects) are eligible for Federal-aid funding under 23 U.S.C. 109(i). It has been suggested by EPA that each State highway agency requesting funds for Type II projects be required to prepare a plan that would identify highway noise impact areas and assign priorities for action. Further, it has been suggested that review and approval of such plans by the FHWA be required as a condition of funding and that progress in implementing the plans be published yearly. Comments on these suggestions are invited.

This NPRM is issued under the authority of 23 U.S.C. 101(e), 109(h), 109(i), 315; 42 U.S.C. 4331, 4332; and the delegation of authority by the Secretary of Transportation at 49 CFR 1.48(b).

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under the Department of Transportation's regulatory procedures. It is anticipated that the proposal would reduce the administrative burden on State highway agencies; however, because of variances in State programs, FHWA is unable to quantify these reductions at this time. In accordance with the above, it has been determined that a full regulatory evaluation is not required. Under the criteria of the Regulatory Flexibility Act, it is certified that the proposed action would not have a significant impact on a substantial number of small entities.

Issued on: November 24, 1981.

R. A. Barnhart,

Federal Highway Administrator.

It is, therefore, proposed to amend Chapter I of Title 23, Code of Federal Regulations, by revising Part 772 to read as follows:

PART 772—PROCEDURES FOR ABATEMENT OF HIGHWAY TRAFFIC NOISE AND CONSTRUCTION NOISE

Sec.

772.1 Purpose.
772.3 Noise standards.
772.5 Definitions.
772.7 Applicability.
772.9 Analysis of traffic noise impacts and abatement measures.
772.11 Noise abatement.
772.13 Federal participation.
772.15 Information for local officials.
772.17 Traffic noise prediction.
772.19 Construction noise.
Table 1—Noise Abatement Criteria

Authority: 23 U.S.C. 109(h), 109(i); 42 U.S.C. 4331, 4332; 49 CFR 1.48(b).

§ 772.1 Purpose.

To provide procedures for noise studies and noise abatement measures to help protect the public health and welfare, to supply noise abatement criteria, and to establish requirements for information to be given to local officials for use in the planning and design of highways approved pursuant to title 23, United States Code (U.S.C.).

§ 772.3 Noise standards.

The highway traffic noise prediction requirements, noise analyses, noise abatement criteria, and requirements for informing local officials in this regulation constitute the noise standards mendated by 23 U.S.C. 109(i). All highway projects which are developed in conformance with this regulation shall be deemed to be in conformance with the Federal Highway Administration (FHWA) noise standards.

§ 772.5 Definitions.

(a) *Design year*—the future year used to estimate the probable traffic volume for which a highway is designed. A time 10 to 20 years from the start of construction is usually used.

(b) *Existing noise levels*—the noise, resulting from the natural and mechanical sources and human activity, considered to be usually present in a particular area.

(c) L_{10}—the sound level that is exceeded 10 percent of the time (the 90th percentile) for the period under consideration.

(d) $L_{10}(h)$—the hourly value of L_{10}.

(e) L_{eq}—the equivalent steady-state sound level which in a stated period of time contains the same acoustic energy as the time-varying sound level during the same time period.

(f) $L_{eq}(h)$—the hourly value of L_{eq}.

(g) *Traffic noise impacts*—impacts which occur when the predicted traffic noise levels approach or exceed the noise abatement criteria (Table 1), or when the predicted traffic noise levels substantially exceed the existing noise levels.

(h) *Type I projects*—a proposed Federal or Federal-aid highway project for the construction of a highway on new location or the physical alteration of an existing highway which significantly changes either the horizontal or vertical alignment or increases the number of through-traffic lanes.

(i) *Type II projects*—a proposed Federal or Federal-aid highway project for noise abatement on an existing highway.

§ 772.7 Applicability.

(a) *Type I projects.* This regulation applies to all Type I projects unless it is specifically indicated that a section applies only to Type II projects.

(b) *Type II projects.* The development and implementation of Type II projects are not mandatory requirements of 23 U.S.C. 109(i) and are, therefore, not required by this regulation. When Type II projects are proposed for Federal-aid highway participation at the option of the highway agency, the provisions of §§ 772.9(c), 772.13, and 772.19 of this regulation shall apply.

§ 772.9 Analysis of traffic noise impacts and abatement measures.

(a) The highway agency shall determine and analyze expected traffic noise impacts and alternative noise abatement measures to mitigate these impacts, giving weight to the benefits and cost of abatement, and to the overall social, economic and environmental effects.

(b) The traffic noise analysis shall include the following for each alternative under detailed study:

(1) Identification of existing activities, developed lands, and undeveloped lands for which development is planned, designed and programmed, which may be affected by noise from the highway;

(2) Prediction of traffic noise levels;

(3) Determination of existing noise levels;

(4) Determination of traffic noise impacts; and

(5) Examination and evaluation of alternative noise abatement measures for reducing or eliminating the noise impacts.

(c) Highway agencies proposing to use Federal-aid highway funds for Type II projects shall perform a noise analysis of sufficient scope to provide informaton needed to make the determination required by § 772.13(a) of this chapter.

§ 772.11 Noise abatement.

(a) In determining and abating traffic noise impacts, primary consideration is to be given to exterior areas. Abatement will usually be necessary only where frequent human use occurs and a lowered noise level would be of benefit.

(b) In those situations where there are no exterior activities to be affected by the traffic noise, or where the exterior activities are far from or physically shielded from the roadway in a manner that prevents an impact on exterior activities, the interior criterion shall be used as the basis of determining noise impacts.

(c) If a noise impact is identified, the abatement measures listed in § 772.13(c) of this chapter must be considered.

(d) When noise abatement measures are being considered, every reasonable effort shall be made to obtain substantial noise reductions.

(e) Before adoption of a final environmental impact statement or finding of no significant impact, the highway agency shall identify:

(1) Noise abatement measures which are reasonable and feasible and which are likely to be incorporated in the project, and

(2) Noise impacts for which no apparent solution is available.

(f) The views of the impacted residents will be a major consideration in reaching a decision on the abatement measures to be provided.

(g) The plans and specifications will not be approved by FHWA unless those noise abatement measures which are reasonable and feasible are incorporated into the plans and specifications to reduce or eliminate the noise impact on existing activities, developed lands, or undeveloped lands for which development is planned, designed, and programmed.

§ 772.13 Federal participation.

(a) Federal funds may be used for noise abatement measures where:

(1) A traffic noise impact has been identified,

(2) The noise abatement measures will reduce the traffic noise impact, and

(3) The overall noise abatement benefits are determined to outweigh the overall adverse social, economic, and environmental effects and the costs of the noise abatement measures.

(b) For Type II projects, noise abatement measures will not normally be approved for those activities and land uses which come into existence after May 14, 1976. However, noise abatement measures may be approved for activities and land uses which come into existence after May 14, 1976, provided local authorities have taken measures to exercise land use control over the remaining undeveloped lands adjacent to highways in the local jurisdiction to prevent further development of incompatible activities.

(c) The noise abatement measures listed below may be incorporated in Type I and Type II projects to reduce traffic noise impacts. The costs of such measures may be included in Federal-aid participating project costs with the Federal share being the same as that for the system on which the project is located:

(1) Traffic management measures (e.g., traffic control devices and signing for prohibition of certain vehicle types, time-use restrictions for certain vehicle types, modified speed limits, and exclusive lane designations).

(2) Alteration of horizontal and vertical alignments.

(3) Acquisition of property rights (either in fee or lesser interest) for construction of noise barriers.

(4) Construction of noise barriers (including landscaping for esthetic purposes) whether within or outside the highway right-of-way.

(5) Acquisition of real property or interests therein (predominantly unimproved property) to serve as a buffer zone to preempt development which would be adversely impacted by traffic noise.

(6) Noise insulation of public use or nonprofit institutional structures.

(d) There may be situations where (1) severe traffic noise impacts exist or are expected, and (2) the abatement measures listed above are physically infeasible or economically unreasonable. In these instances, noise abatement measures other than those listed in paragraph (c) of this section may be proposed for Types I and II projects by the highway agency and approved by the Regional Federal Highway Administrator on a case-by-case basis when the conditions of paragraph (a) of this section have been met.

§ 772.15 Information for local officials.

In an effort to prevent future traffic noise impacts on undeveloped lands, highway agencies shall inform local officials within whose jurisdiction the highway project is located of the following:

(a) The best estimation of future noise levels (for various distances from the highway improvement) for both developed and undeveloped lands or properties in the immediate vicinity of the project,

(b) Information that may be useful to local communities to protect future land development from becoming incompatible with anticipated highway noise levels, and

(c) Eligibility for Federal-aid participation for Type II projects as described in § 772.13(b) of this chapter.

§ 772.17 Traffic noise prediction.

(a) Any traffic noise prediction method is approved for use in any noise analysis required by this regulation if it meets the following two conditions:

(1) The methodology is consistent with the methodology in the FHWA Highway Traffic Noise Prediction Model (Report No. FHWA–RD–77–108).[1]

(2) The prediction method uses noise emission levels obtained from one of the following:

[1] These documents are available for inspection and copying as prescribed in 49 CFR Part 7, Appendix D.

(i) National Reference Energy Mean Emission Levels as a Function of Speed (Federal-Aid Highway Program Manual, Volume 7, Chapter 7, Section 3, Attachment 1).[1]

(ii) Determination of Reference Energy Mean Emission Levels, Report No. FHWA–OEP/HEV–78–1.[1]

(b) In predicting noise levels and assessing noise impacts, traffic characteristics which will yield the worst hourly traffic noise impact on a regular basis for the design year shall be used.

§ 772.19 Construction noise.

The following general steps are to be performed for all Types I and II projects:

(a) Identify land uses or activities which may be affected by noise from construction of the project. The identification is to be performed during the project development studies.

(b) Determine the measures which are needed in the plans and specifications to minimize or eliminate adverse construction noise impacts to the community. This determination shall include a weighing of the benefits achieved and the overall adverse social, economic and environmental effects and the costs of the abatement measures.

(c) Incorporate the needed abatement measures in the plans and specifications.

TABLE 1.—NOISE ABATEMENT CRITERIA HOURLY A-WEIGHTED SOUND LEVEL—DECIBELS (dBA)[1]

Activity category	$L_{eq}(h)$	$L_{10}(h)$	Description of activity category
A	57 (Exterior)	60 (Exterior)	Lands on which serenity and quiet are of extraordinary significance and serve an important public need and where the preservation of those qualities is essential if the area is to continue to serve its intended purpose.
B	67 (Exterior)	70 (Exterior)	Picnic areas, recreation areas, playgrounds, active sports areas, parks, residences, motels, hotels, schools, churches, libraries, and hospitals.
C	72 (Exterior)	75 (Exterior)	Developed lands, properties, or activities not included in Categories A or B above
D			Undeveloped lands
E	52 (Interior)	55 (Interior)	Residences, motels, hotels, public meeting rooms, schools, churches, libraries, hospitals, and auditoriums.

[1] Either $L_{10}(h)$ or $L_{eq}(h)$ (but not both) may be used on a project.

[CGD 81-007]

Inland Navigation Rules Annex IV—Distress Signals; Public Hearing

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking—public hearing.

SUMMARY: A public hearing will be held on the proposed Annex IV (Distress Signals) to the Inland Navigation Rules. The proposed rule was published on July 16, 1981 at 46 FR 37010–37012. A commenter requested that a public hearing be held to allow a more detailed presentation of his and other views on the issue of strobe lights as a distress signal. The Coast Guard believes that the opportunity to make oral presentations on the strobe light issue will be beneficial to this rulemaking.

DATE: The public hearing will be held on January 6, 1982, at 9:30 a.m.

ADDRESS: The public hearing will be held at Coast Guard Headquarters, 2100 Second Street S.W., Washington, DC 20593, in Room 3201.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Llana, Project Manager, Office of Navigation, Room 1606, U.S. Coast Guard Headquarters, 2100 Second Street S.W., Washington, DC 20593, (202) 426–4958.

SUPPLEMENTARY INFORMATION: On July 16, 1981, the Coast Guard proposed regulations designating signals to be used exclusively for indicating distress and need of assistance on United States inland waters. No public hearing was scheduled at that time, but the notice stated that one may be held at a time and place set in a subsequent notice if written requests for a hearing were received and it was determined that the opportunity to make oral presentations would be beneficial to the rulemaking.

A request for a public hearing was received from the Pyrotechnic Signal Manufacturers Association, Inc. to permit them to present in greater detail their position against the designation of high intensity flashing white lights (commonly called strobe lights) as a signal to indicate distress and need of assistance. As many of the issues involving the use of strobe lights remain unsettled, the Coast Guard feels a public hearing would benefit the rulemaking.

Dated: December 1, 1981.

R. A. Bauman,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

Drawbridge Operation Regulations; Anacostia River, District of Columbia

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the District of Columbia Department of Transportation, the Coast Guard will consider amending the regulations governing operation of the Frederick Douglas drawbridge on South Capitol Street across the Anacostia River, mile 1.2, at Washington, DC to require an advance notice for all draw openings. This proposal is being made because the current volume of vessel traffic passing through the bridge does not appear sufficient to warrant constant attendance by a bridge tender. It also is proposed to add a new provision to allow the bridge to remain closed to vessel traffic on every Presidential Inauguration Day in order to prevent vehicular traffic congestion at the bridge on that day. This action is intended to accommodate the needs of vehicular traffic while providing for the reasonable needs of navigation.

DATE: Comments must be received on or before January 7, 1982.

ADDRESSES: Comments should be mailed to Commander (oan), Fifth Coast Guard District, Federal Building, 431 Crawford Street, Portsmouth, Virginia 23705. The comments and any materials referenced in this notice will be available for inspection or copying at the Office of Chief, Aids to Navigation Branch, Room 609, Fifth Coast Guard District, Federal Building, 431 Crawford Street, Portsmouth, Virginia 23705. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Specialist, Aids to Navigation Branch, Fifth Coast Guard District, Federal Building, 431 Crawford Street, Portsmouth, Virginia 23705 (804–398–6222).

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their name and address, identify this proposed rule by Docket Number or bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The rule may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that an opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal person involved in drafting this proposal is: Ann B. Deaton, Project Manager, Fifth Coast Guard District, Aids to Navigation Branch.

Discussion of Proposed Rule

The District of Columbia Department of Transportation, owner of this bridge, has requested a change to the existing regulation for the bridge which requires the bridge to be opened on signal except for restricted openings during morning and evening rush hours. They indicated the draw has been required to be opened infrequently for vessel traffic in recent years, and it has not been cost effective for them to maintain an operator in constant attendance when the need for one does not exist. They provided records which show the draw was opened 60 times for vessel traffic during 1979 and 74 times during an 11-month period in 1980. Most of this traffic consisted of military craft. The Navy Diving School, which frequently required opening of the draw in the past, has since relocated away from the area, thus reducing the number of openings. The Washington Navy Yard, located upstream of the bridge, is visited by U.S. and foreign flagships and other visiting dignitaries, occasionally requiring opening of the bridge. At times, Coast Guard and Army vessels require the bridge to be opened. However, these openings are not considered to be frequent enough to justify constant operator attendance. There is very little use of this bridge by recreational or commercial water traffic at this time, although there are plans to develop waterfront property above the bridge for such uses in the future.

Based on these findings, the Coast Guard proposes to amend the regulation to require a 24-hour advance notice for all draw openings year round. It appears that this proposed change may be made without unduly restricting existing water traffic volumes while at the same time relieving the bridge owner of the responsibility of providing constant operator attendance at the bridge. Also, a proposed new provision to allow the bridge to remain closed to vessel traffic on every Presidential Inauguration Day is being considered because the Coast Guard traditionally has approved the District of Columbia's request for such closure in order to prevent vehicular traffic congestion at the bridge on this day. The current provision in § 117.330(c) that the draw will remain closed to navigation on certain other occasions to permit uninterrupted passage of dignitaries across the bridge will be retained, although editorial changes to this provision have been made.

There are no known businesses that will be significantly impacted by the proposed change. Since most water traffic consists of military craft and visiting U.S. and foreign ships who plan their trips according to an arranged schedule, it is felt that these may plan their trips around the advance notice opening requirement, thus avoiding any inconvenience or expense resulting from

fuel consumption often encountered during unexpected delays. The District of Columbia, Department of Transportation, will be beneficially affected from an economic standpoint since they will be relieved of the responsibility of providing a salaried operator on a continuous basis.

Evaluation

This proposed regulation has been reviewed under the provisions of Executive Order 12291 and has been determined not to be a major rule. In addition, the proposed regulation is considered to be nonsignificant in accordance with guidelines set forth in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–22–80). An economic evaluation has not been conducted since, for the reasons discussed above, their impact is expected to be minimal. In accordance with section 605(b) of the Regulatory Flexibility Act (94 Stat. 1164), it is also certified that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

Proposed Regulation

PART 117—DRAWBRIDGE OPERATION REGULATIONS

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations is proposed to be amended as follows.

In 33 CFR 117.330, paragraph (c) is revised to read as follows:

§ 117.330 Anacostia River, Washington, D.C.; bridges.

* * * * *

(c) *District of Columbia; South Capitol Street (Frederick Douglass) Bridge.* (1) The draw shall be opened for the passage of vessel traffic if at least 24-hour's advance notice has been given to the District of Columbia Department of Transportation.

(2) Requests for draw openings that coincide with the prearranged passage of dignitaries across the bridge will be scheduled so as not to interfere with the dignitaries' crossing.

(3) The bridge shall remain closed all day on every Presidential Inauguration Day.

(4) A copy of the regulations in this section with a telephone number where the bridge owner can be reached shall be posted on both the upstream and downstream sides of the bridge.

(Sec. 5, 28 Stat. 362, as amended (33 U.S.C. 499); sec. 6(g)(2), Pub. L. 89–670, 80 Stat. 937, as amended (49 U.S.C. 1655(g)(2)); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(g)(3))

Dated: October 13, 1981.

John D. Costello,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

Library Career Training Program (Title II–B HEA)

Correction

In FR Doc. 81–31203, at page 53362, in the issue of Wednesday, October 28, 1981, make the following corrections:

(1) On page 53366, third column, § 776.33(h)(2), line 2, correct the word "interest" to read "interests".

(2) On page 53367, first column, § 776.41, change the figure in paragraph (a)(3), line 3, from "$3500" to "$5200" and in the introductory text of paragraph (b), line 2, change "stepends" to "stipends".

(3) On page 53367, first column, § 776.42, correct the paragraph now reading (b)(2) to read (b)(1) and the paragraph now reading (b)(1) to read (b)(2). Also correct the new (b)(2), line 1, by changing "post-baccalaureate" to read "pre-baccalaureate".

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[BC Docket No. 81–819; RM–3839]

FM Broadcast Stations in Colorado Springs, Denver, Evergreen, Lamar, Monte Vista, and Pueblo, Colo.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes two optional assignment plans for the use of Channel 243 at either Evergreen or Denver, Colorado, and the substitution of channels in four other Colorado communities to accomodate the proposals. Stations on two occupied channels are directed to show cause why their license should not be modified to specify operation on a proposed substitute channel. The assignment could provide a first local aural service to Evergreen or a tenth FM channel for Denver.

DATES: Comments must be filed on or before January 17, 1982, and reply comments on or before February 1, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Broadcast Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION:

Adopted: November 18, 1981.

Released: December 3, 1981.

By the Acting Chief, Policy and Rules Division.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Colorado Springs, Denver, Evergreen, Lamar, Monte Vista, and Pueblo, Colorado); Proposed rulemaking and orders to show cause.

1. A petition for rulemaking[1] was filed by Carolyn Gaspard and Penny Eilersen, d.b.a. Gaspard and Eilersen ("petitioner"), proposing the assignment of Class C FM Channel 243 to Evergreen, Colorado, as that community's first FM allocation. The requested assignment would required a substitution of channels for two occupied and two unused channels in order to comply with the minimum mileage separation requirements of § 73.207 of the Commission's Rules. The required changes in the affected Colorado communities are as follows: Channel 251 for 243 (Station KKFM) at Colorado Springs; Channel 245 for 250 (Station KCCY) at Pueblo; Channel 237A for vacant 244A at Monte Vista; and Channel 289 for vacant 245 at Lamar. Oppositions were filed by Kennebec-Colorado Broadcasting Corporation ("Kennebec"), licensee of Station KCCY (Channel 250) at Pueblo, Colorado, and KSID, Inc. ("KSID"), licensee of Station KSID–FM, Sidney, Nebraska,[2] to which the petitioner responded.

2. Evergreen (population 2,321),[3] in Jefferson County (population 233,031), is located approximately 24 kilometers (15 miles) southwest of Denver. It presently has no local service.

3. Petitioner states that Evergreen is a mountain community located within the foothills of Colorado's Front Range. It asserts that the area is growing at a substantial rate, indicating a 1980 U.S. Census of 6,393 persons and 23,000 inhabitants within a five mile radius thereof. Further it adds that the present means of providing information to the

[1] Public Notice of the petition was given February 23, 1981, Report No. 1270.

[2] KSID's opposition stems from its mutually exclusive proposal to add Channel 243 to Sidney, Nebraska (BC Docket No. 81–573). However, a staff study indicates that another channel can be assigned to Sidney, thus permitting that proposal to proceed independently of the instant proceeding and mooting its arguments in regard to this case.

[3] Population figures herein are extracted from the 1970 U.S. Census, unless otherwise indicated.

community is through the two local newspapers which are published twice a week. Coverage of matters of interest to Evergreen residents are not provided by Denver stations and the community needs a means of providing public safety information (stemming from a combination of stated potential area hazards), to its residents. In support of its proposal, petitioner included a market profile which reveals, among other things, the expanding economic and population base of Evergreen. Petitioner adds that, although Evergreen is located within 15 miles of Denver, it has separate needs and interests and that it would apply for a Class A channel if one were available.

4. Petitioner's proposal to assign Channel 243 to Evergreen would require a change in four assignments, and petitioner states it would reimburse the two affected stations for channel changes. Assignment of Channel 243 to Evergreen will cause preclusion to occur on Channel 242 within 150 miles, Channel 243 within 180 miles, and on Channel 244A within 105 miles. In addition, petitioner shows the areas already precluded by the channels to be deleted. The newly precluded areas contain seven communities having a population in excess of 1,500 persons. Five of these have assignments[4] and the remaining two have channels available.[5]

5. In opposition comments, Kennebec states that it has expended considerable time and money in promoting its existing location on the FM dial which would be lost if the assignment is made as proposed. Additionally, it states its concern that its audience may be reluctant to accept a change which might appear "quixotic" on its part, in view of its recent promotional campaign. Further, it states its belief that the subject proposal is an effort to add another station to Denver, and that if Evergreen is to have local service, it should be assigned a Class A channel, due to its size.

6. KSID submitted a lengthy opposition to the assignment of a Class C channel to Evergreen. However, since its interest was directed to obtaining a channel for Sidney, Nebraska, and such a proposal can be accommodated separately from this case (see footnote 2, *supra*), we have not elaborated on its arguments. If KSID wishes to pursue its opposition it may do so in response to this *Notice of Proposed Rule Making.*

7. In response to the Kennebec opposition, petitioner states that opponent's belief regarding service to Denver is misplaced and reiterates that it would have applied for a Class A if any had been assignable. It states that if Evergreen is to have a station, Channel 243 is the only available one.

8. In support of its proposal to assign Class C FM Channel 243 to Evergreen, Colorado, as a first local service, petitioner should provide a *Roanoke Rapids/Anamosa* study to indicate the amount of first and second service that would be provided to surrounding areas and populations by the instant proposal. See, *Roanoke Rapids, North Carolina,* 9 FCC 2d 672 (1967); *Anamosa, Iowa,* 46 FCC 2d 520 (1975). Without such a showing we would assume that no first or second service would be provided in view of the nine Denver Class C stations nearby. This proposal would also require a transmitter site restriction of 9.6 kilometers (6 miles) southeast of Evergreen to avoid shortspacing to Station KSBT(FM) (Channel 244A) in Steamboat Springs, Colorado.

9. As an alternative to the Evergreen proposal, we also propose to assign Class C Channel 243 to the larger city of Denver, which could be applied for at Evergreen under the 15-mile rule, § 73.203(b) of the Commission's Rules. This option is proposed generally in such cases where the community requested is not considered large enough to warrant a Class C assignment without a special showing of need and the community is close enough to the larger city to fall within § 73.203(b). See *Albuquerque and Alameda, New Mexico,* 48 RR 2d 1327 (1981), and *Anchorage and Eagle River, Alaska,* 50 RR 2d 215 (1981). We are adding this proposal because we are concerned that a high powered station allocated to Evergreen would inevitably seek to attract advertising from Denver and thereby serve the Denver market. If petitioner desires to serve Evergreen, it could do so with a Class A station. Although petitioner is correct that no Class A channel is available on a drop-in basis, a Class A channel could nevertheless be assigned to Evergreen with less substitutions than are involved here. We shall not propose a Class A channel here since petitioner may not be willing to reimburse other stations for a Class A assignment to Evergreen.

10. Denver (popluation 491,396) of which Denver County is comprised, is presently assigned 9 FM channels but could qualify for an additional allocation under the Commission's population guidelines. This proposed option to make the assignment available at Denver would also require the two permittees (Stations KKFM and KCCY) to change frequencies to accommodate the proposal. Therefore, we shall give consideration to comments directed toward these alternate assignment proposals.

11. Accordingly, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Option I		
Colorado Springs, Colorado.	243	251.
Evergreen, Colorado		243.
Lamar, Colorado	245	289.
Monte Vista, Colorado	244A	237A.
Pueblo, Colorado	250	245.Q03
Option II		
Colorado Springs, Colorado.	243	251.
Denver, Colorado	239,253, 258, 262, 266, 278, 286, 290, 294	239, 243, 253, 258, 262, 266, 278, 286, 290, 294.
Lamar, Colorado	245	[illegible].
Monte Vista, Colorado	244A	237A.
Pueblo, Colorado	250	245.

12. It is ordered, that, pursuant to Section 316 of the Communications Act of 1934, as amended, Sky Hi, Inc., licensee of radio Station KKFM–FM at Colorado Springs, Colorado, shall show cause why its license for Station KKFM–FM (Channel 243) should not be modified to specify operation on Channel 251 in lieu of Channel 243 at Colorado Springs, Colorado.

13. Pursuant to § 1.87 of the Commission's Rules and Regulations, the licensee of Station KKFM–FM may, not later than January 17, 1982, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f) if the right to request a hearing is waived, Sky Hi, Inc. may, not later than January 17, 1982, file a written statement showing with particularity why its license should not be modified or not so modified as proposed in the *Order to Show Cause.* In this case, the Commission may call on Sky Hi, Inc. to furnish additional information, designate the matter for hearing, or issue without further proceeding an Order modifying the license as provided in the *Order to Show Cause.* If the right to request a hearing is waived and no written statement is filed by the date referred to above, Sky Hi, Inc. is deemed to consent to the modification as proposed in the *Order to Show Cause* and a final Order will be issued by the Commission if the

[4] The five communities with their assignments are Sidney, Nebraska (Channel 237A); Kimball, Nebraska (Channel 261A); Brush, Colorado (Channel 296A); Wheatland, Wyoming (Channel 269A); and Aspen, Colorado (Channel 249A).

[5] The two communities are Gering, Nebraska, and Holyoke, Colorado. Channel 244A is available for assignment to either place, according to petitioner.

channel changes referred to in paragraph 11 above are found to be in the public interest.

14. It is further ordered, that, pursuant to Section 316 of the Communications Act of 1934, as amended, Kennebec-Colorado Broadcasting Corporation, licensee of Radio Station KCCY–FM, Pueblo, Colorado, shall show cause why its license for Station KCCY–FM (Channel 250), should not be modified to specify operation on Channel 245 in lieu of Channel 250 at Pueblo, Colorado.

15. Pursuant to § 1.87 of the Commission's Rules and Regulations, the licensee of Station KCCY–FM may, not later than January 17, 1982, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f), if the right to request a hearing is waived, Kennebec-Colorado Broadcasting Corporation may, not later than January 17, 1982, file a written statement showing with particularity why its license should not be modified or not so modified as proposed in the *Order to Show Cause*. In this case, the Commission may call on Kennebec-Colorado Broadcasting Corporation to furnish additional information, designate the matter for hearing, or issue without further proceedings an Order modifying the license as provided in the *Order to Show Cause*. If the right to request a hearing is waived and no written statement is filed by the date referred to above, Kennebec-Colorado Broadcasting Corporation is deemed to consent to the modification as proposed in the *Order to Show Cause* and a final Order will be issued by the Commission if the channel changes referred to in paragraph 11 above are found to be in the public interest.

16. It is further ordered, That the Secretary of the Commission shall send a copy of this *Order* by Certified Mail, return receipt requested, to Sky-Hi, Inc., Radio Station KKFM–FM, 225 South Academy Boulevard, Colorado Springs, Colorado 80910, and Kennebec-Colorado Broadcasting Corporation, Radio Station KCCY–FM, c/o 315 8th Street, Pueblo, Colorado 81003, the parties to whom the *Orders to Show Cause* are directed.

17. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference haerin.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

18. Interested parties may file comments on or before January 17, 1982, and reply comments on or before February 1, 1982.

19. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

20. For further information concerning this proceeding, contact Nancy V. Joyner, Broadcast Bureau, (202) 632–7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assigments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082 (47 U.S.C. 154, 303))

Federal Communications Commission.

Martin Blumenthal,

Acting Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, They will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.40 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

47 CFR Part 73

[BC Docket No. 81–818; RM–3960]

FM Broadcast Station in Naples, Florida; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to substitute Channel 276A for Channel 249A at Naples, Florida, in response to a petition filed by WRMF, Inc., licensee of Station WRMF (FM), West Palm Beach, Florida. The proposed substitutions would enable WRMF to improve its facilities through a relocation of its transmitter site. In addition, Channel 221A is substituted for Channel 276A at Marco, Florida, as the channel to be considered in BC Docket 81–487.

DATES: Comments must be filed on or before January 17, 1982, and reply

comments must be filed on or before February 1, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION: .

Adopted: November 19, 1981.

Released: December 2, 1981.

By the Acting Chief, Policy and Rules Division.

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Naples, Florida); BC Docket No. 81-818, RM-3960; notice of proposed rule making and order to show cause.

1. Before the Commission is a petition for rule making,[1] filed by WRMF, Inc. ("WRMF"), licensee of Station WRMF (FM) (Channel 250), West Palm Beach, Florida, proposing to substitute Channel 276A for Channel 249A at Naples, Florida. Opposing comments thereto were filed by Sunshine Broadcasting, Inc., petitioner for an FM assignment to Marco, Florida, to which WRMF responded.[2]

2. Naples (population 17,581),[3] in Collier County (population 85,791), is located on the southwest coast of Florida, approximately 160 kilometers (100 miles) west of Miami, Florida. It is served locally by fulltime AM Station WNOG and FM Stations WCVU (Channel 233), WSGL (Channel 249A), WRGI (Channel 228A), Channel 288A is unoccupied with an application pending. We have determined, in response to WRMF's suggestion, that Channel 221A is available at Marco. We shall therefore substitute that channel for consideration in BC Docket 81-487 and we shall notify the parties by mail. If the Channel 221A proposal is unsatisfactory, the Marco proponent may file a counter proposal to this *Notice*.

3. WRMF seeks to substitute Channel 276A for Channel 249A at Naples, Florida, to enable it to relocate the transmitter of its Station WRMF (FM) (Channel 250), to a site which, at present, would be short-spaced to the operation of Station WSGL (FM) on Channel 249A. It states that the requested channel subsitution would accommodate its proposed technical improvements by elimination of the short-spacing, and thus enable it to provide an increase in its 60 dBu coverage from an area encompassing 1,595 square miles to one covering 4,080 square miles, serving 864,617 persons with new listening diversity.

4. WRMF states that assignment of Channel 276A at Naples would preclude its use in an area of 1,350 square miles, which, according to petitioner, is principally comprised of uninhabited swampland known as "The Everglades," but indicates that alternate Channels 280A and 261A are available to the more populated communities of Everglades City (Channel 280A), and Marco (Channel 221A), which lie within this area, However, WRMF has neglected to provide information regarding the adjacent channel preclusion impact of the proposed assignment of Channel 276A to Naples, and should do so in its comments. Finally, WRMF adds that it will reimburse Station WSGL for its reasonable costs incurred in effectuating the proposed channel substitutions.

5. As indicated in fn. 1 *supra*, the pending petition (BC Docket 81-487) to assign Channel 276A to Marco, Florida, is mutually exclusive with the Naples proposal (RM-3960). A staff engineering study reveals that Channel 276A is the only "drop-in" channel available for assignment to Naples. However, Channel 221A, with a site restriction of 2.6 miles southwest of the community, is available to Marco. Also, Channel 249A, with a site restriction of 3.7 miles west, is available to Marco if deleted at Naples. Of the two choices, we have selected Channel 221A as the most efficient and effective usage of the frequency spectrum since it would permit the transmitter site to be located close to the community. Also, Channnel 221A at Marco would preclude only the use of the co-channel in a very small area (22 square miles), and the only affected community is Everglades City, with a population considerably less than 1,000 persons.

6. Accordingly, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Naples, Florida	228A, 233, 249A, 288A.	228A, 233, 276A, 288A.

7. It is ordered, That pursuant to section 316(a) of the Communications Act of 1934, as amended, Sterling Communications Corp., licensee of Station WSGL(FM), at Naples, Florida, shall show cause why its license should not be modified to specify operation on Channel 276A as proposed herein instead of the present Channel 249A.

8. Pursuant to § 1.87 of the Commission's Rules, Sterling Communications Corp ("Sterling") may, not later than January 12, 1982, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f), if the right to request a hearing is waived, Sterling may, not later than January 17, 1982, file a written statement showing with particularity why its license should not be modified as proposed in the *Order to Show Cause*. In this case, the Commission may call on Sterling to furnish additional information, designate the matter for hearing, or issue, without further proceedings, an Order modifying the license as provided in the *Order to Show Cause*. If the right to request a hearing is waived and no written statement is filed by the date referred to above, Sterling will be deemed to have consented to the modifications as proposed in the *Order to Show Cause* and a final Order will be issued by the Commission, if the above-mentioned channel modification is ultimately found to be in the public interest.

9. It is further ordered, That the Secretary of the Commission shall send by Certified Mail, Return Receipt Requested, a copy of this *Order* to: Sterling Communications Corp., c/o P.O. Box 1874, Tallahassee, Florida 32302, and to its counsel, Herbert M. Schulkind, Esq., Fly, Shuebruk, Gaguine, Boros, Schulkind and Braun, 1211 Connecticut Avenue, N.W., Washington, D.C. 20036, and also to the parties to BC Docket 81-4897, Sunshine Broadcasting, Inc., c/o Peter Tannenwald, Arent, Fox, Kintner, Plotkin and Kahn, 1815 H Street, NW., Washington, D.C. 20006, and Collier Broadcasting Company, c/o James A. Koerner, Baraff, Koerner and Olender, P.C., 2033 M Street, NW. Suite 203, Washington, D.C. 20036.

10. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

11. Interested parties may file comments on or before January 17, 1982, and reply comments on or before February 1, 1982.

12. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules.

[1] *Public Notice* of this petition was given August 17, 1981, Report No. 1305.

[2] Channel 276A was proposed for assignment to Marco in BC Docket 81-487. That proposal conflicts with the present proposal to assign Channel 276A to Naples.

[3] Population data are extracted from the 1980 U.S. Census.

See Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules, 46 FR 11549, published February 9, 1981.

13. For further information concerning this proceeding, contact Nancy V. Joyner, Broadcast Bureau, (202) 632–7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Acting Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

47 CFR Part 73

[BC Docket No. 81-813; RM-3971]

FM Broadcast Station in Great Falls, Montana; Proposed Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the substitution of Class C FM Channel 291 for Channel 292A at Great Falls, Montana, and modification of the Class A license for Station KOOZ (FM), in response to a petition filed by Sun River Broadcasting, Inc. The assignment could provide Great Falls with a fourth Class C FM station.

DATES: Comments must be filed on or before January 4, 1982, reply comments must be filed on or before January 19, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Broadcast Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION: .

Adopted: November 12, 1981.

Released: November 20, 1981.

By the Acting Chief, Policy and Rules Division.

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Great Falls, Montana); BC Docket No. 81–813, RM–3971; notice of proposed rule making.

1. The Commission herein considers a petition for rule making [1] filed by Sun River Broadcasting, Inc. ("petitioner"), licensee of FM Station KOOZ (Channel 292A), Great Falls, Montana, which seeks to substitute Class C FM Channel 291 for Channel 292A, and to modify its license to specify operation on the Class C channel. No oppositions to the proposal were received. Channel 291 can be assigned to Great Falls consistent with the minimum distance separation requirements of § 73.207 of the Commission's Rules.

2. Great Falls (population 56,725),[2] the seat of Cascade County (population 80,696), is located approximately 112 kilometers (70 miles) north of Helena, Montana. It is served by four full-time AM stations (KARR, KEIN, KMON and KQDI); FM Stations KNUW (Channel 233), KAAK (Channel 255), and KOOZ (Channel 225 with maximum power of 100 kW.

3. Petitioner states that its request is founded on the necessity to eliminate an existing intermixture situation in the Great Falls area. It adds that such intermixture stems from the initial allocations plan for Great Falls, whereby the Commission allocated four channels to the community, three of which were Class C channels and the remaining, a Class A channel. Petitioner states that at that time, it was the only operational FM station in Great Falls, operating with Class A facilities. It adds that since those alloted Class C channels have become operational during the past decade, it now finds the substitution necessary to enable its station to become technically competitive with the higher-powered stations.

4. Petitioner's engineering study reveals that assignment of Channel 291 to Great Falls will cause preclusion to occur on Channels 288A, 290, 291, and 292A. This study takes into consideration petitioner's present Channel 292A allocation in Great Falls. In this regard, it states that most of the precluded area is already precluded by its existing operation. Petitioner listed those communities containing over 1,000

---

[1] *Public Notice* of the petition was given September 9, 1981, Report No. 1308.

[2] Population figures are extracted from the 1980 U.S. Census.

persons which would sustain preclusion as a result of the proposed assignment. It also indicates that numerous channels are available for assignment to the precluded communities. Although we did not undertake an in-depth engineering analysis to verify this assertion, we would agree that, considering the remoteness of the area, it is probable that alternate channels are indeed available.

5. The engineering study also reveals that, in employing reasonable facilities to reflect the extent of FM service in the area, the location of the existing transmitters are in such close proximity to each other that the coverage pattern of the present Class C stations and the proposal herein are essentially the same. Further, petitioner asserts that the coverage area of its proposed station with the nighttime AM facilities of the area indicate there are no white or grey areas.

6. In addition to eliminating the present undesirable intermixture in Great Falls, we find the proposal has merit since no other city of comparable size would be precluded by this assignment. In view of the above considerations, we find that petitioner has demonstrated a need for the proposed assignment at Great Falls and shall propose to amend the Table of Assignments as requested.

7. Currently, no other expression of interest in the proposed Class C channel at Great Falls has been received. Accordingly, we will propose to modify the license of Station KOOZ, as requested by petitioner, to specify operation on Channel 291. However, in conformity with Commission precedent, as express in *Cheyenne, Wyoming*, 62 FCC 2d 63 (1976), should another interest in the assignment be shown, the proposed modification could not be made and the channel, if assigned, would be open to competing applications.

8. An *Order to Show Cause* to the petitioner is not required since consent to the modification of its license is indicated by its request for the Class C channel.

9. Canadian concurrence in this assignment is required since Great Falls is located within 402 kilometers (250 miles) of the U.S.-Canadian border.

10. In view of the above, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with regard to Great Falls, Montana, as follows:

City	Channel No.	
	Present	Proposed
Great Falls, Montana	225, 233, 255, 292A	225, 233, 255, 291.

11. The Commission's authority to institute rulemaking proceedings, showing required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

12. Interested parties may file comments on or before January 4, 1982 and reply comments on or before January 19, 1982.

13. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rulemaking proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. *See, Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rulemaking to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

14. For further information concerning this proceeding, contact Nancy V. Joyner, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a Notice of Proposed Rulemaking is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rulemaking other than comments officially filed at the Commission or oral presentation required by the Commission.

(Secs. 4, 303, 48 stat., as amended, 1068, 1082 (47 U.S.C. 154, 303))

Federal Communication Commission.

Martin Blumenthal,

Acting Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[BC Docket No. 81-776; RM-3958]

FM Broadcast Stations in Gallup, New Mexico; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the assignment of Class C Channel 256 to Gallup, New Mexico, in response to a petition filed by John R. Catsis. The proposed assignment could provide for a third FM station at Gallup.

DATES: Comments must be filed on or before January 4, 1982, and reply comments on or before January 19, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION: .

Adopted: November 6, 1981.

Released: November 24, 1981.

By the Acting Chief, Policy and Rules Division:

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Gallup, New Mexico); BC Docket No. 81-776, RM-3958; notice of proposed rule making.

1. A petition for rule making [1] was filed by John R. Catsis ("petitioner"), requesting the assignment of a Class C FM channel to Gallup, New Mexico,[2] as its third FM assignment. Supporting comments were filed by the petitioner stating his intent to apply for the channel, if assigned. No oppositions to the proposal were received.

2. Gallup (population 18,161),[3] seat of McKinley County (population 54,950), is located approximately 192 kilometers (120 miles) west of Allbuquerque, New Mexico. It is served locally by two fulltime AM stations (KGAK and KYVA), and two FM stations (KQNM and KOVO). The AM and FM stations are co-owned.

3. The petitioner states that Gallup is the largest community in the county, and it experienced a growth in population of approximately 24 percent from 1970 (14,596) to 1980 (18,206).[4] According to the petitioner, the economy is based on retail and wholesale trade, petroleum refining, coal and uranium mining, light manufacturing and tourism. Petitioner contends that, based on Gallup's present population and anticipated future growth, an additional (independent) station is needed to meet the community's needs for expanded communications facilities. Petitioner emphasizes the need for a station with a varied format.

4. The study submitted by the petitioner indicates that all seven channels will be affected as a result of the proposed assignment. However, numerous other channels are said to be available throughout the precluded area.

5. The proposed assignment exceeds the Commission's population guidelines for a third allocation, as cities the size of Gallup (under 50,000) are generally limited to two FM assignments. However, assignments in excess of the guidelines have been made when the preclusion impact of the assignment is considered to be minimal. As noted in the preceding paragraph, there appear to be several channels available for assignment to the precluded communities, therefore the population guidelines do not appear to be an obstacle to the proposal to assign Channel 256 to Gallup.

6. In view of the above, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, for the community listed, as follows:

City	Channel No.	
	Present	Proposed
Gallup, N. Mex.	229, 233	229, 233, 256

7. The Commission's authority to institute rule making proceedings, showing required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

8. Interested parties may file comments on or before January 4, 1982, and reply comments on or before January 19, 1982.

9. The Commission has determined that the relevant provisions of the Regualtory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

10. For further information concerning this proceeding, contact Montrose H. Tyree, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

(Secs. 4, 303, 48 stat., as amended, 1068, 1082 (47 U.S.C. 154, 303.))

Federal Communications Commission.

Martin Blumenthal,

Acting Chief, Policy and Rules Division Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules. It Is Proposed To Amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponents of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial

[1] Public Notice of the petition was given on August 7, 1981, Report No. 1303.

[2] The petition as filed requested Channel 260. That proposal conflicted with the proposals to assign Channel 260 to Thoreau, New Mexico (RM-3897), and Channel 259 to Springerville-Eagar, Arizona (RM-3943). We have substituted Channel 256 for consideration here.

[3] Population figures are taken from the 1980 U.S. Census.

[4] Estimates from Gallup-McKinley County Chamber of Commerce, based on U.S. Census tabulations.

comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

BILLING CODE 6712-01-M

47 CFR—Part 73

[BC Docket No. 81-779; RM-3870]

FM Broadcast Station Abilene, Texas; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign Channel 232A to Abilene, Texas, as its fifth commercial FM channel in response to a request from Salvador M. Ybarra.

DATES: Comments must be filed on or before January 4, 1982, and reply comments on or before January 19, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: November 6, 1981.

Released: November 25, 1981.

By the Acting Chief, Policy and Rules Division:

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Abilene, Texas); BC Docket No. 81-779, RM-3870; notice of proposed rule making.

1. *Petitioner, Proposal, Comments.* (a) A petition for rule making was filed by Salvador M. Ybarra ("petitioner") proposing the assignment of FM Channel 232A to Abilene, Texas, as its fifth commercial channel assignemnt.[1]

(b) The proposed channel can be assigned to Abilene in compliance with the mileage separation requirements of Section 73.207 of the Commission's Rules provided a site is selected at least 5.3 miles northwest of Abilene to avoid short-spacing to Station KEAN (Channel 286), Abilene.

(c) Petitioner states it will apply for the channel if assigned. No oppositions have been received.

2. *Demographic Date.* (a) Location: Abilene, seat of Taylor County, is located approximately 232 kilometers (145 miles) west of Fort Worth, Texas. The boundary of Abilene also extends into Jones County.

(b) Population: Abilene—98,315;[2] Taylor County—110,932; Jones County—17,268.

(c) Present aural service: 2 daytime-only AM stations (KBER, KEAN); 2 fulltime AM stations (KRBC, KWKC); 3 commercial FM stations (KORQ (Channel 264), KEAN-FM (Channel 286), KFMN (Channel 300)), a fourth commercial FM channel (257A) has two applications pending; and one noncommercial educational FM station (KGNZ (Channel 201C)).

3. Petitioner states in support of his request for a fifth FM channel that he intends to provide the first minority owned station in Abilene designed to serve its Spanish-speaking community. He states that the total Spanish population of the Abilene area was 11,257, as of September 1, 1977. Additional information concerning Abilene's recent growth was also submitted. Petitioner supplemented his comments by submitting letters from various local institutions in support of the request.

4. The preclusive effect of this proposal is not known and petitioner, as a minority, requests waiver of this requirement in order to conserve its financial resources. We have on our own analyzed the preclusive impact and find that the following communities of over 1,000 population and without local aural service are affected: *Texas*—Roscoe (1980 population 1,628); Clyde (1980 population 2,562); Hamlin (1980 population 3,248); Anson (1980 population 3,831). Our study shows at least one Class A channel is available at each of the precluded communities.

5. As previously indicated a site restriction of 5.3 miles northwest is necessary to meet the spacing restrictions. Petitioner proposed a site approximately 6.9 miles northwest of Abilene. Since the community covers a large land area, petitioner will need to demonstrate 70 dBu coverage to the entire community with the filing of its application, should the channel be assigned, as proposed.

6. In view of the above, the Commission proposes to amend § 73.202(b) of the Commission's Rules, the FM Table of Assignments, with regard to the following community:

City	Channel No.	
	Present	Proposed
Abilene, Texas	257A, 264, 286, 300	232A, 257A, 264, 286, 300

7. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

8. Interested parties may file comments on or before January 4, 1982, and reply comments on or before January 19, 1982.

9. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules, 46 FR 11549, published February 9, 1981.*

10. For further information concerning this proceeding, contact Mark N. Lipp, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a

Acting Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filng initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable precedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

47 CFR Part 73

[BC Docket No. 81-777; RM-3856]

FM Broadcast Stations in Big Pine Key, Florida; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the substitution of Class C FM Channel 284 for Channel 228A at Big Pine Key, Florida, and modification of the Class A license for Station WWUS(FM), accordingly, in response to a petition filed by Lower Keys Broadcasting Corporation.

DATES: Comments must be filed on or before January 4, 1982, and reply comments on or before January 19, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: November 6, 1981.

Released: November 25, 1981.

By the Acting Chief, Policy and Rules Division:

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Big Pine Key, Florida); BC Docket No. 81-777, RM-3856; *Notice of Proposed Rule Making.*

1. The Commission herein considers a petition for rule making [1] filed by Lower Keys Broadcasting Corporation ("petitioner"), licensee of Station WWUS(FM), Big Pine Key, Florida, which seeks to substitute Class C FM Channel 284 for Channel 228A at Big Pine Key, and modify its license for Channel 228A to specify operation on the Class C channel. Petitioner stated that it will apply for the Class C channel, if assigned. Comments opposing the proposal were filed by Florida Keys Broadcasting Corporation, licensee of Stations WKIZ(AM) and WFYN(FM), Key West, Florida, to which petitioner responded.

2. Petitioner argues in support of its request that Big Pine Key, while showing recent growth, remains isolated from propulation centers. A higher powered station could serve nearly all of the Lower Keys Division of Monroe County and the large number of tourists driving through this area, according to petitioner. The deletion of Channel 228A from Big Pine Key would make the channel available to any one of nine communities in the area, including seven with no local aural service.

3. In opposing comments, Florida Keys states that it previously opposed a petition filed by Lower Keys in 1977 which sought the allocation of Channel 228A to Boca Chica Key, Florida, on the grounds that (1) it was a proposal to allocate the channel to nearby Key West and (2) Key West was then amply served by five AM and FM stations licensed to the community. The Commission in a *Report and Order*, released August 22, 1978, denied the proposal, after which the petitioner requested the assignment of Channel 228A to Big Pine Key. Florida keys claims that it views the present proposal as one intended to serve Key West. Thus, Florida Keys questions whether the Lower Key Division of Monroe County is a separate community in any meaningful political or governmental sense which would justify a wide coverage area Class C channel.

4. In reply comments, petitioner argues that the Commission in an earlier decision determined that Big Pine Key is a community, although unincorporated. Petitioner states that the opposition does not refute the need for a Class C assignment at Big Pine Key, instead it contends that the proposed assignment is intended to serve Key West, but it has failed to submit evidence to support its contentions. Petitioner maintains that its engineering report indicates that the proposed allocation in which it proposes facilities of 100 kW at 150 feet would not cover any part of Key West, and requests the Commission to institute the rule making, as proposed.

5. Big Pine Key (population not listed in the 1970 or preliminary 1980 Census), in the Lower Keys Division (population 16,353 [2] of Monroe County (population 63,098) is located approximately 48

---

[1] Public Notice of the petition was given on March 27, 1981, Report No. 1277.

[2] Population figures are taken from the 1970 U.S. Census.

kilometers (30 miles) northeast of Key West, Florida. It is served locally by FM Station WWUS (Channel 228A), licensed to the petitioner.

6. While petitioner listed communities in the area without AM or FM service, it did not however list the communities that would be left without alternative assignments as a result of the allocation of Channel 284 to Big Pine Key. Petitioner should do so in the comments to this proposal.

7. Although it has been general Commission policy to assign Class C channels only to larger communities, exceptions have been made when the assignment of a Class C channel would provide first or second service to outlying areas. While no Roanoke Rapids/Anamosa showing was submitted, petitioner states that some second, third and even fourth service would be provided. We have confirmed petitioner's showing that with its proposed facilities, a 60 dBu signal would not be received in Key West. Thus, we find it inappropriate to raise a suburban community issue.

8. Comments are invited on the proposal to amend the FM Table of Assignments, § 73.202(b) of the Rules, with regard to Big Pine Key, Florida, as follows:

City	Channel No.	
	Present	Proposed
Big Pine Key, Fla	228A	

9. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

10. Interested parties may file comments on or before January 4, 1982, and reply comments on or before January 19, 1982.

11. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

12. For further information concerning this proceeding, contact Montrose H. Tyree, Broadcast Bureau, (202) 632–7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; (47 U.S.C. 154, 303))

Federal Communications Commission.

Martin Blumenthal,

Acting Chief, Policy and Rules Division Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, IT IS PROPOSED TO AMEND the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

47 CFR Part 90

[PR Docket No. 81-703]

Transmission of Non-voice Signals at a Certain Frequency; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; Extension of comment/reply comment period.

SUMMARY: This order extends the comment period for the Notice of Proposed Rulemaking (NPRM) in PR Docket No. 81-703, published October 27, 1981, 46 FR 52402, for thirty days. This action is necessary because the petition demonstrated the need for more time to respond to the NPRM, which proposed to amend Section 90.385(c) of the Commission's Rules to allow transmission of non-voice signals at 800 MHz.

DATES: Comments by December 16, 1981. Reply comments by January 4, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Emmett Haines Pritchard, Private Radio Bureau, (202) 632-6497.

SUPPLEMENTARY INFORMATION:

Order To Extend the Time for Filing Comments

Adopted: November 16, 1981.

Released: November 20, 1981.

By the Chief, Private Radio Bureau: The Chief, Private Radio Bureau, acting

under delegated authority, grants, in part, a Petition for Extension of Comment Date in PR Docket No. 81–703. The petition was submitted by the General Electric Co. (GE), through its Mobile Communications Business Division. The present dates by which comments and reply comments must be submitted are November 16, 1981 and December 1, 1981, respectively. GE requests that the Commission extend these dates to February 16, 1982 and March 5, 1982.

In support of its request GE states that "the issues raised in this NPRM cannot be judiciously addressed and evaluated for the Commission by November 16th . . . This would include at least a careful analysis of replacing voice with non-voice signalling, evaluating the probabilities of co-channel interference and devising technical and operational standards that could be added to the Commission's rules. However, to assure the meaningful data can be assembled and evaluated, it is quite imperative that additional comment time be allowed."

While we feel there is merit to allowing some additional time to GE to prepare its comments, we must balance this against unduly delaying this proceeding. Since we do not believe GE has adequately demonstrated a requirement for three months, we are granting only a 30 day extension for the submission of comments.

Accordingly, the Chief of the Private Radio Bureau, acting under authority delegated by § 0.331 of the Commission's Rules, 47 CFR 0.331, orders that the Petition for Extension of Comment Date in PR Docket No. 81–703 is granted to the extent discussed herein and that the extended date to file comments is on or before December 16, 1981, and the extended date to file reply comments is on or before January 4, 1982.

Federal Communications Commission.

Robert S. Foosaner,

Acting Chief, Private Radio Bureau.

BILLING CODE 6712–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

Foreign Fishing and Groundfish of the Gulf of Alaska

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rulemaking and notice of availability of a plan amendment.

SUMMARY: Amendment 10 to the fishery management plan for the groundfish of the Gulf of Alaska is approved. NOAA issues a proposed rulemaking to implement the amendment, which decreases the allowable biological catch (ABC) of Pacific ocean perch in the Eastern Regulatory Area, sets the optimum yield equal to ABC, and decreases the amount of Pacific ocean perch available for the domestic annual harvest, the total allowable level of foreign fishing, and the reserve. Also, that portion of the Eastern Regulatory Area between 132°40′ W. and 140°00′ W. longitude will be closed to all foreign trawling. Foreign trawlers using pelagic trawl gear will be permitted within the Eastern Regulatory Area between 140°00′ W. and 147°00′ W. longitude.

The intended effects of this regulation are (1) to reduce the problem of gear conflicts and grounds preemption involving domestic and foreign fishermen, (2) to alleviate the high incidental catches of Pacific halibut in the foreign trawl fishery, and (3) to aid the recovery of the severely depressed Pacific ocean perch resource.

DATE: Comments are invited until January 21, 1982.

ADDRESSES: Comments should be addressed to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802. Copies of an environmental assessment for Amendment 10 are also available from Mr. McVey. Individual copies of the amendment may be obtained by contacting the North Pacific Fishery Management Council, P.O. Box 3136 DT, Anchorage, Alaska 99510, 907–274–4563.

FOR FURTHER INFORMATION CONTACT: Robert W. McVey, 907–586–7221.

SUPPLEMENTARY INFORMATION: On February 24, 1978, the Assistant Administrator for Fisheries, NOAA (Assistant Administrator) approved the Fishery management plan (FMP) for the Groundfish of the Gulf of Alaska. The FMP governs foreign and domestic fishing for a number of finfish, commonly known as groundfish (Section 3.1 of the FMP identifies the common and scientific names of each species). Currently, the FMP designates three regulatory areas in the Gulf of Alaska. Most of the fishery is conducted at numerous fishing grounds within those areas with on-bottom and off-bottom trawls and longlines. The foreign trawl fishery takes place primarily along the 200-meter depth contour.

The FMP was originally published in the **Federal Register** on April 21, 1978 (43 FR 17242). Since then it has been amended nine times. The notice of approval and availability of the ninth amendment was published on July 9, 1981 (46 FR 35536).

Amendment 10 to the FMP was approved by the North Pacific Fishery Management Council (Council) on February 26, 1981. In one of its parts, Amendment 10 changes the annual optimum yield (OY) and its components for Pacific ocean perch in the Eastern Regulatory Area. (Amendment 8, 46 FR 33038, changed the fishing year to conform to the calendar year. To make this adjustment, the regulations implementing Amendment 8 specified the OYs and other values to be effective for 14 months, from November 1, 1980 through December 31, 1981. After December 31, 1981, the specifications will be on calendar year basis.) Amendment 10 now reduces the annual allowable biological catch (ABC) from 29,000 metric tons (mt) to 875 mt and sets the OY equal to ABC. To achieve this OY, the amendment reduces the initial domestic annual harvest (DAH) for Pacific ocean perch from 1,315 mt to 500 mt, the initial total allowable level of foreign fishing from 10,205 mt to 200 mt, and the initial reserve amount from 2,880 mt to 175 mt. The amount of DAH set aside for domestic processing (DAP) is increased from 80 mt to 300 mt, and the amount of DAH allocated for processing by foreign processors under joint ventures (JVP) is decreased from 1,235 mt to 200 mt.

The OY is reduced to allow the Pacific ocean perch resource to recover from its depressed state which resulted from intensive foreign fishing that began in 1962. Harvests of Pacific ocean perch peaked at 344,700 mt in 1965, but declined to 46,600 mt by 1976. Since enactment of the Magnuson Fishery Conservation and Management Act of 1976 (Magnuson Act), annual foreign catches have ranged between 20,229 mt and 8,171 mt.

The best indicator of the depressed condition of the Pacific ocean perch resource is the steadily declining catch per unit of effort (CPUE). Observer data from large Japanese stern trawlers indicate the CPUE within the Southeastern and Yakutat Districts of the Eastern Regulatory Area declined by about 40 percent from 1978 through 1980 (from about 1.4 mt per hour (mt/h) in 1978 to 0.5 mt/h in 1980 in the Southeastern District, and from about 1.0 mt/h in 1978 to 0.5 mt/h in 1980 in the Yakutat District). The resource is probably more seriously depressed than these figures indicate since improvements in equipment and

technique have significantly increased the efficiency of fishing to the extent that, if stocks had remained constant, CUPE would be expected to increase.

Until now, U.S. harvests of Pacific ocean perch in this area have been minimal; however, this species is potentially important in the future development of a domestic groundfish fishery in the eastern Gulf of Alaska, and currently depleted stocks must be rebuilt to provide the incentive necessary for such development. National Marine Fisheries Service surveys of the U.S. fishing industry in Alaska indicate that U.S. fishermen intend to deliver only about 230 mt of Pacific ocean perch to U.S. processors in Alaska in 1981. Thus, the decrease in DAH to 500 mt as proposed by Amendment 10, will not adversely affect the U.S. fishing industry, and it should still encourage domestic development, provide protection for the Pacific ocean perch resource, and allow the stocks to rebuild. The allocation of 200 mt to TALFF is intended to allow for an incidental catch of Pacific ocean perch in foreign fisheries targeting on other groundfish. This measure will thus provide effective protection to the resource without placing undue burden on foreign fishermen.

Amendment 10 also closes the fishery conservation zone (FCZ) between 132°40′ W. and 140°00′ W. longitude to all foreign trawling. Foreign fishing with longlines is already prohibited in this area. The history of gear conflicts between foreign and domestic fishermen in the area forces this action. Initially, most reported conflicts involved Japanese and domestic longline fishermen and, as a result, foreign longlining was prohibited east of 140°00′ W. longitude beginning in 1978. Since that time, there have been increasing reports by U.S. longline fishermen of gear conflicts and grounds preemptions involving foreign trawl vessels. In addition, data from the U.S. longline fishery indicate that the CPUE and the average weight of fish caught declined after foreigners fished the grounds.

The U.S. longline fishery and the accompanying gear conflict/grounds-preemption problem occurs primarily east of 140° W. longitude. Therefore, the proposed area closure to foreign fishing will mitigate the problem. To reduce further potential conflicts between domestic and foreign fishermen, Amendment 10 adds an appendix to the FMP that will facilitate communication between domestic and foreign fishermen to prevent future gear conflicts in the Central and Western Regulatory Areas as the domestic fishery develops.

Amendment 10 also allows foreign trawling at all times between 140° W. and 147° W. longitude, which is a 3½ month increase in fishing time over current regulations. However, foreign trawlers fishing within this area must use only pelagic trawls with recording net-sonde devices functioning properly. The use of pelagic gear will essentially eliminate the high incidental catches of Pacific halibut, since this species is rarely taken in pelagic trawls. In the Gulf of Alaska, halibut have been affected adversely by the foreign trawl fishery. In the Eastern Regulatory Area, the foreign incidental catch of halibut increased from 247 mt in 1978 to 1,688 mt in 1979. Even though foreign vessels must return halibut to the sea, the trawl mortality of halibut is assumed to be 100 percent and therefore the incidental catch represents a total loss to the U.S. directed fishery for halibut. Amendment 10 will eliminate the incidental catch of halibut in the eastern Gulf of Alaska by foreign trawlers, and provide more protection for the halibut resource, which is a management objective of the FMP.

A technical change has been made in the regulations to conform with the Magnuson Act definition of "Secretary", which includes the designee of the Secretary.

National Environmental Policy Act of 1969

The Assistant Administrator has determined that approval of Amendment 10 and the promulgation of proposed implementing rules do not constitute a major federal action significantly affecting the quality of the human environment and requiring the preparation of a supplemental environmental impact statement under the National Environmental Policy Act.

Classification

The Assistant Administrator has determined that Amendment 10 to the FMP is necessary and appropriate for the conservation and management of fishery resources in the Gulf of Alaska. Further, he has determined that it is consistent with the national standards in section 301 of the Magnuson Act, with other provisions of the Magnuson Act, and with other applicable law. He has, therefore, under sections 304 and 305 of the Magnuson Act, approved Amendment 10 and proposed regulations to implement the amendment.

The Assistant Administrator has also determined that approval and implementation of this amendment would not be a federal activity directly affecting the Alaska coastal zone within the meaning of section 307(c)(1) of the Coastal Zone Management Act of 1972 and its implementing regulation, 15 CFR Part 930, Subpart C.

The Administrator of NOAA has determined that this amendment and its implementing regulations are not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. By reducing the gear-conflict/grounds-preemption problem and by enhancing the Pacific ocean perch and halibut resources in the eastern Gulf of Alaska, Amendment 10 will increase the long-term availability of these and other groundfish resources to the domestic groundfish fishery. This amendment can, be expected, therefore, to encourage the expansion of the U.S. fishing industry, to reduce costs for consumers and producers in that industry, and to enhance the competitive position of the U.S. fishing industry relative to the fishing industries of other nations.

For the above reasons, the Administrator certifies that approval and implementation of Amendment 10 will not have a significant economic impact on a substantial number of small entities and thus does not require the preparation of regulatory flexibility analysis under 5 U.S.C. 603 and 604.

This action does not increase the Federal paperwork burden for individuals, small busineses, or other persons as defined by the Paperwork Reduction Act.

Dated: November 30, 1981.

Robert K. Crowell,

Deputy Executive Director National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Parts 611 and 672 are proposed to be amended as follows:

PART 611—FOREIGN FISHING

1. The authority citation for Part 611 reads as follows:

Authority: 16 U.S.C. 1821 and 1855.

§ 611.20 [Amended]

2. Section 611.20, Appendix 1, entry 4.E is revised to read as follows:

V 46 / 234 DEC 7 81 UMI

Thornyhead rockfish	749	Total	3,750	6	6	0		450	3,294

[4] The category "Pacific Ocean Perch" includes *Sebastes* species *S. alutus* (Pacific Ocean Perch), *S. polyspinus* (northern rockfish), *S. aleutianus* (rougheye rockfish), *S. borealis* (shortraker rockfish), and *S. sacentrue* (sharpchin rockfish)

[5] See figure 1 of section 611.92(a) for description of regulatory areas and districts

[6] The category "other rockfish" includes all fish of the genus *Sebastes* except the category "Pacific Ocean Perch" as defined in footnote 4 above and *Sebastolobus* (thornyhead rockfish)

[7] Excludes values for the Southeast Inside District which is not governed by these regulations.

[8] The category "other species" includes sculpins, sharks, skates, eulachon, smelts, capelin, and octopus

3. In § 611.92, paragraph (e)(2)(i) is removed; paragraphs (e)(2)(ii), (e)(2)(iii), and (e)(2)(iv) are redesignated as (e)(2)(i), (e)(2)(ii), and (e)(2)(iii) respectively; and paragraphs (e)(1), (e)(3)(i) and (f)(1) are revised to read as follows:

§ 611.92 Gulf of Alaska groundfish fishery.

* * * * *

(e) *Closed areas.*—(1) *All fishing.* Foreign fishing for groundfish is prohibited in the following portions of the management area:

(i) Between 132°40′ W. longitude and 140°00′ W. longitude; and

(ii) "*Davidson Bank*": between 163°04′ W. longitude and 166°00′ W. longitude north of 53°00′ N. latitude.

(2)* * *

(3) *Fishing with longline gear.*—(i) *General.* For the purpose of this section, "longline" means (*a*) a stationary, buoyed, and anchored line with hooks or pots attached, or (*b*) the taking of fish by means of such a device.

* * * * *

(f) *Gear restrictions.*—(1) *Vessels using trawl gear.* From December 1 to June 1, vessels subject to this section may use only pelagic trawls (trawls for which neither the net nor the otter boards contact the seabed). When being fished, each pelagic trawl must be equipped with an operating recording net-sonde device.

* * * * *

§ 611.92 [Amended]

4. In addition to the changes set forth above, § 611.92 is amended by removing reference to "Regional Director" and inserting instead the work "Secretary" in the following places:

a. In (c)(1)(ii)(A), (c)(1)(ii)(B), the first and third references to "Regional Director" and in (c)(1)(ii)(C)(*1*), (c)(1)(ii)(C)(*2*), (c)(1)(ii)(C)(*3*), (c)(1)(ii)(C)(*4*)(*a*), (c)(1)(ii)(C)(*4*)(*b*) and in (c)(1)(ii)(C)(*5*):

b. In (c)(2)(i)(B), the first reference to "Regional Director" and in (c)(2)(ii), (c)(2)(ii)(A), (c)(2)(ii)(B), and (c)(2)(ii)(C).

PART 672—GROUNDFISH OF THE GULF OF ALASKA

5. The authority citation for Part 672 reads as follows:

Authority: 16 U.S.C. 1855.

§ 672.20 [Amended]

§ 672.20, Table 1 is revised to read as follows:

TABLE 1.—OPTIMUM YIELD (OY), DOMESTIC ANNUAL HARVEST (DAH), DOMESTIC ANNUAL PROCESSING (DAP), JOINT VENTURE PROCESSING (JVP), DOMESTIC NONPROCESSED (DNP), RESERVE AND TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING (TALFF), ALL IN METRIC TONS

[1] See figure I of section 611.92(a) for description of regulatory areas and districts.
[2] The category "Pacific Ocean Perch" includes *Sebastes* species *S. alutus* (Pacific Ocean Perch), *S. polyspinus* (northern rockfish), *S. aleutianus* (rougheye rockfish), *S. borealis* (shortraker rockfish), and *S. saccomus* (sharpchin rockfish).
[3] The category "other rockfish" includes all fish of the genus *Sebastes* except the category "Pacific Ocean Perch" as defined in foot note 2 above and *Sebastolobus* (thornyhead rockfish).
[4] Excludes values for the Southeast Inside District, which is not governed by these regulations.
[5] The category "other species" includes sculpins, sharks, skates, eulachon, smelts, capelin, and octupus.

7. In § 672.20(b), make the following changes:

A. Remove the word "he" the first time it appears, and add the words "the Secretary" in lieu thereof;

B. Remove the second reference to "Regional Director" and add the words "the Secretary" in lieu thereof;

C. Remove the second reference to the word "he" and add the words "the Regional Director" in lieu thereof.

8. In § 672.20 make the following changes:

A. In paragraphs (c) (1) and (2), remove the first and third references to "Regional Director" and add the word "Secretary" in lieu thereof;

B. In paragraphs (c)(3) (i), (ii), and (iii), remove the second reference to "Regional Director", and add the word "Secretary" in lieu thereof;

C. Also, in § 672.20, remove the word "he" and add the words "the Secretary" in lieu thereof in paragraphs (c)(3)(iv)(A)(3), (3)(iv)(B), and (3)(v).

9. In § 672.20(e), remove the reference to the word "he" and add the words "the Secretary" in lieu thereof;

§ 672.22 [Amended]

10. In § 672.22, in paragraphs (a)(1), (b)(1), and (b)(4)(i), remove the words "Regional Director" and add the word "Secretary" in lieu thereof; in paragraphs (b)(4)(ii), (b)(4)(iv) and (b)(5), remove the first reference only to "Regional Director", and add the word "Secretary" in lieu thereof.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Levels of Restraint for Certain Cotton Texile Products from Brazil

December 2, 1981.

AGENCY: Committee for the Implemtation of Textile Agreements.

ACTION: Establishing import restraint levels for cotton textile products in Categories 300 and 301 (Carded and Combed Yarns), as a group, and individual Categories 313 (Sheeting), 314 (Poplin and Broadcloth), 318 (Other Yarn-Dyed Fabrics) and 338 (Men's and Boys' Knit Shirts), produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1981 and extends through March 31, 1982.

(A detailed description of the textile categories in terms of T.S.U.S.A numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963) and October 27, 1981 (46 FR 52409))

SUMMARY: The Bilateral Cotton Textile Agreement of April 22, 1976, as amended and extended, between the Governments of the United States and the Federative Republic of Brazil established levels of restraint for certain cotton textile products, including Categories 300 and 301, as a group, and individual Categories 313, 314, 318 and 338 during the twelve-month period which began on April 1, 1981 and extends through March 31, 1982. Accordingly, there is published below a letter from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing the entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton textile products in Categories 300 and 301, as a group, and individual Categories 313, 314, 318 and 338 be limited to the designated twelve-month levels of restraint. The levels of restraint have not been adjusted to account for any imports after March 31, 1981. Imports during the April 1–September 30, 1981 period have amounted to the following will be charged. As the data become available, further charges will be made to account for imports during the period which began on October 1, 1981 and extends to the effective date of this directive.

Category and import charges

300-301	1,623,115 pounds of which 1,584,840 pounds will be charge to Category 300 and 38,275 pounds will be charged to Category 301.
313	9,217,747 square yards.
314	363,379 square yards.
318	278,641 square yards.
338	4,869 dozen.

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

December 2, 1981.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasury.
Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton Textile Agreement of April 22, 1976, as amended, between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on December 8, 1981 and for the twelve-month period beginning on April 1, 1981 and extending through March 31, 1982, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 300–301, as a group, and individual Categories 313, 314, 318 and 338, produced or manufactured in Brazil, in excess of the following levels of restrant:

Category	12-Month Levels of Restraint[1]
300–301	12,196,102 pounds.
313	25,965,340 square yards.
314	1,500,000 square yards.
318	1,500,000 square yards.
338	138,889 dozen.

1 The levels of restraint have not been adjusted to reflect any imports after March 31, 1981. During the April 1—September 30, 1981 period, charges in Categories 300 and 301, as a group, have amounted to 1,623,115 pounds of which 1,584,840 pounds should be charged to Category 300 and 38,275 pounds, to Category 301. During the same period, charges in Category 313 have amounted to 9,217,747 square yards; in Category 314, to 363,379 square yards; in Category 318, to 278,641 square yards; and in Category 338, to 4,869 dozen.

Cotton textile products in Categories 300–301, as a group, and individual Categories 313, 314, 318 and 338 which have been exported to the United States prior to April 1, 1981 shall not be subject to this directive.

Cotton textile products in Categories 300–301, as a group, and individual Categories 313, 314, 318 and 338 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The levels of restraint set forth above are subject to adjustment in the future according to the provisions of the Bilateral Cotton Textile Agreement of April 22, 1976, as amended and extended, between the Governments of the United States and the Federative Republic of Brazil, which provide, in part that (1) within the aggregate and applicable group limits, specific limits may be exceeded by designated percentages; (2) specific ceilings may be increased for carryover and carryforward up to 11 percent of the applicable category limit; (3) consultation levels may be increased within the aggregate and applicable group limits upon agreement between the two governments; and (4) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementaton of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963) and October 27, 1981 (46 FR 52409).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Federative Republic of Brazil and with respect to imports of cottom textile products from Brazil have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Intelligence Agency Advisory Committee; Closed Meeting

Pursuant to the provisions of subsection (d) of section 10 of Pub. L. 92-463, as amended by section 5 of Pub. L. 94-409, notice is hereby given that a closed meeting of a Panel of the DIA Advisory Committee has been scheduled as follows:

Monday, January 11, 1982, Plaza West, Rosslyn, Virginia.

The entire meeting, commencing at 0900 hours is devoted to the discussion of classified information as defined in section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. Subject matter will be used in a special study on the Department of Defense Intelligence Information System.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

December 2, 1981.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Education Appeal Board

AGENCY: Department of Education.

ACTION: Notice of applications for review accepted for hearings by Education Appeal Board.

SUMMARY: This notice lists the applications for review that were received and accepted for hearing by the Education Appeal Board between December 9, 1980, and July 31, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue SW., (Room 2141, FOB-6), Washington, D.C. 20202. Telephone: (202) 245-7835.

SUPPLEMENTARY INFORMATION: Under sections 451 through 454 of the General Education Provisions Act (20 U.S.C. 1234 et seq.), the Education Appeal Board has authority to conduct (1) audit appeal hearings, (2) withholding, termination, and cease and desist hearings initiated by the Secretary of Education, and (3) other proceedings designated by the Secretary as being within the jurisdiction of the Board.

The Secretary has designated the Board as having jurisdiction to conduct appeal proceedings related to final audit determinations, the withholding or termination of funds, and cease and desist actions for most programs administered by the Department of Education (ED). The Secretary also has designated the Board as having jurisdiction to conduct hearings concerning most ED administered programs that involve a determination that a grant is void, the disapproval of a request for permission to incur an expenditure during the term of a grant, or determinations regarding cost allocation plans or special rates negotiated with specified grantees. Final regulations governing Board jurisdiction and procedures were published in the **Federal Register** on May 18, 1981 (46 FR 27304).

This notice lists the applications for review that were received and accepted for hearing by the Education Appeal Board between December 9, 1980, and July 31, 1981. The notice also explains how interested third parties may intervene in proceedings before the Board.

Appeal of the State of Hawaii, Docket No. 1-(66)-81

The State appealed a final audit determination by the Assistant Secretary for Vocational and Adult Education that Federal funds authorized to supplement the planning and operation of State-wide vocational education programs were misspent. The final audit determination was based on an audit of the State's vocational education program for Fiscal Year (FY) 1977 conducted by Federal auditors.

The Assistant Secretary sustained the auditors' finding that $100,664 in Federal funds were expended at a high school that was ineligible for these funds. The Assistant Secretary also upheld the auditors' finding that $98,613 of Federal funds granted to the University of Hawaii were charged improperly to the FY 1976 appropriation after the expiration of the period for which the funds were available.

The State disputes these findings. The Department of Education requested a refund from the State in the amount of $199,277.

Appeal of the State of Colorado, Docket No. 2–(67)–81

The State appealed a final audit determination issued by the Deputy Assistant Secretary for Special Education which upheld the finding of the Health, Education, and Welfare Audit Agency that the State did not meet Federal maintenance of effort requirements for funds granted under Title I of the Elementary and Secondary Education Act of 1965 during Fiscal Year 1976. The maintenance of effort regulations required the grantee to ensure that the level of State and local education expenditures for students who were beneficiaries of the grants was maintained at the preaward level. The Deputy Assistant Secretary found that the State did not maintain its fiscal effort for handicapped children enrolled at a local mental health center.

The State disputes this determination, asserting that it maintained its fiscal effort. The Department of Education requested a refund of $14,003.

Appeal of the State of Hawaii, Docket No. 3–(68)–81

The State appealed a final audit determination by the Assistant Secretary for Vocational and Adult Education that Federal funds authorized for State vocational education programs during Fiscal Years 1970 through 1975 were not expended within the period of the grant although the State recorded and reported the funds as expended. The State disagrees, stating in its appeal that the funds were carried forward properly and spent within the period of availability. The State also asserts that $1,493 of the disputed amount was unexpended but was returned to the Office of Education and not carried forward after the fund had lapsed. The Department of Education requested a refund of $103,487.

Appeal of the State of Montana, Docket No. 4–(69)–81

The State appealed a final determination by the Assistant Secretary for Vocational and Adult Education. The Assistant Secretary sustained findings by the Health, Education, and Welfare Audit Agency that twenty-six schools (including twenty-four secondary schools, one community college, and the State prison) did not meet the maintenance of effort requirements of the Vocational Education Act of 1963, as amended. Also, the Assistant Secretary sustained the audit finding that, due to an accounting error, $1,760 of work study funds for Fiscal Year (FY) 1973 were reported twice as expended in FY 1973 and FY 1974.

The amount requested by the Department of Education for a refund is $165,521.43. This amount may be reduced by application of the statute of limitations.

Appeal of McKendree College, Docket No. 5–(70)–81

McKendree College, Lebanon, Illinois, appealed a final audit determination issued by the Office of Procurement and Assistance Management (OPAM) of the U.S. Department of Education.

The final audit determination disallowed consultant costs incurred by the College during Fiscal Years 1976 through 1979 for its Advanced Institutional Development Program, funded under Title III of the Higher Education Act of 1965, as amended. OPAM found that the College did not provide documentation that adequately demonstrated the need for the services or the reasonableness of the consultant costs as it was obligated to do under the terms of the grant. The College asserts in its appeal that the consultant costs were properly documented and allocable to the grant. The Department of Education requested a refund of $37,226, the amount of the disallowed costs.

Appeal of the Board of Education of the City of Chicago, Docket No. 6–(71)–81

The Board of Education of the City of Chicago (the City) appealed a final audit determination issued by the Office of Procurement and Assistance Management (OPAM) of the U.S. Department of Education regarding expenditures made by the City for a project funded under Title VII of the Elementary and Secondary Education Act of 1965, as amended, for Fiscal Years 1976 through 1978. Title VII regulations require that a grantee administer its Bilingual Education Project in accordance with Federal regulations, including the provision that the grantee use at least 15 percent of its Title VII grant funds for training purposes. The final audit determination was that the City failed to comply with the 15 percent rule. The City contests this finding.

The Department of Education requested a refund of $39,684, representing the additional amounts it found that the City should have expended for training in order to meet its obligation under the 15 percent rule.

Appeal of Montana State University, Docket No. 7–(72)–81

Montana State University requested review of a final audit determination issued by the Department of Education's Office of Procurement and Assistance Management. The final determination was that extra compensation payments made by the University out of Federal grant funds did not comply with the cost principles that governed Office of Education grants for the period audited (July 1, 1976 through June 30, 1979). The payments were made in a lump sum to faculty members who acted as facilitators for a career-life planning program, which was a component of the University's federally funded project, "Reduction in Sexual Stereotyping".

The University asserts in its appeal that the faculty payments were proper under its grant. The Department of Education requested a refund of $4,600, the amount of the disallowed extra compensation payments.

Appeal of Metropolitan Development Council, Docket No. 8–(73)–81

The Metropolitan Development Council, Tacoma, Washington, provided free professional career counseling services to county residents during Fiscal Years 1978 and 1979. Federal funds to support this service were acquired under an Education Opportunity and Resource Center grant. The Higher Education Act of 1965, as amended, provides in part that recipients of such grants must bear 25 percent of the project costs.

The Metropolitan Development Council appealed a final audit determination made by the U.S. Department of Education's Office of Procurement and Assistance Management that certain of these Federal funds were not expended properly. The final audit determination was that the grantee did not meet its obligation to provide 25 percent of the project costs. A number of in-kind contributions claimed by the grantee were disallowed. The final determination also stated that the grantee could not use unexpended funds from the first grant year to absorb an over-expenditure in the second year. The Department of Education requested a refund of $18,706.

Appeal of Westwood Inkster Cherry Hill Magnet School Planning Group (Inkster Public Schools), Docket No. 9–(74)–81

The Westwood Inkster Cherry Hill Magnet School Planning Group (WIC MSPG), Inkster, Michigan, appealed a final audit determination issued by the Office of Procurement and Assistance Management of the U.S. Department of Education. WIC MSPG is a consortium of three local school districts for which Inkster Public School District acted as applicant and recipient of a Federal

grant under the Emergency School Aid Act to help fund a magnet school project. The grant period was July 1, 1979 through June 30, 1980. An audit of the project was conducted by the Office of Procurement and Assistance Management (OPAM) of the U.S. Department of Education.

The final determination issued by OPAM disallowed $20,164.28 of the grant expenditures. The disallowed costs include charges for repair and remodeling associated with vandalism; unbudgeted costs for equipment unrelated to grant activities; unapproved costs for data processing, concurrent enrollment, and travel; unapproved proposal costs, unallowable entertainment costs; unbudgeted field trip costs; undocumented costs for inservice workshops; and other costs not documented as related to the approved project. The Department of Education requested a refund of $20,164.28.

Appeal of Confederated Tribes of the Umatilla Indian Reservation, Docket No. 10–(75)–81

The Confederated Tribes of the Umatilla Indian Reservation, Pendleton, Oregon, (Confederated Tribes) appealed a final audit determination issued by the Department of Education's Office of Procurement and Assistance Management (OPAM) regarding expenditures made by the Confederated Tribes for an Early Childhood Development Program funded under the Indian Education Act during Fiscal Years (FY) 1977 through 1979. The final determination was to disallow $35,422 as not expended in compliance with the cost principles for nonprofit institutions which OPAM found governed this grant. The specific costs disallowed include rent expenditures which were found to be unrelated to the grant and not budgeted or recoverable as direct costs; undocumented travel costs; duplicate payments for certain office expenses charged as both direct and indirect costs; claimed but unpaid expenditures; and unobligated fund balance. The Department of Education requested a refund of $35,422. The Confederated Tribes dispute all but $10,184 of this determination.

Intervention

Section 78.43 of the final regulations establishing procedures for the Education Appeal Board provides that an interested person, group, or agency may, upon application to the Board Chairperson, intervene in appeals before the Education Appeal Board, including the above appeals.

An application to intervene must indicate to the satisfaction of the Board Chairperson or, as appropriate, the Panel Chairperson, that the potential intervenor has an interest in and information relevant to the specific issues raised in the appeal. If an application to intervene is approved, the intervenor becomes a party to the proceedings.

These applications to intervene or questions should be addressed to Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue, S.W. (Room 2141, FOB–6), Washington, D.C. 20202, telephone (202) 245–7835.

(20 U.S.C. 1234)

(Catalog of Federal Domestic Assistance No. not applicable)

Dated: December 1, 1981.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000–01–M

Fund for the Improvement of Postsecondary Education; Application Notice for the Comprehensive Program Final Year Dissemination Competition

AGENCY: Department of Education.

ACTION: Application notice for the comprehensive program final year dissemination competition.

SUPPLEMENTARY INFORMATION: Applications are invited for new awards under the Comprehensive Program Final Year Dissemination Competition conducted by the Fund for the Improvement of Postsecondary Education.

Authority for this program is contained in section 1001 of Title X of the Higher Education Act, as amended. This program issues awards to institutions of postsecondary education and other public and private educational institutions and agencies. The purpose of the awards is to improve postsecondary education by supporting efforts by current grantees to disseminate project ideas and results.

(20 U.S.C. 1135)

Closing Date for Transmittal of Applications: Applications for awards must be mailed or hand-delivered by January 12, 1982.

Applications Delivered by Mail: An application sent by mail must be addressed to the Comprehensive Program Final Year Dissemination Competition, U.S. Department of Education, Fund for the Improvement of Postsecondary Education, Attention: 84.116D, 400 Maryland Avenue, S.W., (Regional Office Building 3, Room 3100), Washington, D.C. 20202–3328.

To establish proof of mailing, an applicant must show one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

If an application is sent through the U.S. Postal Service, the Secretary does not accept a private metered postmark or a mail receipt that is not dated by the U.S. Postal Service as proof of mailing. An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

Applications Delivered by Hand: An application that is hand-delivered must be taken to the Comprehensive Program Final Year Dissemination Competition, Attention: 84.116D, Department of Education, Fund for the Improvement of Postsecondary Education, 7th and D Streets, S.W., Room 3100, Washington, D.C.

The Secretary will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays. Applications that are hand-delivered will not be accepted after 4:30 p.m. on January 12, 1982.

Program Information:

Type of Competition: In Final Year Dissemination competitions, the Secretary supports efforts by grantees of the Fund to disseminate project ideas and results. Applications in these competitions are limited to grantees of the Fund whose projects are in their final year of funding, except that a recipient of a single-year grant may apply for assistance under this competition within one year following the termination of its project.

Selection Criteria: The Secretary evaluates an application on the basis of the following criteria:

(a) *Significance for Postsecondary Education.* The Secretary reviews each project for its significance in improving postsecondary education by determining the extent to which it would:

(1) Address the purposes of the Final Year Dissemination Competition;

(2) Address an important problem or need;

(3) Represent an improvement upon, or important departure from, existing practice;

(4) Involve learner-centered improvements; achieve far-reaching impact through improvements that will be useful in a variety of ways and in a variety of settings; and increase the cost-effectiveness of services.

(b) *Feasibility.* The Secretary reviews each project for its feasibility by determining the extent to which:

(1) The project represents an appropriate response to the problem or need addressed;

(2) The applicant is capable of carrying out the project, as evidenced by the quality of the dissemination project design;

(3) The applicant is capable of carrying out the project, as evidenced by the adequacy of resources, including money, personnel, facilities, equipment, and supplies;

(4) The extent to which the applicant is capable of carrying out the dissemination project as evidenced by the applicant's qualifications and relevant prior experience; and

(5) The applicant and any other participating organizations are committed to the success of the dissemination project, as evidenced by contributions of resources and prior work in the area.

(c) *Appropriateness of the Fund's support.* The Secretary reviews each application to determine whether support of the project by the Fund is appropriate in terms of the availability of other funding sources for the proposed dissemination activities.

(20 U.S.C. 1135)

The selection criteria (a)(1), (a)(2), (a)(3), (a)(4), (b)(1), (b)(2), (b)(3), (b)(4), and (c) are of equal importance. In applying the criteria, the Secretary first analyzes an application in terms of the individual criteria. The Secretary then bases the final judgment of an application on an overall assessment of the degree to which the application addresses the selection criteria.

Other Information To Be Requested From Applicants: The Secretary will contact by phone all applicants being considered for funding in the final stages of the selection process in order to clarify or verify information relevant to their application.

Available Funds: Approximately $100,00 is estimated to be available for new awards in Fiscal Year 1982. It is estimated that these funds could support approximately 15 new awards. The estimated maximum amount for new awards will be up to $8,000 for a 12-month period.

However, these estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant except as may be required by applicable statute and regulation.

Application Forms: Application forms included in program information packages will be sent directly to all Comprehensive Program grantees in their final year of funding and those single-year grantees whose grants have terminated within the past year from the Fund for the Improvement of Postsecondary Education.

The program information package is intended to aid applicants in applying for assistance under this competition. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those specifically imposed under the statute and regulations governing the competition.

Applicable Regulations: The regulations governing awards made by the Fund for the Improvement of Postsecondary Education are contained in:

(1) The Education Department General Administration Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants) (formerly 45 CFR Part 74), 34 CFR Part 75 (Direct Grant Programs) and 34 CFR Part 77 (Definitions), (formerly 45 CFR Parts 100a and 100c).

(2) When adopted in final form, the regulations for the Fund for the Improvement of Postsecondary Education in 34 CFR Part 630 (formerly 45 CFR Part 1501) published in the **Federal Register** as a Notice of Proposed Rulemaking on September 30, 1981. If public comment on these proposed regulations results in substantive changes in the final regulations, applicants will be given the opportunity to amend their applications.

Further Information: For further information, contact the Fund for the Improvement of Postsecondary Education, regarding the Comprehensive Program Final Year Dissemination Competition (84.116D) telephone: (202) 245–8091.

(Catalog of Federal Domestic Assistance No. 84.116D, Fund for the Improvement of Postsecondary Education)

Dated: December 1, 1981.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000–01–M

Field Initiated Research Continuations

AGENCY: Department of Education.

ACTION: Notice of closing date for transmittal of applications for continuation projects.

Applications are invited for continuation of multi-year projects currently being supported under the Field Initiated Research program.

Authority for this program is contained in sections 641 and 642 of Part E of the Education of the Handicapped Act (20 U.S.C. 1441, 1442).

Closing Date for Transmittal of Applications: To be assured of consideration for funding, an application for a noncompeting continuation award should be mailed or hand delivered at least 120 days prior to the end of the current budget period, but no later than April 1, 1982.

If the application is late, the Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

Applications Delivered by Mail: An application sent by mail must be addressed to the Department of Education, Application Control Center, Attention: 84.023C, 400 Maryland Avenue, SW, Washington, D.C. 20202–3561.

An applicant should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

Applications Delivered by Hand: An application that is hand-delivered must be taken to the Department of Education, Application Control Center, Room 5673, Regional Office Building 3, Seventh and D Streets SW., Washington, D.C.

The Application Control Center will accept hand-delivered applications

between the hours of 8:00 a.m. and 4:30 p.m., (Washington, D.C. time) daily, except Saturdays, Sundays, or Federal holidays.

Available Funds: Approximately $3 million is expected to be available for support of continuation projects under the Field Initiated Research program.

This estimate does not bind the U.S. Department of Education except as may be required by the applicable statute and regulations.

Application Forms: Further information and application forms are available and may be obtained by writing to the Reseach Projects Branch, Special Education Programs, Department of Education, 400 Maryland Avenue SW, (Donohoe 3165), Washington DC 20202–4714.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that only the information required by the application form and instructions be submitted.

Applicable Regulations: The following regulations are applicable to this program:

(a) Regulations governing the Handicapped Research and Demonstration program (34 CFR Part 324). Amendments to the final regulations were published in the **Federal Register** on April 3, 1980 (45 FR 22533), Janury 19, 1981 (46 FR 5380–5381), and June 18, 1981 (46 FR 31996–31998).

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77, formerly 45 CFR Parts 100a and 100c).

FOR FURTHER INFORMATION CONTACT:

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Acceptance of Certifications and Issuance of Proposed Prohibition Orders

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of acceptance of certifications and issuance of proposed prohibition orders.

SUMMARY: The Economic Regulatory Administration is giving notice of its acceptance of certifications submitted pursuant to section 301 of the Fuel Use Act, as amended by the Omnibus Budget Reconciliation Act, by owners or operators of powerplants which previously had received proposed prohibition orders under former section 301 (b) or (c) of the Fuel Use Act (see "SUPPLEMENTARY INFORMATION" for a listing of powerplants). The certifications address the technical capability and financial feasibility of the plants to use coal, a mixture of petroleum or natural gas and coal, or another alternate fuel as a primary energy source. Accordingly, ERA is issuing proposed prohibition orders pursuant to the authorities contained in section 301 (b) and (c) of the Fuel Use Act, as amended.

DATES: Certifications are deemed to have been accepted on November 30, 1981. Proposed prohibition orders are issued as of the date of acceptance of the certifications. Comments and/or requests for a public hearing are due on or before January 21, 1981.

ADDRESSES: All comments and/or requests for a public hearing on individual cases should be directed to the Office of Fuels Conversion, Economic Regulatory Administration, Department of Energy, Room 6114, 2000 M Street, N.W., Washington, D.C. 20461. Correspondence should clearly indicate the ERA docket number for the case in question.

FOR FURTHER INFORMATION CONTACT:
Jack Vandenberg, Office of Public Information, Economic Regulatory Administration, Department of Energy, 12th & Pennsylvania Ave., N.W., Room 7120, Washington, D.C. 20461, (202) 633–9451.633–9451.
Robert L. Davies, Office of Fuels Conversion, Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W., Room 3002, Washington, D.C. 20461, (202) 653–3649.
Marilyn Ross, Office of General Counsel, Department of Energy, 1000 Independence Ave., S.W., Room 6B–178, Washington, D.C. 20585, (202) 252–2967.

SUPPLEMENTARY INFORMATION: Section 1021 of the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35 (OBRA) amended former section 301 of the Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95–620 (FUA), to limit the authority of the Secretary of Energy to prohibit oil or natural gas use only where the owner and operator of an existing powerplant has voluntarily certified to the unit's technical capability and financial feasibility to use an alternate fuel. Section 1022(b) or OBRA provides that any powerplant issued a proposed prohibition order under former section 301 (b) of (c) of FUA, which had not been made final as of the date of enactment of OBRA (August 13, 1981), may elect continued coverage under former section 301 (b) or (c) of FUA rather than coverage under the provisions of section 1021 of OBRA.

On October 1, 1981, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) issued a final rule to establish election procedures for the owners and operators of electric powerplants which had received proposed prohibition orders under former section 301 (b) or (c) of FUA (46 FR 48118).

The preamble to the final rule addressed the issue of the continued validity of proposed FUA orders issued to owners or operators of plants under former section 301 (b) or (c) who wish to proceed under OBRA without unnecessarily disrupting the continuity of their prohibition order proceedings. ERA indicated that the owners or operators of those plants wishing to preserve the continuity of their prohibition order proceedings should submit the certifications required by section 1021 of OBRA at least five days prior to the expiration of the applicable election period, i.e. five days prior to November 30, 1981, in order that ERA could issue proposed prohibition orders under § 1021 of OBRA and prevent any lapse in the prohibition order process.

On or before November 25, 1981, the powerplants identified in the table below filed certifications with ERA in accordance with section 1021 of OBRA.

Utility, Generating unit and docket No.	Date of issu-	Date of filing certifica- tion
New England Power Co., Salem Harbor #1, 52007-1626-01-82	3/28/80	11/23/81
New England Power Co., Salem Harbor #2, 52007-1626-02-82	3/28/80	11/23/81
New England Power Co., Salem Harbor #3, 52007-1626-03-82	3/28/80	11/23/81

Each of the above-listed powerplants had previously been issued a proposed prohibition order pursuant to former

section 301 (b) or (c) of FUA, as indicated by docket number and date of issuance in the table above.

ERA has examined the basis for the certifications and the documentation submitted for each powerplant and believes that it will be able to concur in such certifications resulting in the ultimate issuance of a final prohibition order.

Pursuant to section 301 of FUA, as amended, ERA has proposed regulations applicable to the issuance of prohibition orders to certifying existing powerplants 46 FR 58051 (November 27, 1981). In accordance with § 501.52 of the proposed regulations, the following procedure for the processing of these proposed orders will be followed:

(1) Pursuant to § 501.52(b)(2) of the proposed regulations ERA is issuing proposed prohibition orders to the above-listed powerplants. This decision is based on ERA's review of the certifications submitted pursuant to § 1021 of OBRA, and the supporting information submitted with the certifications, and the information contained in each of the records of the prior proceedings under former § 301 of FUA. ERA is hereby publishing its proposed findings, as required by § 701(b) of FUA.

(2) In accordance with § 501.52(b)(3) of the proposed regulations, the publication of this Notice of Acceptance commences a period of 45 days during which interested persons may submit written comments or request a public hearing. During this period, the recipient of the proposed order and any other interested person may submit any evidence that they have available relating to the proposed order, the certification or the concurrence that ERA must make. A request for an extension of the 45 day period may be granted at ERA's discretion.

(3) If a hearing has been requested, ERA shall provide interested persons with an opportunity to present oral data, views and arguments at a public hearing held in accordance with Subpart C of 10 CFR, Part 501. The hearing may consider, among other matters, the sufficiency of the certification the owner or operator of the powerplant submitted as required by section 301 of FUA, as amended, and §§ 504.5, 504.6 and 504.8 of the proposed regulations.

(4) No final prohibition orders may be issued until any necessary environmental review conducted pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. § 4321 *et seq.* (NEPA) has been completed. Upon completion of the NEPA review and unless ERA determines on the basis of the information contained in the record of the proceeding that the certification fails to meet the requirements of §§ 504.4, 504.6, and 504.8 of the proposed regulations, ERA may issue a final prohibition order.

Proposed Prohibition Orders

Subject to any further findings that ERA may make, ERA hereby proposes to prohibit the powerplants listed in the table below from burning petroleum or natural gas as a primary energy source. In accordance with section 301(a) of FUA, and § 504.6 (c), (d), (e) and (f) of the proposed regulations, the proposed prohibition orders are based on proposed findings by ERA that (1) the powerplants have the technical capability to use coal or another alternate fuel as a primary energy source without having (A) substantial physical modification of the powerplant, or (B) substantial reduction in the rated capacity of the powerplant, and (2) that it is financially feasible to use coal or another alternate fuel as a primary energy source in such powerplants. These findings are based on the certifications submitted by each of the proposed order recipients, on data furnished to ERA in support of these certifications, and on information contained in the records of the previous proceedings under former section 301 (a) or (c) of FUA.

Utility, generating unit and docket No.	Date of issuance	Date of filing certification
New England Power Co., Salem Harbor #1, 52007-1626-01-82	3/26/80	11/23/81
New England Power Co., Salem Harbor #2, 52007-1626-02-82	3/26/80	11/23/81
New England Power Co., Salem Harbor #3, 52007-1626-03-82	3/26/80	11/23/81

Roger C. Wesley,

Acting Deputy Administrator, Economic Regulatory Administration.

November 30, 1981.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 5412-000]

Chimaera Energy Technology Corp.; Application for Preliminary Permit

December 2, 1981.

Take notice that Chimaera Energy Technology Corporation (Applicant) filed on September 23, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5412 to be known as the Edwards' Falls Water Power Project located on Limestone Creek near the Town of Manlius in Onondaga County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Kermit J. Lee, Jr., Chimaera Energy Technology Corporation, 104 Berkeley Drive, Syracuse, New York 13210.

Project Description—The proposed project would utilize existing facilities consisting of: (1) A 400-foot long and 21-foot high masonry and earthen dam having a 150-foot long spillway section; and (2) a reservoir having a surface area of 12 acres and negligible storage capacity at normal maximum surface elevation 720 feet msl. Applicant proposes to construct: (1) An intake structure; (2) a 5-foot diameter and 600-foot long penstock; (3) a powerhouse containing a generating unit having a rated capacity of 800-kW at a head of 90 feet and a flow of 150 cfs; (4) a tailrace; (5) a 400-foot 4.8-kV transmission line; and (6) appurtenant facilities. Applicant estimates that the average annual energy output would be 3,000,000 kWh. Project energy would be sold to Niagara Mohawk Power Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 12 months, during which time it would evaluate the existing facilities, perform design studies, determine project viability, examine the environmental impact, and prepare an application for an FERC license. Applicant estimates the cost of the work under the permit to be $64,400.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980).

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-34985 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4632]

Clifton Power Corp.; Application for Short-Form License

December 2, 1981.

Take notice that Clifton Power Corporation (Applicant) filed on May 7, 1981, an application for a license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for continued operation of a water power project to be known as Clifton Mills No. 1, Project No. 4632. The project would be located on the Pacolet River near Clifton in Spartanburg County, South Carolina. Correspondence with the Applicant should be directed to: Charles B. Mierek, P. E., Cortland Associates, Inc., 838 Arlington Drive, Tucker, Georgia 30084.

Project Description—The existing project consists of: (1) An existing concrete slab and buttress type dam approximately 175 feet long and 16 feet high with three tainter gates each 16.5 feet high by 25 feet wide; (2) an existing reservoir with a surface area of 15 acres with a maximum storage capacity of 150 acre-feet at a normal pool elevation of 594 feet msl; (3) an existing headworks structure approximately 100 feet long containing three vertical type wooden gates approximately 12 feet wide by 12 feet high; (4) an existing powerhouse located approximately 25 feet downstream of the dam, containing two generating units with a capacity of 800 kW; (5) an existing 12.47 kV transmission line; and (6) appurtenant facilities. The project would be operated on a run-of-river basis.

Purpose of Project—All project energy produced will be sold to the Duke Power Company for marketing to the residents and establishments of the local area. The average annual generation is expected to be 5,120 MWh.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before January 18, 1982, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than April 19, 1982. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c), (*as amended* 44 FR 61328, October 25, 1979). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d), (*as amended,* 44 FR 61328, October 25, 1979).

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before January 18, 1982. The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-34986 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5208-001]

Flathead Joint Board; Application for Preliminary Permit

December 2, 1981.

Take notice that Flathead Joint Board (Applicant) filed on November 4, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r)] for Project No. 5208 to be known as the Lower Crow Creek Project located on Crow Creek, near town of Ronan, in Lake County, Montana. The proposed project would be located within the Flathead Indian Reservation. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Everitt Foust, President, Flathead Joint Board, P.O. Box 69, Moiese, Montana 59824.

Project Description—The proposed project would consist of: (1) The rehabilitation of the existing outlet works of the existing Bureau of the Indian Affairs' 90-foot high earthfilled Crow Dam; (2) a powerhouse, to be located at the outlet works, containing two generating units, each rated at 500 kW; (3) a tailrace; (4) the existing Moiese "A" Canal; (5) a turnout structure; (6) a 500-foot long, 4.5-foot diameter steel penstock; (7) a powerhouse containing two generating units, each rated at 650 kW; and (8) two transmission lines. The average annual energy generation from both powerhouses is estimated to be 9.1 million kWh. The Flathead Joint Board is the operator of the Crow Dam.

Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction.

Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time it would conduct engineering, economic, environmental, and feasibility studies, and prepare an FERC license application. The cost of the studies to be performed under the preliminary permit is estimated to be $100,000.

Competing Applications—This application was filed as a competing application to the Lower Crow Dam Project No. 4703 filed on May 20, 1981, by the City of Kalispell under 18 CFR 4.33 (1980). Public notice of the filing of the initial application has already been given and the due date for filing competing applications or notices of intent has passed. Therefore, no further competing applications or notices of intent to file competing applications will be accepted for filing.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest or petition to intervene must be received on or before January 4, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-34983 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5603-000]

The City of Sebastopol, California; Application for Preliminary Permit

December 2, 1981.

Take notice that The City of Sebastopol, California (Applicant) filed on November 3, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5603 to be known as the Sebastopol Trinity Power Project located on Trinity River in Trinity County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Melvin K. Davis, City Manager, 7120 Bodega Avenue, Sebastopol, California 95472.

Project Description—The proposed project would consist of : (1) A 150-foot long, 5-foot high diversion structure on Trinity River; (2) a 14,000-foot long, 72-inch diameter diversion conduit; (3) a 800-foot long, 50- inch diameter penstock; (4) a powerhouse with a total installed capacity of 5,200 kW; and (5) a 4-mile long, 12-kV transmission line from the powerhouse to an existing transmission line. The Applicant estimates that the average annual energy production would be 45.6 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct the technical, environmental and economic studies; and also prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $45,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself [See 18 CFR 4.33(a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33(b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest or petitions to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capitals letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-34984 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5111-000]

Homestake Consulting & Investments, Inc.; Application for Preliminary Permit

December 2, 1981.

Take notice that Homestake Consulting & Investments, Inc. (Applicant) filed on July 21, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5111 known as the Parker Creek Water Power Project located on Parker Creek

in Boundary County, Idaho. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. William H. Delp, II, Independent Power Developers, Inc., P.O. Box 1467, Noxon, Montana 59853.

Project Description—The project would consist of: (1) A 2-foot high diversion structure; (2) a 3,500-foot long, 24-inch diameter penstock; (3) a powerhouse with total installed capacity of 600 kW; and (4) a 800-foot long, 5-kV transmission line which would connect the powerhouse to the existing Northern Lights, Inc. transmission line. The Applicant estimates that the average annual energy production would be 2,260,100 kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time it would conduct technical, environmental and economic studies; and prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $5,350.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Hydro Development Group Inc.; Application for Preliminary Permit

December 1, 1981.

Take notice that Hydro Development Group Inc. (Applicant) filed on October 26, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5576 to be known as the Port Leyden Water Power Project located on the Black River in Lewis County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: John T. Bedard, Hydro Development Group Inc., P.O. Box 58, Dexter, New York 13634.

Project Description—The proposed project would utilize existing facilities consisting of: (1) A 25-foot high and 150-foot long timber-crib dam extending across the right (east) river channel; (2) a reservoir with a surface area of about 20 acres and a negligible storage capacity at normal surface elevation 856.5 feet m.s.l.; (3) an intake structure near the dam's left abutment; (4) a powerhouse; (5) a tailrace; (6) a 2,500-foot long 2.3-kV transmission line; and (7) appurtenant facilities.

Applicant proposes to rehabilitate the powerhouse and to install two generating units each rated at 750 kW and operated under a 25-foot head and at a flow of 400 cfs each. Applicant estimates that the average annual energy output would be 9 million kWh. Project energy would be sold to Niagara Mohawk Power Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time it would study the project environmental impact, perform a detailed engineering assessment and an overall economic analysis and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $49,500.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intevene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's

V 46 / 234 DEC 7 81 UMI

regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5552-000]

Hydro Dyne Co.; Application for Preliminary Permit

December 1, 1981.

Take notice that Hydro Dyne Company (Applicant) filed on October 21, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 5552 to be known as the Black Canyon Water Power Project located on Lake Waldo, and using the waters of North Fork of Middle Fork of the Willamette River, Black and Salmon Creeks in Lane County near Oakridge, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Messrs. Brad Mowreader, Frank Mowreader, 2100 West Broadway #8, Eugene, Oregon 97402.

Project Description—The proposed project, to be located within the boundary of the Willamette National Forest, would consist of: (1) Lake Waldo, a natural lake; (2) the existing diversion gate and connecting tunnel (both to be rehabilitated); (3) a 3.5-mile long, 30-inch diameter penstock; (4) a powerhouse to contain three Francis-type, turbine-generating units with a total rated capacity of 10 MW; and (5) a transmission line to connect to an existing Bonneville Power Administration 12.5-kV line.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a 24-month preliminary permit to study the feasibility of constructing and operating the proposed project. No new road construction would be required to conduct the studies.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 5, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 5, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5525-000]

Hydro Management Inc.; Application for Preliminary Permit

December 2, 1981.

Take notice that Hydro Management Incorporated (Applicant) filed on October 15, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 5525 to be known as the Cedar Creek Power Project located on Cedar Creek in Lake County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. W. H. Edelman III, President, Hydro Management Incorporated, Route 1, Box 169, Ronan, Montana 59864.

Project Description—The proposed project would consist of; (1) A 23-foot long, 3-foot high diversion structure; (2) a 11,500-foot long, 12-inch diameter penstock; (3) a powerhouse with a total rated capacity of 377 kW; and (4) a 8,000-foot long, 14.4-kV transmission line from the powerhouse to an existing 14.4-kV Missoula Electric Cooperative Incorporated transmission line. The Applicant estimates that the average annual energy production would be 2.3 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct the technical, environmental and economic feasibility studies; and also prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $2,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 16, 1982, either the competing application itself [See 18 CFR 4.33(a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33(b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit

comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest or petitions to intervene must be received on or before February 16, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5359-000]

Hydroelectric Power Engineers; Application for Preliminary Permit

December 2, 1981.

Take notice that Hydroelectronic Power Engineers (Applicant) filed on September 14, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5359 to be known as the Kaiser Creek Project located on Kaiser and Westfall Creeks in Fresno, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. William G. Dunn, Hydroelectric Power Engineers, 60 Roan Place, Woodside, California 94062.

Project Description—The proposed project would consist of: (1) A concrete faced rock fill storage dam 115 feet high with a crest length of 550 feet, and two diversion dams, one on Kaiser Creek 20 feet high with 82-foot crest length and the other on Westfall Creek 10 feet high with a 40-foot crest length; (2) a reservoir at the storage dam with a 2,700 acre-foot capacity, negligible storage at the 2 diversion dams; (3) two powerhouses containing turbine-generators with capacities of 630 kW and 7,900 kW and average annual generating 2,200 MWH and 29,400 MWH, respectively; and (4) appurtenant facilities. Potential customers for the power project include the Southern California Edison Company and the Pacific Gas and Electric Company. The project is located entirely on U.S. Forest Service lands.

Proposed Scope of Studies Under Permit—A preliminary permit. If issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which time engineering, economic and environmental studies would be conducted to determine project feasibility and to support a license application. The estimated cost of studies under the preliminary permit authorization is $350,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5501-000]

The Jackson Water Development Co.; Application for Preliminary Permit

December 1, 1981.

Take notice that The Jackson Water Development Company (Applicant) filed on October 14, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5501 to be known as the Knob Hill Hydroelectric Waterpower Project located on Rogue River in Jackson County, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Ms. Marilyn Tebor Shaw, Jackson Water Development Company, Suite 1100, 1333 New Hampshire Avenue, NW., Washington, D.C. 20036.

Project Description—The proposed project would consist of: (1) A 160-foot long, 6-foot high diverson structure on Rogue River; (2) a 2,000-foot long open channel; (3) a 8,000-foot long diversion conduit; (3) a 500-foot long, 72-inch penstock; (4) a powerhouse with a total installed capacity of 4,400 kW; and (5) a 1.25-mile long transmission line from the powerhouse to an existing transmission line. The Applicant estimates that the average annual energy production would be 26 million kWh.

Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24

V 46 / 234 / DEC 7 81 UMI

months, during which time it would conduct technical, environmental and economic studies; and also prepare an FERC license application. The applicant estimates that the cost of undertaking these studies would be $100,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 5, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petitions to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 5, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2748-000]

North Carolina Electric Membership Corp.; Application for License (Major)

December 1, 1981.

Take notice that North Carolina Electric Membership Corporation (Applicant) filed on August 20, 1974, and supplemented on August 30, 1979, an application for a major license under the Federal Power Act, 16 U.S.C. 791(a)–825(r) for the Walters Project No. 2748, located on the Pigeon River, a navigable waterway of the United States, in Haywood County, North Carolina. Correspondence with the Applicant should be addressed to: Mr. James M. Hubbard, Executive Vice President and General Manager, North Carolina Electric Membership Corporation, 3333 North Boulevard, Post Office Box 27306, Raleigh, North Carolina 27611.

This application was filed as a competing application to the Carolina Power and Light Company's application for a new license filed on August 7, 1973, for Project No. 432.

Project Description—The Walters Project consists of: (1) A concrete arch dam 185 feet high and approximately 900 feet long, with a spillway containing 14 steel taintor gates each 24 feet by 10 feet; (2) a reservoir with a surface area of 340 acres at normal high water elevation 2,258.6 feet m.s.l.; (3) a concrete-lined water tunnel 32,700 feet long, extending from the base of an intake structure; (4) a 42-foot diameter surge tank 193 feet high; (5) three 8-foot diameter penstocks each 615 feet long; (6) a powerhouse consisting of three generating units with a total installed capacity of 108,000 kW plus a 600 kW house service generator; and (7) appurtenant facilities.

Purpose of Project—Applicant would distribute the energy generated by the project to its own retail customers.

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before January 15, 1982. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-34993 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5541-000]

Norton Hydro Co.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 2, 1981.

Take notice that on October 20, 1981, Norton Hydro Company (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 5541) would be located on the Coaticook River in the Town of Norton, in Essex County, Vermont. Correspondence with the Applicant should be directed to: Mr. L. Macrae Rood, Box 142, Warren, Vermont 05674.

Project Description—The proposed project would consist of: (1) The Applicant's existing concrete gravity dam, 12 feet high, when equipped with 2-foot flashboards, and 120 feet long; (2) a small existing impoundment covering four acres with negligible storage; (3) an existing steel pipe penstock, 4 feet in diameter and 550 feet long; (4) an existing 15 by 36 foot, one story wooden powerhouse; (5) a renovated 115-kV turbine/generator unit operating under a head of 26 feet and generating 700,000 kWh per year; (6) a 75-foot tailrace channel; and (7) a new 200-kV transmission line 1,000 feet long.

Purpose of Project—Project power would be sold to the New Hampshire Electric Cooperative.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Vermont Fish and Game Department are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from

the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 18, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 18, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-34994 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5502-000]

Springfield Utility Board; Application for Preliminary Permit

December 1, 1981.

Take notice that Springfield Utility Board (Applicant) filed on October 15, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r)] for Project No. 5502 to be known as the Cottage Grove Power Project located on the Willamette River (Cottage Grove Lake) in Lane County, near Cottage Grove, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Steve L. Loveland, Springfield Utility Board, 250 North "A" Street, P.O. Box 300, Springfield, Oregon 97477.

Project Description—The proposed project would be located at the base of the U.S. Army Corps of Engineers' existing Cottage Grove Lake Dam and would consist of: (1) A new outlet structure; (2) a penstock; (3) a powerhouse with a rated capacity of 1.4 MW; and (4) a 500-foot long, 115-kV transmission line to connect to an existing Pacific Power and Light Company line.

Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant is seeking a 36-month preliminary permit to study the feasibility of constructing and operating the proposed project. No new road construction would be required to conduct the studies.

Competing Applications—This application was filed as a competing application to the Cottage Grove Hydroelectric Power Project No. 5024 filed on June 30, 1981, by Energenics Systems, Inc. under 18 CFR 4.33 (1980). Public notice of the filing of the initial application has already been given and the due date for filing competing applications or notices of intent has passed. Therefore, no further competing applications or notices of intent to file competing applications will be accepted for filing.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest or petitions to intervene must be received on or before December 31, 1981.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant sp[illegible]"fied in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2426-008]

State California Department of Water Resources; Application for Amendment of License

December 1, 1981.

Take notice that on August 26, 1981, the State of California Department of Water Resources (Licensee) filed an application for amendment of its existing license for the California Aqueduct Project No. 2426, to add Pyramid Outlet powerplant in Los Angeles County, California. Correspondence with the Licensee should be directed to: Mr. Ronald B. Robie, Director, Department of Water Resources, P.O. Box 388, Sacramento, California 95802.

Licensee seeks authorization to construct, operate, and maintain: (1) A 750-foot long, 24-inch diameter penstock connecting an outlet from the existing Pyramid Lake with; (2) a powerhouse with a total installed capacity of 1.0 MW; (3) an afterbay and chute structure from the powerhouse; and (4) a 15-kV, 2,500-foot long underground transmission line interconnecting an existing Southern California Edison Company's transmission line.

The estimated annual energy of 3.17 million kWh generated by the proposed powerplant would be added to the energy generated at the other powerplants of the Licensee. The Licensee estimates the cost of the proposed action to be $2,754,000. The proposed project would be located within the Angeles National Forest and the Los Pades National Forest.

Comment, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 15, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5237-001]

James E. Tucker; Application for Preliminary Permit

December 2, 1981.

Take notice that James E. Tucker (Applicant) filed on October 9, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 5237 to be known as the Antwerp Project located on the Indian River in the Village of Antwerp, Jefferson County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. James E. Tucker, 204 Main Street, Antwerp, New York 13608.

Project Description—The proposed project would utilize existing facilities consisting of: (1) The 100-foot long and 12-foot high stone rubble-concrete faced Antwerp Dam; (2) the reservoir having a surface area of 34 acres and a storage capacity of 290 acre-feet at spillway crest elevation 495 feet msl; (3) an intake structure; (4) a forebay; (5) a 7-foot diameter, 17-foot long steel penstock; (6) a powerhouse; and (7) a tailrace.

Applicant proposes to rehabilitate the existing facilities and to: (1) Rebuild the powerhouse; (2) install generating unit(s) having a total rated capacity of 220 kW; (3) construct a 275-foot long, 4.2-kV transmission line; and (4) install or construct miscellaneous appurtenant facilities. Applicant estimates that the average annual energy output would be 1,542 MWh. Project energy would be sold to Niagara Mohawk Power Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time it would investigate the technical and financial feasibility to determine if the project should proceed to development. Should the project be feasible, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $25,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative

of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-34997 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5496-000]

County of Amador, Calif.; Application for Preliminary Permit

December 1, 1981.

Take notice that the County of Amador, California (Applicant) filed on October 14, 1981, an application for preliminary permit (pursuant to the Federal Power Act, (16 U.S.C. 791(a)-825(r))) for Project No. 5496 to be known as the Sutter Creek Project located on Sutter Creek in Amador County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Fred Joyce, Chairman of Board, County of Amador, 108 Court Street, Jackson, California 95642.

Project Description—The proposed project would consist of: (1) A 170-foot high, 710-foot long earth fill dam; (2) a 40-foot high, 200-foot long saddle dike; (3) a reservoir with a capacity of approximately 50,000 acre-feet; (4) a powerhouse containing a single generating unit with a rated capacity of 1,125 kW; and (5) a 4,000-foot long transmission line. Applicant estimates that the average annual energy output would be 9 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 36-month permit to prepare a definitive project report, including preliminary designs, results of geological, environmental and economic feasibility studies. The cost of the above activities, along with preparation of an environmental impact report, obtaining agreements with Federal, State and local agencies, preparing a license application, conducting final field surveys, and preparing designs is estimated by the Applicant to be $400,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 5, 1982, either the competing application itself (See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent (See 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 5, 1982.

Filing and Service of Responsive Documents—Any filing must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35011 Filed 12-4-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5284-000]

Empire Pallets, Inc.; Application for Preliminary Permit

December 1, 1981.

Take notice that Empire Pallets, Inc. (Applicant) filed on September 16, 1981, and revised on October 26m 1981, an application for preliminary permit (pursuant to the Federal Power Act) 16 U.S.C. 791(a)-825(r)] for Project No. 5484 to be known as the Port Leyden Project located on the Black River in Lewis County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Philip J. Movish, Daverman & Associates, P. C., 500 South Salina Street, Syracuse, New York 13202.

Project Description—The proposed project would utilize existing Applicant-owned facilities consisting of: (1) A 10-foot high and 75-foot long concrete gravity-type dam in two sections; (2) a reservoir with a surface area of 10 acres and a storage capacity of 45 acre-feet at normal maximum surface elevation 871.6 feet msl; (3) an intake structure near the dam's right (east) abutment; (4) a 20-foot deep 20-foot wide and 60-foot long concrete flume; (5) a former lumber mill; (6) a tailrace; (7) a 200-foot long 23-kV transmission line; and (8) appurtenant facilities.

Applicant proposes to repair the dam, use a portion of the mill as a powerhouse, and to install two rebuilt generating units each rated at 500-kW. Applicant estimates that the average annual energy output would be 6 million kWh. Project energy would be sold to Niagara Mohawk Power Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36-months, during which time it would, study the project's hydrological aspects, perform a detailed engineering assessment, examine the project's environmental impact, determine the project's economic feasibility and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be 53,100.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself (See 18 CFR 4.33 (a) and (d) (1980)) or a notice of intent (See 18 CFR 4.33 (b) and (c) (1980)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to

intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5492-000]

The City of New York; Application for Preliminary Permit

December 1, 1981.

Take notice that The City of New York (Applicant) filed on October 13, 1981, an application for preliminary permit (pursuant to the Federal Power Act (16 U.S.C. 791(a)–825(r)) for Project No. 5492 to be known as the Shandaken Tunnel Intake Water Power Project located on Schoharie Creek in Delaware, Green, and Schoharie Counties, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Francis X. McArdle, Department of Environmental Protection, City of New York, 2358 Municipal Building, New York, New York 10007.

Project Description—The proposed project would redevelop the existing Applicant-owned facilities and would consist of: (1) The 2,280-foot long and 155-foot high masonry Gilboa Dam having a 1,324-foot long spillway discharging into Schoharie Creek; (2) the Schoharie Reservoir having a surface area of 1,145-acres at spillway crest elevation 1,130 feet m.s.l.; (3) the intake works receiving water from Schoharie Reservoir and modified to contain a new generating unit having a rated capacity of 2,000 kW; (4) the 18-mile long Shandaken Tunnel to Esopus Creek; (5) a new 1-mile long transmission line; and (6) appurtenant facilities. Applicant estimates that the average annual energy output would be 6,000 MWh.

The system would continue to be operated essentially to provide water supply to The City of New York. Project energy would be used by Applicant for municipal purposes or would be sold.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would complete feasibility, engineering, and hydrologic studies, conduct field surveys, prepare environmental reports and detailed plans, consult with Federal, State, and local agencies, and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $64,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 8, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules or Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5475-000]

Homestake Consulting & Investment Inc.; Application for Preliminary Permit

December 1, 1981.

Take notice that Homestake Consulting & Investments, Inc. (Applicant) filed on October 13, 1981, an application for preliminary permit (pursuant to the Federal Power Act (16 U.S.C. 791(a)–825(r))) for Project No. 5475 to be known as the O'Brien Creek Water Power Project located on O'Brien Creek near Troy in Lincoln County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. William H. Delp, II, Independent Power Developers, Inc., P.O. Box 1467, Noxon, Montana 59853.

Project Description—The project would consist of: (1) A 3-foot high diversion structure with 10-square foot intake orifice; (2) a 2100-foot long, 24-inch diameter penstock; (3) a powerhouse with total installed capacity of 250 kW and (4) a 1.6-mile long, 5-kV transmission line from the powerhouse to an existing Northern Lights, Inc.,

transmission line. The Applicant estimates that the average annual energy production would be 1.054 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would conduct technical, environmental and economic analysis; and prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $4000.

Competing Application—Anyone desiring to file a competing application must submit to the Commission, on or before February 5, 1982, either the competing application itself (See 18 CFR 4.33(a) and (d)(1980)) or a notice of intent (See 18 CFR 4.33(b) and (c)(1980)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest or petition to intervene must be received on or before February 5, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS" "NOTICE OF INTENT TO FILE COMPETING APPLICATION" "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[Project No. 5479-000]

Homestake Consulting & Investment, Inc.; Application for Preliminary Permit

December 1, 1981.

Take notice that Homestake Consulting & Investments, Inc. (Applicant) filed on October 13, 1981, an application for preliminary permit (pursuant to the Federal Power Act (16 U.S.C. 791(a)-825(r))) for Project No. 5479 to be known as the Camp Creek Water Power Project located on Camp Creek near Troy in Lincoln County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. William H. Delp, II, Independent Power Developers, Inc., P.O. Box 1467, Noxon, Montana 59853.

Project Description—The project would consist of: (1) A 3-foot high diversion structure with 10-square foot intake orifice; (2) a 4400-foot long, 16-inch diameter penstock; (3) a powerhouse with total installed capacity of 225 kW and (4) a 6000-foot long, 5-kV transmission line from the powerhouse to an existing Northern Lights, Inc., transmission line. The Applicant estimates that the average annual energy production would be 0.828 million kWh..

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would conduct technical, environmental and economic analysis; and prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $3300.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 5, 1982, either the competing application itself (See 18 CFR 4.33(a) and (d) (1980)) or a notice of intent (See 18 CFR 4.33(b) and (c) (1980)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 5, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. notice.

The ap
available
extent su

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 22, 1981.

Categories within each NGPA section are indicated by the following codes:

Section:
102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section:
107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section:
108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-85-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 22, 1981.

Categories within each NGPA section are indicated by the following codes:

Section:
- 102–1: New OCS lease
- 102–2: New well (2.5 mile rule)
- 102–3: New well (1000 ft rule)
- 102–4: New onshore reservoir
- 102–5: New reservoir on old OCS lease

Section:
- 107–DP: 15,000 feet or deeper
- 107–GB: Geopressured brine
- 107–CS: Coal seams
- 107–DV: Devonian shale
- 107–PE: Production enhancement
- 107–TF: New tight formation
- 107–RT: Recompletion tight formation

Section:
- 108: Stripper well
- 108–SA: Seasonally affected
- 108–ER: Enhanced recovery
- 108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

available fo

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 22, 1981.

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1,000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 22, 1981.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1,000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Denonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–62004; FRL–1999–5]

Applications to Use Sodium Fluoroacetate (Compound 1080) to Control Predators: Hearing

AGENCY: Environmental Protection Agency.

ACTION: Notice of hearing.

SUMMARY: This notice announces that EPA has received several applications to use the pesticide, sodium fluoroacetate (commonly called "1080"), to control coyotes and other species which prey on livestock. Based on its review of these applications and other data, EPA has decided to conduct an adjudicatory hearing to reconsider its 1972 decision to cancel the registration of 1080 products intended for use as predacides.

DATE: Notices indicating an intention to participate in this hearing must be filed by December 21, 1981 (See Part V.B. of this notice for a discussion of other procedural matters.)

ADDRESS: Copies of the Agency's Technical Review Document on 1080 are available from: Registration Division, Office of Pesticide Programs (TS–767), U.S. Environmental Protection Agency, 401 M St., S.W., Washington, D.C. 20460.

Notices of Intent to Participate must be submitted to: Hearing Clerk (A–110), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: For information on procedural matters, contact Bessie L. Hammiel, Hearing Clerk, Office of the Administrative Law Judge (A–110), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460; Telephone (202) 755–5476. For information on other matters, contact Carole V. Gray, Office of Pesticide Programs, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460; Telephone (703) 557–7102.

SUPPLEMENTAL INFORMATION: The U.S. Environmental Protection Agency (EPA or Agency) regulates pesticides under the authority of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (FIFRA), 7 U.S.C. 136 et seq., and implementing regulations. This responsibility is exercised primarily by Agency decisions on whether to register (license) pesticide products. EPA is required to register a pesticide when it concludes that use of the product will not cause "unreasonable adverse effects on the environment." FIFRA section 3(c)(5). If EPA concludes that a registered pesticide no longer meets this standard, the Agency may cancel the registration of the product. FIFRA section 6(b).

On March 9, 1972, the EPA Administrator issued an order cancelling and suspending the registration of all federally registered pesticide products containing sodium fluoroacetate, commonly called "1080," which were intended for use as predacides. Recently, in the late summer and fall of 1981, EPA received several applications to register pesticide products containing 1080 for use against coyotes and other species which prey on livestock. The Agency has also received applications under FIFRA section 18 for emergency exemptions from FIFRA's registration requirements submitted by States which wish to use 1080 to control coyotes and other predators.

Since the applications concern a pesticidal use which has been cancelled, the applications are subject to Subpart D of EPA's Rules of Practice, 40 CFR 164.130–.133. These regulations state that the Agency must treat such applications as petitions to reconsider its prior order cancelling and suspending the predacidal use of 1080. 40 CFR 164.130. If the Administrator finds that there is "substantial new evidence" which may warrant reconsideration of the prior order, he shall issue a notice announcing that the Agency will hold a hearing to examine the new evidence and to determine whether the order should be modified or reversed. 40 CFR 164.131.

As described more fully below, I have reviewed the information contained in the registration applications and request for emergency exemptions, as well as information available from other sources. I find that the available information meets the standard of § 164.131. I find, accordingly, that it is appropriate to conduct an adjudicatory hearing, pursuant to 40 CFR Part 164, to review the evidence and determine whether the 1972 cancellation and suspension order should be modified or reversed. This document explains the reasons for my decision and establishes certain procedural rules to govern the conduct of this hearing.

I. The 1972 Cancellation and Suspension Order

On March 9, 1972, the EPA Administrator issued notices and orders cancelling and suspending the registrations of products containing 1080, as well as strychnine, sodium cyanide, and thallium sulfate—three other compounds used as predacides. PR Notices 72–2 and 72–3, 37 FR 5718 (March 18, 1972). No registrant requested an administrative hearing in which to contest the order, and no adversely affected person sought judicial review or the order within the statutory time period. Accordingly, the order became final thirty days after it was served on registrants. See *Wyoming v. Hathaway*, 525 F.2d 66 (10th Cir. 1975) *cert. denied*, 426 U.S. 906.

EPA at that time made a series of Findings of Fact with respect to each of the pesticides. (The text of the 1972 cancellation and suspension orders and the supporting Findings of Fact are reproduced in the Appendix.) Concerning the risks of 1080, the Agency found that it is highly toxic to all species and that a number of humans had died from 1080 poisoning. EPA also found that non-target animals were being

adversely affected by use of 1080 and that 1080 was thought to have contributed to the death of a California condor, an endagered species.

With regard to the benefits of 1080 and the other predacides, EPA found in 1972 that "there is no reliable data as to the amount of predator control achieved by the use of these poisons;" that existing data were insufficient to predict the loss of sheep that might occur without these pesticides; that the "data that are presently available indicate predator losses may in fact be of such a low magnitude as to be a minor part of total losses;" that effective alternatives to 1080 and the other predacides were available, though they were generally more expensive; and that the Federal Government was supporting research to develop more effective and environmentally acceptable predator control methods. 37 FR 5718, 5720.

The 1972 Notice cited three major sources for the information which it considered in deciding to cancel and suspend the registration of 1080 and the other toxicants. The most comprehensive was the 1972 Report to the Council on Environmental Quality and the Department of the Interior, commonly called the "Cain Report" after the chairman of the committee which produced the report. The Cain Report surveyed data on predation loss rates, predator control methods, wildlife toxicology, and a number of other subjects. EPA also considered a 1971 petition submitted by the Natural Resources Defense Council and six other environmental organizations ("NRDC petition"), which urged EPA to suspend the use of 1080 and other predacides, citing numerous articles and studies to substantiate its arguments. The Agency also relied on the 1964 "Leopold Report" (officially titled "Predator and Rodent Control in the United States"), which was written by a special advisory committee appointed by the Secretary of the Interior to study wildlife management. The Leopold Report contained some data and opionions agout how to improve the environmental acceptability of the animal damage control program administered by the Department of the Interior.

The Agency has recently prepared a Technical Review Document on 1080 which discusses in considerably greater detail the Agency's 1972 findings and the information in the Cain Report, Leopold Report, and NRDC petition. The Technical Review Document on 1080 is available to the public at the address listed at the beginning of this notice.

II. Applications to Use 1080 to Control Predators

Three States—Wyoming, South Dakota, and Montana—and the Department of the Interior recently have submitted applications seeking authorization to use 1080 to control animals which prey on livestock. (These applications are summarized in the Technical Review Document on 1080.) The applications propose one or more of the following delivery mechanisms: 1080 large-bait stations, 1080 toxic collars, and single-lethal-dose (SLD) baits.

The 1080 large-bait station was the only delivery mechanism commonly used before 1972. A 1080 large-bait station is a carcass of a sheep, calf, or horse which has been injected with an aqueous solution of 1080. Coyotes and other predators feeding on the dead animals are expected to consume lethal quantities of 1080.

Compound 1080 toxic collars and 1080 SLD baits are new delivery mechanisms that were not in general use prior to 1972 and that were not discussed in the Administrator's cancellation and suspension order. The toxic collar is a rubber and plastic apparatus designed to be strapped around the necks of sheep or goats. The collar contains two 1080-filled compartments that are broken when a predator attempts to bite the throat of the prey, exposing the attacking predator to a lethal oral dose of 1080. The SLD bait is made from fat or meat and contains enough 1080 to kill a coyote which eats it. SLD baits are usually placed around a draw station, e.g., a dead sheep or calf, or at sites frequented by the target species.

The applicants include or cite numerous studies and other sources of information to support their applications. In reaching a decision to hold a Subpart D hearing, EPA has considered several sources of information in addition to the material submitted by applicants. Two of the most important sources are the annual reports submitted on tests with 1080 toxic collars conducted under EPA's experimental use permit program and the testimony and exhibits provided at EPA's information-gathering hearings held in July 1981.

In 1977, EPA issued an experimental use permit to the Department of the Interior authorizing limited field testing with 1080 toxic collars. This permit has been renewed annually. More recently, EPA has also approved experimental use permits for the Texas Agricultural Experiment Station, a part of Texas A&M University, and the New Mexico Department of Agriculture. These permits also allow testing with the 1080 toxic collar. Permit holders are required to submit periodic reports to EPA on the results of their testing. These reports comprise a large part of the data base on toxic collars.

EPA has also reviewed the testimony and exhibits presented during three days of information-gathering hearings held in Denver and Washington, D.C. last July. These hearings, held under the authority of FIFRA section 21(b), produced over 800 pages of transcript and 5000 pages of exhibits. Over 80 witnesses, representing a variety of disciplines and viewpoints, testified during the three days of hearings.

III. The Regulatory Framework and Applicable Standards for Reviewing Requests for Reconsideration of a Prior Cancellation Order

Subpart D of EPA's rules of practice (40 CFR 164.130–.133) states that any application under section 3 or section 18 of FIFRA to allow use of a pesticide at a site and on a pest for which registration has been finally cancelled constitutes a petition for reconsideration of the previous cancellation order. 40 CFR 164.130. The regulations require the Administrator to review the applications and supporting data to determine whether reconsideration is warranted. Specifically, the Administrator must determine whether:

1. The applicant has presented substantial new evidence which may materially affect the prior cancellation or suspension order and which was not available to the Administrator at the time he made his final cancellation or suspension determination and

(2) such evidence could not, through the exercise of due diligence, have been discovered by the parties to the cancellation or suspension proceeding prior to the issuance of the final order. 40 CFR 164.131(a). Since I find that there is substantial new evidence with respect to the proposed use patterns, 40 CFR 164.131 requires that I publish a notice in the **Federal Register** setting forth my determination and the basis for it. (See Part IV of this Notice.) The regulations also require that the notice announce that EPA is holding an adjudicatory hearing to review the evidence and to determine whether to modify or reverse the prior order.

The hearing required by Subpart D must be conducted under the provisions of the Administrative Procedure Act governing formal adjudications, under EPA's rules of practice governing hearings (40 CFR 164.1–.111, .130–.133), and under the procedures established by Part V.B. of this Notice. The hearing will be conducted by an EPA Administrative

Law Judge who will preside over the presentation of sworn testimony and oral cross-examination and who will generally supervise the proceeding. During the hearing, the applicants will have the burden of proof. 40 CFR 164.132(a).

At the close of the hearing, the parties will have an opportunity to present briefs to the Administrative Law Judge, who in turn will prepare an Initial Decision containing findings of facts and conclusions of law. The Initial Decision must specifically determine whether substantial new evidence exists and if so, whether it requires reversal or modification of the existing cancellation and suspension order. 40 CFR 164.132. This preliminary decision may be appealed to the Administrator for a final Agency decision. Under EPA's Rules of Practice, if no appeal is taken within 20 days after the Administrative Law Judge files his Initial Decision, the Initial Decision becomes final. 40 CFR 164.101

A final Agency decision modifying or reversing the 1972 order would not, by itself, authorize use of 1080 as a predacide; in addition EPA would need to issue either an emergency exemption as authorized by FIFRA section 18 or a registration pursuant to FIFRA section 3. (Alternatively, a State could issue a "special local need" registration pursuant to FIFRA section 24(c).) Applicants would be required to satisfy certain requirements before such regulatory actions could be taken. Moreover, such regulatory actions could only authorize use of 1080 to the extent allowed by the Agency's final decision in the Subpart D proceeding.

Use of 1080 on Federal lands or in Federal animal damage control programs currently is prohibited by Executive Order 11917. 41 Fed. Reg. 22239; May 28, 1976. This Order, which was issued in 1976 by President Ford, is based on Executive Order 11643 issued by President Nixon shortly before EPA's order cancelling and suspending the registration of 1080 predacides. 37 Fed. Reg. 2875; Feb. 8, 1972. The Executive Order prohibits the use of any animal toxicant on Federal lands or in Federal programs, except sodium cyanide in the M–44 device, unless there is an emergency. Further action, in accordance with the emergency waiver procedures contained in Executive Order 11917, would be required to authorize such use, unless the Executive Order itself is modified.

In summary, FIFRA and its implementing regulations establish very specific standards and procedures for reviewing the pending applications for 1080 predacide products. The Subpart D hearing announced by this notice is only the first step that must be completed before legal use of 1080 as a predacide would be possible.

IV. BASIS OF THE DECISION TO HOLD SUBPART D HEARINGS

The EPA has reviewed the information submitted with the applications for registration and requests for emergency exemptions described above. In addition, Agency staff have reviewed the documents and testimony provided in public hearings on the use of 1080 to control predators, as well as information from several other sources. The staff have prepared a Technical Review Document on 1080 which summarizes and analyses this material. (Copies of the Technical Review Document on 1080 are available to the public at the address listed at the beginning of this notice.) I find that there is new evidence which suggests that in recent years there has been a rise in the rates of livestock lost to predation; a decrease in the availability and/or an increase in the cost of several alternative predator control methods; and an improvement in the ability of users to handle 1080 safely. New evidence also suggests that in 1972, EPA may have overestimated the environmental hazards of using 1080 to control predators. In addition, two new delivery mechanisms (the 1080 toxic collar and single lethal dose (SLD) baits) which might reduce environmental exposure have been proposed. Reduced exposure would lessen the risks for nontarget wildlife. Taken together, these new data constitute substantial new evidence which may warrant reconsideration of the Agency 1972 order.[1]

A. Increased Predation Loss Rates

Comparisons of recent data on the rate of livestock (especially sheep) lost to predation with data available in 1972 indicate that predation has become an increasingly important problem in the intervening years. The 1972 Cain Report reviewed four questionnaire survey studies of predation loss rates, and concluded that the reported loss rates [2] (3.6% to 7.9%) were probably overstated.

Since 1972, biological field studies, as well as additional questionnaire surveys, have been conducted. Generally, field studies produce more reliable estimates of predation-losses, since deaths are verified by the investigator. In many cases, field studies yield lower estimates of loss rates than questionnaire surveys. For example, Robel (1981) reported predation losses determined by a field study to be only 25% of the losses reported in a questionnaire survey during the same period. Thus, it is significant that the average losses to predators reported from field surveys after 1972 are comparable to the questionnaire survey results discussed in the Cain Report.

Data from questionnaire surveys conducted after 1972 are also consistent with the conclusion that predation rates have risen. Though some surveys report losses in the same range as the Cain Report data, five studies indicate that average losses are over five percent, including one survey which found predation losses averaging 14.8% of sheep and lambs. These results are corroborated with abundant testimony from individual ranchers that predation has increased since the 1972 EPA order cancelling the registration of 1080 and other predator toxicants.

Terrill (1980) surveyed available USDA statistics and other reports of sheep and lamb losses to predators from 1958 to 1978. Based on Terrill's report, the loss of sheep and lambs to predators from 1972 to 1978 was about 35 percent higher than the average rate from 1958 to 1972.

While data on calf and cattle losses to predators are not available from the period before 1972, data are available on the losses from all causes. These data indicate that loss rates were relatively stable from 1950 to 1972, averaging 8.9%, and that after 1972 loss rates rose markedly: from 1972 to 1980, the rate of death loss of cattle and calves averaged 11.2%, an increase of over 20 percent from the average from the 1950–1972 period.

B. Alternative Predator Control Methods

Recent information on alternative predator control methods indicates that the 1972 findings may no longer hold true for conditions in 1981. Livestock ranchers testifying at the July 1981

[1] In 1977, Wyoming and several other states applied for registration of products containing 1080 for use against coyotes and other predators. EPA reviewed the applications and supporting data and determined, under Subpart D, that they did not present substantial new evidence which warranted reconsideration of the 1972 order. See 43 FR 14100; April 4, 1978. This decision to hold a hearing under Subpart D is based in part on data that were submitted in 1977. The Agency is aware, however, of a significant body of information which has been generated since 1978, particularly with regard to livestock losses to predators, availability and effectiveness of alternatives, the toxic collar, secondary poisoning of scavengers, and the metabolism of 1080. The total body of information, including data generated from 1972 to 1978, and data developed after 1978, constitutes substantial new evidence.

[2] Loss rates are measured in a variety of ways; e.g. sheep lost per 1,000 ewes, percentage of total livestock. Conversion of reported loss figures to a common measurement was not always possible.

V 46 / 234 DE 7 81 UMI

information-gathering hearings repeatedly stressed the problems with the currently available methods of controlling predators. For instance, they noted that the cost of aerial gunning has increased dramatically since 1972. In addition, they referred to a 1978 decision by the then Secretary of the Interior, to prohibit denning (the practice of killing coyote pups and parents during the spring before the young are mobile enough to leave their den) in Federal animal damage control programs.

In addition, development of non-lethal chemical methods (reproduction inhibitors and repellents) that were anticipated in 1972 has not occurred.

Other testimony cited numerous problems with using the M–44 sodium cyanide device which was introduced in 1975 as a predator control method. Witnesses claimed the M–44 does not work well in cold weather; that it is subject to mechanical malfunctions; and that the restrictions on its use are quite burdensome.

Thus, the available evidence indicates that at least some of the alternatives cited as sufficient in 1972 are today not available, less available, more costly, or all of the above. This in turn may shift the balance of risks and benefits determined in 1972.

C. Human Safety

In the years before EPA cancelled the predacidal uses of 1080, there were a number of accidental human 1080 poisonings resulting in at least 13 and perhaps as many as 18 fatalities. Since 1972 no deaths from 1080 poisoning have been reported, even though the compound is still used as a rodenticide in the United States. (Although the rodenticide use pattern differs from the one being proposed, these differences would not significantly affect human safety.) In addition, 1080 has been used in other countries (e.g., New Zealand and Canada) to control predators and other species without any known adverse consequences for humans. The improved safety record indicates that users are now handling 1080 more carefully, thereby reducing the chance of human poisoning.

The improvement may be attributed to two factors. First, since 1972, EPA has gained a better understanding of how to revise the labeling of a pesticide to reduce risks to humans and the environment. As a result, in recent years the directions for using Federally-registered 1080 rodenticides have been clarified and expanded to provide users with more precise instructions about how to apply the treated bait safely. Second, since 1978, all registered products containing 1080 have been classified as "restricted use pesticides." [3] See 40 CFR § 162.31. As a result, 1080 may be used only by a "certified applicator" (a person who has been specially trained in the safe use of highly toxic pesticides), or by a person under his direct supervision. (Prior to 1972 EPA lacked the authority to require that a pesticide be used only by certified applicators.)

Because EPA would have greater regulatory control in 1981 over the use of 1080 products than it did in 1972 (e.g. EPA could restrict 1080 use to certified applicators), EPA may be able to establish conditions on the use of 1080 which would prevent the occurrence of unreasonable adverse effects on the environment.

D. New Delivery Mechanisms

The 1080 toxic collar and SLD baits are two delivery mechanisms for 1080 which were not considered in the 1972 cancellation and suspension order. These mechanisms may substantially reduce the environmental exposure of non-target wildlife to 1080 in comparison to the use of 1080 large-bait stations.

The most important advantage of the toxic collar is its selectivity for "offending" animals. Only those individual predators which attack livestock are killed. Other "non-offending" members of the species are not directly exposed. Moreover, no animal is exposed until the collar is broken. Once the collar is punctured, the neck area of the dead sheep, goat, or calf may be a source of exposure to scavengers. This, however, is only a limited region of the animal's body (far less than an entire carcass as is used in the large-bait station), and some available test results suggest that certain species of scavengers do not feed on this area.

The SLD bait has two potential advantages over the large-bait station in reducing exposure to non-target wildlife. First, since coyotes and other canid species are more sensitive to 1080 poisoning than most other species, the dose of 1080 in an individual bait can be limited to an amount which is sufficient to kill a canine predator, but not a species less sensitive to that amount of 1080. The second advantage is that limiting the number, as well as the dose levels, of baits allows more precise control of the total amount of 1080 available at a site or in an area.

As a result of these two advantages, the controlled use of SLD baits may lead to lower exposure to 1080 for non-target wildlife than would use of 1080 large-bait stations. First, animals may eat only as many SLD baits as are present at a site. Thus, if only a few baits are placed at any site, only a few non-target animals can be directly exposed. In contrast, a poisoned bait station could serve as a food source for numerous animals living in the vicinity of the bait station. Moreover, the animals feeding at a large-bait station can eat as much meat as they wish. Since large-bait stations customarily contain multiple lethal doses of 1080, it was assumed in 1972 that a non-target animal could ingest a lethal amount of 1080. This perceived hazard may be lessened by use of SLD baits. Not only would a SLD bait contain a sublethal does for most species, but the number and placement of baits at a site also could be controlled to reduce the likeihood of a single animal consuming more than one bait. Finally, the amount of 1080 consumed by a predator which eats a SLD bait may well be less than the amount obtained from feeding on a large-bait station. Thus, the risk of secondary poisoning (poisoning of animals which scavenge the dead predator) is also likely to be lower.

No laboratory or field testing with SLD baits has been reported to substantiate these conclusions; they are based on available wildlife toxicity data and simple comparisons of the amounts of 1080 that would be placed in the environment. [4]

E. Evironmental Safety

In addition to information indicating that use of 1080 toxic collars and SLD baits may result in lower environmental exposure than large-bait stations, there is evidence suggesting that EPA overestimated the environmental hazards of 1080 in 1972.

First, several studies address the risk of primary and secondary poisoning of scavengers. In these studies magpies were allowed to feed on 1080 poisoned coyotes, and though the magpies consumed meat containing residue levels of 1080 in excess of the previously reported median lethal dose for magpies, none died from 1080 poisoning. While there are several possible explanations of these results, the data may indicate that the risk of secondary poisoning is lower than originally thought in 1972.

Second, information is available concerning the metabolism of 1080 in the body of an animal (or human) which

[3] Since 1972, 1080 has been registered only for use in products intended to control rodents. Thus, the "restricted use" classification has applied to 1080 only when used as a rodenticide.

[4] The majority of the available wildlife toxicity data were generated before 1972. Some studies which generally corroborate these data have been conducted since 1972. (Connally, 1981).

ingests the compound (Kun, 1981). Kun asserts that 1080, itself, is not a poisonous compound; it must be metabolized to flourocitrate by cellular systems to exhibit its toxic effects. Kun also claims that the presence of fluorocitrate residues in a dead animal presents little risk of secondary poisoning, because a scavenger which consumes fluorocitrate as a result of feeding on a primary victim would detoxify (metabolize to nontoxic compounds) the fluorocitrate residues before they had a chance to exert their toxic effect. Based on his research, Kun also claims that secondary poisoning most often occurs when the primary victim fails to metabolize all of the 1080 to fluorocitrate and a scavenger consumes this residual 1080 when feeding on the primary victim. Kun asserts, however, that 1080 breaks down rapidly (in 5–10 hours) into nontoxic metabolites. Thus, it is claimed that if a scravenger feeds on a victim of primary poisoning which has been dead for more than a day, the scavenger is unlikely to consume sufficient 1080 residues to be poisoned. If Kun's claims are correct, the risk of secondary poisoning may be substantially less than originally thought.

Finally, EPA has received information in the reports on the toxic collar experiments and during the information gathering hearings which suggest that the analytical methods used prior to 1972 to detect the presence of 1080 residues in wildlife might have produced occasional "false positive" results—that is, the method indicated that 1080 residues were present in samples known to contain no 1080. This information provides a basis for questioning whether the reported results which EPA relied on in 1972—that 1080 residues were present in dead eagles and a California condor—were accurate. If the positive results are shown to be attributable to an artifact of the analytical method, rather than the actual presence of 1080 residues, the residue results may not support the existence of a risk to avian species.

Upon consideration of the data and information discussed above, I conclude that there is substantial new evidence which may materially affect the 1972 order cancelling and suspending the predacidal uses of 1080. Accordingly, I am directing that a public hearing be conducted to review the available data and to determine whether the 1972 order should be modified or reversed, based on this evidence. I have further concluded that the hearing should address all three of the delivery mechanisms proposed in the pending applications: 1080 toxic collars, single lethal dose baits, and 1080 large bait stations.

V. Conduct of the Subpart D Hearing

Subpart D of the Rules of Practice requires that the Administrator specify:

(1) The date on which the hearing will begin and end,

(2) the issues of fact and law to be adjudicated at the hearing,

(3) the date on which the presiding officer shall submit his recommendations, including findings of fact and conclusions, to the Administrator, and

(4) the date on which a decision by the Administrator is anticipated. 40 CFR 164.131(c).

Part V.A. of this Notice describes the issues to be resolved in the Subpart D hearing. Part V.B. establishes procedural rules for the conduct of the hearing and deadlines for reaching decisions.

A. Issues for the Subpart D Hearing.

Since 1972 a number of studies and surveys have been performed which increase the information available to the Agency in several areas: rates of livestock losses to predation; efficacy of 1080 in various use patterns; availability, effectiveness, and cost of alternative predator control methods; and hazards to human and non-target wildlife. The purpose of the hearing is to review the relevant new evidence closely, to expose its strengths and weaknesses, and to determine whether, on balance, it would support a decision to reverse or modify the 1972 order. The ultimate issues, therefore, are whether substantial new evidence exists, and if so, whether it requires reversal or modification of the existing cancellation or suspension order. 40 CFR 164.132(a). [5]

Specifically, the hearing shall consider the following issues:

(1) *Predation loss rates.* Whether available data demonstrate that predation loss rates have increased since 1972:

(a) for sheep.

(b) for cattle.

(c) for goats.

Whether current losses to predation account for a greater percentage of total losses than before 1972:

(a) for sheep.

(b) for cattle.

(c) for goats.

Whether coyotes, foxes, and/or feral dogs are significant cause of predation.

(2) *Efficacy.* Whether use of 1080 in toxic collars, single lethal dose baits, and/or large-bait stations is likely to reduce predation:

(a) in open-range grazing of livestock.

(b) in fenced pasture grazing of livestock.

If use of 1080 is likely to reduce predation, by how much?

(3) *Alternatives.* Whether nonchemical methods of predator control, e.g., denning, shooting, trapping, and snaring, are generally effective in reducing predation.

Whether the M-44 device using sodium cyanide is generally an effective alternative to the use of 1080.

Whether non-lethal chemical methods of predator control, e.g., taste aversion chemicals, reproduction inhibitors, and repellants, are effective.

Whether husbandry practicers, e.g., use of guard dogs, shed lambing, additional herders, are generally effective in reducing predation.

With respect to all alternatives to 1080 predacides, whether there is any situation in which no currently available alternative is satisfactory, e.g., because of its cost or because of limitations on its use due to characteristics of the control method.

(4) *Benefits.* What are the national, regional, and local effects of predation on the livestock industry and the general economy?

What impact would the availability of 1080 have on the profits of individual ranchers and the livestock industry, as a whole?

(5) *Environmental Safety.* Whether available data indicate that use of 1080 in toxic collars and/or SLD baits would be likely to result in lower direct or indirect exposure to non-target wildlife than resulted from use of 1080 large-bait stations.

Whether available data indicate that the risk of primary and/or secondary poisoning was overestimated in 1972.

(6) *Human Safety.* Whether use of 1080 in toxic collars, SLD baits, and/or large-bait stations is likely to result in human injury or death.

Whether an antidote and/or medical treatment exists which effectively counteracts the effects of 1080 poisoning.

---

[5] The determination required by § 164.132(a)—that the hearing record contain substantial new evidence—differs from the determination required by § 164.131(a)—that substantial new evidence is available which warrants holding a Subpart D hearing. In the case of the a decision to initiate a Subpart D proceeding, the Administrator may consider information available from any source. Moreover, the Administrator may accept the available data without extensive inquiry into its reliability. In contrast, the Administrator's decision at the close of a Subpart D proceeding must be based solely on the testimony and exhibits in the hearing record, evidence which has usually been subjected to rigorous examination in the adversarial process. Thus, while the Subpart D regulations use the same language to describe two different findings, the findings are actually quite different due to the scope and nature of the information which must be considered.

V 46 / 234 / DEC 7 81 UMI

(7) *Use Restrictions.* Whether prohibition of the use of 1080 in the range of certain protected and/or endangered species, e.g., the San Joaquin kit fox or California condor, would effectively reduce or eliminate the risks to those species, and what effect would such a prohibition have:

(a) in those areas,

(b) on the livestock industry as a whole.

Whether restriction of the use of 1080 to trained Government employees or certified applicators would reduce human and environmental risks without substantially reducing benefits.

Whether a requirement that livestock predation be verified by state employees before use of 1080 was authorized would limit use of 1080 to situations in which it was most likely to provide significant benefits.

Whether restrictions on the sites of use, the timing of use, or the delivery mechanism would reduce risks without substantially reducing the benefits.

Whether users should be required to post warnings in the vicinity of SLD baits and large-bait stations.

Whether users should be required to check toxic collars, SLD baits, and bait stations periodically.

Whether users should be required to keep records of their use of 1080, and if so, what records.

Whether other restrictions would reduce risks without substantially reducing benefits.

In conclusion, I note that the determination of these issues shall be made taking into account the factors specified in the applicable EPA regulations. See 40 CFR 164.132(a).

B. Deadlines and Procedures for the Subpart D Proceedng

The subject of using 1080 to control predation on western livestock was brought to my attention last spring by a letter from the National Woolgrowers Association. The woolgrowers stated at that time that predation was already a major problem for the livestock industry and was rapidly growing worse. Since then, the Association's words have been echoed by many others, including the Departments of Agriculture in several western states, numerous individual ranchers, as well as other regional and national livestock associations. They have repeatedly claimed that 1080 would aid their efforts to reduce predation rates, and therefore they have asked that EPA authorize its use as quickly as possible.

Because of the urgency expressed by a number of groups and individuals, I find that it would be in the public interest to reach a prompt, final decision in this matter. Therefore, I have decided to establish a schedule and to prescribe certain procedures for the conduct of this proceeding. In the event that it is not feasible to comply with the schedules or requirements established below, either the Administrative Law Judge or the parties may request that they be modified.

1. *Procedure for requesting to participate in the proceeding.* Any interested person who wishes to participate in this proceeding either as a party or as an *amicus curiae* shall submit a Notice of Intent to Participate to the Hearing Clerk on or before December 21, 1981.[6] Applicants for registration or an emergency exemption for a 1080 predacide are also being notified by registered mail of my decision to hold a Subpart D hearing. They are required to submit their Notices of Intent to Participate within 14 days of receiving the registered letter or within 14 days of publication of this notice, whichever is later. The Notice shall identify the person (individual or organization) and his representative, if any. The Notice of Intent to Participate shall also provide an address at which documents in the proceeding can be served. Finally, the Notice of Intent to Participate shall indicate whether the person wishes to participate as a party or as an *amicus curiae.* Notices of Intent to Participate must be submitted to: Hearing Clerk (A–110), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Any person who fails to submit a Notice of Intent to Participate in the proceeding within the specified time period shall not be allowed to participate in the proceeding unless he shows good cause why he should be admitted.

Applicants and other interested parties who might be affected by a decision to modify or reverse the 1972 order cancelling and suspending the registration of 1080 predacides should be aware that participation in the hearing initiated by this notice may be their sole opportunity to present evidence and/or testimony concerning the predacidal use of 1080 prior to final Agency action. Moreover, judicial review under FIFRA § 16(b) of any action concerning the use of 1080 which is taken by the Administrator at the conclusion of this Subpart D proceeding can only be obtained by a person who has been "a party to the proceedings * * *."

[6] An *amicus curiae* is a person whose role is limited to filing written briefs. An *amicus curiae* is not a party, and thus he would not be entitled to obtain judicial review.

2. *Pre-Hearing Procedures: Settlement Discussions, Statements of Position, Discovery, and Final Pre-Hearing Order.* Since a settlement of this matter would allow the Agency to conclude the proceeding even more quickly than the schedule established below, I direct the presiding Administrative Law Judge to convene a Pre-Hearing Conference within three weeks after this notice is published to explore the possibility of settlement. The Administrative Law Judge is authorized to hold additional meetings or to take any other actions which he considers likely to lead to settlement.

By January 6, 1982 each person requesting to participate in this proceeding as a party shall file with the Hearing Clerk a Statement of Position. This statement shall contain a written response describing the person's position and interest with respect to the issues in Part V.A. of this notice. If the person is an applicant, the statement shall also contain the number assigned by EPA to his application, a copy of the proposed labeling of his product, and a description of the proposed use. See 40 CFR § 164.24. The Statement of Position shall be submitted to the address above and served on all parties.

In addition, no later than January 6, 1982 each party shall serve on all other parties and the Administrative Law Judge a preliminary list of witnesses, together with a brief narrative summary of their expected testimony, and a list of all documents and exhibits which the party expects to introduce at trial. See 40 CFR 164.50(b).

Thirty days after this notice is published or thereafter, any party may direct requests for discovery to any other party. The Administrative Law Judge shall supervise discovery in accordance with the Agency's Rules of Practice, 40 CFR 164.51. All discovery must be completed by March 8, 1982.

The Administrative Law Judge shall hold a Final Pre-Hearing Conference five days after the end of the period allowed for discovery. Within five days after this conference, he shall issue a final prehearing order specifying how the hearing will be conducted. This order shall establish, *inter alia* (if not already specified by previous orders): measures to restrict repetitive or cumulative testimony; the order in which parties shall present testimony; and the amount of time to be allotted to the different sides on different issues. Within five days after the final prehearing order, the parties may move the Administrator to modify the time for presentation of evidence based upon information bearing on the length of trial (such as the number of scheduled

witnesses), which has become known during the pretrial period. Such motion shall not stay the evidentiary presentation.

3. *Schedule for the hearing and the decisions of the Administrative Law Judge and the Administrator.* The formal presentation of evidence shall begin within five days after issuance of the final prehearing order. The hearing record shall close no later than 60 days after commencement of the evidentiary presentation. Following the close of the hearing record, the parties will have an opportunity to present briefs according to a schedule established by the Administrative Law Judge. The Administrative Law Judge shall file his Initial Decision with supporting findings of fact, conclusions of law, and regulatory recommendations no later than 40 days after the hearing record is closed. If an appeal from that decision is taken, I expect to issue a final decision within 30 days.

4. *Field hearings.* The principal location for this hearing will be EPA headquarters in Washington, D.C. However, I recognize that some of the potential parties and witnesses are located in the Western states, where the livestock industry is centered. Accordingly, I authorize the Administrative Law Judge upon a showing of good cause to hold field hearings in Denver, Colorado, where EPA has a regional facility, and in other locations, if appropriate. The Administrative Law Judge shall determine the appropriate timing and duration of such field hearings. See 40 CFR 164.50(a)(10).

5. *Ex parte communications.* Finally, the Agency's Rules of Practice forbid anyone who may take part in deciding this case, at any stage of this proceeding, from discussing the merits of the proceeding *ex parte* with any party or with any person who has been connected with the preparation or presentation of the proceeding as an advocate or in an investigative or expert capacity, or with any of their representatives. 40 CFR 164.7.

Accordingly, the following Agency offices, and the staffs thereof, are designated as the trial staff to perform all investigative and prosecutorial functions in this case: the Office of Pesticides and Toxic Substances; the Office of General Counsel; and the Office of Enforcement Counsel.

From the date of this notice until any final decision in this case, neither the Administrative Law Judge, the Judicial Officer, the Office of Policy and Resource Management, the members of the staff in the immediate office of the Administrator, nor myself shall have any *ex parte* contact or communication with any members of the trial staff, or with any other interested persons not employed by EPA, on any of the issues involved in this proceeding. However, persons interested in this case should feel free to contact any other EPA employee, including the trial staff, with any questions they may have.

Dated: December 1, 1981.

Anne M. Gorsuch,

Administrator.

Appendix.—Environmental Protection Agency, Pesticides Office, Washington, D.C. 20250

March 9, 1972.

[FR Notice 72–2 Pesticides Regulation Division]

Notice to Manufacturers, Formulators, Distributors and Registrants of Economic Poisons

Attention: Person Responsible for Federal Registration of Economic Poisons.

Suspension of Registration for Certain Products Containing Sodium Fluoroacetate (1080), Strychnine and Sodium Cyanide.

I

Last spring, this Agency made a public commitment to review the status of registrations for strychnine, cyanide, and sodium floroacetate (1080), for use in prairie and rangeland areas for the purpose of predator and rodent control. This commitment grew out of grave concern surfaced by the reported deaths of some 20 eagles killed by the misuse of thallium sulfate.[1]

This same concern caused the Secretary of the Interior to initiate a thorough review of the government's federal predator control program. An advisory committee was appointed under the chairmanship of Dr. Stanley Cain, Director, Institute for Environmental Quality and Professor of Botany and Conservation at the University of Michigan. The report of that advisory committee was released earlier this month.

Aside from this Agency's review and the Cain findings, a detailed petition has been submitted to this Agency by several distinguished conservation groups urging that the registrations of these compounds be cancelled and suspended immediately. That petition invoked the Federal Insecticide, Fungicide and Rodenticide Act, 7 U.S.C. § 135, Section 2z(2)(c) which requires that an economic poison contain "directions for use which are necessary and if complied with, adequate to prevent injury to living man and other vertebrate animals . . ." and Section 4c which allows the Administrator to initiate cancellation proceedings by ordering immediate suspension "when he finds that such action is necessary to prevent an imminent hazard to the public." [2]

Based on this Agency's review of the registrations of sodium cyanide, strychnine, and 1080 in light of available evidence, I am persuaded that their registrations for predator uses should be suspended and cancelled.

II

The Cain group has dealt at length with the effects of the use of strychnine, cyanide, and 1080 for predator control. The report points out the extreme toxicity of these compounds, their non-selectivity, and their potential impact on the environment which "is increased by secondary hazard, accumulation in the animal, and combined characteristics of chemical stability and solubility in water." This report reconfirms the findings of the Leopold Report (see[1], *supra*) that the predator control program took a heavy environmental toll.

Cyanide, strychnine, and 1080 are among the most toxic chemicals known to man. They act quickly, spreading through an entire animal crippling the central nervous system. These poisons are toxic not only to their targets but other animals and wildlife. All of these poisons have a similar pattern of use as unattended baits and are spread over vast areas of open prairie.

In the case of strychnine use against badgers, coyotes, and foxes, a tablet containing the poison is placed inside a one-inch ball or cube of bait material such as meat, lard or tallow. These baits are left along animal trails or near non-game carcasses. While instructions caution the user to cover the baits over with chips or brush to avoid ingestion by non-target animals, the Cain Report has suggested the inadequacy of such directions.[3]

The pattern for cyanide use differs little in pertinent respects. An explosive gun, a "coyote-getter," charged with cyanide is baited and driven into the ground. The gun is left unattended along the trail or range and is triggered when an animal pulls at the bait. In the case of 1080, carcasses of dead animals are laced with the substance and strewn to attract the predator.

Indiscriminate baiting over wide unpoliced area poses two obvious and recognized threats to non-target animals that share the ranges as a natural habitat. The unsupervised bait is itself a potential killer of a non-target range species. The threat, however, is compounded by the extremely high toxicity of

---

[1] This concern predates last summer. In 1963 the Secretary of Interior appointed an Advisory Board on Wildlife and Game Management chaired by Dr Leopold of the University of California.

[2] Sponsors of the petition were: The Natural Resources Defense Council, Defenders of Wildlife, Friends of the Earth, The Humane Society of the United States, National Audubon Society, Inc., New York Zoological Society, the Sierra Club, and the National Parks and Conservation Association.

[1] (Dept. please supply this footnote.)

[3] According to the Cain Committee, if toxicants were consistently applied under field conditions with meticulous case, it is possible undesirable side-effects might be avoided. Draft at 131. However, the Committee concludes, "It appears that the necessary high standards are not likely to be attained." (Draft at 115) The Committee found no reliably precise data is available showing the degree of predator control achieved or the possible loss that might ensue without any program.

V 46 / 234 DEC 7 81 UMI

these poisons, which can transform the predator carcass into a potential lethal killer of prairie animal life.

While the effects of prairie baiting are, for the most part, not documented, the Cain group has suggested the present evidence may well understate the true damage. It is appropriate to take administrative notice of the fact that isolated accidents involving wildlife are not apt to be reported. Isolated, even if routine and numerous, instances of secondary animal poisoning would not have the visibility of a wildlife "kill," nor is there apt to be an observer present as in the case of human mishap. The administrative process need not be blind to these realities. This Agency's Pesticides Registration Division has, moreover, reports of cases of alleged secondary and accidental poisoning, and recently range-use of 1080 has been suspected of killing birds, including some of our rare species.

Measured against these obvious threats to wildlife are only ill-defined and speculative benefits. The Cain Committee has noted the absence of any meaningful information on the efficacy of poison baiting, especially in relation to the economic loss caused by predators to the sheep industry. At least one state, Nevada, has estimated that the cost of predator control was ten times the value of livestock and poultry lost to predators.

This absence of any meaningful data of benefits derived from the use of these highly dangerous poisons which pose a marked potential threat to the environment renders these registrations suspect. It is now settled that the burden of proof rests on the poison. The report, moreover, specifically cites the greater selectivity of ground shooting, denning, and trapping, and the Department of the Interior is embarking on a study to determine other methods of control. Here, where it is known that alternative methods of control exist, the registrations must be seriously questioned.

III

In deciding whether or not these considerations justify suspension, it must be recognized that the concept of suspension is one that must evolve, and existing verbal tests are not readily translated into a decisive cue for action. The Federal Insecticide, Fungicide and Rodenticide Act, and the judicial and administrative constructions of it to date set forth only word formulas that establish a general attitude on suspension questions. Each situation must be scrutinized not only for what is involved, but also for what is not involved.

Turning to the verbal tests by which we must measure the use of these poisons, FIFRA provides that the Administrator of EPA "may, when he finds that such action is necessary to prevent an imminent hazard to the public, by order, suspend the registration of an economic poison immediately." "Public" is not to be viewed restrictively, and includes fish and wildlife, as has recently and forcefully been noted in an opinion of a federal court. See *EDF* v. *Ruckelshaus,* 439 F2d. 584, at 597. Nor does "imminent" mean that we are on the "brink" and that the harm will occur tomorrow or has been documented.[4] It is sufficient that reasonable men can conclude that action taken today will with reasonable certainty lead to a loss in the future and that loss will be irremediable and uncorrectable by subsequent action, and that the apparent benefits from using a chemical, pending the complete statutory review process are outweighed by the possible harm of use during the period.[5] Or, as the matter was put in the Agency's DDT policy statement of March 18, 1971, the type, extent, probability and duration of such injury will be measured in light of the positive benefits accruing from use of the economic poison, for example, in human or animal disease control or food production.

Bearing these principles in mind, I am persuaded that a definite hazard exists. While the mere toxicity of poisons does not, under FIFRA, render them a hazard, their degree of toxicity and pattern of use may well do so. The unattended and unsupervised use of poisons over large areas of land, by definition, poses a hazard to non-target species. The fact that label instructions contain directions for placing the baits at times and in areas least likely to be populated by non-target species and for policing them, affords slight, if any comfort. This Agency has on prior occasions taken into account a "commonly recognized practice" of use (see *In Re Hari Kari Lindane,* I.F.&R. Docket #6), and has noted that the likelihood of directions being followed may affect their adequacy (see *In Re King Point,* 2 ERC 1819 (1970)); *In Re Stearns,* 2 ERC 1364 (1970).

The hazards from the pattern of use for these chemicals is not remote or off in the distant future. The prairies and ranges are populated by numerous animals, some of which are becoming rare. At jeopardy are potentially endangered species. Each death to that population is an irremediable loss and renders such species closer to extinction.

No apparent circumstances exist to counterbalance this distanct hazard and suggest that the possibility of irremediable loss is outweighed by the harm that might occur from their nonavailability during a period of suspension. The situation might well be different were the removal of these poisons from the market likely to affect human health or the supply of a staple foodstuff; or were there no apparent alternatives available, the balance might be differently struck. This, however, is not true.

I am hereby affixing findings of fact and an order suspending and cancelling these chemicals for use in predator control.

William D. Ruckelshaus.
Administrator.
March 9, 1972.

Findings of Fact

Cyanide

1. Two products in the form of shells containing sodium cyanide are currently registered for explosive devices designed to kill coyotes that may prey on sheep. The device is simply a cyanide charge placed in a baited cylinder and driven into the ground. When the animal pulls at the bait the charge explodes into its mouth. Only one of the shell products is registered for use by the general public. The Division of Wildlife Services of the Department of the Interior has probably been the largest user of such devices.

2. Sodium cyanide is a water-soluble white-solid which reacts with acids to form hydrogen cyanide gas. This chemical is among the most toxic and rapidly acting of all known poisons.

3. Persons overcome by gas either die very rapidly from respiratory failure or recover completely within a relatively short time.

4. Ingestion or inhalation of a very low dose (as little as 300 micrograms per litre of air) may rapidly result in death.

5. There is no true effective antidote.

6. Recent data show four incidents involving cyanide compounds in fiscal year 1970 in three of which human beings were injured by the discharge of cyanide guns placed in fields. Only quick thinking on the part of all three victims in seeking immediate medical aid prevented any loss of life.

7. There is evidence that dogs have been subjected to poisoning by cyanide (used as outlined above) which is highly toxic to all wildlife and domestic animals.

Strychnine

8. Currently at least six products containing strychnine in tablet and technical powder form are registered for use in baits against coyotes and wolves.

9. The technical powder form is for reformulation and repackaging, and is for use only by professional pest control operators and government agencies.

10. The tablets are available on the open market.

11. Strychnine is an extremely bitter-tasting white crystal.

12. It is a complex, naturally occurring, organic compound which would probably bind to soil readily and decompose over a period of time, although information on the persistance of strychnine and its effect on the environment is somewhat limited.

13. Strychnine is highly toxic to humans and animals, with 30 mg. considered as a threat to the life of an adult man. Death has, however, been reported with as little as 5 to 10 mgs., and animal life may be acutely poisoned by ingestion of small amounts.

14. Strychnine acts by interfering with normal neural processes, causing exaggerated muscle contraction and violent convulsion. Death in a rather gruesome form due to respiratory failure soon follows unless the seizures are controlled.

---

[4] "An 'imminent hazard' may be declared at any point in a chain of events which may ultimately result in harm to the public. It is not necessary that the final anticipated injury actually have occurred prior to the determination that an 'imminent hazard' exists." *Reasons Underlying the Registration Decisions Concerning Products Containing DDT, 2,4,5–T, Aldrin and Dieldrin,* at 6.

[5] The cancellation proceeding involving the possibility of both a scientific advisory committee and public hearing consumes at least one year. In actual fact, these proceedings have generally taken considerably more than a year.

15. There is no true effective antidote.

1080 (Sodium Fluoroacetate)

16. Four products containing 1080 are currently registered for use as mammalian predacides.

17. Use is restricted to areas west of the 100th meridian, and then only by Division of Wildlife Services personnel, or under their direct supervision.

18. 1080 is a white powder, soluble in water, very stable, and thus very persistent in ground water.

19. 1080 is highly toxic to all species. The dangerous dose for man is 0.5–2 mg/kg. The chemical acts rapidly upon the central nervous and cardiovascular systems with cardiac effects. Effect is usually too quick to permit treatment, and antidotes are relatively valueless.

20. According to one authority, prior to 1963 there were 13 proven fatal cases, five suspected deaths, and six non-fatal cases of 1080 poisoning in man, although it is not clear to what extent predator control materials were implicated.

21. There is evidence that a certain number of non-target animals are being adversely affected by 1080 products, particularly, in the case of carrion eating birds and mammals, by secondary poisoning. It is not clear, however, how various animal populations are being affected, although 1080 is thought to have contributed to the death of at least one California condor, an endangered species.

Benefits

22. There is no reliable data as to the amount of predator control achieved by the use of these poisons.

23. There is no reliable data as to the loss of sheep that might occur without a predator control program using these poisons, or of the real effect of such losses on the general economic health of the sheep industry. Certain data that are presently available indicate predator losses may in fact be of such a low magnitude as to be a minor part of total losses. The Cain Report suggests that among other reasons for the decline of the sheep industry may be competition from synthetic fibers and from lot-fed livestock.

24. For the maintenance of predator control programs, especially in the sheep industry, effective non-chemical alternatives exist, including denning, shooting and trapping, methods that have long been available and effective, though more costly than poisons.

25. The Federal Government has committed itself to a research program for methods of controlling predators other than poisons.

Conclusion

The predator use of the foregoing chemicals presents an imminent hazard such as to warrant their suspension pursuant to section 4(c) of the Federal Insecticide, Fungicide and Rodenticide Act.

Order

In accordance with the attached opinion and findings, it is hereby ordered that the registration for all products containing sodium fluorocetate (1080), sodium cyanide or strychnine for use against mammalian predators be cancelled and suspended immediately.

Registrations for those products bearing directions as listed above are hereby suspended and the products may not be legally shipped in interstate commerce until labeled to block out instructions for predator use.

William D. Ruckelshaus,

Administrator.

March 9, 1972.

Environmental Protection Agency, Pesticides Office, Washington, D.C. 20250

March 9, 1972.

[PR Notice 72–3 Pesticides Regulation Division]

Notice to Manufacturers, Formulators, Distributors and Registrants of Economic Poisons

Attention: Person Responsible for Federal Registration of Economic Poisons.
Suspension of Registration for All Products Containing Thallium Sulfate.

As explained in greater detail in our Order announced today, in connection with registrations of cyanide, strychnine, and sodium fluoroacetate (1080) for use on predators, this Agency undertook to review the status of the registration for thallium sulfate. Last spring evidence came to light of thallium bootlegging in connection with reports of eagle kills.

I.—Findings

1. Thallium is not a registered predacide, but is rather registered for rodent control and use against pests.

2. The chemical is a white powder, soluble in water.

3. It is persistent and will remain indefinitely in soil.

4. It is dermally and orally toxic to humans.

5. Instances of thallium poisoning and bootlegging have been reported.

6. The danger to humans is increased by the tendency of thallium to be stored in the body and thus to build up to critical levels by continued exposure so that permanent damage to vital organs or death may occur.

II.—Conclusion

The principles governing the decision of whether or not to "suspend," see 7 U.S.C. 135(b) have been set forth in our predator control order. Looking to the nature of the hazard and its foreseeability, there can be no question that thallium is a candidate for suspension. The combined circumstances of dermal absorption, possible accidental ingestion, build-up in the body, and persistenace in the environment, taken with the history of known bootlegging, would require a compelling demonstration of benefits to justify the continued use of this product pending the course of cancellation proceedings.

No such benefits exist. Alternatives are available for all thallium uses, including urban rat control. The United States Department of Interior has not used the compound for some time. Whatever their own dangers, particularly as predator poisons, it seems apparent that the controlled used of 1080 and strychnine in an urban environment is far less dangerous than the continued use of thallium with its forty-year history of accidents. All thallium registrations will be forthwith cancelled and suspended in accordance with the attached order.

William D. Ruckelshaus,

Administrator.

March 9, 1972.

Order

In accordance with the attached opinion and findings, it is hereby ordered that the registration for all products containing thallium sulfate for all uses be cancelled and suspended immediately.

Registrations for all thallium products are hereby suspended and the products may not be legally shipped in interstate commerce.

William D. Ruckelshaus,

Administrator.

March 9, 1972.

BILLING CODE 6560–32–M

[AD-FRL 1857-1]

Control Techniques Guideline Documents; Large Petroleum Dry Cleaners; Fugitive Emissions From Synthetic Organic Chemical, Polymer, and Resin Manufacturing Equipment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Release of draft control techniques guideline (CTG) documents for public review.

SUMMARY: Draft CTG documents for control of volatile organic compound emissions from large petroleum dry cleaners; and fugitive emissions from synthetic organic chemical, polymer, and resin manufacturing equipment are available for public review and comment. These informational documents have been prepared to assist States in analyzing and determining reasonably available control technology for stationary sources of volatile organic compound emissions located within ozone national ambient air quality standard nonattainment areas with attainment dates after 1982.

DATES: Comments should be submitted, in duplicate if possible, to the Emission Standards and Engineering Division (MD–13), Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Fred Porter, on or before January 21, 1982. Comments will be available for public inspection and copying between 8:30 a.m. and 4:00 p.m., Monday through Friday, at the Office of the Director, Room 741, Emission Standards and Engineering Division, Environmental Protection Agency, 411 West Chapel Hill Street, Durham, North Carolina.

CONTROL TECHNIQUES GUIDELINE DOCUMENTS: Copies of the draft control techniques guideline documents may be obtained by contacting Mrs. Marcia Piotrowski; (919) 541–5631; Emission Standards and Engineering Division (MD–13); Environmental Protection Agency; Research Triangle Park, North Carolina 27711.

FOR FURTHER INFORMATION CONTACT: Mr. Fred Porter; (919) 541–5631; Emission Standards and Engineering Division (MD–13); Environmental Protection Agency; Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1977 require each State in which there were areas exceeding the national ambient air quality standards (NAAQS) to adopt and submit revised State implementation plans (SIP) to EPA by January 1, 1979. States which were unable to demonstrate attainment with the NAAQS for ozone by the statutory deadline of December 31, 1982, could request extensions for attainment with the standard. States granted such extensions are required to submit a further revised SIP to EPA by July 1, 1982.

Sections 172 (a)(2) and (b) (2) and (3) of the Clean Air Act require that nonattainment area SIP's include reasonably available control techology (RACT) requirements for stationary sources.

The EPA is planning on publishing several control techniques guidelines (CTG) documents in 1981 to assist the States in determining RACT for various stationary sources.

CTG documents are informational in nature and provide State and local air pollution control agencies with an initial information base for proceeding with their own analysis of RACT for specific stationary source categories of VOC emissions located within ozone NAAQS extension nonattainment areas. The CTG documents review existing information and data concerning the technology and cost of various control techniques to reduce emissions.

Under Executive Order 12291, EPA must judge whether a regulation is "major" or "minor." If "major," the regulation is subject to a Regulatory Impact Analysis. The draft CTG documents for large petroleum dry cleaners; and fugitive emissions from synthetic organic chemical, polymer, and resin manufacturing equipment are considered "minor."

The CTG documents provide information to assist the States in analyzing and determining RACT to meet the statutory requirement of RACT on stationary sources. The CTG documents are not a regulation and do not impose any new requirements.,

This **Federal Register** notice and copies of the draft CTG documents were submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any comments from OMB to EPA and any EPA responses to those comments are available for public inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, at the Office of the Director, Room 741, Emission Standards and Engineering Division, Environmental Protection Agency, 411 West Chapel Hill Street, Durham, North Carolina.

Dated: August 26, 1981

Kathleen M. Bennett,

Assistant Administrator for Air, Noise and Radiation.

[FR Doc. 81–34727 Filed 12–4–81; 8:45 am]

BILLING CODE 6560–26–M

FEDERAL COMMUNICATIONS COMMISSION

[BC Docket No. 81–807, etc.; File No. BPH–800626AA, etc.

Ivanhoe Broadcasting Corp., et al.; Hearing Designation Order

Adopted: November 10, 1981.

Released: November 24, 1981.

In re applications of Ivanhoe Broadcasting Corp., Ponce, Puerto Rico, BC Docket No. 81–807, File No. BPH–800626AA, Req: 101.1 MHz, Channel 266 50 kW (H&V), 231 feet (HAAT); Jose J. Ortiz, Judith Mendez de Ortiz and Bessy A. Ortiz, d/b/a Family Broadcasting Group, Ponce, Puerto Rico, BC Docket No. 81–808, File No. BPH–800925AA, Req: 101.1 MHz, Channel 266 50 kW (H&V), minus 46 feet (HAAT); Zaba Radio Corp., Ponce Puerto Rico, BC Docket No. 81–809, File No. BPH–800930AD, Req: 101.1 MHz, Channel 266 50 kW (H&V), 363 feet (HAAT); Marsona Broadcasting Corp., Ponce, Puerto, Rico, BC Docket No. 81–810, File No. BPH–801003AJ, Req: 101.1 MHz, Channel 266 50 kW (H&V), 203 feet (HAAT); designating applications for consolidated hearing on stated issues.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications filed by Ivanhoe Broadcasting Corporation, Jose J. Ortiz, Judith Mendez de Ortiz and Bessy A. Ortiz, d/b/a, Family Broadcasting Group (Family), Zaba Radio Corporation (Zaba) and Marsona Broadcasting Corporation (Marsona).

2. *Family.* Applicants for new broadcast stations are required by 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in § 73.3580(h) of the rules. We have no evidence that Family published the required notice. To remedy this deficiency, Family will be required to publish local notice of its application and to file a statement of publication with the presiding Administrative Law Judge.

3. Analysis of the financial data submitted by Family reveals that $164,500 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment	$68,000
Building	12,000
Miscellaneous	62,500
Operating costs (three months)	22,000
Total	164,500

Family plans to finance construction with existing capital in the amount of $42,500 and a bank loan for an amount "between $100,000 and $125,000." However, by its own terms, the bank letter submitted by Family is not a firm commitment to advance the funds. Hence, only $42,500 in existing capital has been shown available to meet its required costs of construction and operation of $164,500. A financial issue will therefore be specified.

4. *Zaba.* Applicant's proposed antenna structure is above 300 feet and is thus a major action under the National Environmental Policy Act. Applicant must therefore submit an environmental impact statement as required by § 1.1311 of the Commission's Rules. Zaba shall amend its application by submitting an environmental impact statement with the Administrative Law Judge.

5. *Marsona.* Analysis of the financial data submitted by Marsona reveals that $156,954 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment	$96,880
Miscellaneous	14,000
Operating costs (three months)	46,074
Total	156,954

Marsona plans to finance construction and operation with the following funds: Applicant shows the availability of existing capital in the amount of $1,000. Applicant is relying on a bank line of credit in the amount of $500,000. However, the bank letter submitted by Marsona is not a firm commitment to advance the funds. Hence, the $1,000 in

existing capital available to Marsona is insufficient to meet its required cost of construction and operation for 3 months. A financial issue will therefore be specified.

6. *Other Matters.* On October 3, 1980, Anibal Sotomayor filed an application for a construction permit for a new FM broadcast station on Channel 266B. On December 18, 1980, the Sotomayor application was returned as unacceptable for filing. A preliminary examination of the Sotomayor application revealed that the proposed operation failed to comply with § 73.203(b) of the Commission's Rules pertaining to availability of channels. Specifically, FM Channel 266B, which is assigned to Ponce, Puerto Rico, is also available (upon application) to any other community that is not *listed* in the Table of Assignments set forth in § 73.202(b) and which is located within 15 miles of Ponce. Although the city of Adjuntas is located within 15 miles of Ponce, the city of Adjuntas, is listed in the Table of Assignments. Channel 275 is assigned to Adjuntas. Puerto Rico according to the Table of Assignments, notwithstanding the fact that Channel 275 is licensed to Station WCHQ, Camuy, Puerto Rico. In support of his petition for reconsideration, filed January 13, 1981, Sotomayor states that Channel 275 has been effectively removed to Camuy. In this connection, Sotomayor asserts there is no FM channel available to Adjuntas and suggests that the Commission "correct" the Table of Assignments to reflect the actual use of Channel 275 in Camuy.

7. Section 73.203(b), in pertinent part, specifically states that any *unlisted* community may apply for an available channel in a listed community if it meets certain requisite criteria. Adjuntas *is listed* in the Table of Assignments and is thus precluded from applying for Channel 266 assigned to Ponce. Moreover, the proper proceeding for seeking the relief requested by Sotomayor is a rulemaking to amend the Table of Assignments. Accordingly, the Sotomayor petition for reconsideration will be denied.

8. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

9. Accordingly, *it is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Family:

a. The source and availability of additional funds over and above the $42,500. Indicated; and

b. Whether in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

2. To determine with respect to Marsona:

a. The source and availability of additional funds over and above the $1,000 indicated; and

b. Whether in light of the evidenced adduced pursuant to (a) above, the applicant is financially qualified.

3. To determine which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

10. *It is further ordered,* That the petition for reconsideration filed by Anibal Sotomayor IS DENIED.

11. *It is further ordered,* That in the event the application of Zaba is granted, it is subject to the condition that if the Commission ultimately adopts a rule prohibiting commonly owned AM and FM stations in the same market, Zaba will divest itself of either its AM station or FM station in accordance with the requirements established in such rulemaking proceeding.

12. *It is further ordered,* That Zaba shall file the amendment specified in Paragraph 4 above with the presiding Administrative Law Judge within 30 days after this order is published in the Federal Register.

13. *It is further ordered,* That Family shall file the amendment specified in Paragraph 2 above with the presiding Administrative Law Judge on or before January 6, 1982.

14. *It is further ordered,* That to avail themselves of the opportunity to be heard, the applicant herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

15. *It is further ordered,* That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rules, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

16. The Commission has not yet received Federal Aviation Administration clearance for the antenna tower(s) proposed by the below listed applicant(s). Accordingly, *It is further ordered,* That the following issue is specified:

3. To determine whether there is a reasonable possibility that a hazard to air navigation would occur as a result of the tower height(s) and location(s) proposed by Family Broadcasting Group, Zaba Radio Corporation and Marsona Broadcasting Corporation.

17. *It is further ordered,* That the Federal Aviation Administration is made a party to the proceeding.

Federal Communications Commission.

Larry D. Eads,

Acting Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 81-34923 Filed 12-4-81; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket No. 81-804, etc.; File No. BPH-800214AI, etc.]

Robillard Communications, Inc., et al.; Hearing Designation Order

Adopted: November 10, 1981.

Released: November 24, 1981.

In re applications of Robillard Communications, Inc., Dubach, Louisiana, BC DOCKET NO. 81-804, File No. BPH-800214AI, Req: 97.7 MHz, Channel 249, 3 kW (H&V), 300 feet (HAAT); Dubach Broadcasting Co., Dubach, Louisiana, BC DOCKET NO. 81-805, File No. BPH-800220AL, Req: 97.7 MHz, Channel 249, 3 kW (H&V), 300 feet (HAAT); DUBACH RADIO, INC., Dubach, Louisiana, BC DOCKET NO. 81-806, File No. BPH-800829BD, Req: 97.7 MHz, Channel 249, 3 kW (H&V), 300 feet (HAAT); for construction permit for a new FM station; designating applications for consolidated hearing on stated issues.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications filed by Robillard Communications, Incorporated (Robillard), Dubach Broadcasting Company (Broadcasting) and Dubach Radio, Inc. (Radio).

2. *Robillard.* The age of majority in Louisiana is 18. Rebecca R. Robillard, one of the principals of Robillard Communications, Inc., was born November 22, 1965, thus she has not yet reached the age of majority under Louisiana law. Since she is legally under the control of her parents, Joseph P. and Elizabeth G. Robillard, for comparative purposes, the interests of Rebecca's

parents in other broadcast properties must be imputed to Rebecca.[1]

3. Section 73.2080(c) of the Commission's Rules requires that an applicant for a construction permit for a new facility file an equal employment opportunity program if it proposes to have 5 or more full-time employees. The EEO program filed by Robillard, Section VI of Form 301, indicates the "city and state which station is licensed to serve" as Haynesville, Louisiana instead of Dubach. Accordingly, Robillard shall file with the Administrative Law Judge an amendment to Section VI, Form 301, specifying Dubach, Louisiana as the city and state to be served.

4. *Broadcasting.* In response to Question 6, Section II, Form 301, Broadcasting indicates that not all of the parties to its application are citizens of the United States. Since all of the parties to the application were born in and are residents of the United States, this response may be eroneous. Applicant shall file an amendment to its application with the Administrative Law Judge responding to Question 6.

5. Broadcasting proposed to locate its main studio 3.4 miles outside the city limits of Dubach. Section 73.1125(a)(3) of the Commission's Rules provides that a broadcast station may locate its main studio outside the principal community to be served upon a showing of good cause, and that the granting of such proposal would be in the public interest. Broadcasting has not submitted such a showing. Therefore, a § 73.1125 issue will be specified.

6. *Radio.* In response to Question 5, Section V–B, Form 301, Radio indicates only that the site of its main studio is "To Be Determined." Therefore, a § 73.1125 issue will be specified.

7. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

8. Accordingly, *it is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Dubach Broadcasting Company, whether the main studio location complies with § 73.1125 of the Rules and, if not, whether circumstances exist which warrant a waiver of that Section.

2. To determine with respect to Dubach Radio, Inc. whether the main studio location complies with § 73.1125 of the Rules and, if not, whether circumstances exist which warrant a waiver of the section.

4. To determine which of the proposals would, on a comparative basis, best serve the public interest.

5. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

9. *It is further ordered,* That Robillard file an amendment to Section VI, Form 301 with the presiding Administrative Law Judge.

10. *It is further ordered,* That Broadcasting shall file an amendment with the presiding Administrative Law Judge responding to Question 6, Section II of Form 301.

11. *It is further ordered,* That to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

12. *It is further ordered,* That the applicants herein shall, pursuant to § 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

13. The Commission has not yet received Federal Aviation Administration clearance for the antenna tower(s) proposed by the below listed applicant(s). Accordingly, *it is further ordered,* That the following issue is specified:

3. To determine whether there is a reasonable possibility that a hazard to air navigation would occur as a result of the tower height(s) and location(s) proposed by Robillard Communications, Inc., Dubach Broadcasting Company and Dubach Radio, Inc.

14. *It is further ordered,* That the Federal Aviation Administration IS MADE A PARTY to the proceeding.

Federal Communications Commission.

Larry D. Eads,

Acting Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 81-34822 Filed 12-4-81; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 81–802 and 81–803; File Nos. BPH–801029AA and BPH–810313AD]

Town and Country Broadcasting and Mary Ellen Burns; Hearing Designation Order

Adopted: November 10, 1981.

Released: November 20, 1981.

In re applications of Town and Country Broadcasting, Inc., Decatur, Illinois, BC Docket No. 81–802, File No. BPH–801029AA, Req: 99.3 MHz, Channel No. 257A 3.0 kW (H&V), 300 feet; Mary Ellen Burns, Mt. Zion Illinois, BC Docket No. 81–803, File No. BPH–810313AD, Req: 99.3 MHz, Channel No. 257A 3.0 kW (H&V), 300 feet; for construction permit for a new FM station; designating applications for consolidated hearing on stated issues.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications filed by Town and Country Broadcasting, Inc. (TCB), and Mary Ellen Burns (Burns).

2. Applicants for new broadcast stations are required by § 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in § 73.3580(h) of the Rules. We have no evidence that TCB published the required notice. To remedy this deficiency, TCB will be required to publish local notice of its application, if it has not already done so, and file a statement of publication with the presiding Administrative Law Judge.

3. The TCB proposal constitutes a major environmental action, as defined by § 1.1305(a) of the Rules, since the antenna tower exceeds 300 feet in height above ground. To comply with § 1.1311 of the Rules, TCB provided an environmental narrative statement of two sentences regarding the height and location of the tower. The information submitted lacks the environmental information requested by § 1.1311, and accordingly, an issue will be designated

4. Analysis of the financial data submitted by TCB reveals that $83,515 will be required to construct the proposed station and operate for three months, itemized as follows:

---

[1] Joseph Robillard has a controlling interest in KLUV (AM), Haynesville, Louisiana. Additionally, both Joseph and Elizabeth have a combine interest of 50% in Talbot-Robillard, Inc., permittee of new FM Station KQIT, Stamps, Arkansas.

Equipment	$19,415
Land	3,000
Building	5,000
Miscellaneous	4,000
Operating cost (three months)	32,100
Total	63,515

TCB plans to finance construction and operation with the following funds: $63,000 in stock subscriptions; $30,000 from a mandatory stock purchase by the upcoming general manager of the station; and $8,212 currently in the bank. Although, the subscription agreements were included in the application, TCB failed to provide balance sheets for the stockholders and the general manager showing their ability to purchase the stock. A financial issue will therefore be specified.

5. The respective proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining pursuant to section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

6. The proposals are mutually exclusive and must be designated for hearing in a consolidated proceeding. The applicants are qualified to construct and operate as proposed except as indicated by the qualification issues, if any, specified below.

7. Accordingly, *It is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to TCB
(a) the source and availability of additional funds over and above the $8,212 indicated; and
(b) whether, in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

2. Whether TCB's environmental information has fully complied with the provisions of § 1.1311 of the Commission's Rules.

4. To determine, in light of section 307(b) of the Communications Act of 1934, as amended which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

5. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

6. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications, if any, should be granted.

8. *It is further ordered,* That TCB shall file a statement with the presiding Administrative Law Judge showing compliance with the public notice requirements of § 73.3580(f) of the Commission's Rules.

9. *It is further ordered,* That to avail themselves of the opportunity to be heard the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in persons or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

10. *It is further ordered,* That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

11. The Commission has not yet received Federal Aviation Administration clearance for the antenna towers proposed by the below listed applicants. Accordingly, *It is further ordered,* That the following issue is specified:

3. To determine whether there is a reasonable possibility that a hazard to air navigation would occur as a result of the tower heights and locations proposed by TCB and Burns.

12. *It is further ordered,* That the Federal Aviation Administration is made a party to the proceeding.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 81-34927 Filed 12-4-81; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 81-797 and 81-798; File Nos. BP-810313AE and BP-81051AD]

KWIQ Radio, Inc. et al; Applications

Adopted: November 9, 1981.

Released: November 24, 1981.

By the Chief, Broadcast Bureau.

In the matter of applications of KWIQ Radio, Inc., KWIQ, Moses Lake North, Washington; Has: 1260 kHz, 1 kW D (Moses Lake, Washington); Req: 1020 kHz, 500 W, 5 kW-LS, U (Moses Lake North, Washington) (BC Docket No. 81-797, File No. BP-810313AE) and Robert E. Reece, Raymond V. Naught and Donald L. Harris d.b.a. Tri-Co Company, Selah, Washington; Req: 1020 kHz, 500 W, 10 kW-LS, U (BC Docket No. 81-798, File No. BP-810518AD) for construction permit. Hearing designation order designating applications for consolidated hearing on stated issues.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications for new and modified AM broadcast stations.

2. *KWIQ Radio, Inc.* We have no evidence that KWIQ broadcast and published the local notice of its application required by § 73.3580 of the Rules. It must therefore demonstrate that it did.

3. *Tri-Co Company.* This applicant proposes service to Selah, Washington (1980 population 4,372), which is less than half the size of nearby Yakima (1980 population 49,826). Further, the proposed station would provide 5 mV/m daytime service to all of Yakima and 10 mV/m interference-free nighttime service to a large part of it. Under a policy announced in *Policy Statement on Section 307(b),* 2 FCC 2d 190 (1965), and affirmed in *AM Station Assignment Standards,* 54 FCC 2d 1, 21-22 (1975), a presumption therefore arises that this applicant realistically proposes to serve Yakima rather than Selah. Appropriate issues will be specified.

4. *Other matters.* Except as indicated by the issues specified below, both applicants are qualified to construct and operate as proposed. However, the proposals are mutually exclusive, so they must be set for hearing in a consolidated proceeding. Although the proposals are for different communities, they would serve substantial areas in common during daytime hours. Consequently, in addition to determining pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of them would better provide a fair, efficient, and equitable distribution of radio service, a contingent comparative issue will also be specified.

5. Accordingly, it is ordered, that pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine whether the Tri-Co Company proposal will realistically provide a local transmission facility for Selah, Washington, or for Yakima, Washington.
2. To determine, in the event it be concluded pursuant to Issue 1 that the

proposal will not realistically provide a local transmission service for Selah, Washington, whether the proposal meets the technical provisions of the Rules for AM broadcast stations assigned to Yakima, Washington.

3. To determine the areas and populations which would receive primary service from each proposal, and the availability of other primary aural service to such areas and populations.

4. To determine, in light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would better provide a fair, efficient, and equitable distribution of radio service.

5. To determine, in the event it be concluded that a choice between the applicants should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, better serve the public interest.

6. To determine, in light of the evidence adduced pursuant to the foregoing issues, which application should be granted.

6. It is further ordered, that KWIQ Radio, Inc. shall broadcast and publish local notice of its application (if it has not already done so) and shall file a statement with the presiding Administrative Law Judge on or before January 18, 1982.[1]

7. It is further ordered, that to avail themselves of the opportunity to be heard and pursuant to § 1.221(c) of the Commission's rules, the applicant shall within 20 days of the mailing of this order, in person or by attorney, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this order.

8. It is further ordered, that pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, the applicants shall give notice of the hearings as prescribed in the rule, and shall advise the Commission of the publication of the notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

BILLING CODE 6712-01-M

[1] KWIQ Radio, Inc. has also been requested by pre-designation letter to file certain environmental information about its proposal. If it has not yet done so, it must file that informaton on or before January 6, 1982.

[BC Docket No. 81-79, File No. BPH-800425 AE, etc.]

M&M Communications, Inc., et al; Applications

In the matter of Applications of M&M Communications, Inc., Warrensburg, Missouri; Req: 105.5 MHz, Channel 288 3 kW (H&V), 299.9 feet (BC DOCKET NO. 81-799, File No. BPH-800425AE); Grapevine Communications, Inc., Warrensburg, Missouri; Req: 105.5 MHz, Channel 288 3 kW (H&V) 300 feet (BC DOCKET NO. 81-800, File No. BPH - 800703AB); Warrensburg Broadcasters, Inc., Knob Noster, Missouri; Req: 105.5 MHz, Channel 288 3 kW (H&V), 300 feet (BC DOCKET NO. 81-801, File No. BPH-800829AH). Hea designation order designating applications for consolidated hearing on stated issues.

Adopted: November 9, 1981.

Released: November 24, 1981.

By the Chief, Broadcast Bureau.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications filed by M&M Communications, Inc. (M&M), Grapevine Communications, Inc. (Grapevine),[1] and Warrensburg Broadcasters, Inc. (Warrensburg).

2. *M & M.* Applicants for new broadcast stations are required by § 73.3580)f) of the Commission's Rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in § 73.3580(h) of the Rules. From the evidence before us, M&M's public notice failed to include the transmitter height and location. Additionally, the studio location and public file were not in the community of license. To remedy these deficiencies, M&M will be required to republish local notice of its application and to file a statement of publication with the presiding Administrative Law Judge.

3. Section 73.1125 of the Commission's Rules requires that the main studio of an FM station be located within the city of license, but that on a showing of good cause the main studio may be located outside that community. M&M proposes to locate its main studio approximately six-tenths of a mile north from the Warrensburg city limits. The applicant alleges that the proposed location is easily accessible from Warrensburg. There is no question here of a *de facto* change in station location. Under these circumstances we believe that adequate justification has been provided under § 73.1125 for the proposed studio location.

4. Analysis of the financial data submitted by M&M reveals that $90,672 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment	$31,350
Land	10,000
Building	10,000
Miscellaneous	15,000
Operating cost (three months)	24,322
Total	90,672

M&M plans to finance construction and operation with $64,000 in existing capital, $5,000 in new capital and an $80,000 bank loan. The applicant relies upon the balance sheets of Big Country of Missouri, Inc., a commonly owned corporation, and Richard L. Billings and Patricia A. Billings, holders of 100% of the applicant's stock. However, neither balance sheet adequately segregates the current (12 month) portion of obligations, and it is impossible to determine whether any net liquid assets are available to the applicant from these sources. Finally, although the bank has submitted an application for an $80,000 Small Business Administration Loan to the applicant, the line of credit by its terms is authorized for only $20,000. Since the applicant has shown only $20,000 available to meet the $90,677 needed for construction and operation, a financial issue will be specified.

5. Since no determination has been reached that the antenna proposed by M&M would not constitute a menace to air navigation, an issue regarding this matter is required.

6. *Grapevine.* Section 73.1125 of the Commission's Rules requires that the main studio of an FM station be located within the city of license, but that on a showing of good cause the main studio may be located outside that community. Grapevine has failed to provide us with any information as to its main studio location. Under these circumstances, and issue will be specified.

7. Since no determination has been reached that the antenna proposed by Grapevine would not constitute a menance to air navigation, an issue regarding this matter is required.

8. *Warrensburg.* Warrensburg proposed to locate its main studio approximately 3.5 miles east of the recognized Knob Noster boundaries. The applicant alleges that the proposed location is easily accessible from Knob Noster. There is no question here of a *de*

[1] Grapevine's April 10, 1981 amendment reporting disposal of other broadcast interests of its principals, was filed after the "B" cut-off date and will be received only for purposes of compliance with § 1.65 of the Rules, not any comparative consideration.

facto change in station location. Under these circumstances we believe that adequate justification has been provided under § 73.1125 for the proposed studio location.

9. The respective proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining, pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

10. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

11. Accordingly, it is ordered that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to M&M.

(a) The source and availability of additional funds over and above the $20.000 indicated; and

(b) Whether, in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

2. To determine whether there is a reasonable possibility that the tower height and location proposed by M&M would constitute a hazard to air navigation.

3. To determine whether the proposal of Grapevine contains a main studio location within its community of license in compliance with § 73.1125 of the Commission's Rules with respect to location of the main studio and, if not, whether circumstances warrant a waiver of that Section.

4. To determine whether there is a resonable possibility that the tower height and location proposed by Grapevine would constitute a hazard to air navigation.

5. To determine, in the light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio services.

6. To determine in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

7. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

12. It is further ordered, that M&M Communications, Inc. shall file a statement with the presiding Administrative Law Judge showing compliance with the public notice requirements of § 73.3580(f) of the Commission's Rules.

13. It is further ordered, that the Federal Aviation Administration is made a party to the proceeding.

14. It is further ordered, that to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

15. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 81-34925 Filed 12-4-81; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 81-795 and 81-796; File Nos. BPH-791107AD and BPH-800828AH]

Western Minnesota Stereo, Inc. and O & I Broadcasting; Applications

In the matter of applications of Western Minnesota Stereo, Inc., Montevideo, Minnesota; Req: 105.5 MHz, Channel 288 3 kW (H&V), 297 feet (BC Docket No. 81-795, File No. BPH-791107AD), and O & I Broadcasting, Montevideo, Minnesota; Req: 105.5 MHz, Channel 288 3 kW (H&V), 300 feet (BC Docket No. 81-796, File No. BPH-800828AH), for construction permit for a new FM station. Hearing designation order designating applications for consolidated hearing on stated issues.

Adopted: November 9, 1981.

Released: November 20, 1981.

By the Chief, Broadcast Bureau.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority has under consideration the above-captioned mutually exclusive applications filed by Western Minnesota Stereo, Inc., (hereinafter Western), and O & I Broadcasting (hereinafter O & I).

2. *Western.* Analysis of the financial data submitted by Western reveals that $39,221 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment down payment (first and last month)	$5,712
Equipment payments (4 months)	11,424
Land	(1)
Building	1,000
Miscellaneous	12,700
Operating Cost (3 months)	11,241
Total	42,077

[1] To be leased.

To meet this requirement, Western intends to rely on existing capital of $2,500, a loan from stockholder in the amount of $40.000, with no interest or principal required to be paid back until the radio station is making money, and deferred credit from the equipment supplier in the amount of $62,162. However, since applicant's breakdown of its operating costs does not include the expense for leasing the land, the sum of 42,077 is below applicant's actual costs.[1] Therefore, a limited financial issue will be specified.

3. Western will not be able to provide a 3.16 mV/m signal to the entire city of Montevideo as required by § 73.315(d) of the rules. Only a small portion of the city of Montevideo extends beyond the 3.16 mV/m contour, which includes about 20 houses. Under these circumstances, we have determined that waiver of this provision is appropriate.

4. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for comparative hearing on the issues specified below.

5. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Western

(a) the cost of leasing land, and

[1] Similarly, O & I also did not include in its estimate its cost in leasing land, but because O & I's resources above those needed to meet its express costs are shown to be greater than what the probable cost of leasing will be, a financial issue will not be designated.

(b) whether, in light of the evidence adduced pursuant to (a) above, applicant is financially qualified.

2. To determine which of the proposals would, on a comparative basis, better serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

6. It is further ordered, that, if the application of Western is granted, the permit shall specify that the provisions of § 73.315(a) of the Commission's rules are waived to permit a signal of less than 3.16 mV/M over the entire city of Montevideo.

7. It is further ordered, that to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

8. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594(g) of the Commission's rules, give notice of the hearing (either individually, or, if feasible and consistent with the rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

Larry D. Eads,

Acting Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 81-34928 Filed 12-4-81; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 81-791 and 81-792; File Nos. BPCT-810121KO and BPCT-810615KJ]

Wilmington Telecasters, Inc. and Cape Fear Television, Inc.; Applications

In the matter of applications of Wilmington Telecasters, Inc., Wilmington, North Carolina (BC Docket No. 81-791, File No. BPCT-810121KO), and Cape Fear Television, Inc., Wilmington, North Carolina, (BC Docket No. 81-792, File No. BPCT-810615KJ) for construction permit. Hearing designation order designating applications for consolidated hearing on stated issues.

Adopted: November 9, 1981.

Released: November 24, 1981.

By the Chief, Broadcast Bureau.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications for authority to construct a new commercial television broadcast station on Channel 29, Wilmington, North Carolina.

Wilmington Telecasters, Inc.

2. The application states that Wilmington is a wholly-owned subsidary of American Telecasters, Inc. (American). The application also shows, however, that only five shares of stock are outstanding and that these shares are held by Kathrine R. Everett, who is the president and a board member of Wilmington. It is further stated that the shares represent the costs of organization for Wilmington, but no explanation of this arrangement is offered. It is stated that Mrs. Everett holds the shares "for the beneficial interest" of American. Numerous questions are raised with respect to the legal status of this applicant.

3. We are not told why Mrs. Everett obtained stock or under what circumstances. We do not know if she advanced her own funds for organizational expenses and the stock was issued as reimbursement, or whether she purchased the stock with funds which the corporation then used for organizational expenses, or whether there is some other explanation. If the stock was purchased or issued as reimbursement, it would appear that legal title resides in Mrs. Everett and that she holds the stock for her own interest. In any even, since she is apparently the sole stockholder, Wilmington is not a wholly-owned subsidiary of American and cannot become so without losing the right to comparative consideration. If there is some contract, agreement, or understanding between Mrs. Everett and American under which Mrs. Everett holds bare legal title with the beneficial interest (including voting rights) being in American, a copy of that arrangement should have been filed as required by Section II, paragraph 10(d) of FCC Form 301. Any effort to transfer control of the corporation from Mrs. Everett to American would, of course, be a major change, resulting in dismissal of the Wilmington application or rejection of the amendment. Appropriate issues will be specified to ascertain the facts concerning ownership and control of the applicant corporation.

4. The applicant estimates that it will require $2,670,450 to construct and operate for three months. Applicant's "Plan of Financing" (exhibit 5) indicates that it relies on a loan of $1,000,000 from American Telecasters Inc. and an installment sales agreement with RCA for equipment. The application contains no copy of an undertaking by American Telecasters to loan money to the applicant. Neither does Wilmington submit a copy of the RCA installment sales agreement. There is, however, a letter to American from Northwestern Bank (exhibit 6) stating that the bank will lend money to American, but that no terms have yet been decided upon. Additionally, the bank letter contains no indication of the amount to be loaned. American, therefore, cannot be considered as a source of funds to the applicant. Appropriate financial issues will be specified.

Cape Fear Television, Inc.

5. Since no determination has been reached that the tower height and location proposed by applicant would not constitute a hazard to air navigation, an issue regarding this matter is required.

Conclusion and Order

6. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since these application are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

7. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the above-captioned applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Wilmington Telecasters, Inc.:

(a) Whether there are any contracts, agreements, arrangements or understandings between Mrs. Kathrine R. Everett and American Telecasters, Inc., or any other person, persons or entity concerning or affecting ownership or control of Wilmington Telecasters, Inc., and, if so, the nature thereof;

(b) In light of the evidence adduced pursuant to the foregoing issue, whether the applicant is legally qualified.

(c) The source and availability of $2,670,450 to construct and operate as proposed;

(d) Whether, in light of the evidence adduced pursuant to (c) above, applicant is financially qualified.

2. To determine with respect to Cape Fear Television, Inc. whether there is a reasonable possibility that the tower

height and location proposed would constitute a hazard to air navigation.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

8. It is further ordered, that the Federal Aviation Administration is made a party to the proceeding with respect to issue 2.

9. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants and the party respondent herein, pursuant to § 1.221(c) of the Commission's Rules, in person of by attorney, shall, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

10. It is further ordered, that the applicants herein, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, shall give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder License No. 1860]

Aroundworld Shipping & Chartering, Inc.; Order of Revocation

On November 27, 1981, Aroundworld Shipping & Chartering, Inc., 16515 Hedgecroft Street, #306, Houston, TX 77205 surrendered its Independent Ocean Freight Forwarder License No. 1860 for revocation.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised), § 10.01(e) dated November 12, 1981;

It is ordered, that Independent Ocean Freight Forwarder License No. 1860 issued to Aroundworld Shipping & Chartering, Inc. be revoked effective November 27, 1981.

It is further ordered, that a copy of this Order be published in the Federal Register and served upon Aroundworld Shipping & Chartering, Inc.

Albert J. Klingel, Jr.,

Director, Bureau of Certification and Licensing.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of October 5-6, 1981

In accordance with § 217.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on October 5-6, 1981.[1]

"The information reviewed at this meeting suggests that real GNP declined slightly further in the third quarter and that prices on the average continued to rise at the somewhat lower rate that emerged in the second quarter. In July and August the nominal value of total retail sales was essentially unchanged from the June level, and unit sales of domestic automobiles weakened in September. Industrial production declined slightly in August and apparently slackened further in September, while nonfarm payroll employment changed little in both months. The unemployment rate rose to 7.5 percent in September, about equal to its average in the first half of 1981. Housing starts fell in August to the lowest rate in several years. Over the first nine months of the year, the rise in the index of average hourly earnings was somewhat less rapid than during 1980.

"The weighted average value of the dollar against major foreign currencies declined sharply through mid-September from its peak in early August and on balance has changed little since then. In August the U.S. foreign trade deficit widened substantially from the low rate in July; for July and August combined, the deficit was considerably larger than the second-quarter rate.

"M1-B, adjusted for the estimated effects of shifts into NOW account, increased little over the period from June to September, while M2 grew at a relatively strong pace. The level of adjusted M1-B in September was well below the lower end of the Committee's range for growth over the year from the fourth quarter of 1980 to the fourth quarter of 1981; the level of M2 was at the upper end of its range for the year. In frequently volatile markets, short-term rates have risen considerably further. On September 21 the Board of Governors announced a reduction in the surcharge from 4 to 3 percentage points on frequent borrowings of large depository institutions.

"The Federal Open Market Committee seeks to foster monetary and financial conditions that will help to reduce inflation, promote sustained economic growth, and contribute to a sustainable pattern of international transactions. At its meeting in early July, the Committee agreed that these objectives would be furthered by reaffirming the monetary growth ranges for the period from the fourth quarter of 1980 to the fourth quarter of 1981 that it had set at the February meeting. These ranges included growth of 3½ to 6 percent for M1-B, abstracting from the impact of flows into NOW accounts on a nationwide basis, and growth of 6 to 9 percent and 6½ to 9½ percent for M2 and M3, respectively. The Committee recognized that the shortfall in M1-B growth in the first half of the year partly reflected a shift in public preferences toward other highly liquid assets and that growth in the broader aggregates had been running at about or somewhat above the upper ends of their ranges. In light of its desire to maintain moderate growth in money over the balance of the year, the Committee expected that growth in M1-B for the year would be near the lower end of its range. At the same time, growth in the broader aggregates might be high in their ranges. The associated range for bank credit was 6 to 9 percent. The Committee also tentatively agreed that for the period from the fourth quarter of 1981 to the fourth quarter of 1982 growth of M1, M2, and M3 within ranges of 2½ to 5½ percent, 6 to 9 percent, and 6½ to 9½ percent would be appropriate. These ranges will be reconsidered as warranted to take account of developing experience with public preferences for NOW and similar accounts as well as changing economic and financial conditions.

"In the short run the Committee seeks behavior of reserve aggregates consistent with growth of M1-B from September to December at an annual rate of 7 percent after allowance for the impact of flows into NOW accounts and with growth in M2 at an annual rate around 10 percent or slightly higher, recognizing that the behavior of M2 will be affected by recent regulatory and legislative changes, particularly the public's response to the availability of the all savers certificate. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that pursuit of the monetary objectives and related reserve paths during the period before the next meeting is likely to be associated with a federal funds rate persistently outside a range of 12 to 17 percent."

By order of the Federal Open Market Committee, November 27, 1981.

Murray Altmann,

Secretary.

BILLING CODE 6210-01-M

[1] The Record of Policy Actions of the Committee for the meeting of October 5-6, 1981, is filed as part of the original document. Copies are available on request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

GENERAL SERVICES ADMINISTRATION

[E-81-32]

Delegation of Authority to the Secretary of Defense

1. *Purpose.* This delegation authorizes the Secretary of Defense to represent

V 46 / 234 DEC 7 81 UMI

the consumer interests of the executive agencies of the Federal Government in proceedings before the Washington Utilities and Transportation Commission involving electric rates, Cause No. U–81–41.

2. *Effective date.* This delegation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in proceedings before the Washington Utilities and Transportation Commission involving the application of the Puget Sound Power and Light Company for an increase in its electric rates in Cause No. U-81-41.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration (GSA), and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

d. The Department of Defense shall add GSA to its service list in this case so that GSA will receive copies of testimony, briefs, and other Department of Defense filings.

Dated: November 24, 1981.

Ray Kline,

Deputy Administrator of General Services.

[E-81-33]

Delegation of Authority to Secretary of Energy

1. *Purpose.* This delegation authorizes the Secretary of Energy to represent the consumer interests of the executive agencies of the Federal Government in proceedings before the Federal Energy Regulatory Commission involving electric rates, Docket No. ER82–1–000.

2. *Effective date.* This delegation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Energy to represent the consumer interests of the executive agencies of the Federal Government in proceedings before the Federal Energy Regulatory Commission involving the application of the Public Service Company of New Mexico for an increase in its electric rates in Docket No. ER82–1–000.

b. The Secretary of Energy may redelegate this authority to any officer, official, or employee of the Department of Energy.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration (GSA), and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

d. The Department of Energy shall add GSA to its service list in this case so that GSA will receive copies of testimony, briefs, and other Department of Energy filings.

Dated: November 30, 1981.

Ray Kline,

Deputy Administrator of General Services.

BILLING CODE 6820-AM-M

[E-81-31]

Delegation of Authority to the Secretary of Defense

1. *purpose.* This delegation authorizes the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in proceedings before the Rhode Island Public Utilities Commission involving electric rates, Docket No. 1599.

2. *Effective date.* This delegation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in proceedings before the Rhode Island Public Utilities Commission involving the application of the Newport Electric Corporation for an increase in its electric rates in Docket No. 1599.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration (GSA), and shall be exercised in cooperation with the responsible officers, officals, and employees thereof.

d. The Department of Defense shall add GSA to its service list in this case so that GSA will receive copies of testimony, briefs, and other Department of Defense filings.

Dated: November 24, 1981.

Ray Kline,

Deputy Administrator of General Services.

BILLING CODE 6820-AM-M

[H-81-4]

Delegation of Authority to the Secretary of the Interior

1. *Purpose.* This delegation authorizes the Secretary of the Interior to dispose of surplus mineral resources underlying the property known as the Tennessee Products Corporation, Rockwood, Tennessee, RR–TN–28, as prescribed in part 101–47 of the Federal Property Management Regulations (FPMR) (41 CFR 101–47).

2. *Effective Date.* The delegation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, as amended, particularly sections 203 and 205(d) (40 U.S.C. 484 and 486(d)), authority is delegated to the Secretary of the Interior to dispose of surplus mineral resources underlying the property known as the Tennessee Products Corporation, Rockwood, Tennessee, RR–TN–28, in accordance with this act and implementing regulations.

b. The Secretary of the Interior may redelegate this authority to any officer, official, or employee of the Department of the Interior.

c. Under the delegated authority, the Department of the Interior, as the disposal agency, is responsible for the following: (1) securing, in accordance with FPMR 101–47.303–4, any appraisals deemed necessary by the Secretary; (2) coordinating with all present and subsequent surface landholders, Federal or otherwise, so as not to impede use of the facilities or impair the integrity of utilization; (3) ensuring that lands which are disturbed or damaged are restored after removal of the mineral deposits is completed; and (4) notifying the General Services Administration when the disposal of all marketable mineral deposits has been completed.

d. The Department of the Interior, as the disposal agency, is responsible for

complying with the requirements of the following: (1) the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321, et seq.), Executive Order 11514 of March 5, 1970, entitled "Protection and Enhancement of Environemntal Quality," as amended by Executive Order 11991, Relating to Protection and Enhancement of Environmental Quality, and implementing regulations issued by the Council on Environmental Quality (40 CFR 800); (2) section 106 of the National Historic Preservation Act of 1966 (16 U.S.C. 470f); and (3) guidelines developed by the Tennessee Wildlife Resources Agency.

e. A copy of any documents executed under this delegation shall be forwarded immediately to the General Services Administration (DR), Washington, D.C. 20406.

Dated: November 30, 1981.

Ray Kline,

Deputy Administrator of General Services.

BILLING CODE 6820-96-M

Travel Expenses; Report on the Cost of Travel and the Operation of Privately Owned Vehicles

Correction

In FR Doc. 81-34328, appearing at page 58363, in the issue of Tuesday, December 1, 1981, make the following correction.

On page 58365, second column, the "Prescribed maximum daily rate (in dollars)" was inadvertently ommitted for the "District of Columbia". That rate should read "$75."

BILLING CODE 1505-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Privacy Act 1974; Report of a New System of Records

AGENCY: Office of the Assistant Secretary for Planning and Evaluation (ASPE), Office of the Secretary (OS).

ACTION: Notification of New System of Records—National Long-Term Care Channeling Demonstration (NLTCCD), HHS/OS/ASPE, 09-90-0088.

SUMMARY: In accordance with 5 U.S.C. 552a(e)(4), we are issuing public notice of our intent to establish a new system of records: National Long-Term Care Channeling Demonstration (NLTCCD), HHS/OS/ASPE, 09-90-0088. We also are proposing to include routine uses of the sytem in accordance with 5 U.S.C. 552a(e)(11). This proposed new system will provide for the following types of data: demographic, health and economic characteristics, functional status, service utilization and cost of utilization, for a sample of eligible elderly, functionally impaired persons participating in the demonstration as treatment or control group members. Data on participants' families and on long-term care providers also will be collected and maintained. The proposed system will be used by the evaluation contractor to conduct statistical analysis and by channeling agencies to conduct the demonstration.

We will collect complete data from 10 sites in 10 states on about 8,400 individuals who are selected into the impact research sample. The sample size has been determined by standard sample design techniques to be the minimum that can be expected to reveal statistically significant outcomes between treatment and control groups in the basic and complex models of channeling should such differences occur. Additionally, a more limited set of data (identifying information, screening and baseline assessment information) will be collected and maintained in the system of records for a further 6,400 individuals receiving channeling services. Names, addresses, and referral destinations will be maintained for approximately 47,450 individuals who apply or are referred for channeling services but who do not meet the program's eligibility criteria.

The public is invited to submit comments on the routine uses on or before January 6, 1982.

DATES: We filed a report of a new system of records with the President of the Senate, the Speaker of the House of Representatives, and the Director, Office of Management and Budget (OMB) on the December 2, 1981. This system will become effective February 1, 1982. The proposed routine uses will be become effective without further publication on the same date unless DHHS receives comments which would result in a contrary determination.

ADDRESS: Address comments to the ASPE Privacy Act Officer, Department of Health and Human Services, 200 Independence Avenue, S.W. Washington, D.C. 20201. We will make comments received available for public inspection in Room 434G.12, Alcove, Hubert Humphrey Building, at the above address.

FOR FURTHER INFORMATION CONTACT: Project Officer, National Long-Term Care Channeling Demonstration, Office of the Assistant Secretary for Planning and Evaluation, 200 Independence Avenue, S.W., Washington, D.C. 20201, telephone number (202) 245-1794.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Planning and Evaluation, Department of Health and Human Services, proposes to initiate a new system of collecting data under the authorities of section 421 of the Older Americans Act sections 1110, 1115, 1875 and 1881 of the Social Security Act and sections 1526 and 1533(d) of the Public Health Service Act.

In 1980, the Department of Health and Human Services (DHHS) initiated the National Long-Term Care Channeling Demonstration to develop and test methods to maximize the efficient use of existing long-term care resources. The Office of the Secretary (Assistant Secretary for Planning and Evaluation), the Administation on Aging, and the Health Care Financing Administration jointly manage this demonstration.

This demonstration was developed in response to serious concern at all levels of government about the rapid increase in nursing home costs, fragmentation of the existing service system, and federal financial incentives for nursing home placement for elders.

In response to these concerns, a national demonstration and evaluation have been established to test a community care approach to long-term care called "channeling." Channeling provides a central intake point in the community for older persons; a systematic assessment of the individual's needs; and continuing case management to develop, implement, and monitor a plan of care tailored to the individual's changing needs. (The channeling objectives can be found in Appendix 1 of the system notice.)

The channeling concept will be implemented at the local level by a community agency in ten states participating in the demonstation. (See Appendix 2 of the system notice.) Two models of channeling will be tested: One which relies on services already existing in the community; and one with additional service resources which limits expenditures with a fixed budget approach.

Data will be collected from a number of sources for inclusion in the system of records. These sources include personal interveiws with individuals, their proxies, and their families, and records of health and social services, including Medicare and Medicaid claims and billings records. In order to associate data from different sources for a given individual, linkage of names and identifying numbers will be necessary. The personal identifiers, however, will

V 46 / 234 DEC 7 81 UMI

be maintained in a limited number of files, and source data will be stripped of its identifying information as soon as it is operationally feasible. For purposes of data-gathering, a "field" identifying number will be assigned to each individual. Once data is collected, validated, and edited, a "research" identifying number will be assigned to the individual record, and all personal identifying information including field indentifying numbers, will be stripped from the record. A master "link" file will be maintained which associates the two series of identifying numbers. Access to this file will be restricted to evaluation contractor staff who need to use the file to fulfill their professional duties.

The Privacy Act of 1974 allows us to disclose information without the consent of the individual for "routine uses," that is, disclosure for purposes that are compatible with the purposes for which the data are collected. Accordingly, we are establishing two routine uses of information in this system.

One routine use provides for disclosure in response to congressional inquiries made at the request of any individual included in the system of records.

The other routine use provides for disclosure to a contractor of AOA, HCFA or ASPE, for performance of research and statistical activities in order to accomplish the purposes for which the records are collected.

Individually indentifiable data are maintained at the 10 channeling agencies (see Appendix 2 of the system notice) and at the contractor for the evaluation, Mathematica Policy Research, Inc. (P.O. Box 2393, Princeton, New Jersey 08540). Mathematica Policy Research will maintain records in hard copy and on magnetic computer tapes and disc.[1] Individual identifiers will be stripped from records as soon as it is operationally feasible. However, those files which must contain individual indentifiers will be kept in locked file cabinets or areas of restricted access, and will be made available only to individuals who need access to the records in order to fulfil their official duties.

The channeling agencies will maintain records in hard copy and on magnetic tapes and discs. Case records will be maintained in hard copy with individual identifiers in limited access areas. Service authorization and utilization records will be maintained on magnetic tape or disc. Access to both sets of data will be limited to individuals whose official duties require access.

Since we propose to establish this system in accordance with the requirements of the Privacy Act, we anticipate no untoward effect on the privacy or personal rights of individuals.

Dated: December 1, 1981.

Robert Rubin,

Assistant Secretary for Planning and Evaluation.

Notification of New System of Records Required by the Privacy Act of 1974

09–90–0088

SYSTEM NAME:

National Long-Term Care Channeling Demonstration (NLTCCD) DHHS/OS/ASPE.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Mathematica Policy Research, Inc. (MPR), P.O. Box 2393, Princeton, New Jersey 08540. Channeling Agencies (See Appendix 2).

CATEGORIES OF INDIVIDUAL COVERED BY THE SYSTEM:

The system will include records on a sample of approximately 14,800 individuals in ten states who have signed an informed consent form and are participating in the National Long-Term Care Channeling Demonstration; and approximately 47,450 individuals who apply to receive channeling services but are found inappropriate for the intervention.

CATEGORIES OF RECORDS IN THE SYSTEM:

"Channeling" is a brokerage process through which elderly and multiply-impaired individuals are referred to receive needed services from two or more agencies. The ten channeling agencies (hereafter referred to as agency) will collect names, addresses, and interveiw information on functional disability and service needs of potential participants, and assign an identification number to each individual For those individuals who are not appropriate for channeling, personal identifying information will be maintained at the agency. Interview data and a sequential identifier will be forwarded to the evaluation contractor. Appropriate channeling clients will be randomly assigned to treatment or control groups. All information concerning control group members will be forwarded to the evaluation contractor. All data collected by the agency on treatment group members will be maintained at the agency. Screening and non-clinical baseline interview data on treatment group members also will be forwarded with personal identifiers and field identifying numbers to the evaluation contractor. The evaluation contractor will augment the information provided by the agency with data collected from interviews, and from health and social service records.

Independently, the agency will develop hard-copy case records on treatment group members which contain detailed individual identifying data, clinical and other information required to develop care plans and coordinate services, and details of services ordered and utilized. The case records will be maintained up to seven years after an individual dies, withdraws voluntarily from the program, moves out of the area, ceases to be appropriate for channeling services, or is terminated because the project ends. A client tracking system which will include information on client identity and status, will be implemented at all sites. Information from this system will be shared with the evaluation contractor. A further system of records will be maintained at those sites deemed to follow the "complex channeling" model. At these sites, a financial tracking system, some parts of which identify clients either by name or other identifying information, will be implemented to monitor costs of services and to track service authorization and service use.

The evaluation contractor will collect and maintain data describing both individuals and facilities providing long-term care services. Data relating to individuals will include information collected by interview from the individual or his/her proxy and from families or informal care-givers; demographic and economic characteristics; health and functional status; service utilization; and out-of-pocket costs. In addition, utilization and cost data will be collected from Medicare and Medicaid claims and billing records and provider billings records. Individual identifiers will be names, addresses, and health insurance claim numbers for Medicare and Medicaid beneficiaries, as well as identifying numbers supplies by the evaluation contractor.

The use and maintenance of identifying numbers is discussed below in the section on retrievability.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 421 of the Older Americans Act, sections 1110, 1115, 1875, and 1881 of the Social Security Act, and sections 1526 and 1533(d) of the Public Health Service Act.

[1] The contractor will safeguard the identifiable data according to the Department's ADP Systems Manual, "Part 6, ADP System Security."

PURPOSE:

In 1980, the Department of Health and Human Services (DHHS) initiated the National Long-Term Care Channeling Demonstration to develop and test methods to maximize the efficient use of existing long-term care resources. The Office of the Secretary (Assistant Secretary for Planning and Evaluation), the Administration on Aging, and the Health Care Financing Administration jointly manage this demonstration.

This demonstration was developed in response to serious concern at all levels of government about the rapid increase in nursing home costs, fragmentation of the existing service system, and federal financial incentives for nursing home placement for elders.

This national demonstration and evaluation have been established to test a community care approach to long-term care called "channeling." Channeling provides a central intake point in the community for older persons; a systematic assessment of the individual's needs; and continuing case management to develop, implement, and monitor a plan of care tailored to the individual's changing needs. (The channeling objectives can be found in Appendix 1.)

The channeling concept will be implemented by a community agency in ten states participating in the demonstration. (See Appendix 2.) Two models of channeling will be tested; one which relies on services already existing in the community; and one with additional service resources and a fixed budget approach.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

There will be two routine uses of information in the system. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In addition disclosure will be made to a contractor of AOA, HCFA or ASPE involved in the NLTCCD, for the performance of research and statistical activities in order to accomplish the purposes for which the records are collected.

STORAGE:

Magnetic tape and disk, paper and card records.

RETRIEVABILITY:

The channeling agencies will assign evaluation contractor-supplied field identifying numbers to each applicant's record. This field identifying number is used for data collection purposes only, and is readily linked by staff with a need-to-know to personal identifiers.

According to the path the individual follows, i.e., becoming a member of the research sample or not, and becoming a member of the treatment or the control group, separation of personal identifiers and descriptions of the individual will take place at different points. For applicants deemed inappropriate at the channeling agency, the record is retrievable only at the channeling agency, where records of these individuals and the agency to which they were referred will be maintained, but detailed information about the applicant will not be kept. For participants in the research sample, the record must remain retrievable for the duration of the research namely for the 18-month period of follow-up after application to channeling during which period individuals are re-interviewed, and for a subsequent period during which additional information is collected and merged with interview data. For treatment group members who are on the caseload of the channeling agency, the records must remain retrievable as long as the individual remains a client and for a period of up to seven years after that. At the research contractor, the data-collection (field) identifying number and any personal identifiers are removed from research files and replaced by a research-file identifying number. Thus, for data collection and validation purposes the "field" identifying number is used, and for file development and maintenance, the research-file identifying number is used. A master "link" file will be maintained which associates the two series of identifying numbers. Access to this file will be restricted to evaluation contractor staff who need to use the file to fulfill their professional duties.

SAFEGUARDS:

Channeling Agencies: Records will be kept in limited access areas. Records may only be accessed by agency personnel who need to know the contents of the records.

Mathematica Policy Research, Inc.: The evaluation contractor conforms to the DHHS ADP Systems Manual, "Part 6, ADP System Security." A system of separate identifiers is used to maximize security of records. Contact sheets with personal identifiers from interviews and abstracting forms are stored separately from non-individually identifiable data. Magnetic tape files and hard copy files with personal identifiers, and link files, are stored in locked cabinets or limited access areas. Research files are stripped of personal and field identifiers and are encoded with a distinct research identifier. Access to the linkages between identifiers is limited, and subject to the approval of the Project Director at Mathematica Policy Research, Inc.

MPR will maintain all records in secure storage areas accessible only to authorized employees and will notify all employees having access to records of criminal sanctions for unauthorized disclosure of information on individuals.

RETENTION AND DISPOSAL:

As explained above, different types of data will be maintained and different retention periods will apply according to whether the applicant is found inappropriate or appropriate, and, if appropriate, whether a treatment or control group member. Treatment and control group members' identifying information will be maintained by MPR through completion of fielding operations in the demonstration, and for a period of three years to allow for future follow-up. The channeling agencies will maintain clinical records on treatment group members for up to seven years after a client is terminated from the program, and limited personal information for individuals found inappropriate for channeling.

Data disposal will consist of shredding the hard copy (and so certifying) and degaussing computer records. There are no plans to dispose of non-identifiable individual data.

SYSTEMS MANAGER(S) AND ADDRESS:

Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, 200 Independence Avenue SW., Washington, D.C. 20201.

NOTIFICATION PROCEDURES:

Project Officer, National Long-Term Care Channeling Demonstration Evaluation, Office of the Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, Room 433F.1, H.H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201. (202) 245–1794.

An individual requesting notice as to whether the system of records contains information pertaining to him/her, should write to the government Project Officer, at the above address, indicating his/her full name, current address and any other addresses since January, 1982. The individual may simultaneously request record access as described below.

RECORD ACESS PROCEDURES:

Individuals who, through the notification procedures set out above, have established that the system of

V 46 / 234 DE 7 81 UMI

records contains information pertaining to them, may request access to those portions of the records pertaining to them by writing the government Project Officer at the address given above. The government Project Officer will notify the individual as to the place and time for access to the record(s) or if the individual wishes, arrange for mailing the records.

CONTESTING RECORD PROCEDURES:

Contact the government Project Officer at the address given above, reasonably identify the record, specify the information being contested, and supply the substitute information.

RECORD SOURCE CATEGORIES:

Individual-specific information will be gathered through interviews with the clients and their families, from providers and from the Medicare and Medicaid claims systems. Information that pertains to the providers will be collected from demonstration files, and executive interviews with health and social services provider personnel.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Appendix 1

The objectives of the channeling program are:

1. To marshal and direct long-term care resources in a community in ways that contain overall costs;
2. To increase access to a wider range of services than is currently available;
3. To match services used to the identified needs of clients;
4. To concentrate resources on those persons with the greatest need for long-term care;
5. To stimulate the development of needed in-home and community services which do not exist or are in short supply;
6. To reduce the unnecessary use of publicly-subsidized long-term care services, including costly medical and institutional services;
7. To promote efficiency and quality in community long-term care delivery systems;
8. To promote a reasonable division of labor between informal support systems (including families, neighbors, friends), privately-financed services and publicly-financed care; and
9. To maintain or enhance client outcomes, including physical and mental functioning and quality of life.

BILLING CODE 4150-04-M

DEPARTMENT OF THE INTERIOR

Geological Survey

Outer Continental Shelf; Certification Verification Agents; Cessation of Application Acceptance

AGENCY: U.S. Geological Survey (USGS), Department of the Interior.

ACTION: Notification of cessation of acceptance of applications for certified verification agents.

SUMMARY: Outer Continental Shelf (OCS) Order No. 8 requires the use of an approved Certified Verification Agent (CVA) in the design, fabrication, and installation of all new fixed or bottom-founded platforms or other structures on OCS leases subject to the Platform Verification Program. The receipt of applications from prospective CVA firms and individuals began in January 1980. Over the past 2 years, an approved list of qualified CVA's has been maintained by the Platform Verification Section of the Conservation Division's Branch of Offshore Field Operations. The list now contains over 30 approved CVA's for each of the three phases of assuring the structural integrity of offshore structures in frontier areas. In this time period, the services of only 19% of the approved CVA's for design and fabrication and 12% for installation have been contracted for by lessees proposing new platforms. Due to the number of existing approved CVA's and the degree of utilization of these qualified firms or individuals, the U.S. Geological Survey has concluded that additional applications are not necessary at this time to satisfy the third-party verification responsibilities. This temporary closing of the application period does not apply to the Arctic Area and the CVA responsibilities for new structures in that OCS area. Applications will continue to be accepted through February 1, 1982. Applications received after this date will be returned without prejudice. The interest in this program is greatly appreciated.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald Prehoda, Branch of Offshore Field Operations, Conservation Division, 640 National Center, Reston, Virginia 22092, (703) 860-6831.

Dated: November 25, 1981.

Richard B. Krahl,

Acting Deputy Division Chief, Offshore Minerals Regulation, Conservation Division.

BILLING CODE 4310-31-M

Oil and Gas and Sulphur Operations, Outer Continental Shelf; ODECO Oil and Gas Co.

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: This Notice announces that ODECO Oil & Gas Company, Unit Operator of the Ship Shoal Block 113 Federal Unit Agreement No. 14-08-001-2931, submitted on November 18, 1981, a proposed annual plan of development/production describing the activities it proposes to conduct on the Ship Shoal Block 113 Federal Unit.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Geological Survey is considering approval of the plan and that it is available for public review at the offices of the Conservation Manager, Gulf of Mexico OCS Region, U.S. Geological Survey, 3301 N. Causeway Blvd., Room 147, Metarie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: U.S. Geological Survey, Public Records, Room 147, open weekdays 9:00 a.m. to 3:30 p.m., 3301 N. Causeway Blvd., Metairie, Louisiana 70002, phone (504) 837-4720, ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the U.S. Geological Survey makes information contained in development and production plans available to affected States, executives of affected local

governments, and other interested parties became effective on December 13, 1979 (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: November 30, 1981.

Lowell G. Hammons,

Conservation Manager, Gulf of Mexico OCS Region.

[FR Doc. 81-34974 Filed 12-4-81; 8:45 am]

BILLING CODE 4310-31-M

National Park Service

National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before November 30, 1981. Waiver of the 15-day public commenting period following this publication is necessary for the Alabama nomination(s) listed below in order for listing of eligible properties to be accomplished before December 31, 1981. Listing in the National Register by this date will enable property owners to take advantage of Alabama's Historic Preservation Authorities Act of 1979, (Act 79-441 and 80-366), which provides that owners of properties entered into the National Register of Historic Places be eligible for tax-exempt bond financing through locally established historic preservation authorities. Waiver of the public commenting period will allow timely listing which is necessary to aid in the preservation of these properties.

BILLING CODE 4310-10-M

INTERSTATE COMMERCE COMMISSION

[I.C.C. Order No. P-37]

Atchison, Topeka & Santa Fe Railway Co.; Passenger Train Operation

It appearing, That the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Chicago, Illinois and Oakland, California. The operation of these trains requires the use of the tracks and other facilities of Burlington Northern Railroad (BN). A portion of the BN tracks between Galesburg and Chicago, Illinois, are temporarily out of service because of a derailment. An alternative route is available via The Atchison, Topeka and Santa Fe Railway Company.

It is the opinion of the Commission that the use of such alternate route is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered.

(a) Pursuant to the authority vested in me by order of the Commission decided October 30, 1981, and of the authority vested in the Commission by Section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), The Atchison, Topeka and Santa Fe Railway Company (ATSF) is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between a connection with Burlington Northern Railroad, (BN) at Galesburg, Illinois, and Chicago, Illinois.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though now agreements or arrangements no exists between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(d) *Effective date.* This order shall become effective at 12:00 noon, November 16, 1981.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m. November 18, 1981, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon The Atchison, Topeka and Santa Fe Railway Company and upon the National Railroad Passenger Corporation (Amtrak), and a copy of this order shall be filed with the Director, Office of the Federal Register.

Interstate Commerce Commission.

Bernard Gaillard,

Agent.

BILLING CODE 7035-01-M

[Volume No. 204]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: November 30, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part

1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of undly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Ewing, and Shaffer

Agatha L. Mergenovich,

Secretary.

MC 9644 (Sub-12)X, filed November 2, 1981. Applicant: HAYES TRUCK LINE, INC., 1410 Intercity Trafficway, Kansas City, MO 64101. Representative: Larry D. Knox, 600 Hubbell Building, Des Moines, IA 50309. (A) Lead and Sub-Nos. 2, 3G, 4, 5, and 6 certificates and E-letter notice Sub-E1, remove all restrictions in the general commodities authorizations except "Classes A and B explosives, commodities in bulk, and household goods"; (B) Sub-Nos. 4 and 5, authorize service at all intermediate points in connection with regular-route service; (C) Sub-No. 4, broaden off-route points to countywide: Gage, Saline and Lancaster Counties, NE (Clatonia, DeWitt, Roca, Martell, Sprague, Hallam, Denton, and Kramer, NE), and Douglas and Sarpy Counties, NE and Mills and Pottawattomie Counties, IA (Council Bluffs, IA); and (D) broaden irregular-route points to countywide: Sub-Nos. 2, 3G, and E1, Wyandotte, Johnson and Leavenworth Counties, KS and Cass, Jackson, Clinton, Clay and Platte Counties, MO (Kansas City, KS/MO, North Kansas City, MO, and points within 15 miles of the named points).

MC 25255 (Sub-4)X, filed November 16, 1981. Applicant: LEE ROY HEERMAN, d.b.a. COIN TRANSFER, P.O. Box 296, Coin, IA 51636. Representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501. Subs 2 and 3: broaden (1) bearings and (2) materials, equipment and supplies used in the manufacture, sale and distribution of bearings (except commodities in bulk), to "machinery" in Sub 2; general commodities, with exceptions to "general commodities (except classes A and B explosives, household goods as defined by the Commission, and commodities in bulk)" in Sub 3; remove originating at/destined to restriction in Sub 2; broaden: to all intermediate points in Sub 3; Clarinda, IA to Page County, IA in Sub 2; points within 25 miles of Stanton, IA to Fremont, Page, Taylor, Adams, Montgomery, Mills, Pottawattamie and Cass Counties, IA in Sub 3; and to radial authority in those Subs.

MC 29849 (Sub-4)X, filed November 19, 1981. Applicant: EXCHANGE FURNITURE FORWARDERS, INC., 1601 Willow Avenue, Hoboken, NJ 07030. Representative: Morton E. Kiel, Suite 1832, Two World Trade Center, New York, NY 10048–0640. Lead and Sub-3: (1) broaden commodity descriptions (a) radiator enclosures to "metal products, textile mill products, and lumber and wood products" in the lead; (b) new furniture to "furniture and fixtures" in the lead and Sub-3; (c) oil heaters and parts for oil heaters to "metal products and machinery" in the lead; (2) broaden territorial description: Mount Vernon to Westchester County, NY, in the lead and Sub-3; and Hartford to Hartford County, CT, in the lead; (3) eliminate facilities limitation in Sub-3; (4) change one-way to radial authority; and (5) remove the restriction against traffic having a prior movement by rail or motor carrier in Sub-3.

MC 52022 (Sub-17)X, filed November 20, 1981. Applicant: SANTINI BROS., INC., 1405 Jerome Avenue, New York, NY 10452. Representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, DC 20036. Sub-No. 13F, broaden to "transportation equipment," from used automobiles, in truckaway service.

MC 52979 (Sub-26)X, filed February 17, 1981, previously noticed in the **Federal Register** of March 6, 1981, republished as follows: Applicant: HUNT TRUCK LINES, IC., West High St., Rockwell City, IA 50579. Representative: William L. Fairbank, 2400 Financial Center, Des Moines, IA 50309. Applicant seeks to remove restrictions in its irregular-route authority in lead and Sub-Nos. 2, 3, 8, 14, 18, 20, and 21 certificates, and regular-route authority in Sub-Nos. 3, 8, and 17 certificates. This Board previously broadened these certificates, but failed to broaden some cities and their commercial zones in applicant's irregular-route authority to counties. Applicant appealed. The Commission, in accordance with the decision in No. MC–38400 (Sub-No. 8)X, *Hitchock Bros. Administrative Appeal* (not printed) served May 19, 1981, the Board was instructed to republish. Notice is hereby given that applicant seeks to broaden in the lead, from East Moline, IL, to all counties which the commercial zone of East Moline touches upon including Scott County, IA, and Henry County, IL, from Peoria, IL, to all counties which the commercial zone of Peoria, touches upon including Tazewell County, IL, from Independence, MO, to all counties which the commercial zone of Independence, touches upon including Clay County, MO, from St. Paul, MN, to all counties which the commerical zone of St. Paul touches upon including Anoka and Hennepin Counties, MN, from St. Cloud, MN to all counties which the commercial zone of St. Cloud touches upon including Sherburne and Benton Counties, MN, from South St. Paul, MN, to all counties which the commercial zone of South St. Paul touches upon including Ramsey and Washington, MN.

MC 73081 (Sub-4)X, filed November 19, 1981. Applicant: ANYTIME DELIVERY SYSTEMS, INC., 375 Western Highway, Tappan, New York 10983. Representative: Wayne Hartke, 7637 Leesburg Pike, Falls Church, VA 22043. Sub 1F, remove "in expedited service, *restricted however*, to shipments delivered within 24 hours of pickup", on general commodities (with the usual exceptions) authority, between points in 12 States and DC.

MC 80289 (Sub-16)X, filed November 13, 1981. Applicant: RED LINE FURNTIURE CARRIERS, INC., 110 First Street, Jersey City, NJ 07302. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. Lead certificate. Broaden (1) from new furniture and furniture to "furniture and fixtures"; (2) to radial authority; and (3) change Oakmont, PA to Allegheny County, PA.

MC 102401 (Sub-29)X, filed November 9, 1981. Applicant: TAYLOR HEAVY HAULING, INC., P.O. Box 2707, South Bend, IN 46680. Representatives: Norman R. Garvin, Andrew K. Light, 1301 Merchants Plaza, East Tower, Indianapolis, IN 46204. Lead and Subs 3, 6, 7, 8, 9, 11, 13, 15, 17, 19, 20, 22, 23, 24F, 26, 27, and 28, broaden to (1) (a) "metal products" from aluminum sash and frames, lead; iron and steel articles, Sub

11; corrugated steel pipe, circular piling, and fittings, attachments and accessories, Sub 13; powdered aluminum and powdered aluminum blends, Sub 22; machinery and steel shot, Sub 23; iron and steel articles, Sub 24F; and materials, equipment and supplies used in the manufacture of steel articles, Sub 26; (b) "commodities, which because of their size or weight require the use of special handling or equipment" from insulated pipe, manhole conatainers and fittings, and attachments and accessories which because of their size or weight require the use of special equipment or special handling, Sub 19; (c) "machinery and commodities, which because of their size or weight require the use of special handling or equipment" from heavy machinery, contractors' equipment, materials, and supplies, and commodities requiring special equipment and special handling, lead; road construction and earth moving machines and equipment, Sub 3; tractors and parts, Sub 7; self-propelled articles, each weighing 15,000 pounds or more, Sub 8; and self-propelled road construction and earth moving machines and equipment, each weighing 15,000 pounds or more, Sub 20, (d) "building materials" from building modules, Sub 15, and from brick, Sub 6, (e) "clay, glass, concrete, or stone products" from pre-cast forms, Sub 17, (f) "general commodities (except Classes A and B explosives)" from general commodities (except motor vehicles and motor vehicle cabs and bodies and except Classes A and B explosives), Sub 9; and (g) "waste and scrap materials" from scrap aluminum, Sub 22; and materials, equipment and supplies used in the manufacture of rubber scrap, Sub 27; (2) remove facilities limitation in (a) Sub 11, and replace (b) South Bend, IN with St. Joseph County, IN, Subs 17, 18 and 24; (c) Mishawaka, IN with St. Joseph County, Subs 15 and 23, (d) Portage, WI with Columbia County; Alma, MI with Gratiot County and Middleton, OH with Butler County, Sub 13 and (e) Plymouth, IN with Marshall County, Sub 22; (3) (a) lead, and Sub 19, Niles, MI to Cass County, (b) Sub 3, South Bend, IN to St. Joseph County, (c) Sub 6, Danville, IL to Vermilion County, and (d) Subs 7 and 20, Springfield, IL to Sangamon County; (4) remove "Mercer Commodities" restriction, Sub 11; (5) remove mixed loads, moving on single bill of lading from single consigner, originating at/destined to, in bulk, in tank vehicles, the minimum weight requirement, size and weight and commodities transported on trailers restrictions in various subs; (6) remove restriction on shipments to South Bend, IN limited to named purposes, Sub 3, and (7) to radial authority in lead, Subs 6, 11, 13, 15, 17, 20, 22, 23 and 24.

MC 113300 (Sub–14)X, filed November 6, 1981. Applicant: WILLIAM T. HERRON TRUCKING, INC., P.O. Box 424, Marietta, OH 45750. Representative: Andrew Jay Burkholder, 275 East State St., Columbus, OH 43215. Lead and Sub-Nos. 4, 6, 10, and 12F certificates, (A) broaden to "commodities in bulk" from coal, in bulk, and such commodities as are susceptible of being unloaded by dumping (lead): from stone, soil, sand, slag, gravel, cinders, limestone, concrete, fertilizer, road building materials, construction materials, and coal (Sub-No. 4): from coal (Sub-Nos. 6 and 10): and from lime (Sub-No. 12); (B) substitute radial service in place of one-way service; and (C) remove "in dump vehicles" restriction.

MC 117565 (Sub–105)X, filed October 22, 1981, previously noticed in the **Federal Register** of November 10, 1981, republished as follows: Applicant: MOTOR SERVICE COMPANY, INC., P.O. Box 448, Coshocton, OH 43012. Representative: Gerald K. Gimmel, Suite 145, 4 Professional Dr., Gaithersburg, MD 20879. Sub-No. 82, broaden facilities at or near New Orleans, LA to Orleans, Lafourche, Jefferson, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany and Tangipahoa Parishes, LA and Hancock County, MS. The purpose of this correction is to add Hancock County to the territorial description.

MC 119567 (Sub–20)X, originally published August 25, 1981, republished this issue to correct an error. Applicant: EMPIRE TRANSPORT, INC., 2007 Overland Rd., Boise, ID 83705. Representative: Timothy R. Stiver, P.O. Box 1576, Boise, ID 83701. Lead and Subs. 1, 5, 7, 10, 14, 16, 17F and 19F as previously noticed and, in addition, to broaden (1) lead, Boise, ID to Ada County; Hood River, The Dalles, La Grand, Baker, Pondosa, and Dee, OR to Hood River, Wasco, Union and Baker Counties, Longview and Kelso, WA to Cowlitz County and Enterprise, Bend, Burns, John Day, Wallowa and Elgin, OR to Deschutes, Grant, Harney, Union, and Wallowa Counties; Pondosa, Dee, La Grande, Baker, Union, Redmont and Eugene, OR and points within 5 miles thereof to Baker, Deschutes, Lane and Union Counties; points more than one mile but not more than 5 miles of La Grande, The Dalles and Baker, OR to Baker, Union and Wasco Counties; White Salmon and Vancouver, WA and points within 10 miles of Vancouver to Clark and Klickitat Counties and Klamath Falls, Lakeview, Burns, Joseph Enterprise, Wallowa and Elgin, OR and points within 5 miles thereof to Harney, Klamath, Lake, Union and Wallowa Counties; points within 5 miles of, but not including Bend, Hood River, Elgin, Burns, Wallowa, Enterprise, and The Dalles, OR to Deschutes, Harney, Hood River, Union, Wallowa and Wasco Counties; Etna, WY and points within 15 miles thereof to Lincoln and Teton Counties, WY, (2) Subs 5, 7 Boise, ID to Ada County, and (3) Sub 10, Inkom; ID to Bannock County, ID.

MC 120761 (Sub–77)X, filed October 30, 1981. Applicant: NEWMAN BROS. TRUCKING COMPANY, 6559 Midway Rd., P.O. Box 18728, Fort Worth, TX 76114. Representative: Clint Oldham, 623 S. Henderson, 2nd Floor, Fort Worth, TX 76104. Sub-Nos. 4, 19, 21, 47F and 69, broaden (1)(a) from pipe when moving as oilfield equipment, oilfield equipment, other than pipe, and pipe, trenching machines, tractors, drag lines, back fillers, caterpillars, road building machinery, batch bins, ditching machinery, bulldozers, heavy mixers, finishing machinery, power hoists, cranes, heavy machinery, pile driving rigs, paving machines and equipment, graders, construction equipment, boilers, scrapers, irrigation and drainage machinery, road maintainers, electric motors, pumps, transformers, circuit breakers, turbines, bridge construction equipment, shovels, planes, lathes, air compressors, rotaries, prefabricated houses, bulk station storage tanks, heavy tanks, pump machinery, erection machinery and equipment, refinery machinery and equipment, boats and prefabricated steel girders, threshing machines, sawmill machinery, telephone and telegraph poles, creosote, and other pilings, heavy furnaces or ovens, pipe (including iron, steel, concrete, composition or corrugated), punches, presses, iron and steel girders, beams, columns, posts, channels and trusses, generators and dynamos, iron and steel castings, sheets, and plates, industrial hammers, industrial machinery, including laundry, ice making, air conditioning, baker, bottling, gin, crushing, dredging, mill brewery, textile, water plant and wire covering, twisting or laving, derricks, hoists, steam or internal combustion engines, rollers, power shovels, safes, vaults, bank doors, and gasoline, fuel oil and other storage tanks, when said commodities are not moving as oilfield equipment to "machinery, equipment, metal products, articles which because of size or weight require the use of special equipment, Mercer commodities and pipe" in Subs 4 and 21; (b) from earth drilling machinery

and equipment, and machinery, equipment, materials, supplies and pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage and transmission of commodities resulting from drilling operations at wells or hole sites, and the injection or removal of commodities into or from holes or wells, to "machinery, equipment and metal products" in Subs 19 and 47F; and (2) to remove restrictions: "except the stringing and picking up of pipe in connection with main or tank pipelines", "in connection with main or trunk pipelines", and "other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights-of-way" in Sub-Nos. 21 and 69.

MC 124062 (Sub-21)X, filed November 10, 1981. Applicant: FRICK TRANSPORT, INC., Wawaka, IN 46794. Representative: Donald Smith, P.O. Box 40248, Indianapolis, IN 46240. Lead and Subs-2, 6, 10, 11, 12, 14F, 15F, 16F, 17F, and 20F certificates. Broaden (1) to "chemicals and related products", from fertilizer, dry fertilizer and materials, in bags, liquid caustic soda, liquid fertilizer mix (exceptions), etc. . . ., lead and all Subs; (2) to radial authority, lead and all Subs (except Sub-20F); (3) change: Wawaka to Noble County, IN, Sub-2; facilities at Joliet to Will County, IL, Sub-6; Lockland to Hamilton County, OH, Sub-10; Greenwood to Johnson County, IN, Sub-12; Burns Harbor to Porter County, IN, Subs 14F and 16F; Watseka to Iroquois County, IL, Sub-15F; Lemont to Cook County, IL, Sub-16F; and Yodar to Allen County, IN and Lima to Allen County, OH, Sub-17F; and (4) remove: originating at and destined to restriction, Sub-17F; and in containers, in bulk, in tank, and hopper-type vehicles restrictions, Subs-2, 11, 12, 14F, 15F, 16F, and 17F; except dry fertilizer in bulk, in lead.

MC 124174 (Sub-187)X, filed October 29, 1981. Applicant: MOMSEN TRUCKING CO., 2045 Hiway Blvd., Spencer, IA 51301. Representative: Raymond A. Jensen, 13811 "L" Street, Omaha, NE 68137. Sub-No. 176, broaden part (1) to "food and related products" from hides and chromes, and part (2) to "materials, equipment and supplies used in the manufacture, sale and distribution of the commodities in (1) above" from tannery byproducts, and materials, equipment and supplies.

MC 124328 (Sub-145)X, filed November 19, 1981. Applicant: BRINK'S, INCORPORATED, Thorndal Circle, Darien, CT 06820. Representative: Chandler L. Van Orman, 1729 H St., N.W., Washington, DC 20006. Subs 64 and 113 permits: (A) Remove the restriction prohibiting the transportation of traffic between named points, Sub-64; and (B) Broaden to "between points in the U.S.," under continuing contract(s) with named classes of shippers, both Subs.

MC 124718 (Sub-1)X, filed August 24, 1981, previously notice in the **Federal Register** of September 18, 1981, republished as follows: Applicant: REISING BROTHERS, INC., P.O. Box 5, 54 Hungry Harbor Road, Valley Stream, NY 11582. Representative: Eugene M. Malkin, Suite 1832, Two World Trade Center, New York, NY 10048–0640. Lead certificate: This Board previously broadened the commodity description, eliminated a containers restriction, and authorized radial authority. Applicant also requested city-wide authority for two counties in New York, this segment was not published. A decision in No. MC–152318 (Sub-No. 3)X *Atlantic Truck Lines, Inc.—Administrative Appel*, (not printed), served September 28, 1981, instructed Board to republish. Notice is hereby given that applicant seeks to expand Kings and Queens Counties, NY to New York City, NY.

MC 124774 (Sub-144)X, filed November 9, 1981. Applicant: MIDWEST REFRIGERATED EXPRESS, INC., 4440 Buckingham Ave., Omaha, NE 68107. Representative: Arlyn L. Westergren, Suite 201, 9202 W. Dodge Rd., Omaha, NE 68114. Subs 110F, 113F and 126F certificates: (A) broaden (1) from (a) drugs, feed and feed supplements, to "chemicals and related products and food and related products", Sub-110F; (b) iron and steel articles to 'metal products", Sub 113F; and (c) toilet preparations to "chemicals and related products", Sub-No. 126F; (2) to countywide authority: (a) Rockland County, NY, and Bergen County, NJ (Pearl River, NY), Sub-110F; and (b) Morris County, NJ (facilities Morristown), Sub-126F; (B) remove "facilities" restriction, Sub-113F; and (C) broaden to radial authority, all Subs.

MC 129927 (Sub-7)X, filed November 16, 1981. Applicant: JAMERSON BROTHERS TRUCKING CO., INC., Route 3, Box 75, Appomattox, VA 24522. Representative: Carroll B. Jackson, 1810 Vincennes Road, Richmond, VA 23229. (1) Broaden lead and Sub-Nos. 1 and 4 permits to "between points in the U.S. (except AK and HI)," under continuing contract(s) with named shippers; (2) broaden (a) lead permit to "lumber and wood products," from lumber, except plywood and veneer; and (b) Sub-No. 1 to "furniture and fixtures," from new furniture in containers or in trailers; and (3) remove the restriction limiting transportation of shipments to that having a prior or subsequent movement by rail or water, in Sub-No. 1.

MC 133666 (Sub-34)X, filed November 18, 1981. Applicant: JACOBSON TRANSPORT, INC., 1112 Second Avenue, South, Wheaton, MN 56296. Representative: Thomas J. Burke, Jr., 1600 Lincoln Center, 1660 Lincoln Street, Denver, CO 80264. Subs 10, 17, 19 and 22F, certificates and MC–150780F permit. Broaden: Subs 10, 22, from liquefied petroleum gas; Subs 17, 19, from anhydrous ammonia; in permit, from road asphalt, road oils, and fuel oils, (all in bulk, in tank vehicles), to "commodities in bulk"; Sub 10, Rosemount facility to Dakota County, MN; Sub 17, Dilworth facility to Clay County, MN; Sub 19, facilities at: Spencer and Holstein to Clay and Ida Counties, IA; David City to Butler County, NE; Sub 22F facilities at: Milford to Koscuisko County, IN; New Hampton to Chickasaw County, IA; Benson to Swift County, MN; Carrington to Foster County, ND; in all certificates to radial; permit, to between points in U.S. under continuing contract(s) with named shipper.

MC 133735 (Sub-16)X, filed November 13, 1981. Applicant: AUDUBON-BROOKHISER TRANSPORT, INC., P.O. Box 186, Wever, IA 52658. Representative: Larry D. Knox, 600 Hubbell Building, Des Moines, IA 50309. Sub-Nos. 3, 5F, 7F, 8F, 9F, 10F, 12F, and 14F (1) remove the "facilities of" restrictions in Sub-Nos. 3, 5F, 7F, 8F, 10F, 12F, and 14F; (2) authorize radial authority in all authorities: (3) broaden from liquid animal feed and liquid animal feed ingredients to "food and related products" in Sub-No. 3; from fertilizer to "chemicals and related products" in Sub-No. 5F; from corn products, corn products and soybean meal to "food and related products" and from corn products, fertilizers, and calcium chloride to "food and related products and chemicals and related products" in Sub-No. 7F; from fertilizers to "chemicals and related products" in Sub-No. 8F; from liquid fertilizer to "chemicals and related products" in Sub-No. 9F; from caustic soda, steepwater, and corn products to "food and related products" in Sub-No. 10F; from liquid fertilizer to "chemicals and related products" in Sub-No. 12F; and corn products to "food and related products" in Sub-No. 14F; (4) eliminate

the "in bulk" restriction in Sub-Nos. 7F, 9F, and 14F and eliminate the "in bulk, in tank vehicles" restriction in Sub-Nos. 10 and 12; and (5) replace points with county-wide authority, Aududon County, IA, for Audubon, IA in Sub-No. 3; Lee County, IA, and Hancock County, IL, for Fort Madison, IA in Sub-Nos. 5F, 8F, and 12F; Lee County, IA, Hancock County, IL and Clark County, MO, for Keokuk, IA and Scott County, IL for Naples, IL, in Sub-No. 7F; Cook County, IL for Lemont, IL; Lee County, IA, Hancock County, IL, and Clark County, MO for Keokuk, IA; and Onondaga, Madison, and Oswego Counties, NY, for Syracuse, NY, in Sub-No. 10F; Des Moines County, IA and Henderson County, IL for Burlington, IA, in Sub-No. 9F; and Lee County, IA, Hancock County, IL and Cook County, MO, for Keokuk, IA, in Sub-No. 14F.

MC 135971 (Sub-5)X, filed November 20, 1981. Applicant: SOLIVRAC SERVICES, INC., 90 du Sous Bois, Beauport, Quebec, Canada GIE 5Z6. Representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108. (1) Sub-Nos. 2 and 3F certificates, broaden to "clay, concrete, glass or stone products," from cement, in bulk; and (2) change one-way service to radial service.

MC 139697 (Sub-9)X, filed November 12, 1981. Applicant: WAGONER TRANSPORTATION COMPANY, INC., P.O. Box 2975, South Bend, IN 46680. Representative: Morton E. Kiel, Suite 1832, Two World Trade Center, New York, NY 10048. Lead, Subs 4F and 6F, broaden: all authorities to between points in the U.S. under continuing contract(s) with named shippers; lead, from lawn and garden tractors to "machinery"; Subs 4, 6, from (1) foodstuffs to "foods and related products," remove: in bulk restriction in lead, Sub 4; and restriction against size/weight commodities in Sub 4.

BILLING CODE 7035-01-M

Motor Carrier; Temporary Authority Applications

The following are notices of filing of applications for temporary authority under section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-170

The following applications were filed in Region I. Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

MC 159411 (Sub-1-1TA), filed November 24, 1981. Applicant: JERRY GRASSO & SON, INC., Western Avenue, P.O. Box 254, Marlboro, NY 12542. Representative: John L. Alfano, Esq., 550 Mamaroneck Avenue, Harrison, NY 10528. *Contract carrier:* irregular routes: *Fruit juices, in containers* from Highland, NY to Windsor Locks, CT, Boston, MA, Elizabeth and Woodbridge, NJ, and Farmingdale, NY under continuing contract(s) with Costa Apple Products, Inc., of Highland, NY. Secretary.

[FR Doc 81–34970 Filed 12–4–81; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by special rule of the Commission's rules of practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be

satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries to the Ombudsman's Office, (202) 275–7326.

Volume No. OP1–313

Decided: November 25, 1981.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 136200 (Sub-2), filed November 16, 1981. Applicant: ACE VAN & STORAGE COMPANY, P.O. Box 602, Escondido, CA 92025. Representative: Robert J. Gallagher, 1000 Connecticut Avenue, NW., Suite 1200, Washington, DC 20036, (202) 785–0024. Transporting (1) for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions); (2) *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds; and (3) *used household goods* for the account of the United States Government incident to the performance of a pack-and-crate service on behalf of the Department of Defense, between points in the U.S.

MC 159271, filed November 13, 1981. Applicant: SAM RUCKER and FAYTH LEE RUCKER, d.b.a. METRO AIRPORT BLACK AND WHITE CAB COMPANY, 3646 Harrison, Inkster, MI 48141. Representative: Alex J. Miller, 555 S. Woodward Ave., Suite 512, Birmingham, MI 48011, (313) 647–3350. Transporting *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds, between points in the U.S.

Volume No. OPY–4–462

Decided: November 25, 1981.

By the Commission, Review Board No. 2, Members Carleton, Fisher, and Williams.

MC 42487 (Sub-1055), filed November 18, 1981. Applicant: CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 175 Linfield Dr., Menlo Park, CA 94025. Representative: V.R. Oldenburg, P.O. Box 3062, Portland, OR 97208. Transporting *general commodities*, between Dodge, WA, on the one hand, and, on the other, points in the U.S.

Note.—The purpose of this application is to substitute motor carrieer service for abandoned rail service.

Volume No. OPY–5–210

Decided: November 24, 1981.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC 143098 (Sub-4), filed November 13, 1981. Applicant: LAUGHLIN TRUCKING, INC., Rt. 1, Box 95, Carlton, OR 97111. Representative: Lawrence V. Smart, Jr., 419 N.W. 23rd Ave., Portland, OR 97210, (503) 226–3755. To operate as a *broker* of *general commodities* (except household goods), between points in the U.S.

MC 159249, filed November 12, 1981. Applicant: J.K.J. TRUCKING, INC., 7131 Fisher Woods Rd., Indian River, MI 49749. Representative: Kathleen R. Clark, (same address as applicant), (616) 238–8489. Transporting, for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S.

Volume No. OPY–5–213

Decided: November 25, 1981.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC 147958 (Sub-3), filed November 17, 1981. Applicant: EMILE R. CARUFEL, d.b.a. CARUFEL REFRIGERATED SERVICE, 21109 91st E. Bonney Lake, Sumner, WA 98390. Representative: Jim Pitzer, 15 S. Grady Way, Suite 321, Renton, WA 98055, (206) 235–1111. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S.

MC 156329, filed November 13, 1981. Applicant: CHISM, INC., 2160 E. Thoman, Springfield, MO 65803. Representative: Robert Jarvis, (same address as applicant), 417–865–4127. Transporting, for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S.

MC 159259, filed November 13, 1981. Applicant: NORTH LAKE TRANSPORT, INC., 217 Elmhurst Ave., Elmhurst, IL 60126. Representative: Anthony E. Young, 29 South LaSalle St., Chicago, IL 60603, 312–782–8880. (1) Transporting *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds, between points in the U.S.; and (2) for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by special rule of the Commission's rules of practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisditional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authority documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries to the Ombudsman's Office, (202) 275–7326.

Volume No. OP1–312

Decided: November 25, 1981.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 2060 (Sub-16), filed November 13, 1981. Applicant: PINE HILL-KINGSTON BUS CORP., d.b.a. PINE HILL TRAILWAYS, 411 Washington Ave., P.O. Box 1758, Kingston, NY 12401. Representative: Lawrence E. NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-443A and 50-444A

Public Service Co. of New Hampshire, et al.; Receipt of Additional Antitrust Information: Time for Submission of Views on Antitrust Matters

Public Service Company of New Hampshire, et al.,[1] pursuant to section 103 of the Atomic Energy Act of 1954, as amended, has filed information requested by the Attorney General for antitrust review as required by 10 CFR Part 50, Appendix L. This information concerns a proposed additional ownership participant, the Canal Electric Company (Canal) in the Seabrook Station, Units 1 and 2. The change involves the transfer of ownership from the Commonwealth Electric Company to Canal.

The information was filed in connection with the application submitted by the construction permit holders for operating licenses for two pressurized water reactors. Construction was authorized on July 7, 1976 at the Seabrook site located in Rockingham County, New Hampshire.

The original application was docketed on July 9, 1973, and the Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matters was published in the **Federal Register** on August 9, 1973 (38 FR 21522). The Notice of Receipt of Application for Facility Operating Licenses; Notice of Availability of Applicants' Environmental Report; and the Notice of Consideration of Issuance of Facility Operating Licenses and Notice of Opportunity for Hearing was published in the **Federal Register** on October 19, 1981 (46 FR 51330).

A copy of the above documents are available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the Exeter Public Library, Front Street, Exeter, New Hampshire 03883.

Any person who wishes to have his views on the antitrust matters with respect to the Canal Electric Company presented to the Attorney General for consideration or who desires additional information regarding the matters covered by this notice, should submit such views or requests for additional information to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Antitrust and Economic Analysis Branch, Division of Engineering, Office of Nuclear Reactor Regulation, on or before January 29, 1982.

Dated at Bethesda, Maryland, this 16th day of November 1981.

For the Nuclear Regulatory Commission.

Frank J. Miraglia,

Chief, Licensing Branch No. 3, Division of Licensing.

[FR Doc. 81-34273 Filed 11-27-81; 8:45 am]

BILLING CODE 7590-01-M

[1] The current applicants for the operating licenses for Seabrook Station are: Bangor Hydro-Electric Company, Central Maine Power Company, Central Vermont Public Service Corporation, Commonwealth Energy Systems, Connecticut Light & Power Company, Fitchburg Gas & Electric Light Company, Hudson Light & Power Department, Maine Public Service Company, Massachusetts Muncipal Wholesale Electric Company, Montaup Electric Company, New England Power Company, Public Service Company of New Hampshire, Taunton Municipal Lighting Plant, The United Illuminating Company, and Vermont Electric Cooperative, Inc.

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, CE 037-4 (which should be mentioned in all correspondence concerning this draft guide), is entitled "Applicability of Existing Regulatory Guides to the Design and Operation of an Independent Spent Fuel Storage Installation" and is intended for Division 3, "Fuels and Materials Facilities." The purpose of this draft guide is to identify existing regulatory guides that may be applicable in whole or in part to the design and operation of an independent spent fuel storage installation. Applicable regulatory positions in each guide are identified and briefly described. The portions of the NRC regulations addressed by the regulatory positions are also identified and other pertinent information is provided.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value-impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by February 5, 1982.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street N.W., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 30th day of November 1981.

For the Nuclear Regulatory Commission.

G. A. Aniotto,

Director, Division of Engineering Technology, Office of Nuclear Regulatory Research.

[Docket No. 50-302]

Florida Power Corp., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 45 to Facility Operating License No. DPR-72, issued to the Florida Power Corporation, City of Alachua, City of Bushnell, City of Gainesville, City of Kissimmee, City of Leesburg, City of New Smyrna Beach and Utilities Commission, City of New

Smyrna Beach, City of Ocala, Orlando Utilities Commission and the City of Orlando, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., and the City of Tallahassee (the licensees) which revised the Technical Specifications (TSs) for operation of the Crystal River Unit No. 3 Nuclear Generating Plant (CR-3) located in Citrus County, Florida.

The amendment deletes 4 hydraulic shock suppressors (snubbers) from Table 3.7-3 of the CR-3 TSs and adds a definition of "operable" for hydraulic snubbers in locations outside the reactor buiding during Cycle 4 operation.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated November 17, 1981, (2) Amendment No. 45 to License No. DPR-72, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C., and at the Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 27th day of November 1981.

For the Nuclear Regulatory Commission.

Peter B. Erickson,

Acting Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 81-35029 Filed 12-4-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-335]

Florida Power & Light Co.; Issuance of Amendment to Facility Operating License and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 48 to Facility Operating License No. DPR-67, issued to Florida Power & Light Company (the licensee), which revised the Technical Specifications for operation of the St. Lucie Plant, Unit No. 1 (the facility), located in St. Lucie County, Florida. The amendment is effective as of the date of issuance.

The amendment changes License Conditions 2.C.(1) and the Technical Specifications to authorize operation of St. Lucie Unit 1 at 2700 Megawatts thermal power. The previously authorized maxmimum power level was 2560 Megawatts thermal.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with this action was published in the **Federal Register** on January 15, 1981 (46 FR 3686). No request for a hearing or petition for leave to invervene was filed following notice of the proposed acton.

The Commission has prepared an environmental impact appraisal for the revised Technical Specifications and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact attributable to the action other than that which has already been predicted and described in the Commission's Final Environmental Statement for the facility dated June 1973.

For further details with respect to this action, see (1) the applications for amendment dated November 14, 1980 and September 28, 1981, (2) Amendment No. 48 to License No. DPR-67, and (3) the Commission's related Safety Evaluation and Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 23rd day of November, 1981.

For the Nuclear Regulatory Commission.

[Docket No. 50-289 (Restart)]

Metropolitan Edison Co. et al. (Three Mile Island Nuclear Station, Unit 1); Assignment of Atomic Safety and Licensing Appeal Board

Notice is hereby given that, in accordance with the authority conferred by 10 CFR 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has assigned the following members to serve as the Appeal Board for that portion of this restart proceeding concerned with plant design and procedures, separation of TMI-1 and TMI-2 and emergency planning:

Gary J. Edles, Chairman
Dr. John H. Buck
Dr. Reginald L. Gotchy

The Panel members heretofore assigned to the Appeal Board for this proceeding (46 FR 55026) will remain responsible for hearing the pending appeals from the Licensing Board's August 27, 1981, partial initial decision on the management qualifications of the licensee as well as any appeals which may be taken from any decision which the Licensing Board may issue on the matters relating to operator license examination cheating covered by that Board's September 9, 1981 order reopening the record on management qualification issues.

Dated: November 30, 1981.

C. Jean Shoemaker,

Secretary to the Appeal Board.

BILLING CODE 7590-01-M

[Docket Nos. 50-443-OL and 50-444-OL]

Public Service Co. of New Hampshire, et al.; Establishment of Atomic Safety and Licensing Board to Preside in Proceeding

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register** (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.711, 2.714a, 2.717 and 2.721 of the Commission's regulations, all as amended, an Atomic Safety and

Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

Public Service Co. of New Hampshire, et al.

Seabrook Station, Units 1 and 2

Construction Permit Nos. CPPR–135 and CPPR–1336

This Board is being constituted pursuant to a notice published by the Commission on October 19, 1981, in the **Federal Register** (46 FR 51330–32) entitled, "Receipt of Application for Facility Operating Licenses; Availability of Applicants' Environmental Report; Consideration of Issuance of Facility Operating License; and Notice of Opportunity for Hearing."

The Board is comprised of the following administrative judges:

Helen Hoyt, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Dr. Emmeth A. Luebke, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Dr. Oscar H. Paris, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Issued at Bethesda, Maryland this 30th day of November 1981.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590–01–M

[Docket Nos. 50–259, 50–260, and 50–296]

Tennessee Valley Authority; Issuance of Amendments to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 78 to Facility Operating License No. DPR–33, Amendment No. 74 to Facility Operating License No. DPR–52, and Amendment No. 47 to Facility Operating License No. DPR–68 issued to Tennessee Valley Authority (the licensee), which revised the Technical Specifications for operation of the Browns Ferry Nuclear Plant, Unit Nos. 1, 2 and 3, located in Limestone County, Alabama, and the Licenses for Unit Nos. 1 and 2. The amendments are effective as of the date of issuance.

These amendments change the Technical Specifications to add operability and surveillance requirements on fire doors and dampers and delete two paragraphs from the licenses for Unit Nos. 1 and 2 which are no longer pertinent since the conditions have been completed.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated March 4, 1981, as supplemented by letter dated April 29, 1981, (2) Amendment No. 78 to License No. DPR–33, Amendment No. 74 to License No. DPR–52, and Amendment No. 47 to License No. DPR–68, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Athens Public Library, South and Forrest, Athens, Alabama 35611. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 24th day of November 1981.

For the Nuclear Regulatory Commission.

Thomas A. Ippolito,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

BILLING CODE 7590–01–M

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

December 2, 1981.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act (44 U.S.C., Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available).

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected;

Whether small businesses or organizations are affected;

A description of the Federal budget functional category that covers the information collection;

An estimate of the number of responses;

An estimate of the total number of hours needed to fill out the form;

An estimate of the cost to the Federal Government;

An estimate of the cost to the public;

The number of forms in the request for approval;

An indication of whether Section 3504(h) of Pub. L. 96–511 applies;

The name and telephone number of the person or office responsible for OMB review; and

An abstract describing the need for and uses of the information collection.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting

requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statemnent, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Deputy Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

DEPARTMENT OF AGRICULTURE

Agency Clearance Officer—Richard J. Schrimper—202–447–6201

SIC: 919
Health: 10,812 responses; 7,352 hours $0 Federal cost; 1 form; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

State medicaid agencies conduct quality control reviews of their eligibility, claims processing, and third party liability findings. HCFA's Regional Office (RO) rereviews a sample of State reviews. This clearance is for RO forms requesting State files and case records.

• Health Care Financing Administration

[1] These reporting forms have been approved for interim use by OMB for one year in order to continue operation of the Medicare Program. However, OMB will continue its reviews of these forms, and will accept comments from health care providers and others based on their experience with these forms through this approval period. Health care providers and reicipients, who are respondents to these Medicare contractor forms, are invited to send comments to Joseph Strnad at the above address, and to the OMB reviewer listed.

Contractors' Information Collections—Overpayments to[1] providers, beneficiaries, and physicians
9005
On occasion
Individuals or households/businesses or other institutions
Hospitals, nursing facilities, physicians and beneficiaries
SIC: 805, 806, 808 809, 801
Small businesses or organizations
Health: 481,000 responses; 360,750 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

This information is used to collect money overpaid to medicare providers, physicians and/or beneficiaries. It is required that these funds be returned to the medicare trust fund. These forms demand repayment of the overpayment and in some instances require additional information to assure the overpayment determination is accurate.

• Health Care Financing Administration
Contractors' Information Collections—Audit Programs[1]
HCFA–9022
Annually
Businesses or other institutions
Hospitals, skilled nursing facilities, home health agencies
SIC: 805, 806, 808, 809
Small businesses or organizations
Health: 4,750 responses; 190,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

These forms are used by intermediaries to gather information during the course of an audit. About one-third of the providers are audited each year.

• Health Care Financing Administration
Contractors' Information Collections—Contractor Program[1]
Integrity forms to verify services
HCFA–9016

SIC: 801, 805, 806, 807, 808, 809
Small businesses or organizations
Health: 4,500 responses; 4,500 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

HCFA requires medicare contractors to investigate potential abuse or fraud situations involving medicare providers/suppliers. These intermediary and carrier forms request explanations and/or beneficiary medical records from providers/suppliers.

• Health Care Financing Administration
Contractors' Information Collections—Prior Liability[1]
NCFA–9009
On occasion
Individuals or households/businesses or other institutions
Medicare providers, physicians, and beneficiaries
SIC: 801, 804, 805, 806, 808
Small businesses or organizations
Health: 855,901 aresponses; 71,325 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

These forms are used by intermediaries and carriers to collect information on the possible existence of other third-party insurance, specifically, wokman's compensation and veterans administration benefits. Medicare benefits are not paid in these cases.

• Health Care Financing Administration
Contractors' Information Collections—Periodic audit[1] of provider/supplier claims data
HCFA–9015
Annually
Businesses or other institutions
Medicare part A and B providers/suppliers
SIC: 801, 806, 805, 807, 808, 809
Small businesses or organizations
Health: 5,000 responses; 25,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

HCFA requires medicare contractors to conduct periodic audits of medicare providers and suppliers. These intermediary and carrier forms request medical and remibursement information on a sample of paid claims.

• National Institutes of Health
Quick Response Survey—Laetrile
Nonrecurring
Individuals or households
Adults 18 years of age in telephone households
Health: 2,500 responses; 417 hours; $33,169 Federal cost; 1 form; $4,170 Public cost; not applicable under 3504(h)
Gwendolyn, Pla, 202–395–6880

This study will give the views of a representative sample of U.S. adults living in telephone households on the use of laetrile as a treatment for cancer.

• Health Care Financing Administration
Contractor Information Collection—Provider Permanent [1]
Reference file
HCFA–9020
On occasion
Business of other institutions
All medicare providers
All medicare providers
SIC: 805, 806, 808, 809
Small businesses or organizations
Health: 14,300 responses; 143,000 hours; $0 Federal cost; 1 form; $1,430,000 Public cost; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

These intermediary forms collect background information from all providers when they are admitted to the medicare program. The information constitutes a permanent reference file on the provider. This data is updated as needed.

• Health Care Financing Administration
Contractors' Information Collections Interim Payment [1]
Adjustment forms for HHAS
HCFA–9013
Semiannually
Businesses or other institutions
Home Health Agencies in the medicare program.
SIC: 809

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Doc. No. 301–25]

National Pasta Association; Initiation of Investigation

On October 16, 1981, the Chairman of the Section 301 Committee received a petition from the Pasta Association alleging that EC export subsidies on pasta are granted in a manner inconsistent with the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade ("Subsidies Code") and constitute an unreasonable and unjustifiable burden on U.S. commerce. The petition was filed pursuant to Section 301 of the Trade Act of 1974, as amended (19 U.S.C. 2411 *et seq.*). On November 30, 1981, the United States Trade Representative decided to initiate an investigation pursuant to 19 U.S.C. 2412(a).

The text of the petition is as follows:

BEFORE THE OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

National Pasta Association, Petitioner

Petition filed seeking relief under Section 301 of the Trade Act of 1974, as amended.

This petition is filed pursuant to 15 CFR 2006.0(b) (1980) and section 301 *et seq.* of the Trade Act of 1974, as amended, 19 U.S.C. 2411 *et seq.* (Supp. III 1979). The dramatic increase of imports of pasta products from Italy has caused serious prejudice to U.S. producers and threatens to cause further serious prejudice by displacing U.S. producers in domestic markets. This increase in imports is largely the result of the bestowal of unjustified and unfair direct export subsidies by the European Economic Community (hereinafter the "E.C."). The use of these export subsidies violates the rights of the United States under the provisions of the General Agreement on Tariffs and Trade (hereinafter the "General Agreement") and the Agreement on Interpretation and Application of Articles IV, XVI and XXIII of the General Agreement on Tariffs and Trade (hereinafter the "Subsidies Code").

Petitioner

Petitioner, the National Pasta Association (formerly the National Macaroni Manufacturers Association), is a non-profit trade association incorporated under the laws of Illinois. The purpose of the Association is to serve all phases of the industry by promoting the development and use of pasta and related products for the benefit of consumers while providing programs and services that will enhance the efficiency and effectiveness of members of the industry. All major domestic producers of pasta products are presently members of the National Pasta Association. These producers, whose names are set forth in Appendix A to this petition, account for over 95 percent of all pasta produced in the United States.

Statutory Basis for This Petition

This petition arises under section 301(a)(1), 2(A) and 2(B) of the Trade Act of 1974, as amended, 19 U.S.C. 2411 (Supp. III 1979), Articles VI, XVI and XIII of the General Agreement and Articles 8 and 9 of the Subsidies Code. The bestowal of an export subsidy upon the exportation of pasta constitutes the subsidization of a non-primary product in violation of the absolute proscription against such subsidies set forth in Article 9 of the Subsidies Code. While it is unnecessary to demonstrate more than the existence of an Article 9 violation in order to justify relief under the Subsidies Code, petitioners will also show that the subsidy violates Article 8 in that it has caused serious prejudice and threatens to cause additional serious prejudice to U.S. pasta manufacturers by increasing substantially the abolute and relative level of pasta imports coming into the U.S. market.

Foreign Laws and Regulations Which are the Subject of This Petition

Subsidies granted on the exportation of pasta products manufactured from E. C. durum wheat are currently authorized by Council Regulation No. 2727/75 [1] on the common organization of the market in cereals. Such subsidies were first authorized in Council Regulation No. 120/67 when the common organization

[1] O.J. EUR. COMM. (No. L/281) 1 (1975).

of the market in cereals was first unified.[2] Article 16 of that regulation specifically provides that cereals such as durum wheat may be covered by export refunds. In addition, the Article provides that certain products processed from these cereals may also be covered by these refunds.

Pasta products are among the eligible products listed in Annex B [3] of the regulation. Council Regulation 3035/80 [4] sets out detailed rules for granting export refunds on processed cereal products and the criteria for fixing the amount of such refunds. Annex C [5] of this regulation specifically cites "macaroni, spaghetti and similar products" as categories to which these rules apply. Moreover, the regulation provides that exporters can apply for advance fixing of this subsidy.[6] Domestically, durum wheat is supported by permanent intervention arrangements pursuant to Article 10 of Council Regulation 2727/75.[7]

Foreign Countries or Instrumentalities With Whom the United States Has an Agreement

The E.C. has signed the Subsidies Code on behalf of all member states. However, the principal beneficiary of the E.C. export refund on pasta products is Italy. Italy is an individual signatory to the General Agreement.

Products Which are the Subject of This Petition

The products for which the rights of the United States under the General Agreement and the Subsidies Code are being denied are macaroni, vermicelli and similar products containing less than 5.5 percent by weight of egg or egg products, and noodle products containing 5.5 percent or more of egg or egg products by weight. As used herein, the term pasta refers to both macaroni and noodle products. These products comprise TSUSA categories Nos. 182.35 and 182.36 respectively.

Requests for Other Relief

Petitioner has not filed for relief under the Trade Act of 1974 or any other provision of law.

Legal Justification for This Petition

I. E.C. Subsidy on Pasta Exports

The practice which is the principal subject of this petition is the E.C. export refund on pasta manufactured from E.C. durum wheat. In its regulations authorizing a common organization of the market in cereals,[8] the E.C. provides that certain E.C. cereal products exported after being transformed into processed goods may be eligible for an export refund. The refund on the processed product is intended to cover the difference between quotations or prices for the cereals on the world market and prices in the Community.

For pasta produced from E.C. durum wheat, the E.C. calculates export refunds according to a conversion factor which takes into account the amount of wheat and other basic products necessary to produce a given amount of pasta. For macaroni, spaghetti and similar products, both with and without eggs, the conversion factor of durum to pasta is 1.67.[9] In other words, 167 kg. of durum wheat is necessary to make 100 kg. of pasta. The average export refunds granted by the E.C. on the export of pasta may be calculated using this factor. As indicated in Table 1, over the past five years exports have been subsidized at a rate of between seven and twelve cents per pound of pasta. This subsidy represents between 14 and 24 percent (approximately) of the wholesale value of pasta products.

Normally, the rate of the refund is that which is in force on the day of the export. Exporters can, however, apply for advance fixing of the refund by obtaining an advance fixing certificate from an intervention agency which is valid for the month of issue plus the following five months.[10] The rate of the refund is that applicable on the date the application for advance fixing is received by the intervention agency.

II. The General Impact of the E.C. Export Refunds on Italian Exports of Pasta Products into the United States

An examination of the extraordinary growth of U.S. imports of Italian pasta during the past five years demonstrates that the E.C.'s export subsidy has made a substantial contribution to Italian producers success in displacing U.S. producers in their home markets.

The common organization of the market in cereals was first established by regulation on June 19, 1967.[11] On October 29, 1975, the Council of the E.C. reissued its regulation 2727/75 [12] on the common organization of this market. Since the reissuance of the regulation, Italian exports of pasta products containing no egg or egg products to the U.S. have experienced substantial growth on both an absolute and a relative basis (Table 3). In 1975, Italian exports to the U.S. were 10,016,969 pounds, and comprised only 20.3 percent of total U.S. imports. By 1980, the volume had grown to 26,051,913, reflecting an average annual growth rate of 32.0 percent. Moveover, in 1980, Italian imports comprised over one-third of total U.S. imports. Estimates based on data for the first six months of 1981 would put total Italian exports at an annual level of 38 million pounds. This import level would comprise over 40 percent of total projected U.S. imports.

Similar growth has appeared—although on a much smaller scale—with respect to Italian imports of noodles containing at least 5.5 percent egg or egg products (Table 4). These imports grew from 498,575 pounds in 1975 to 912, 593 pounds in 1978. Although these figures tailed off in 1979 and 1980, preliminary data for 1981 reveal a projected annual import level of over one million pounds. The import growth in both categories is all the more significant to U.S. producers in view of the fact that domestic demand for pasta products at retail has not increased substantially in recent years and that production—as reflected by the amount of durum wheat ground—has declined in response to lagging domestic demand (Table 2).

III. The E.C.'s Export Refund on Pasta Products is Inconsistent with the Obligations Undertaken by Signatories to the General Agreement and the Subsidies Code

A. General Consideration

The Subsidies Code specifically addresses the problem of export subsidies and establishes general standards of conduct with respect to the granting of export subsidies. It also establishes a series of formal mechanisms for resolving disputes in this area.

Article 8 of the Subsidies Code contains an agreement by the signatories that they will avoid causing, through the use of *any subsidy*, "serious prejudice to the interests of another signatory." Serious prejudice may be demonstrated by showing the effects or threatened effects of the subsidized imports in the domestic market of the importing signatory.[13]

The export subsidization of other than primary products is absolutely prohibited by Article 9 of the Code. The provision reads:

---

[2] O.J. EUR. COMM. (No. 117) 2269 (1967).
[3] O.J. EUR. COMM. (No. L/281) 14 (1975).

[11] O.J. EUR COMM. (No.117) 2269 (1967).
[12] O.J. EUR COMM. (No. L/281) 1 (1975).
[13] Subsidies Code, Art. 8. ¶ 4(a).

Signatories shall not grant export subsidies on products other than certain primary products. [14]

For purposes of the agreement, primary products are defined as:

" " " any product of farm, forest, or fishery, in its natural form, or which has undergone such processing as is customarily required to prepare it for marketing in substantial volume in international trade. [15]

It is the contention of petitioner that the E.C. subsidy on pasta exports violates Articles 8 and 9 of the Subsidies Code in that this subsidy:

(1) is granted upon the exportation of a non-primary product in direct violation of Article 9 of the Code; and

(2) threatens serious prejudice to U.S. domestic markets in pasta products in violation of Article 8 of the Code.

We shall examine each of these contentions individually. While a finding that the export refund on pasta products violates Article 9 would necessarily dispose of the entire matter, petitioners will demonstrate the serious prejudice and threat of serious prejudice posed by these subsidies within the meaning of Article 8 in order to underscore the urgency which exists for dealing with these export refunds.

B. E.C. Subsidy on Pasta Products is a Subsidy Granted upon the Exportation of a Non-Primary Product in Violation of Article 9 of the Subsidies Code

As previously indicated, a primary product is defined in the General Agreement as "any product of the farm, forest or fishery . . . in its natual form or which has undergone such processing as is customarily required to prepare it for marketing in substantial volume in international trade." The issue as to what differentiates a primary agricultural product from a non-primary product has apparently never been the subject of a GATT determination. [16]

Durum wheat is a primary agricultural product. There is sufficient volume of international trade in durum wheat to establish conclusively that its transformation into semolina flour and thereafter its further processing into pasta products is *not* customarily required to prepare it for marketing in international trade. Moreover, the amount of processing required to transform durum wheat into marketable pasta products is so substantial as to preclude consideration of pasta as a primary product. [17]

[14] Subsidies Code, Art. 9, ¶1.

[15] General Agreement, Note Ad Article XVI, Section B, pargraph 2.

[16] "Letter from Jeanne Archibald, Chairman, Section 301 Committee to Paul D. Cullen, Esq." (9 June 1981).

[17] There are also strong arguments against designating pasta as a primary agricultural product inherent in the E.C.'s own treatment of the distinction between primary and non-primary agricultural products. Althougth these distinctions do not have a direct bearing on a prospective GATT interpretation of the primary, non-primary product distinction, they do provide a legal framework within which to determine the nature of pasta for purposes of applying the Subsidies Code. Furthermore, these distinctions, in that they are the creation of the E.C., undermine any assertion by the E.C. that the subsidy on pasta is a subsidy on a primary product, and hence not subject to the Article 9 ban.

In the first place, Article 38 of the Treaty of Rome, 298 U.N.T.S. 5 (1957), which established the common market in agriculture, defined agricultural products as "the products of the soil, of stock farming, and the fisheries and products of *first stage processing* directly related to these products." Applying this definition to the previous discussion on how pasta is made from durum wheat, one would be hard-pressed to consider pasta a product of first stage processing in view of the fact that there exist two intervening stages in the production process. First durum wheat is converted into semolina flour. Second, semolina flour is processed into pasta, a process which in itself involves a 44 percent value added labor. By the E.C.'s own defintion this entire process can hardly be termed "first-stage processing."

The early completion of the E.C. customs union necessitated the development of common rules for the application of the Common Customs Tariff, quantitative restrictions, and other measures applied to imports. In establishing rules for determining and certifying the origins of goods, a distinction had to be made between goods produced in one country and goods (particularly processed) produced in more than one country. Under Council Regulation No. 802/68, "On the Common Definition of the Concept of the Origin of Goods," O.J. EUR. COMM. (No. L/148) 1 (1968), goods produced or extracted in one country are deemed to originate in that country. Such products present few difficulties in comparison to the identification of goods produced in more than one country. For such products, the country of origin is defined as "where the first substantial and economically justifiable processing is done." O.J. EUR. COMM. (No. L/148) 2 (1968). In determining country of origin, it may be necessary to distinguish between raw material and processed product. E.C. case law provides that for a product to be "processed," the processing performed must be substantial enough to result in significant *qualitative* change in the product in comparison to the basic product prior to the "processing." [*See, e.g.*, Gesellschaft fur Uberseehandle mb v. Handelskammer, Court of Justice, Case No. 49/76, January 20, 1977.] Petitioner would contend that pasta is qualitatively different from durum wheat and therefore must be construed as a processed product even under the E.C. definition.

A final basis for looking at the primary— non-primary distinction is to consider the E.C.'s general regulation with respect to "Processed Agricultural Products Not within Common Policy." [E.C. Council Regulation 1059/69, "Price Agreements Applicable to Certain Goods Resulting from the Processig of Agricultural Products," O.J. EUR. COMM. (No. L/141) 1 (1969).] Such products are listed in an Annex to the regulation and include sugar confectionary, chocolate, malt extract, flour, starch, *macaroni*, prepared goods, yeast, pastry, etc. They are subject to common tariff charges which consist of a fixed ad valoreum duty to which is added a variable component. Indeed, they are treated separately and differently for trade purposes than those "agricultural products" subject to the Common Policy under Article 38 of the Treaty of Rome, the difference again being the degree of processing.

1. *International trade in durum wheat.* Since 1975, E.C. exports of durum wheat have grown considerably from 40,734 metric tons in 1975 to 199,400 metric tons in 1980. During that same period, world trade in durum wheat has grown from about 3.1 million metric tons in 1975 to about 4.2 million metric tons in 1980 [18] (Table 5). These figures indicate that there exists independently a significant export market in durum wheat, a market which is much larger than the world export market for pasta products. There is also a substantial market for by-products of ground durum wheat. These by-products are used for making dog food and breakfast cereal. Additionally, they are sold as commercial feed. The market for durum wheat and its by-products negates the presumption that durum wheat is customarily transformed into pasta for purposes of preparing it for marketing in international trade. Consequently, pasta cannot be considered a "primary product" as defined in the Subsidies Code.

2. *The process of converting durum wheat into pasta.* The transformation of durum wheat into pasta involves a complex, multi-staged process. Durum wheat is thoroughly scoured and cleaned, and then it is "tempered," a process in which moisture and heat are applied to toughen the outer bran coat. The wheat is then passed through a series of corrugated and smooth rollers, purifiers, sieves and sifters of increasing fineness—to crush and separate parts of the clean wheat until approximately 60 percent is bran-free semolina, granular or durum flour. The other 40 percent is made into by-products, not connected with macaroni production (e.g. commercial feed). Durum semolina is then mixed with water to make a stiff dough. Additionally, the dough may be enriched with iron and B-vitamins, and in certain products egg solids may also be added. The dough is passed through dies under pressure which, depending on how the dies are cut, convert the dough into different shapes. The shaped products are then passed through a series of dryers, and the final products are cut to exact length, weighed and packaged. Most steps in the manufacturing process are automatic, under cover in sealed compartments of different machines; however, significant amounts of labor are used in the inspection of the final product. Moreover, there are additional steps in the production process which bear on the texture, shape and packaging of the pasta product. These steps are responsible for the differentiation of products which separate individual brands. Given the limited differentiation

[18] International Wheat Council, "World Trade Statistics" (1981).

between products, these steps are crucial in a market where brand-name identification is so important. A graphic presentation of the processing of durum wheat into semolina flour and the reprocessing of semolina flour into pasta products is depicted in Appendix B.

The extent of processing is reflected in terms of cost estimates of the value added in the process of converting semolina flour into pasta products. The following figures reflect the value added to the semolina flour market to make one pound of macaroni:

Semolina flour	*$0.200
Labor	0.055
General overhead	0.050
Packaging	0.050
	0.355

*The price of 20 cents per pound of semolina flour probably represents the highest price paid for this ingredient in recent years. Use of a lower and more typical price would, of course, cause the percent of value added to increase

There is a factor of 44 percent value added to semolina flour in its processing into macaroni. This does not include any expense for brand name advertising which also adds value to the finished product. Moreover, it does not include the separate 18.5 percent value added factor necessary to grind durum wheat into semolina flour and its commercial by-products. The extensive amount of value added through two separate processing stages cannot justify the treatment of pasta as a primary agricultural product. Such treatment would render Article 9 meaningless.

In sum, the level of trade in international durum wheat and the substantial amount of processing that is involved in converting durum wheat to pasta lead to the conclusion that for purposes of the GATT, pasta is a non-primary product. Petitioner therefore submits that a subsidy on the export of such products violates Article 9 of the Subsidies Code. Such a view would be consistent with recent U.S. positions on the primary/non-primary distinction.

Throughout the MTN, the United States subscribed to a narrow definition of primary product, one which would result in a product's removal from the primary product category on the basis of minimal processing. The E.C., as expected, took the other extreme. Consistent with its position in the MTN, the United States recently requested consultations concerning E.C. subsidies on the export of wheat flour.[19] In making this request, the United States asserted that "wheat-flour is a non-primary product on which no subsidy may be maintained." Petitioners contend that the processing of durum wheat into pasta involves substantially more processing than is involved in the transformation of common wheat into wheat flour. To permit the subsidy on pasta to persist where its existence is so clearly violative of Article 9 would be to render the Subsidies Code meaningless.

C. The E.C. Export Subsidy on Pasta Products Threatens Serious Prejudice to U.S. Domestic Markets in Pasta Products and Therefore Violates Article 8 of the Subsidies Code

Article 8 of the Subsidies Code, although not providing an absolute prohibition against export subsidies as contained in Article 9, nevertheless provides that parties "should avoid causing serious prejudice to the interests of another signatory." For purposes of the Article, serious prejudice includes not only actual, but the threat of serious prejudice.[20]

The threat of serious prejudice to U.S. pasta producers can be viewed from two perspectives. First, since there is absolute and continuous growth of Italian pasta imports in a U.S. market in which overall demand has remained constant, the Italian products are directly displacing and will continuing to displace U.S. products. Second, because Italian products are being directed at specific regional markets, the net effect on certain regional producers may be to threaten their well-being.

1. *Italian import penetration.* As previously indicated, domestic demand for pasta products at retail has not increased significantly in recent years. For example, between the years 1979 and 1980, domestic consumption of macaroni products has grown only 0.7 percent annually, from 985 million pounds to 993 million pounds. Moreover, unofficial grocery sales figures provided by the industry reveal that between 1973 and 1980 the annual volume of grocery sales over the entire period has increased at an average annual rate of less than 2 percent. Despite this limited growth, Italian imports to the United States have grown substantially. During the 1979–80 period alone, Italian imports grew at an annual rate of 34.6 percent. Whereas in 1979, Italian imports represented approximately 2.0 percent of total grocery sales, in 1980 that share grew to 2.6 percent. Assuming constant domestic demand in 1981, the increase in the Italian share of the U.S. market may be as high as 3.8 percent if the surge of pasta imports in the first half of 1981 holds constant throughout the remainder of the year. This would represent a doubling of market share in just two years.

Certain recent developments in the U.S. pasta market reinforce this negative trend thereby mandating that the threat be addressed by U.S. policy makers. In the first place, there are now at least 29 separate brands of Italian pasta available nationwide.[21] Moreover, the distribution of imported pasta is no longer limited to specialty shops and gourmet stores, but has spread to a number of important regional and national chain stores, acquiring significant amounts of shelf space. Furthermore, imported pasta from Italy is being priced to undersell domestic brands on retail shelves, in which instance, domestic producers are forced to lower their prices to respond to competition from the imported brands. Coupled with these developments are the apparently unlimited amounts available from the E.C. to cover export refunds. Between the years 1975 and 1979, E.C. expenditures on cereal refunds grew from approximately 425 million European Units of Account (E.C.U.) to 1,152,155,419 E.C.U. (Table 6). In 1980, total appropriations were set at 1,099,000,000 E.C.U., and for 1981 at 1,542,520,000 E.C.U. Clearly, these levels suggest there are no effective administrative controls on cereal subsidies. In effect, Italian pasta producers have an unlimited pool for which to draw.

In a recent complaint by Brazil against the E.C. refunds on export of sugar,[22] a GATT panel took note of the "non-limited amounts" available to cover export refunds of sugar. The panel found that this open-ended commitment on the part of the E.C., when combined with the amount of E.C. sugar available for export, created a permanent source of uncertainty in world markets and therefore constituted a threat of serious prejudice in terms of Article XVI:1 of the General Agreement. The open-ended financial commitment to cereal subsidies by the E.C., coupled with the volume of exportable surpluses within the E.C., demonstrates that a threat of serious prejudice confronts U.S. producers for the same reasons that such a threat was found in the case of Brazilian sugar.

2. *Regional market penetration.* Pasta imports have had a major impact on the retail market in the New York-New Jersey area. Sales data in imported pasta is difficult to gather. Data published by the Nielsen organization

[19] GATT, "European Communities—Export Refunds for Wheat Flour—U.S. Request for Consultations under Article XXII:1," GATT Docs. L/5014 (Aug. 8, 1980).

[20] Subsidies Code, Article 8, footnote 3.

[21] Information received from a survey of members of the National Pasta Association (June 1981).

[22] GATT, European Communities—Refund on Export of Sugar—Complaint by Brazil," GATT Docs. L/5011 (Oct. 7, 1980).

was able to track 5 million pounds of Italian pasta sold at retail in 1980, of which 4 million pounds (80 percent) were sold in the New York-New Jersey market. It is generally believed that much of the unaccounted for distribution of the 26 million pounds of pasta imported in 1980 was also sold at retail—most of that in the New York-New Jersey market area. Thus, the amount of Italian pasta imports sold at retail is probably greatly understated. In 1980, recorded grocery sales of Italian imports (*i.e.*, 4 million pounds) constituted approximately 2.3 percent of the New York area market. If the Nielsen data understates the amount of Italian pasta sold at retail, and if the bulk of the 20 million pounds of imported pasta not accounted for by Nielsen was sold in the New York-New Jersey market, the present impact of imports on retail sales in the New York-New Jersey market could be significantly understated. If 80 percent of the unaccounted-for 20 million pounds were sold in the New York-New Jersey areas, market penetration of imports would exceed 20 percent in 1980 and could go much higher than that in 1981 with the increase in imports.

In considering the impact of subsidized exports on U.S. domestic markets, it is not unprecedented to look in terms of particular geographic markets. For example, in determining the extent or threat of injury to a particular industry in countervailing duty cases, the ITC may find injury on the basis of a regional industry even where a major proportion of the domestic industry taken as a whole is not injured.[23] The language of the statute is sufficiently broad to allow the Commission discretion in determining the appropriate circumstances for an inquiry based upon a regional industry.[24]

In determining the threat to the domestic injury in the contest of the Subsidies Code, consideration of regional impact is equally valid. Article 6, paragraph 7, of the Code provides that:

> . . . The territory of a signatory may, for the production in question, be divided into two or more competitive markets and the producers within each market may be regarded as a separate industry if (a) the producers within such market sell all or almost all of their production of the product in question in that market; and (b) the demand in that market is not to any substantial degree supplied by producers of the product in question backed elsewhere in the territory. In such circumstances, injury may be found to exist even where a major portion of the total domestic industry is not injured provided there is concentration of subsidized imports into such an isolated market, and provided further that the subsidized imports are causing injury to the producers of all or almost all of the production within such market.[25]

The New York-New Jersey market, in that it is generally self-contained, appears to meet the criteria set forth in Article 6, Paragraph 7 of the Subsidies Code. It is therefore appropriate to concern ourselves with the regional impact of the Italian imports. The possibility that Italian penetration in the New York market may have exceeded 20 percent in 1980 and could exceed 25 percent in 1981, if trends for the first half of 1981 hold true, is a threat which petitioner submits must be addressed in the GATT framework.

Relief Requested

Based on the foregoing, petitioner respectfully requests that the President, pursuant to section 301 of the Trade Act of 1974, as amended, 19 U.S.C. 2411, take all appropriate and feasible steps within his power to obtain the elimination of the European Economic Community's export refund on pasta products. Such efforts should include making use of the consultation, conciliation and dispute settlement mechanisms as provided by Articles 12 and 13 of the Subsidies Code. In the event such steps fail to bring about a resolution of the issue, the President should undertake such countermeasures as are authorized under section 301 of the Trade Act of 1974, as amended, and as are permitted under the General Agreement and the Subsidies Code.

Respectfully submitted,

Paul D. Cullen,

1055 Thomas Jefferson St., NW., Washington, D.C. 20007, (202) 342-8400.

Of Counsel:

Collier, Shannon, Rill & Scott,

1055 Thomas Jefferson St., NW., Washington, D.C. 20007.

Dated: October 16, 1981.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-18293; File No. SR-CBOE-81-25]

Chicago Board Options Exchange, Inc.; Proposed Rule Change by Self-Regulatory Organization

In the matter of proposed rule change. Comments requested on or before December 28, 1981.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (15 U.S.C. 78s(b)(1)), notice is hereby given that on November 20, 1981, the Chicago Board Options Exchange, Incorporated filed with the Securities Exchange Commission the proposed rule change as described below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends Chapter XXI of the Rules of the Exchange to provide rules for trading in options on United States Treasury bills and to make certain conforming and nonsubstantive changes. Chapter XXI applies generally to options on Government securities. The proposed rule change states that certain of the existing rules of Chapter XXI are applicable only to options on underlying Treasury bonds and notes, and it adds a new Rule 21.31 applicable to options on underlying Treasury bills. This new rule includes the following terms of substance:

1. A Treasury bill is defined as a non-interest bearing Government security issued by the U.S. Treasury and sold at an original issue discount from par, with a term to maturity of not more than one year at the time of original issuance.

2. Procedures are established for adjusting the exercise price of Treasury bill options to reflect the term to maturity of the underlying Treasury bills.

3. Treasury bill options are proposed to be traded in respect of 13-week and 26-week Treasury bills, with a single 13-week Treasury bill option covering $1 million principal amount of underlying Treasury bills, a single "mini-series" option on 13-week Treasury bills covering $200,000 principal amount of underlying Treasury bills, a single option on 26-week Treasury bills covering $500,000 principal amount of underlying Treasury bills and a single "mini-series" option on 26-week Tresury bills covering $100,000 principal amount of underlying Treasury bills.

4. Treasury bill options will generally expire in the months of March, June, September and December with the term of options available for trading extending to as long as 15 months.

5. The exercise price of Treasury bill options will ordinarily be fixed at a percentage of the principal amount of the underlying security that is an intergral multiple of 1%. New series of options will be opened from time to time to reflect changes in prices of underlying Treasury bills.

6. Bids and offers for Treasury bill options will be expressed as a percentage (to the nearest 1/100 of 1%) of the principal amount of the underlying Treasury bills, adjusted to reflect the term to maturity of the underlying Treasury bills.

7. The settlement of the exercise of Treasury bill options will take place once a week. The person obligated to make delivery may choose whether to settle on Thursday or Friday, but in either case the aggregate exercise price is determined as if settlement were made on Thursday. The delivery obligation may be satisfied by delivering the required principal amount of any Treasury bill having a term to maturity equal to or less than the designated maturity of the Treasury bills underlying the particular series of options. Nevertheless, the aggregate exercise price payable upon exercise will be calculated on the basis of the delivery of the longest term Treasury bills eligible to be delivered.

8. Position and exercise limits for Treasury bill options will be $500 million principal amount of underlying 13-week Treasury bills and $250 million principal amount of underlying 26-week Treasury bills. Reports are required to be submitted to the Exchange whenever a customer holds or is obligated in respect of $100 million or more principal amount of underlying 13-week Treasury bill options or $50 million or more principal amount of underlying 26-week Treasury bill options.

9. In addition to the general obligation to deal for their own accounts in the interest of maintaining a fair and orderly market, Market-Makers in Treasury bill options are expected to bid and/or offer in the two nearest term series of each class of Treasury bill options so as to create differences that do not exceed 10 basis points for options for which the bid is less than 1; 20 basis points for options for which the bid is 1 or more but less than 5; 30 basis points for options for which the bid is 5 or more but less than 10; and 40 basis points for options for which the bid is 10 or more. Maximum bid/offer differentials for all longer term series of each class of Treasury bill options shall be twice the differentials stated in the preceding sentence.

10. Minimum margin required for each Treasury bill option carried in a short position in a customer's account is 100% of the option premium plus a stated percentage of the principal amount of the underlying Treasury bills, less any amount by which the option is "out-of-the-money." The stated percentage depends upon the maximum term to maturity of the underlying Treasury bills: 0.35% where the maturity is 95 days or less, 0.50% where the maturity is 96 days or more but less than 190 days, and 0.75% where the maturity is 190 days or more. In any event, the minimum margin is $500 for each standard Treasury bill option and $100 for each mini-series Treasury bill option. Reduced margin may apply in the case of a put and a call each carried in a short position and in the case of certain spread positions involving both long and short positions in the same class of Treasury bill options.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change amends proposed Chapter XXI of the Rules of the Exchange, which pertains to options on Government securities, to provide rules for trading in options on United States Treasury bills (26-week bills and 13-week bills are proposed to be the subject of options). Chapter XXI is the subject of other prior filings currently before the Commission (File Nos. SR-CBOE-80-8 and 81-18), which concern rules governing trading in options on Treasury bonds (defined as securities haveing a term to maturity of more than 10 years) and Treasury notes (defined as securities having a term to maturity of at least 2 years but not more than 10 years). The addition of options on Treasury bills is intended to expand the risk-limiting and other uses of options in light of the unique characteristics of the market in short-term Government securities and other short-term debt instruments.

The Treasury bill options being proposed are "market basket" options that permit delivery of different maturities of Treasury bills upon exercise. The 26-week option permits delivery of any Treasury bill having 26 or fewer weeks to maturity, while the 13-week option permits delivery of any Treasury bill having 13 or fewer weeks to maturity. In each case, however, the aggregate exercise price is determined as if the longest maturity Treasury bill were delivered. Since Treasury bills trade at a discount from par which is greater for bills having a longer term to maturity, the effect of not adjusting exercise prices for shorter maturity deliveries is to assure that option premiums always reflect the market in the current 13-week or 26-week Treasury bill and to provide an economic incentive to make delivery upon exercise in the longest qualifying maturity. The purpose of permitting delivery in shorter maturities is simply to permit covered writers of call options to maintain their covered status without having to acquire new Treasury bills in each weekly auction, and to provide a "safety-valve" in case of unusual circumstances that limit the supply of 13- or 26-week Treasury bills.

The principal amount of underlying Treasury bills covered by the 26-week Treasury bill option is one-half the amount of Treasury bills covered by the 13-week Treasury bill option. Since the premiums for Treasury bill options are annualized, the effect of this difference in underlying principal amount is to make the premiums comparable between the two classes, thereby facilitating comparisons among all of the series of Treasury bill options that are traded.

The proposed rules for Treasury bill options include appropriate position and exercise limits and a requirement that large positions be reported to the Exchange. In each case these limits reflect amounts for 13-week Treasury bill options that are twice as large as for 26-week Treasury bill options. This is because the supply of 13-week Treasury bills includes previously issued 26-week Treasury bills that have only 13 weeks remaining to maturity, and therefore is considerably larger than the supply of 26-week Treasury bills.

The proposed rules also impose obligations on market-markers and establish minimum margin requirements that correspond to the requirements applicable to other Government security options, with appropriate adjustments to take into account the special characteristics of Treasury bill options.

The general provisions of Chapter XXI that deal with various other aspects of the market for Government security options will apply equally to Treasury bill options. These include matters pertaining to trading procedures, trade matching, sales practices, account handling and recordkeeping.

III. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will not present any burden on competition.

IV. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Formal comments on the proposed rule changes have neither been solicited nor received.

V. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

On or before January 11, 1982, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approved such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before December 28, 1981.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-18295; File No. SR-CBOE-81-26]

Chicago Board Options Exchange, Inc.; Proposed Rule Change by Self-Regulatory Organization

In the matter of proposed rule change relating to Floor Officials. Comments requested on or before December 28, 1981.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (15 U.S.C. 78s(b)(1)), notice is hereby given that on November 12, 1981, the Chicago Board Options Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule change is as follows. Additions are italicized; deletions are bracketed.

Admission to and Conduct on the Trading Floor

Rule 6.20(a) Admission to Floor. Unless otherwise provided in the Rules, no one but a member or an Order Book Official designated by the Exchange pursuant to Rule 7.3 shall make any transaction on the floor of the Exchange. Admission to the Floor shall be limited to members, employees of the Exchange, clerks or messengers employed by members and registered with the Exchange, and such other persons as may be provided by resolution of the Board.

(b) Conduct on the Floor. A member of the Exchange may be fined an amount not to exceed $1,000 upon the determination of two Floor Officials that the member's conduct on the floor of the Exchange is such as to impair the maintenance of a fair and orderly market, or to impair public confidence in the operations of the Exchange. A member adversely affected by a determination made under this Rule may obtain a review thereof in accordance with the provisions of Chapter XIX.

(Fines imposed) *Any action taken* by Floor Officials hereunder shall not preclude further disciplinary action by the Business Conduct Committee under Chapter XVII of the Rules.

* * * Interpretations and Policies:

.01 Only those members who have been approved to perform a floor function are authorized to enter into transactions on the floor. Such members include Floor Brokers who are registered pursuant to Rule 6.71, Board Brokers who are registered pursuant to Rules 7.2 and 7.3 and Market-Makers registered pursuant to Rules 8.2 and 8.3 While on the floor such members shall at all times display a floor member's badge.

.02 Order Book Officials may effect transactions on the floor only in the classes of option contracts to which they have been assigned and only in their capacity as Order Book Officials.

.03 Rule 3.21 provides that a nonequity-options permit holder is entitled to enter into principal transactions as a Market-Maker in nonequity options on the floor of the Exchange until his permit expires.

.04 *The activities which may impair the maintenance of a fair and orderly maket or impair public confidence in the operations of the Exchange, include but are not limited to the following:*

(i) *Effecting or attempting to effect a transaction with no public outcry in violation of Rule 6.43 or 6.74;*

(ii) *Failure of a Market-Maker to respond to a request for a market by an Order Book Official pursuant to Rule 7.5;*

(iii) *Failure of a Market-Maker to bid or offer within the ranges specified by Rule 8.7(b);*

(iv) *Failure to abide by a determination of Floor Officials; and*

(v) *Refusal to provide information requested by a Floor Official acting in his official capacity.*

.05 *Two Floor Officials may nullify a transaction or adjust its terms if they determine the transaction to have been in violation of any of the following: (i) Rule 6.43 (manner of bidding and offering), (ii) Rule 6.45 (priority of bids and offers), (iii) Rule 6.46 (transactions outside the book's last quoted range), or (iv) Rule 6.47 (priority on split price transactions).*

II

(A) *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.*

The primary purpose of the proposed rule change is to make explicit the authority of floor officials to fine for activities other than decorum-related offenses and to break or adjust trades effected in violation of the Exchange rules listed in proposed Interpretation .05. With this explicit authority, Floor Officials will be able to act promptly in response to violations of the Exchange rules referred to in proposed Interpretations .04 and .05. It should be noted that the list of rules in Interpretation .04 is not inclusive. It also should be noted that disciplinary action by the Exchange's Business Conduct Committee, which is normally more time consuming, is not precluded.

Rule 6.20(b) provides and will continue to provide for review of an action taken by Floor Officials by the Exchange's Appeals Committee pursuant to Chapter XIX of the Exchange rules. It is recognized that both the Business Conduct and Appeals Committees could have the same case before them and theoretically could come to different decisions. However, it is not desirable to add an appellate function to the already difficult role of the Business Conduct Committee. In addition, the benefits of prompt, effective action on the part of Floor Officials far outweigh the potential for different decisions if the two committees act on the same case.

The statutory basis for the proposed rule change is sections 6(b) (1), (5), (6) and (7), in that the rule change will enhance the Exchange's ability fairly to enforce compliance with its rules, to promote just and equitable principles of trade and to protect investors and the public interest.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.*

The proposed rule change will impose no burden on competition.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others.*

The Exchange solicited comments on the proposed rule change by means of a memorandum dated October 22, 1981 and sent to all members; however, no comments were received from members or from others.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

On or before January 11, 1982, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before December 28, 1981.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

November 30, 1981.

SMALL BUSINESS ADMINISTRATION

[License No. 05/05-0098]

Doan Resources Corp.; Filing of Application for Approval of Conflict of Interest Transaction

Notice is hereby given that Doan Resources Corporation (Doan), 110 East Grove, Midland, Michigan 48640, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application with the Small Business Administration (SBA) pursuant to section 312 of the Act and covered by § 107.1004 of the SBA Rules and Regulations, governing Small Business Investment Companies (13 CFR 107.1004 (1981)) for approval of a conflict of interest transaction falling within the scope of the above Section of the Act and Regulations.

Subject to such approval, Doan proposes to provide funds to Lifescan,

Inc. (LSI), for the purpose of providing additional working capital.

The proposed financing is brought within the purview of § 107.1004(b)(1) of the Regulation because Mr. James R. Weering a stockholder in LSI, is an Investment Advisor to the Licensee, and therefore is considered an Associate of Doan Resources Corporation as defined by § 107.3 of the Regulations.

Notice is hereby given that any interested person may, not later than December 17, 1981, submit written comments on the proposed transaction to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

(Catalog of Federal Domestic Assistance Programs No. 59.011, Small Business Investment Companies)

Dated: December 1, 1981.

Edwin T. Holloway,

Acting Associate Administrator for Finance and Investment.

BILLING CODE 8025-01-M

Westamerican Capital Corp.; License Surrender

[License No. 09/09-0277]

Notice is hereby given that Westamerican Capital Corporation (WCC), 180 Newport Center Drive, Suite 200, Newport Beach, California 92660, has surrendered its license to operate as a small business investment company under the Small Business Investment Act of 1958, as amended (the Act). WCC was licensed by the Small Business Administration on January 24, 1981.

Under the authority vested by the Act and pursuant to the Regulations promulgated thereunder, the surrender of the license was accepted on November 18, 1981, and accordingly, all rights, privileges and franchises derived therefrom have been terminated.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: December 1, 1981.

Edwin T. Holloway,

Acting Associate Administrator for Finance & Investment.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 81-089]

Regulatory Flexibility Act Review of Coast Guard Rules and Regulations

AGENCY: Coast Guard, DOT.

ACTION: Notice.

SUMMARY: The Regulatory Flexibility Act requires the Coast Guard to periodically review those of its regulations which have a significant impact on a substantial number of small entities, such as small businesses, small organizations, and small governmental jurisdictions. This notice solicits public input to aid the Coast Guard in the grouping of regulations for review and in selecting those regulations which should be reviewed first.

DATE: Comments solicited in this notice are due April 6, 1982.

ADDRESS: Comments should be mailed to Commandant (G-CMC/44) (CGD81-089), U.S. Coast Guard, Washington, D.C. 20593. Comments may be delivered to and will be available for inspection or copying from 7:00 am to 5:00 pm, Monday through Thursday, except holidays, at the Marine Safety Council (G-CMC/44), Room 4402, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593, (202) 426-1477.

FOR FURTHER INFORMATION CONTACT:

CDR A. D. UTARA, Executive Secretary, Marine Safety Council (G-CMC/44), U.S. Coast Guard Headquarters, 2100 Second St. SW., Washington, D.C. 20593 (202) 426-1477.

SUPPLEMENTARY INFORMATION:

Background

The U.S. Coast Guard's regulations are codified in Parts 1 through 199 of Title 33, Parts 1 through 199 and 401 through 403 of Title 46 and Parts 420 through 453 of Title 49 of the Code of Federal Regulations (CFR). The Regulatory Flexibility Act (RFA) (Pub. L. 96-354, 5 U.S.C. 601 et. seq.) requires the Coast Guard to periodically review existing regulations that have a significant economic impact on a substantial number of small entities. In the June 29, 1981 **Federal Register** (46 FR 33405) the Coast Guard, as a part of the Department of Transportation's Notice of RFA review plans, published notice that it was undertaking a review of its rules to determine appropriate groupings to be considered "regulations" for the purpose of the RFA review.

Selection of Rules for Review

The Coast Guard has determined that, for the purposes of this review, the CFR Part will serve as the basic review unit. Recognizing that it may be appropriate to review several closely related CFR Parts concurrently or to divide the CFR Parts into smaller coherent units the Coast Guard will, in some instances, combine or subdivide CFR Parts for review. The Coast Guard will, by August 1, 1982, screen its rules and regulations in order to identify those which it believes do not have or will not have a significant impact on a substantial number of small entities. A list of all rules so identified will be published in the **Federal Register**. Barring public comment identifying the significant impact of these regulations on a substantial number of small entities, these regulations will not be further reviewed under the RFA. The Coast Guard believes that by eliminating this group of regulations it will be better able to plan its regulatory review work load and more efficiently concentrate on the more significant regulatory areas. The remaining rules and regulations will be scheduled for RFA review.

By October 1, 1982 and by October 1 of each succeeding year, a list of those remaining rules and regulations which have been selected for review during the succeeding year will be submitted by the Coast Guard for publication in the **Federal Register** as part of the Department's Semi-Annual Regulations Agenda and Review List. Appropriate information will be provided for each rule, including a brief description of the rule and the need for and legal basis of the rule. Public comment to aid in the review will be solicited.

The purpose of the RFA review will be to determine whether the rules should be continued without change, or should be amended or rescinded to minimize any substantial economic impacts of such rules upon a substantial number of small entities in a manner consistent with the statutes authorizing the rule. The factors that will be considered in this RFA review were specified in the Department's RFA review plan (46 FR 33404). The Coast Guard will review all such rules in effect on January 1, 1981 within ten years of that date. All rules adopted after January 1, 1981 will be reviewed within ten years of their adoption as final rules.

At the same time as it is conducting its screening of regulations for RFA review, the Coast Guard will concurrently screen its regulations with the added objective of identifying rules that may no longer serve the public

interest, even though they may not affect small entities. The goal of this screening is to identify those regulations which are no longer cost effective, obsolete, overly restrictive or overly burdensome or which duplicate or overlap other regulations. Rules identified in this screening process will be scheduled for modification in accordance with the appropriate procedures.

Public Participation

To help the Coast Guard in these screening processes and to aid in selecting the regulations which should be reviewed first, interested persons or organizations, especially small entities, are asked to identify any existing regulations which they feel might have a significant impact on a substantial number of small entities. The Coast Guard asks that these commenters provide: (1) the CFR citation, (2) a description of the economic effects of the regulation on small entities, (3) identification of any disproportionate effects, and (4) any recommendations for changes. Further, the Coast Guard invites comments regarding its selection of the CFR Part as the basic review unit or any suggestions for grouping or subdivision of CFR Parts into other coherent review units. Any additional pertinent comments or data will also be welcomed.

Dated: December 2, 1981.

CDR A.D. Utara,

Regulations Officer, U.S. Coast Guard.

[FR Doc. 81-35021 Filed 12-4-81; 8:45 am]

BILLING CODE 4910-14-M

[CGD 81-093]

Port Access Route Study

AGENCY: Coast Guard, DOT.

ACTION: Notice of study results.

SUMMARY: The purpose of this notice is to publish results of the Port Access Route study announced on April 16, 1979, in the **Federal Register** (44 FR 22543) and modified on January 31 1980 (45 FR 7026). Only the results for study areas 26 to 29 are published in this notice. Generally, these areas include the coasts of Oregon and Washington. The establishment of new vessel traffic routing measures is considered unnecessary at the present time within study areas 26, 27, and 28. Also, it is recommended that the port access routes for the entrance to the Strait of Juan de Fuca in area 29 continue to be addressed under a cooperative U.S./Canadian agreement.

Background

The Ports and Waterways Safety Act (PWSA) (Pub. L. 95-474, 92 Stat. 1473; 33 U.S.C. 1223), mandated that the Coast Guard "undertake a study of the potential traffic density and the need for safe access routes." The **Federal Register** for April 16, 1979 (44 FR 22543), announced the scope of the study and included a description of each area be studied. Coast Guard district staff officers were assigned responsibility for executing the study; and it has been conducted under the standards contained in sections 4 and 5 of the PWSA. As a result of the study, appropriate ship's routing measures, such as safety fairways and traffic separation schemes, may be proposed. Where the study indicates that no new routing measures are to be designated in an area, notice of such a conclusion is to be published in the **Federal Register.** However, areas for which results are published may be studied again in the future as changes in conditions warrant re-evaluation.

Results for areas 5, 5a and 6 (New York and Delaware approaches and Long Island Sound) were published in 46 FR 49035; for areas 13 to 20 (coasts of South Carolina, Georgia and Florida) in 46 FR 48376; and for area 21 (Gulf of Mexico) in 46 FR 49989. Results for the remaining study areas (1 to 4 in New England, 7 to 12 along the Mid-Atlantic coast, 22 to 25 along California, and 30 to 32 along Alaska) will be published in a future **Federal Register.**

The Thirteenth Coast Guard District performed the study for areas 26 to 29. Geographically, these areas are described as follows:

Area 26: Oregon Coast.
Enclosed by the coast and a line bearing 270° T from the coast at 42° N latitude to a point 125°10.0′ W longitude; thence a line bearing 357° T to 45°35.0′ N latitude, 125°25.0′ W longitude; thence a line bearing 090° T to the coast.

Area 27: Includes Columbia River Entrance.
Enclosed by the coast and a line bearing 270° T from the coast at 45°35.0′ N latitude to 125°25.0′ W longitude; thence a line bearing 349° T to 46°45.0′ N latitude, 125°45.0′ W longitude; thence a line bearing 090° T to the coast.

Area 28: Washington Coast.
Enclosed by the coast and a line bearing 270° T from the coast at 46°45.0′ N latitude to 125°45.0′ W longitude; thence a line bearing 344° T to 47°45.0′ N latitude, 126°10.0′ W longitude; thence a line bearing 090° T to the coast.

Area 29: Includes the entrance to the Strait of Juan de Fuca.
From the coast, including the entrance to the Strait of Juan de Fuca, seaward to the 1800 meter curve, from 47°45.0′ N latitude to the limit of Canadian jurisdiction.

The following study results do not go into detail on area 29, since development of access routes to the Strait of Juan de Fuca is part of the Canadian-United States *Agreement for a Cooperative Vessel Traffic Management System for the Juan de Fuca Region* (December 19, 1979). That joint effort will establish a vessel traffic management service, including a traffic separation scheme (TSS) at the entrance to and within the Strait of Juan de Fuca. This TSS has been adopted by the Marine Safety Committee of the Inter-Governmental Maritime Consultative Organization (IMCO); and, by international agreement, the TSS will become effective on January 1, 1982.

Study Method and Findings

1. *Shipping and Navigation.* Vessel traffic on the Washington-Oregon outer continental shelf consists of commercial vessels such as bulk carriers, freighters, tankers, tug and barge traffic, commercial and charter fishing vessels and pleasure craft. In the progress of this study the term "deep draft" will mean those vessels required by Title 33, Code of Federal Regulations, Part 161 (Vessel Traffic Management) to provide an advance notice of arrival and will necessarily include bulk carriers, freighters, tankers, etc. These larger ships and tugs operate out of Puget Sound ports, Columbia River ports, Coos Bay and Grays Harbor.

2. *Vessel Traffic Patterns and Densities.* Of primary importance in the evaluation of routing needs is accurate assessment of where the traffic is and how much there is of it. For the purpose of this study, commercial traffic has been broken down into five basic patterns:

(1) Columbia River traffic bound for an overseas location;

(2) Columbia River traffic bound south coastwise;

(3) Columbia River traffic bound north coastwise;

(4) North-South coastwise traffic (i.e., from locations in Puget Sound, Canada, etc. transiting coastwise to California, Panama Canal, etc.); and

(5) South-North coastwise traffic.

An analysis of data obtained from vessel arrival/departure logs over a two month period (March/April 1980) has been conducted in order to yield approximate transit statistics. The following is an analysis of traffic:

a. The primary route for deep draft traffic exiting all Columbia River and Puget Sound Ports is a direct great circle route to a Far Eastern location (218 vessels westbound and 152 vessels

eastbound over two months). This Far East trade route would not be considered in a recommended coastwise routing scheme, but would be considered in a port access scheme.

b. Coastwise traffic was measured at 72 vessels northbound and 62 vessels southbound over two months. Deep draft traffic entering Columbia River ports was counted at 96 vessels from the south and 118 from the north. Traffic exiting the Columbia River was counted at 77 vessels going south and 71 turning north. It is with these figures that this study is primarily concerned. The data indicates, on the average, the combined north/south traffic along the coasts of Washington and Oregon is between 1.5 and 2.5 deep draft vessels passing a given point on any given day. Even if these figures were doubled to account for statistical error, the traffic density still remains slight by any standard.

3. *Potential Traffic Density.* a. The number of vessels calling at Northwest ports and tonnage transported has been increasing slightly. Of importance, however, is the worldwide trend of barges and vessels becoming larger in size as fuel consumption and labor costs dictate more efficient transportation. A comparison of the Department of Commerce statistics for August 1978 and 1979 shows a decrease in the U.S. Merchant Marine Fleet of 13 deep draft vessels but an increase in their capacity by 1.6 million dwt.

b. There is a good possibility that trade will increase between the People's Republic of China and the Pacific Northwest. Whether the Puget Sound or Columbia River ports will dominate has not yet been determined.

c. Grain and log exports from the Northwest could decrease in the near future. A large portion of the grain has normally been destined for the USSR; however, the international situation can cause the tonnage to fluctuate. Log exports should remain stable or decrease as domestic concerns for this valuable natural resource increase. The current decline of employment in west coast lumber mills could impact the export of raw logs. Efforts are underway to increase the exporting of finished forest products.

d. A remote, long-term potential traffic density problem could occur as the costs of fuels increase with a significant rise in canal tolls for the Panama Canal Zone: conceivably, it could prove more economical to divert Far East shipping to Northwest ports for further transportation to the Mid-West and East Coast markets.

4. *Weather.* Wind, rain and fog are major considerations for the mariner along the Washington and Oregon coasts. Hazardous river bar conditions unique to this area can create problems for river entry. The impact of this condition is normally a delay in the time of river entry with subsequent standing off the coast by the vessel until conditions improve.

5. *Outer Continental Shelf (OCS) Development.* The Bureau of Land Management lease sales projected through 1985 do not include any areas off the Oregon-Washington coast. However, the U.S. Geological Survey has recently granted permits to the Western Geophysical Company of Houston, Texas, to conduct geophysical surveys in waters off Oregon and Washington.

6. *Statistics.* a. *Coos Bay, Oregon*—Over 500 commercial vessels excluding fishing vessels, call each year. Over 50% of this figure represents deep draft vessels which are enaged in coastal traffic while the remainder carry forest products to Japan. Bulk carriers and a few coastal petroleum product tankers are the major users of the port.

The total bar crossing by vessels utilizing pilotage (In and Out) are:

1977—690;
1978—624; and
1979—686.

b. *Newport, Oregon*—Newport averages about 20 deep draft vessels per year. Most of these vessels are bulk carriers transiting to and from Japan.

c. *The Columbia River Ports*—These ports average about 1800 deep draft vessels per year. Approximately 75% of this traffic is on its way to or from foreign ports. The total bar crossings by vessels utilizing pilotage (In and Out) for the River's entrance are:

1970–3870;
1975–3788; and
1978–4493.

Additional vessels consist of tuna clippers, tugs and barges, charter fishing vessels, private fishing vessels and pleasure craft.

d. *Grays Harbor, Washington*—The total bar crossings by vessels utilizing pilotage (In and Out) are as follows:

1977–420;
1978–485; and
1979–604.

Again the majority of this traffic is engaged in foreign trade. These statistics account for only large commercial vessels and do not include the pleasure craft, charter fishing vessels, small tugs and barges or commercial fishing vessels.

7. *Towboat Traffic.* Most of the tugboats and their tows proceed relatively close to shore. Their track lines are dependent on their origin, destination and the weather. In general, most of them cruise parallel to the coast at about the 30 fathom curve. According to the Northwest Tow Boat Association approximately 30 tugs per month transit the coastal waters. This tug traffic can conflict with crab fishing near shore and with black cod fishing further offshore. However, this potential problem has been avoided through informal agreements between towboat operators and crab/black cod fishermen since 1973. These agreement establish fishing/traffic lanes from Destruction Island, Washington (midway between the entrance of the Strait of Juan de Fuca and Grays Harbor) to San Francisco, California. The lanes are renegotiated annually by the fishing and towboat interests. A Coast Guard Notice to Mariners is published to inform all concerned of the agreed upon routes and radio contact frequencies. During the six years that the lanes have been in existence there has been very little interference between the two parties in the geographic areas covered. As a result of recent changes in fishing areas and techniques and an increase in coastal towboats traffic, the lanes were renegotiated in October 1981.

8. *Fishing Vessels.* The entire Washington-Oregon Outer Continental Shelf (OCS) is subject to regular commercial fishing at some time during the year, whether crabbing, salmon trolling or bottomtrawling. During the crabbing season there is usually a large concentration of crab pots between shore and out to about 30 fathoms. Between 50 and 70 foreign vessels (of approximately 300' in length) use OCS waters around the 100 fathom curve to fish for hake during spring, summer and early fall. Domestic vessel numbers range from several hundred to thousands along the Washington/Oregon coast depending on the time of year. Construction of larger U.S. registered fishing vessels which are capable of remaining at sea longer through increased fuel storage, crew accommodations/provisions and more sophisticated means of storing or processing the fish on board will most likely result in a total decrease in the number of vessels engaged in fishing with an increase in the total catch. The mobile nature of west coast fishing areas in such that the annual voluntary "agreements" provide an extremely effective means of traffic routing with the degree of versatility necessary for traffic control.

9. *Existing Routes.* There are presently three routing systems for offshore traffic and port access.

a. *Offshore*—The "U.S. Coast Pilot 7. Pacific Coast" publishes a recommended route for coastal traffic. The Coast Pilot route for the offshore areas of Washington and Oregon consists of basically three rhumb lines as follows:

7 miles off Cape Blanco (43° N) direct to 7 miles off the Columbia River entrance to 7 miles off Cape Alava (48° N) to the Strait of Juan de Fuca entrance. The sourthern half has depths from 70 to 150 fathoms with a general depth of 100 fathoms. The northern half depths are generally in the vicinity of 40 fathoms. The general distance offshore is from 10 to 15 miles with a closing to 7 miles at the turn point. This general decrease in distance offshore facilitates more precise navigation at the turn points through the use of radar, radio beacon and fathometer information. The Coast Pilot suggests southbound vessels shape courses through positions a mile further off the mainland.

b. *TAPS Routes/Strait of Juan de Fuca TSS*—North and South bound Trans-Alaska Pipeline System (TAPS) Routes were established and published in a 1977 Notice to Mariners. These are "recommended" routes and are thus voluntary. In response to Canadian environmental concerns, the U.S. is considering a revision which will move the routes further offshore where they parallel the Canadian coastline. The revision will be coordinated with the new TSS at the entrance to the Strait of Juan de Fuca.

c. *Port Accesses*—A passive system of aids to nagivation (i.e., buoys, ranges, lights, day markers and prominent shoreside points), guides the mariner through the channels and across the bars of the Northwest ports. In addition to this, Commander, Thirteenth Coast Guard District publishes a "Guide to Hazardous Bars" which offers local knowledge and experience for the mariner's use. A copy of this guide is available from the Thirteenth Coast Guard District Office in Seattle, Washington.

10. *Previously Proposed Routes.* On 19 July 1979, the Pacific Merchant Shipping Association submitted a copy of a proposed vessel routing fairway system along the entire West Coast. This proposal was originally submitted to the Honorable Mario Biaggi, Chairman, House Subcommittee on Coast Guard and Navigation. The intent of the proposal is to insure mariners that clear shipping lanes are available where exploratory offshore platforms are established. The proposal was considered, in part, by the Port Access Route Study Group.

11. *Study Results.* 238 letters were mailed to various parties soliciting comments relative to the Port Access Route Study. A summary of letters sent and answers received follows:

Addressee	Solicitations	Response
Ports/pilots	32	8
Government agencies	30	7
Citizens/groups/associations/commissions	15	1
Steamship companies	51	2
Yacht clubs	24	0
Oil companies	18	0
Fish industry	39	1
Other companies	29	2
Total	238	21

A summary of the significant responses follows:

—*Washington State DOT Board of Pilotage Commissioners*—"It is too bad the Coast Guard can't consider vessel densities and safe routing of ships as affected by other reasonable uses (i.e., fishing, pleasure, or regatta boating) here in Puget Sound while they are at it."

—*Seaspan International Ltd of North Vancouver B.C.*—"* * * we consider it imperative that approaches to Harbors and the Straits of Juan de Fuca remain free of offshore structures and facets of the fishing industry that would impede the safe navigation of heavy tonnage vessels or tugs with tows. We would only be interested in any proposal of a shipping route in the subject area if Rule 10 of the 72 COLREGS was applicable so that all users of the waterways are fully made aware that under Rule 10 a vessel engaged in fishing shall not impede the passage of any vessel following a traffic lane." SEASPAN has found the Fishing/Towboat lanes as established "have been of great assistance to their Masters who through the information passed on to them have been able to stay clear of the majority of these users."

—*Northwest Towboat Association* and *TOTEM Ocean Trailer Express, Inc.*—. Submitted comments and information.

—*Crowley Martime*—provided important information on offshore structures and the possible effect on maneuvering tugs with tows.

—*Mobil Oil Company and American Petroleum Institute*—supported the belief that port access routes should no be used where there is not a clear need.

12. *Conclusions.* a. It would appear the major advantage of establishing routes and lanes would be to secure or reserve some areas for safe navigation and others for offshore structures. It is clear that an increase in either activity could necessitate routing measures. However, for the present and foreseeable future this situation is not envisioned for the coastal areas of Washington and Oregon. Traffic densities and lack of fixed offshore structures are such that established routes and lanes would not contribute to safety.

b. The designation of a traffic lane must take into account the inconveniences to fishermen and recreational boaters who must abide by Rule 10 of the international navigation rules while in the vicinity of a lane. Recreational boaters would be expected to navigate with the same precision required of larger vessels. Also, fishermen might have to forgo a potentially profitable catch because they are subject to Rule 10 once they are in a lane.

c. Of paramount concern is vessel safety. In areas where fixed lanes or routes are not really necessary, they may promote complacency in accurate navigation, prudent seamanship, and watchstanding alertness.

d. The offshore areas of Washington and Oregon experience unusually harsh weather conditions. Often this weather dictates the safe course and speed for transiting vessels. The establishment of fixed lanes in open sea areas might inhibit the flexibility of the mariner for keeping his vessel safe.

13. *Recommendation.* It is recommended that port access routes for the entrance to the Strait of Juan de Fuca continue to be addressed under the U.S./Canadian Agreement as a rule making project separate from, but under the same general guidelines as described in **Federal Register**, 16 April 1979.

Designation of access routes for Study areas 26, 27 and 28 are not recommended for the following reasons:

a. Effective voluntary route agreements are in effect governing fishing and towing vessels in the near shore area of of Oregon and Washington. These voluntary agreements as published in "Notice to Mariners" facilitate deep draft navigation.

b. No man-made obstructions to navigation presently exist in these port access study areas and none are contemplated in the near term.

c. The density of coastwise deep draft traffic does not warrant fixed access routes.

d. Outer Port Access areas are characterized as presenting exceptional sea room for competing interests. The practical effect is that the right of navigation is not being encumbered by other uses. The inner access areas, approaches to the Columbia River bar,

V 46 / 234
DEC 7 81
UMI

etc., are used exclusively for navigation, and, by nature, the needs of navigation are paramount.

Environmental Impact Statement: Los Angeles County, Calif.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in Los Angeles County, California..

FOR FURTHER INFORMATION CONTACT: Albert J. Gallardo, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California 95809, Telephone: (916) 440–2804.

SUMMARY INFORMATION: The FHWA, in cooperation with the California Department of Transportation (Caltrans) will prepare an Environmental Impact Statement (EIS) on a proposal to improve access to Los Angeles International Airport (LAX) and the surrounding areas by the selection and implementation of one or more of the following alternatives.

Alternative 1—Full Interchange: Construct full interchange at Arbor Vitae Street providing all traffic movements.

The existing northbound on-ramp from Manchester Street to I–405 and the existing off-ramp (Collector Road) to La Cienega Boulevard will be altered. A slip-ramp will be constructed between the collector road and the on-ramp. This will allow northbound traffic from Arbor Vitae Street to enter I–405 via the collector road, I–405 slip-ramp and on-ramp.

Alternative 2—Half Interchange: Construct southbound off and northbound on-ramps to Arbor Vitae Street to serve traffic to and from the north.

Alternative 3—Null (No Project): This would leave existing conditions as they are into the foreseeable future.

Alternative 4—Southbound, off ramp only: Construct a southbound off-ramp to Arbor Vitae Street providing traffic movements from the north only.

A scoping meeting is tentatively scheduled during December, 1981, to encourage affected parties to identify issues and insure that matters of importance are not overlooked in the early stages of review.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued on November 25, 1981.

Albert J. Gallardo,

District Engineer, Sacramento, California.

BILLING CODE 4910–22–M

National Highway Traffic Safety Administration

[Docket No. 75–29; Notice 6]

Safety Aspects of Motorized Bicycles; Notice of Amendment to Agency Guidelines; Request for Comments

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of amendment to agency guidelines; request for comments.

SUMMARY: This notice advises the public that the definition of "moped" in NHTSA's guidelines for State moped safety programs has been amended by deleting any reference to pedals. The amendment is based on the agency's finding, in response to an industry petition, that no significant safety differences exist between mopeds with pedals and those without pedals.

DATE: Comments must be submitted by January 6, 1982.

ADDRESS: Comments should refer to the docket and notice number and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590. Docket hours are 8 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Lewis Buchanan, Driver and Pedestrian Safety Division, Traffic Safety Programs, National Highway Traffic Safety Administration, Washington, D.C. 20590, (202) 426–2180.

SUPPLEMENTARY INFORMATION: On October 23, 1980, the National Highway Traffic Safety Administration published a series of 19 recommended guidelines for comprehensive State moped safety programs (45 FR 70366). The guidelines were intended to assist the States in developing effective programs to reduce the number and severity of moped accidents. Accompanying the guidelines was a recommended definition of a moped.

The definition adopted in the recommendations was developed by the National Committee on Uniform Traffic Laws and Ordinances (NCUTLO) and had been published in the 1979 Supplement III of the Uniform Vehicle Code (UVC). That definition described a moped as follows:

A moped is a motor-driven cycle both with pedals to permit propulsion by human power and with a motor which produces not to exceed two brake horse-power and which is not capable of propelling the vehicel at a speed in excess of 30 mph (48.km/h) on level ground. If an internal combustion engine is used, the displacement shall not exceed 50cc and the moped shall have a power drive system that functions directly or automatically without clutching or shifting by the operator after the drive system is engaged.

On December 15, 1980, the Motorcycle Industry Council ("MIC") petitioned the agency: 1) to withdraw the final recommendation in Docket No. 75–29 that defines "moped"; and 2) to establish a common definition of moped for the regulatory program under the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1981 et seq.) and for the grant program under the Highway Safety Act (23 U.S.C. 401–407), and to amend regulations to incorporate that definition.

The MIC stated that the pedal requirement in the definition was not based on performance criteria and therefore arbitrarily discriminated against mopeds without pedals. The agency thereupon analyzed the performance characteristics of the vehicles and could ascertain no significant safety benefit for pedals.

In its petition for rulemaking, the MIC proposed an amended definition which contained no reference to pedals. The agency has adopted the MIC definition, with minor changes for clarity, as the definition for the agency's guidelines for State moped safety programs. The definition is as follows:

"Moped" means a motor-driven cycle whose speed attainable in 1 mile is 30 mph or less, which is equipped with a motor that produces 2 brake horsepower or less. If an internal combustion engine is used, the piston displacement shall not exceed 50 cc and the power drive system shall not require the operator to shift gears.

Interested persons are invited to submit comments on the amended definition to the address given above. It is requested but not required that five copies be submitted. The comments will be maintained in the docket and will be considered in the context of any future amendments, either to the highway safety program guidelines or to the definitions applicable to motor vehicle safety standards (49 CFR Part 571.3).

Issued on November 30, 1981.

Charles F. Livingston,

Associate Administrator for Traffic Safety Programs.

BILLING CODE 4910-59-M

Office of the Secretary

Minority Business Resource Center Advisory Committee; Cancellation and Rescheduling of Meeting

This notice is given to advise of the cancellation of the Minority Business Resource Center Advisory Committee meeting originally scheduled to be held December 14, 1981. Notice of meeting was published in the **Federal Register** issue of November 27, 1981 (46 FR 57955).

Notice is hereby given of the rescheduling of said meeting for January 18, 1982, at 9:00 a.m. until 1:00 p.m. in Room 580 at 2 Embarcadero Center, San Francisco, CA 94111. The agenda for the meeting remains the same as published in the issue of November 27, 1981.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to attend and persons wishing to present oral statements should notify the Minority Business Resource Center not later than the day before the meeting. Information pertaining to the meeting may be obtained from Ms. Betty Chandler, Minority Business Resource Center, 400 7th Street, S.W., Washington, D.C. 20590, telephone (202) 426-2852. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, D.C. on December 1, 1981.

Melvin Humphrey,

Director, Office of Small and Disadvantaged Business Utilization.

BILLING CODE 4910-62-M

DEPARTMENT OF THE TREASURY

Customs Service

American Manufacturer's Petition to Classify Household Glassware; Extension of Time for Public Comment

AGENCY: Customs Service, Treasury.

ACTION: Notice of extension of time for comment.

SUMMARY: This notice extends the period of time within which interested members of the public may submit comments with respect to a notice of receipt of an American manufacturer's petition relating to the classification of imported household glassware. A document inviting the public to comment on this notice of receipt of an American manufacturer's petition was published in the **Federal Register** on November 12, 1981 (46 FR 55822). Comments were to have been received on or before December 14, 1981. A request has been received to extend the period of time for the submission of comments claiming that additional time is needed to secure and have tested imported glassware, and prepare a brief of the pertinent facts and law in response to the invitation for comments. Customs believes additional time for comment is warranted. Accordingly, this notice extends the period of time for comment to February 16, 1982.

DATE: Comments must be received on or before February 16, 1982.

ADDRESS: Written comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Thomas J. Lindmeier, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5727).

Dated: December 1, 1981.

Donald W. Lewis,

Director, Office of Regulations and Rulings.

CIVIL AERONAUTICS BOARD

[M–339, December 2, 1981]

TIME AND DATE: 10 a.m., December 9, 1981.

PLACE: Room 1027 (Open), Room 1012 (Closed), 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of items adopted by notation.
2. Report to the Department of Health and Human Services on the Board's Implementation of Age Discrimination Act of 1975, as amended. (OGC)
3. Agreements among members of the International Air Transport Association (IATA) amending the IATA Passenger Sales Agency Administration Rules (Agreement CAB 28518–R1) and the IATA Passenger Sales Agency Agreement (Agreement CAB 28518–R2) applicable in the United States. (Memo 938, BDA, OGC, BIA)
4. Commuter carrier fitness determination of Greater Pacific Airways, Inc. (Memo 949, BDA)
5. Commuter carrier fitness determination of New England Airlines, Inc. (BDA)
6. Dockets 39422, 39423, 39424; 90-day notices of Air Midwest, Inc. to reduce service at Roswell, New Mexico and to suspend all services at Carlsbad and Hobbs, New Mexico. (BDA, OCCR)
7. Docket EAS–352; Review of Essential Air Service Determination for Merced, California. (Memo 133–B, BDA, OGC, OCCR)
8. Docket 39781—Petition of Dulles Policy Task Force for discussion authority under section 412 and antitrust immunity under section 414. (BDA, OGC, BCCP)
9. Simplified Charter Rules. (BDA, BIA, OGC)
10. Oversales. (OGC, BCCP, BDA, BIA)
11. Dockets 30699, 30790, 34579, 36004, 36962 and 34485: *Oakland Service Case, U.S.-Benelux Low-Fare Proceeding, Application of Aeroamerica, Inc., for §§ 408 and 409 Approval, Applications of Aeroamerica, Inc for Certificate Authority, Application of Aeroamerica, Inc. for an Exemption.* (Memo 143–A, OGC)
12. Dockets 33363, 38976 and 38977, *Former Large Irregular Air Service Investigation, Applications of United Air Carriers, Inc. d/b/a/ Overseas National Airways.* (OGC)
13. Docket 39855—Application of South Pacific Island Airways, Inc. to amend its certificate for Route 281–F to serve additional points in the South Pacific. (BIA, OGC, BDA, BALJ)
14. Dockets 39935, 39799, 40035, 39942, 39949, 38721, 39888 and 39886—Applications of Action Air Cargo, Arrow, Challenge, Flying Tiger, Global, Rich, and Southern for certificates of public convenience and necessity to provide scheduled all cargo service between the United States and Latin America (BIA, OGC, BALJ)
15. Recent Negotiations with Japan. (BIA)
16. Docket 39710, Complaint of United Air Lines, Inc., against Japan Civil Aviation Bureau and Japan Air Lines, Co., LTD. (BIA)
17. Report on Poland. (BIA)
18. Report on Argentina. (BIA)
19. Upcoming meetings on ECAC. (BIA)
20. Docket 39692, United States-Chile Show Cause Proceeding. (Memo 481–C, BIA, OGC, BALJ)
21. Docket 39650—Application of Fast Air Carrier LTDA. For amendment of its foreign air carrier permit to engage in scheduled foreign air transportation between Chile, via intermediate points, and Miami/New York. (BIA, OGC, BALJ)

BILLING CODE 4000–01–M

7

NUCLEAR REGULATORY COMMISSION

DATE: Week of December 7, 1981 (Revised).

PLACE: Commissioners' Conference Room, 1717 H Street NW., Washington, D.C.

STATUS: Open/closed.

MATTERS TO BE CONSIDERED: *Tuesday, December 8:*

2 p.m.:
Discussion of Clinch River Breeder Reactor (public meeting)

Wednesday, December 9:

10 a.m.:
Discussion of Scheduling Matters Regarding TMI–1 Restart (closed meeting) (as announced)

2 p.m.:
Discussion of Policy and Planning Guidance (public meeting) (as announced)

Thursday, December 10:

10:00 a.m.:
Discussion of Management-Organization and Internal Personnel Matters (closed meeting) (as announced)

2:30 p.m.:
Affirmation/Discussion Session (public meeting) (as announced)

Items to be affirmed and/or discussed:

a. Proposed Amendment to 10 CFR 50.54(r)—Modification of Requirements for Submittal of Emergency Plans by Research and Test Reactor Licensees
b. Final Amendments to 10 CFR Parts 71 and 73 for Advance Notification to Governors of Transportation of Nuclear Waste Including Spent Fuel
c. Proposed Rulemaking, "Environmental Qualification of Electric Equipment for Nuclear Power Plants"
d. Final Rule on Intransit Physical Protection of Special Nuclear Material of Moderate Strategic Significance
e. Suggested Time Periods for Issuance of Initial Decisions
f. Review of Director's Decision on 2.206 Petition (Florida Power and Light Company)

ADDITIONAL INFORMATION: Discussion of Operational Data Evaluation, announced for Friday, December 11, has been cancelled.

AUTOMATIC TELEPHONE ANSWERING SERVICE FOR SCHEDULE UPDATE: (202) 634–1498. Those planning to attend a meeting should reverify the status on the day of the meeting.

CONTACT PERSON FOR MORE INFORMATION: Walter Magee (202) 634–1410.

Walter Magee,

Office of the Secretary.

[S–1826–81 Filed 12–3–81; 3:41 pm]

BILLING CODE 7590–01–M

OVERSEAS PRIVATE INVESTMENT CORPORATION

Regular Meeting of the Board of Directors

Regular meeting of the OPIC Board of Directors, Tuesday, December 15, 1981 at 10:00 a.m. (Closed Portion); 11:00 a.m. (Open Portion).

PLACE: Office of the Corporation. Seventh (7th) Floor Board Room; 1129 20th Street NW., Washington, D.C.

STATUS: The first part of the meeting from 10:00 a.m. to 11:00 a.m. will be closed to the public. The open portion of the meeting will start at 11:00 a.m.

MATTERS TO BE CONSIDERED:

(Closed to the Public 10 a.m. to 11 a.m.)

1. OPIC Budget FY 1982
2. Construction Insurance Program
3. Insurance Project in African Country
4. Insurance Project in African Country
5. Insurance Project in Middle East Country
6. Claims Report
7. Information Reports; General
8. Information Reports; Project Status

(Open to the Public 11 a.m.)

1. Approval of the Minutes
2. Confirmation of Scheduled Board Meetings
3. Personnel Actions
4. OPIC Amendments Act of 1981: Implementation
5. New Marketing Developments
6. Financial Highlights for FY 1981
7. Information Reports.

CONTACT PERSON FOR INFORMATION: Information with regard to this meeting may be obtained from the Secretary of the Corporation at (202) 653–2925.

December 3, 1981.

Elizabeth A. Burton,

Corporate Secretary.

Part II

Department of Health and Human Services

National Institutes of Health

Recombinant DNA Research; Proposed Actions Under Guidelines

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Recombinant DNA Research; Proposed Actions Under Guidelines

AGENCY: National Institutes of Health, PHS, DHHS.

ACTION: Notice to Proposed Actions under NIH Guidelines for Research Involving Recombinant DNA Molecules.

SUMMARY: This notice sets forth proposed actions to be taken under the NIH Guidelines for Research Involving Recombinant DNA Molecules. Interested parties are invited to submit comments concerning these proposals. After consideration of these proposals and comments by the NIH Recombinant DNA Advisory Committee (RAC) at its next meeting, the Director of the National Institute of Allergy and Infectious Diseases will issue decisions on these proposals in accord with the Guidelines.

DATE: Comments must be received by February 1, 1982.

ADDRESS: Written comments and recommendations should be submitted to the Director, Office of Recombinant DNA Activities, Building 31, Room 4A52, National Institutes of Health, Bethesda, Maryland, 20205. All comments received in timely response to this notice will be considered and will be available for public inspection in the above office on weekdays between the hours of 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Background documentation and additional information can be obtained from Drs. Stanley Barban or Elizabeth Milewski, Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland, 20205, (301) 496–6051.

SUPPLEMENTARY INFORMATION: The National Institutes of Health will consider the following changes and amendments under the Guidelines for Research Involving Recombinant DNA Molecules, as well as actions under these Guidelines.

1. Proposed Revision of Guidelines

Dr. Waclaw Szybalski, McArdle Laboratory for Cancer Research, University of Wisconsin, Madison, Wisconsin, has requested that the following sentence be added to the current NIH Guidelines:

"These are only Guidelines based on the current state of the research and on the concerns of certain individuals or groups about the hypothetical risks. Individual researchers should use their best scientific judgement and peers' advice when designing, modifying and conducting experiments, and be prepared to justify any substantial variations when requested, or in their applications and progress reports."

2. Request To Use Bacillus Megaterium in Recombinant DNA Experiments Under P1 Containment

Dr. Patricia Vary of Northern Illinois University, DeKalb, Illinois, requests permission to introduce recombinant DNA derived from *Staphylococcus aureus, E. coli,* and *Bacillus subtilis* into *Bacillus megaterium* under P1 conditions.

3. Proposed EK2 Host-Vector Systems

Dr. Roy Curtiss, University of Alabama, Birmingham, Alabama, requests EK2 certification of six different *E. coli* K–12 strains in conjunction with various virulent and temperate bacteriophage lambda, plasmid and cosmid vectors. Dr. Curtiss also requests that all previously approved vectors be approved as vector components of the proposed EK2 host-vector systems. Detailed information on the proposed host-vector systems has been provided by Dr. Curtiss.

4. Proposed use of EK2 Host-Vector Systems for Cloning DNA from Class 3 and 4 Etiologic Agents

Dr. Roy Curtiss, University of Alabama, Birmingham, Alabama, requests permission to use all certified EK2 host-vector systems to clone DNA fragments from Class 3 and Class 4 etiologic agents under P2 containment, and under P1 containment if the recombinant clones are shown not to express a virulence determinant that has toxic potential.

As an alternative to this general proposal, Dr. Curtiss requests permission to clone DNA from *Yersinia pestis* and *Mycobacterium leprae* into EK2 host-vector systems under P2 containment, and under P1 conditions in the absence of expression of virulence determinants by the recombinant clones.

5. Proposed Pseudomonas Putida Host-Vector System

Dr. Michael Bagdasarian of the Max-Planck Institute of Fur Molekulare Genetik, Berlin, West Germany, requests HV1 certification of a host-vector system based on *Pseudomonas putida* strain KT2440 and cloning vectors pKT262, pKT263, and pKT264.

6. Proposed Inclusion of Yersinia Enterocolitica on Sublist A, Appendix A

Dr. Guy Cornelis of the Universite Catholique de Louvain, Brussels, Belgium, requests that *Yersinia enterocolitica* be exempted from the Guidelines under Section I–E–4 and added to Sublist A, Appendix A, on the basis that this species exchanges genetic information with *E. coli.*

7. Proposal for Revision of the Guidelines

Dr. Susan Gottesman of the National Cancer Institute of the National Institutes of Health has requested that the following proposal to modify the NIH Guidelines for Research Involving Recombinant DNA Molecules be published in the **Federal Register** for comment:

I. Introduction

There seems to be a clear consensus that the guidelines require simplification, reorganization, and possible lowering of containment levels for some classes of experiments. The Recombinant DNA Advisory Committee (RAC) will be considering at its next meeting a proposal, published for comment in the **Federal Register,** to convert the NIH Recombinant DNA Guidelines into a voluntary code of practice. This proposal would change the detailed listing of containment levels to a few paragraphs of advice to the investigator. I am recommending an alternative approach to revision which retains some aspects of the current guidelines which I consider necessary for the continued orderly development of the recombinant DNA field.

(1) My proposal, as opposed to the RAC proposal, retains the requirement for IBC oversight of some experiments, and retains the current NIH compliance requirements. In addition, the record-keeping function of the IBC is retained. Since many experiments became exempt from the requirements of the Guidelines as of July 1, 1981, the remaining requirements should not be too cumbersome to either the experimenter or the IBC.

(2) My proposal simplifies the structure of the Guidelines and decreases containment for some classes of experiments. In particular, experiments involving non-pathogenic prokaryotes and lower eukaryotes could be carried out at P1 containment. Overall, containment levels would not, however, be lowered to the extent recommended in the RAC proposal.

II. Summary of Proposed Changes as Compared to Current Guidelines

A. *Prohibitions.* The word "prohibition" will no longer be applied to this class of experiments which

currently require explicit RAC review and NIH approval.

1. Three of the five prohibitions (I–D–2, I–D–4, and I–D–5 in the current Guidelines) would be listed in a new section designated III–A and entitled "Experiments that require FAC review and NIH approval before initiation." These three prohibitions cover experiments involving the deliberate formation of recombinant DNAs containing genes for the biosynthesis of certain toxins lethal for vertebrates (I–D–2), the deliberate release into the environment of organisms containing recombinant DNA (I–D–4), and the deliberate transfer of a drug resistance trait to microorganisms that are not known to acquire it naturally if such acquisition could compromise the use of a drug to control disease agents in human or veterinary medicine or agriculture (I–D–5).

2. Prohibition I–D–1 in the current guidelines (formation of recombinant DNAs derived from CDC Class 4 or 5 organisms) would be deleted. Such experiments could be carried out under specific conditions set by the IBC, as described in a new section designated III–B and entitled "Experiments that require IBC approval before initiation".

3. Prohibition I–D–6 in the current Guidelines, which covers certain large-scale experiments, would be eliminated; such experiments could proceed after IBC approval (new section III–B–5). Currently the Guidelines permit certain large scale experiments involving *E. coli* K–12, *S. cerevisiae* and *B. subtilis* host-vector systems to proceed following review by the local IBC (46 FR 53983).

B. *Exemptions.* No changes in the substance of this section are proposed. The categories of exemptions now listed in Section I–E would be listed in a new Section III–D.

C. *Section II (Containment).* All references to HV3 systems would be deleted. Such systems are not presently in use and are not required by current or proposed guidelines. Otherwise, the section would remain as is.

D. *Section III (Containment Guidelines for Covered Experiments).* The complete text of Section III would be replaced by new text which would reorganize, simplify, and eliminate redundancy in the current Guidelines. In addition, significant lowering of containment for some classes of experiments is recommended. In the new Section III, all experiments would fall into one of four classes:

III–A. Current prohibitions; such experiments would require specific RAC review and NIH approval.

III–B. Experiments requiring prior review by the IBC. These would include the use of recombinant DNA molecules derived from or propagated in pathogens, non-defective animal virus systems, and the insertion of recombinant DNA into whole animals and plants. Many experiments which would be included in this section currently require NIH approval.

III–C. Experiments requiring notice to the IBC simultaneously with initiation of the experiment.

The proposal would change the procedure for reviewing recombinant DNA experiments involving non-pathogenic prokaryotes, lower eukaryotes, or defective animal virus systems. These experiments currently require prior review by the IBC. Under this proposal, investigators would not have to wait for IBC approval before initiating these experiments. In addition, containment requirements for experiments involving non-pathogenic prokaryotes and non-pathogenic lower eukaryotes would be relaxed.

III–D. Currently exempt experiments. No changes in the substance of this section are proposed.

E. Section IV. Changes as necessary to reflect changes in other sections of the Guidelines would be incorporated

F. Much material currently in Appendix E would be covered or superseded by the proposed changes in the Guidelines in Section III. Appendix D would be deleted.

III. Changes in Current Guidelines to Implement Proposal

A. *Current Section I.* Section I–A. *Purpose,* would remain unchanged.

Section I–B, *Definition of Recombinant DNA Molecules,* would be modified to include a statement on synthetic DNAs, and would read as follows:

"I–B. *Definition of Recombinant DNA Molecules.* In the context of these Guidelines, recombinant DNA molecules are defined as either (i) molecules which are constructed outside living cells by joining natural or synthetic DNA segments to DNA molecules that can replicate in a living cell, or (ii) DNA molecules that result from the replication of those described in (i) above.

"Synthetic DNA segments likely to yield a potentially harmful polynucleotide or polypeptide (e.g., a toxin or a pharmacologically active agent) shall be considered as equivalent to their natural DNA counterpart. If the synthetic DNA segment is not expressed *in vivo* as a polynucleotide or polypeptide product, it is exempt from the Guidelines."

Section I–C, *General Applicability,* would remain unchanged.

Section I–D, *Prohibitions,* would be deleted. (Some of this material is included in proposed new Section III–A).

Section I–E, *Exemptions,* would be deleted. (This material would be included in proposed new Section III–D)

B. *Current Section II.* Delete current Section II–D–1–c and subsections II–D–1–c–(1) through II–D–1–c–(5), Section II–D–2–b–(3) and references to HV3 in Section II–D–3.

C. *Current Section III.* Delete and replace current Section III and all subsections of III with the following text:

"Part III discusses experiments involving recombinant DNA. These experiments have been divided into four classes:

"III–A. Experiments which require specific RAC review and NIH approval before initiation of the experiment;

"III–B. Experiments which require IBC approval before initiation of the experiment;

"III–C. Experiments which require IBC notification at the time of initiation of the experiment;

"III–D. Experiments which are exempt from the procedures of the Guidelines.

"If an experiment falls into both class III–A and one of the other classes, the rules pertaining to class III–A must be followed. If an experiment falls into class III–D and into either class III–B or III–C as well, it can be considered exempt from the requirements of the Guidelines.

"Changes in containment levels from those specified here may not be instituted without the express approval of the Director, NIH (See Sections IV–E–1–b–(1), IV–E–1–b–(2), and subsections).

"III–A. *Experiments that Require RAC Review and NIH Approval Before Initiation.* Experiments in this category cannot be initiated without submission of relevant information on the proposed experiment to NIH, the publication of the proposal in the **Federal Register** for thirty days of comment, review by the RAC, and specific approval by NIH. The containment conditions for such experiments will be recommended by RAC and set by NIH at the time of approval. Such experiments also require the approval of the IBC before initiation. Specific experiments already approved in this section and the appropriate containment conditions are listed in Appendices E and G.

"III–A–1. Deliberate formation of recombinant DNAs containing genes for the biosynthesis of toxins lethal for vertebrates at an LD_{50} of less than 100 nanograms per kilogram body weight (e.g., the botulinum toxins, tetanus toxin diphtheria toxin. *Shigella dysenteriae*

neurotoxin). Specific approval has been given for the cloning in *E. coli* K–12 of DNAs containing genes coding for the biosynthesis of toxins which are lethal to vertebrates at 100 nanograms to 100 micrograms per kilogram body weight. Containment levels for these experiments are specified in Appendix G.

"III–A–2. Deliberate release into the environment of any organism containing recombinant DNA.

"III–A–3. Deliberate transfer of a drug resistance trait to microorganisms that are not known to acquire it naturally, if such acquistion could compromise the use of the drug to control disease agents in human or veterinary medicine or agriculture.

"III–B. *Experiments that Require IBC Approval Before Initiation.* Investigators performing experiments in this category must submit to their Institutional Biosafety Committee (IBC), prior to initiation of the experiments, a registration document that contains a description of: (a) The source(s) of DNA, (b) the nature of the inserted DNA sequences, (c) the hosts and vectors to be used, (d) whether a deliberate attempt will be made to obtain expression of a foreign gene, and, if so, what protein will be produced, and (e) the containment conditions specified in these Guidelines. This registration document must be dated and signed by the investigator and filed only with the local IBC. The IBC shall review all such proposals prior to initiation of the experiments. Requests for lowering of containment for experiments in this category will be considered by NIH (See Section IV–E–1–b–(3)).

"III–B–1. *Experiments Using CDC Class 2, Class 3, Class 4, or Class 5 Agents* as Host-Vector Systems.*

"III–B–1–a. Experiments involving the introduction of recombinant DNA into CDC Class 2 agents can be carried out at P2 containment.

"III–B–1–b. Experiments involving the introduction of recombinant DNA into CDC Class 3 agents can be carried out at P3 containment.

"III–B–1–c. Experiments involving the introduction of recombinant DNA into CDC Class 4** or Class 5 agents can be carried out at P4 containment. A USDA permit is required for work with Class 5 agents***.

"III–B–2. *Experiments in Which DNA from CDC Class 2 or Class 3 Agents* is Cloned in Nonpathogenic Prokaryotic or Lower Eukaryotic Host-Vector Systems.*

"III–B–2–a. Recombinant DNA experiments in which DNA from CDC Class 2 or Class 3 agents* is transferred into nonpathogenic prokaryotes or lower eukaryotes may be performed under P2 containment. Specific lowering of containment to P1 for particular experiments can be approved by the IBC. Many experiments in this category will be exempt from the Guidelines (See Sections III–D–4 and III–D–5). Experiments involving the formation of recombinant DNAs for certain toxin genes requires RAC review and NIH approval (see Section III–A–1), or must be carried out under NIH specified conditions as described in Appendix G.

"III–B–2–b. Recombinant DNA experiments in which DNA from CDC Class 4** or Class 5 agents is transferred into nonpathogenic prokaryotes or lower eukaryotes can be performed at P2 containment after demonstration that only a totally and irreversibly defective fraction of the agent's viral genome is present in a given recombinant. In the absence of such a demonstration, P4 containment should be used.

Note.—A USDA permit is required for work with Class 5 pathogens***.

"III–B–3. *Experiments Involving the Use of Whole Animal or Plant Viruses or Defective Animal or Plant Viruses in the Presence of Helper Virus in Tissue Culture Systems.*

"III–B–3–a. Experiments involving the use of whole CDC Class 2 animal viruses*, or defective CDC Class 2 animal viruses* in the presence of helper virus, can be performed at P2 containment.

"III–B–3–b. Experiments involving the use of whole CDC Class 3 animal viruses*, or defective CDC Class 3 animal viruses* in the presence of helper virus, can be carried out at P3 containment.

"III–B–3–c. Experiments involving the use of whole CDC Class 4 or Class 5 animal viruses*, or defective CDC Class 4 or Class 5 animal viruses* in the presence of helper virus, may be carried out under P4 containment. A USDA permit is required for work with CDC Class 5 pathogens***.

"III–B–3–d. Experiments involving the use of whole animal or plant viruses, or defective animal or plant viruses in the presence of helper virus, not covered by Sections III–B–3–a, III–B–3–b, or III–B–3–c may be carried out under P1 containment.

"III–B–4. *Recombinant DNA Experiments Involving Whole Animals and Plants.*

"III–B–4–a. DNA from any source except for greater than one quarter of a eukaryotic viral genome may be transferred to any non-human vertebrate organism and propagated under conditions of physical containment comparable to P1 and appropriate to the organism under study (2A).

"III–B–4–b. For all experiments involving whole animals and plants and not covered by III–B–4–a, the appropriate containment will be determined by the IBC.

"III–B–5. *Experiments Involving More than 10 Liters of Culture.*

The appropriate containment will be decided by the IBC. Where appropriate, the large scale containment recommendations of the NIH should be used (45 FR 24968).

"III–C. *Experiments that Require IBC Notice Simultaneously with Initiation of Experiments.*

"For experiments in this category, a registration document as described in Section III–B must be dated and signed by the investigator and filed with the local IBC. The IBC shall review all such proposals, but IBC review prior to initiation of the experiment is not required. All experiments not included in categories III–A, III–B, III–D, and subsections of these categories are to be considered as in category III–C. All such experiments can be carried out at P1 containment. Some explicit cases are listed below.

"III–C–1. *Experiments Involving Non-Pathogenic Prokaryotes or Non-Pathogenic Lower Eukaryotic Host-Vector Systems.*

"Experiments involving non-pathogenic prokaryotes or non-pathogenic lower eukaryotes can be carried out at P1 containment.

"III–C–2. *Experiments Involving Formation of Recombinant DNA Molecules Containing no More Than Two-Thirds of the Genome of any Eukaryotic Virus.*

"Recombinant DNA molecules containing no more than two-thirds of the genome of any eukaryotic virus (all viruses from a single Family (36) being considered identical (50)) may be propagated and maintained in cells in tissue culture using P1 containment. For such experiments, it must be shown that the cells lack helper virus for the specific Families of defective viruses being used. The DNA may contain fragments of the genome of viruses from more than one Family but each fragment must be less than two-thirds of a genome.

"III–D. *Exempt Experiments.*

"The following recombinant DNA molecules are exempt from these Guidelines and no registration with the IBC is necessary.

"III–D–1. Those that are not in organisms or viruses.

"III–D–2. Those that consist entirely of DNA segments from a single non-

chromosomal or viral DNA source, though one or more of the segments may be synthetic equivalent.

"III–D–3. Those that consist entirely of DNA from a prokaryotic host, including its indigenous plasmids or viruses, when propagated only in that host (or a closely related strain of the same species) or when transferred to another host by well established physiological means; also, those that consist entirely of DNA from a eukaryotic host, including its chloroplasts, mitochondria, or plasmids (but excluding viruses), when propagated only in that host (or a closely related strain of the same species).

"III–D–4. Certain specified recombinant DNA molecules that consist entirely of DNA segments from different species that exchange DNA by known physiological processes, though one or more of the segments may be a synthetic equivalent. A list of such exchangers will be prepared and periodically revised by the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment. (See Section IV–E–1–b–(1)–(d).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix A. An updated list may be obtained from the Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205.

"III–D–5. Other classes of recombinant DNA molecules, if the Director, NIH, with advice of the RAC, after appropriate notice and opportunity for public comment, finds that they do not present a significant risk to health or the environment. (See Section IV–E–1–b–(1)–(d).) Certain classes are exempt as of publication of these Revised Guidelines. The list is in Appendix C. An updated list may be obtained from the Office of Recombinant DNA Activities; National Institutes of Health, Bethesda, Maryland 20205."

D. *Current Section IV. Roles and Responsibilities.* Changes as necessary to reflect changes in Parts I–III only.

E. *Current Section V. Footnotes and References.* Changes as necessary to reflect changes in Parts I–III.

F. *Current Appendices.* Delete sections subsumed by proposed guideline changes; i.e. delete Appendix D and entries 1, 2, 3, 5, 7, 10, 11, 12, 14, 15, 17, 18, 20, 22, 24, 25, 26, 27, 28, 29, 33, and 34 of Appendix E.

Footnotes

* *Classification of Etiologic Agents on the basis of Hazard.* (4th Edition, July 1974). U.S Department of Health, Education and Welfare, Public Health Service, Centers for Disease Control, Office of Biosafety, Atlanta, Georgia 30333.

** All activities, including storage of variola and whitepox are retricted to the single national facility (World Health Organization (WHO) Collaborating Center for Smallpox Research, Center for Disease Control, in Atlanta).

*** A USDA permit, required for import and interstate commerce of pathogens, may be obtained from the Animal and Plant Health Inspection Service USDA, Federal Building, Hyattsville, MD 20782.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance.* Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require serveral additional pages. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in Section 8–(b)–(4) and (5) of that Circular.

Dated: November 25, 1981.

Richard M. Krause,

Director, National Institute of Allergy and Infectious Diseases, National Institutes of Health.

Part III

Department of Transportation

Office of the Secretary

Privacy Act of 1974; Annual Publication of Systems of Records

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Privacy Act of 1974; Annual Publication Of Systems Of Records

This preamble is to introduce the annual publication in the **Federal Register** of the systems of records of the Department of Transportation as of October 30, 1981. The Privacy Act (Public Law 93–579) requires such publication annually. The systems of records and General Routine Uses published herewith are now effective. None have been added which were not previously published in the **Federal Register** and at least 30 days allowed for comment. Where comments were received they have been considered and adopted, or the reasons for not adopting have been published.

Since February 1980, the last annual publication, 25 systems of records were cancelled and are deleted from this publication. Some of these are discontinued programs but many are the result of an Office of Personnel Management publication of nine systems covering certain types of personnel related systems governmentwide, and three by the Department of Transportation which cover all of the same types of files in the entire Department. This eliminated a large number of redundant systems of records published for elements of the Department.

Deletions since the last publication in February 1980 were: DOT/CG 501; DOT/FAA 809, 817, 818, 819, 823, 829, 835, 840, 841 & 842; DOT/FHWA 208, 221; DOT/FRA 103, 109; DOT/NHTSA 421, 438, 442, 443; DOT/SLS 156, 157; DOT/UMTA 179; DOT/OST 001; DOT/OST 039 & 005 were republished as DOT/All 2 and 3.

Added since the last publication in February 1980 are the following totally new systems of records: DOT/FAA 845, 846 and 847; DOT/FRA 130 and 131; DOT/NHTSA 470; and DOT/OST 062, and DOT/ALL 1. The DOT/ALL series 1, 2, and 3 now covers all files in the entire Department related to Grievances, Safety Management, and United States Government Vehicle Operators License Applications, respectively.

Several systems were renumbered to accommodate the reorganization which brought the Research and Special Programs Administration (RSPA) to the Department:

DOT/OST 015 became DOT/RSPA 01
DOT/OST 022 became DOT/RSPA 02
DOT/OST 040 became DOT/RSPA 03
DOT/OST 048 became DOT/RSPA 04
DOT/OST 049 became DOT/RSPA 05
DOT/OST 050 became DOT/RSPA 06
DOT/OST 054 became DOT/RSPA 07

All of the above are combined and included in this annual publication in the **Federal Register** for 1981 which supersedes the previous publication on February 21, 1980, FR Vol. 45, pages 11686 through 11788. Questions may be addressed to the Privacy Act Officer, Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590, or by telephone to John J. Windsor, 202–426–1887.

Issued in Washington, D.C. on November 25, 1981.

Robert L. Fairman,

Assistant Secretary for Administration.

DEPARTMENT OF TRANSPORTATION

The following listing is the 1981 publication of Systems of Records required by the Privacy Act of 1974. This replaces the Privacy Act Issuances, Annual Publication of the Department of Transportation, published by the Federal Register on February 21, 1980, Part II, beginning page 11686, Vol. 45.

NOTICE OF SYSTEMS OF RECORDS

The identification of the operating unit or units within the Department to which the particular system of records pertains appears as 'DOT/' followed by a designating abbreviation. The abbreviations and their meanings are as follows:

OST - Office of the Secretary of Transportation
CG - United States Coast Guard
FAA - Federal Aviation Administration
FHWA - Federal Highway Administration
FRA - Federal Railroad Administration
NHTSA - National Highway Traffic Safety Administration
RSPA - Research and Special Programs Administration
SLS - Saint Lawrence Seaway Development Corporation
TSC - Transportation Systems Center
UMTA - Urban Mass Transportation Administration

PREFATORY STATEMENT OF GENERAL

ROUTINE USES

The following routine uses apply to, except where otherwise noted or where obviously not appropriate, each system of records set forth below.

1. In the event that a system of records maintained by the Department to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigation or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

2. A record from this system of records may be disclosed, as a routine use, to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses if necessary to obtain information relevant to a Department decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

3. A record from this system of records may be disclosed, as a routine use, to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or

the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

4. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.

5. The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

6. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In such cases, however, the Congressional office does not have greater right to records than the individual. Thus, the disclosure may be withheld from delivery to the individual where the file contains investigative or factual information or to other materials which are being used, or are expected to be used, to support prosecution or fines against the individual for violations of a statute, or of regulations of the Department based on statutory authority. No such limitations apply to records requested for Congressional oversight or legislative purposes; release is authorized under 49 C.F.R. 10.35(9).

7. One or more records from a system of records may be disclosed routinely to NARS (GSA) in records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

8. Access to Systems of Records of the Department is authorized to member(s) of the Office of Inspector General where the records are considered '...pertinent to the DOT programs or operations being reviewed. Existing orders or (internal) directives contrary to this provision are hereby superseded.' The Secretary of Transporatation by the foregoing has clarified the role of Inspector General personnel 'who have need for the record(s) in the performance of their duties.'

9. The Department may make available to another agency or instrumentality of any governmental jurisdiction, including State and local governments, listings of names from any System of Records in the Department for use in law enforcement activities, either civil or criminal, or to expose fraudulent claims, regardless of the stated purpose for the collection of the information in the System of Records. These enforcement activities are generally referred to as 'matching' programs because two lists of names are checked for match using automated assistance.

This routine use is advisory in nature and does not offer unrestricted access to Systems of Records for such law enforcement and related antifraud activities. Each request will be considered on the basis of its purpose, merits, cost effectiveness and alternatives using 'Guidelines for the Conduct of Matching Programs' published by the Director, Office of Management and Budget, dated March 30, 1979.

DOT/ALL-1

SYSTEM NAME:

DOT Grievance Records Files.

SYSTEM LOCATION:

Records are maintained in the personnel office which services the aggrieved employee if the grievance was processed under DOT 3770.2, Agency Administrative Grievance System, pursuant to 5 CFR Part 771. If processed under a negotiated grievance procedure from an approved labor agreement on behalf of a member, of a group of members, of a recognized collective bargaining unit, or if processed by the union, the grievance record shall be maintained in the office of the official administering the labor agreement pertaining to the collective bargaining unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former DOT employees who have submitted grievances with their respective administrations under DOT Order 3770.2, of grievances pertaining to members of DOT Collective Bargaining Units which were submitted in accordance with negotiated grievance procedures.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains records relating to grievances filed by or on behalf of DOT employees within the Department of Transportation. Grievance case files contain relevant documents used in the processing of grievances under systems applicable to DOT employees, including statements of employees, witnesses, reports of interviews and hearings, factfinders and/or arbitrator's findings and recommendations, copies of decisions and correspondence and exhibits. Grievances in DOT may be submitted and processed through individually negotiated grievance systems contained in various labor agreements applicable to different collective bargaining units throughout the agency, or as prescription in DOT 3770.2, which is the Agency Administrative Grievance System applicable to DOT headquarters employees and all employees of DOT operating administrations, except where operating administrations have promulgated their own grievance systems.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used:

To disclose pertinent information to the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or crimminal law or regulation.

To disclose information to any source from which additional information is requested in the course of processing a grievance to the extent necessary to identify the purpose(s) of the request and identify the type of information requested.

To disclose information to a Federal agency in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security clearance, the conduction of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, or the issuance of a license, grant, or other benefits by the requesting agency, to the extent that the information is relevant and necessary to requesting the agency's decision on the matter.

To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

To disclose information to another Federal agency or to a court when the Government is party to a judicial proceeding before the court.

By the national Archives and Records Service (General Services Administration) in records management inspections conducted under authority of 44 USC 2904 and 2906.

By the agency maintaining the records or the Office of Personnel Administration (OPM), in the production of summary descriptive statistics and analyical studies in support of the function for which the records are collected and maintained, or for related work force studies. While published statistics and studies do not contain individual identifiers, in some instances the selection of elements of data included in the study may be structured in such a way as to make the data individually identifiable by officials.

To disclose information to officials of the Merit Systems Protection Board, including the Office of the Special Counsel, the Federal Labor Relations Authourity and its General Counsel, or the Equal Employment Opportunity Commission when requested in performance of their authorized duties.

To disclose in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial or administrative proceeding.

To provide information to officials of labor organizations recognized under the Civil Service Reform Act when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders.

RETRIEVABILITY:

These records are retrieved by the names of the individuals on whom they are maintained, or by names and local identification of unions.

SAFEGUARDS:

These records are maintained in lockable metal filing cabinets to which only authorized personnel have access.

RETENTION AND DISPOSAL:

These records may be disposed of 3 years after closing of the case. Disposal is by shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel, M-10
U.S. Department of Transportation
400 7th Street, S.W., Room 9401
Washington, D.C. 20590

NOTIFICATION PROCEDURE:

It is required that individuals submitting grievances be provided, on request, a copy of the record under the grievance process. They may, however, contact the agency personnel or designed office where the action was processed regarding the existence of such records on them. They must furnish the following information for their records to be located and identified.

Name.

Date of Birth.
Approximate date of closing of the case and kind of action taken.
Organizational component involved.
Statement as to whether the grievance was processed under administrative or negotiated grievance procedures.

RECORD ACCESS PROCEDURES:

It is required that individuals submitting grievances be provided, on request, a copy of the record under the grievance process. However, after the action has been closed an individual may request access to the official copy of the grievance file by contacting the agency personnel or designated office where the action was processed.
Individuals must provide the following information for their records to be located and identified.
Name.
Date of Birth.
Approximate date of closing of the case and kind of action taken.
Organization component involved.
Statement as to whether the grievance was processed under administrative or negotiated grievance procedures.
Individuals requesting access must also follow the DOT Rules regarding identification, (Title 49, Part 10, Section 10.37) to ensure he or she is who they claim to be.

CONTESTING RECORD PROCEDURES:

Reviews of requests from individuals seeking amendment of their records which have been the subject of a judicial or quasi-judicial action will be limited in scope. Review of ammendment requests of these records will be restricted to determining if the record accurately documents the action of the agency ruling on the case, and will not include a review of the merits of the action, determination, or finding.
Individuals wishing to request amendment to their records to correct factual errors should contact the agency personnel or designated office where the grievance was processed. Individuals must furnish the following information for their records to be located and identified.
Name.
Date of Birth.
Approximate date of closing of the case and kind of action taken.
Organizational component involved.
Statement as to whether the grievance was processed under administrative or negotiated grievance procedures.
Individuals requesting amendment must also follow the Department of Transportation Privacy Act Regulations regarding amendments, Title 49, Part 10, Sections 10.41, 10.43, 10.45, and 10.51.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided
By the individual on whom the records is maintained.
By testimony of witnesses.
By agency officials.
From related correspondence from organization or persons.

DOT/ALL-2.

SYSTEM NAME:

Safety Management Information System (SMIS).DOT/ALL.

SYSTEM LOCATION:

Department of Transportation (DOT), Office of the Secretary (OST), Transportation Computer Center, Department of Transportation (DOT), 400 7th Street, SW, Room 2401, Washington, DC 20590.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Federal Civilian/Military Employees of the Department of Transportation:
Contractors working on DOT premises; and
DOT Real & Personal Property.

CATEGORIES OF RECORDS IN THE SYSTEM:

All DOT Accident Reporting Records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Issue automated records to the U.S. Dept. of Labor, OSHA.
Submit quarterly accident statistics data to DOT operating administrations.
Develops statistical summaries & special analysis listings for use in programming safety management functions, departmental level budget function as it relates to OWCP, and maintains 5 year OSHA requirement for accident record retention.
See Prefatory Satement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic Tapes and Disks.

RETRIEVABILITY:

Name/Social Security Number/ Accident Report Number/Special Project Data Programming.

SAFEGUARDS:

Transportation Computer Center maintains both physical security and personnel security. Retrieve/access procedures. The records are disposed of by blanking/erasing the magnetic tape or disk.

RETENTION AND DISPOSAL:

Kept 5 years then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel and Training, M-10.
Department of Transportation,
Office of the Secretary,
400 7th Street, SW,
Washington, DC 20590.

NOTIFICATION PROCEDURE:

Quarterly management analysis delivered to safety managers or all operative administrators. Special data may be provided by request in written form to:
Director
Office of Personnel & Training, M-10
at the above address.

RECORD ACCESS PROCEDURES:

An individual may gain access to his record by request to the System Manager.

CONTESTING RECORD PROCEDURES:

Contest of these records will be to the Office of Personnel and Training. If resolution is not satisfactory to the individual, an appeal may be filed with Secretary of Trasnportation addressed to the General Counsel as follows:
Department of Transportation,
Office of the Secretary,
Office of the General Counsel,
400 7th Street, SW, Room 10428,
Washington, DC 20590.

RECORD SOURCE CATEGORIES:

DOT Form 3902.1,
DOT Form 3902.2,
DOT Form 3902.3,
DOT Form 3902.4,
DOT Form 3902.5,
DOT Form 3902.6,
DOT Form 3902.7,
DOT Form 3902.8.

DOT/All 3

SYSTEM NAME:

Application for U. S. Government Motor Vehicle Operator's Identification Card (Government Drivers License). DOT/ALL.

SYSTEM LOCATION:

Department of Transportation (DOT), Office of the Secretary (OST),
Transportation Branch (M-444),
400 7th Street, SW, Room 2318,
Washington, DC 20590. Corresponding application offices in all other DOT subordinate Administrations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This system of records contains information regarding all DOT

employees who are licensed to operate government vehicles.

CATEGORIES OF RECORDS IN THE SYSTEM:

Application for operator's Identification Card.
Physical fitness inquiry.
Accident Reports.
NHTSA Vehicle Driver Register Report.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Determine qualifications and fitness for issuance, retention, revocation or renewal of operators license.
Limited access to issuing official and those persons whose official duties require such access.
See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The records are maintained in a locking filing cabinet in folders, at each location within OST and Administrations.

RETRIEVABILITY:

These records are filed in alphabetical order with a cross reference by permit number in a log.

SAFEGUARDS:

Limited access to issuing official and those persons whose official duties require such access.

RETENTION AND DISPOSAL:

Retained for 5 years after separation, retirement or transfer of individual or expiration of license and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Transportation Branch,
Department of Transportation,
Office of the Secretary,
Chief, Transportation Branch 400 7th Street, SW, Room 2318, Washington, DC 20590.

NOTIFICATION PROCEDURE:

Inquiries may be addressed to:
Department of Transportation,
Office of the Secretary,
Transportation Branch, M-444,
400 7th Street, SW, Room 2318,
Washington, DC 20590.

RECORD ACCESS PROCEDURES:

Individuals who desire access to the information about themselves in this system of records should contact, or address their inquiries to, the system manager or to the appropriate office with their own organization

CONTESTING RECORD PROCEDURES:

To contest a record, contact the System Manager.

RECORD SOURCE CATEGORIES:

Applications received from individuals for operator's license.
Accident reports received from individuals.

DOT/CG 501.

SYSTEM NAME:

Auxiliary Management Information System (AUXMIS). DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT).
United States Coast Guard (CG),
Office of Boating, Public & Consumer Affairs (G-B)
2100 2nd Street, SW, Room 4304.
Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All present Coast Guard Auxiliarists.
All Auxiliarists disenrolled since 1974.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personal information (name, address, birthdate, Social Security Number (SSN), phone number).
Auxiliary qualifications information (Instructor, Examiner, Specialty).
Auxiliary Activities information (patrols conducted, classes taught).
Information on boats, radio stations or aircraft owned by Auxiliarists.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Cumulative unit and individual activity summaries for use as a management tool by all Auxiliary units.
Identification cards for all Auxiliary members.
Alphabetical nationwide cross-reference listing for use by headquarters and district office staffs.
Mailing labels for district mailings to Auxiliarists.
An annual member summary of all information on each member which is mailed directly to the member concerned.
Used by:
District Directors of Auxiliary.
Chief Director of Auxiliary.
All elected and appointed officers of the Auxiliary.
See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

AUXMIS master records contain personal and activity information concerning USCG Auxiliarists and Director of Auxiliary (DIRAUX). Each person's record consists of 500 characters. The approximately 50,000 records which are stored in the system presently are stored on both magnetic tape and magnetic disk.

RETRIEVABILITY:

The current AUXMIS master file residing on magnetic disk is retrieved by number and name of the individual and can be accessed by those Directors of Auxiliary with access to the CDC-3300 system at any time. Those DIRAUX without access to the CDC-3300 can request inquiries to be done at the central site by the Office of Boating Safety.

SAFEGUARDS:

The master files cannot be accessed without the proper control cards. All DIRAUX and Chief, Director of Auxiliary have the means available to access the master files.

RETENTION AND DISPOSAL:

Retention of weekly tape files is 180 days at which time they are erased
Retention of disk files is 1 week, and then updated.
Retention of the year-end tape file is permanent.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Director of Auxiliary, G-BAU,
Department of Transportation,
United States Coast Guard,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation
United States Coast Guard
Headquarters,
Management Analysis Division, G-CMA,
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Individuals in the Auxiliary have their record available on a quarterly basis in the Flotilla Roster produced for their flotilla. All information except the Social Security Number and date of birth is on the Flotilla Roster. On an annual basis, the member receives a personal report concerning himself only which contains all elements of his record. At any time during the year, members of the Auxiliary can request through the DIRAUX where attached for access to their member's jacket retained by DIRAUX or can request a report in the annual report format.

CONTESTING RECORD PROCEDURES:

Record content can be contested at any time, and if error is found all DIRAUX have the means to correct individual records. Members are provided the means to correct their own addresses, SSN's, names and phone numbers and occupations.

RECORD SOURCE CATEGORIES:

All records pertaining to Auxiliarists are derived from forms which are filled out by the individuals involved on a voluntary basis.

DOT/CG 503.

SYSTEM NAME:

Motorboat Registration. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-B)
2100 2nd Street, SW,
Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Boat owners registering for the issuance of boat identification numbers for boats recorded in the States of Washington, Alaska, and New Hanpshire and in American Samoa.

CATEGORIES OF RECORDS IN THE SYSTEM:

Tapes: (Computer listings on disk with information on boat owner: name, address, and boat information).
Printouts- Same.
Office files- Same.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by:
Authorized Coast Guard Personnel involved in the Coast Guard boating safety program.
To renew old registrations to issue new number to all motorboats.
The purpose of the numbering system is for identification of recreational boats in case of accident, loss, theft, or abandonment.
See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All records are maintained in file cabinets.

RETRIEVABILITY:

By name/number.

SAFEGUARDS:

Only authorized office personnel have access to subject files. All personnel screened prior to allowing access. Building secured and guarded after duty hours.

RETENTION AND DISPOSAL:

Records are retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Boating, Public and Consumer Affairs
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Contact:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual whose record(s) are being requested.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by visiting Coast Guard Headquarters or writing to:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Individual applicant.

DOT/CG 505.

SYSTEM NAME:

Recreational Boating Law Enforcement Case Files. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Coast Guard District Offices and Headquarters unit offices for records of incidents in their localities. Addresses in Appendix 1.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Owners/operators of vessels found in violation of Federal recreational boating laws or regulations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Case files containing names of violators, their addresses and social security numbers, together with descriptions of boats and notations of the alleged violations of Federal boating laws, and copies of correspondence relating to the disposition of any penalty involved.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information contained in this system is used by authorized Coast Guard employees in performance of their duties to determine the appropriate enforcement action to be taken by the Coast Guard in individual cases as well as providing a record of repeated offenders.
See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information in this system is maintained on index cards, in logbooks, and in file folders.

RETRIEVABILITY:

Information is retrieved by name of individual in alphabetical file.

SAFEGUARDS:

Information available only to authorized personnel. Files maintained in office in building which is secured during non-working hours and which has a roving guard patrol.

RETENTION AND DISPOSAL:

Records in system maintained for three years before disposal by mutilation or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Boating, Public and Consumer Affairs
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting the Commandant (G-CMA) at the address in 'System Manager', or by visiting the local Coast Guard District or Unit where incident occurred.
Proof of identity will be required prior to release of records. A military identification card, driver's license or

V46/234 DEC 81 UMI

similar document is considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Notification Procedure.'

RECORD SOURCE CATEGORIES:

Information obtained from reports of Coast Guard boarding officers and marine safety investigations as well as from reports by citizens concerning possible violations of law or regulation.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system may be exempt from disclosure under the provisions of 5USC 552a (K)(2) which provide in part, that investigatory material compiled for law enforcement purposes may be withheld from disclosure to the extent that the identity of the source of the information would be revealed by disclosing the investigatory record, and the source has received an express guarantee that his identity would be held in confidence, or, prior to the effective date of this section, if the source received an implied promise that his identity would be held in confidence.

DOT/CG 507.

SYSTEM NAME:

Coast Guard Supplement to the Manual of Courts Martial Investigations. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-L),
2100 2nd Street, SW, Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Military and civilian employees of the Coast Guard and other individuals who may be involved in any Coast Guard investigation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Investigations into injuries to Coast Guard personnel, mishaps involving vessels, aircraft and vehicles.

Incidents involving fires, explosions, for loss or destruction of classified material.

Circumstances involving equipment failures and property damage, loss, or destruction.

Circumstances involving violation of standards of conduct personnel.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by authorized Coast Guard personnel in connection with the performance of their official duties which include, but are not limited to:

Accident prevention.

Payment of disability benefits,

Improvement of internal Coast Guard procedures and practices.

Reports are used in connection with the resolution of claims against the Coast Guard as well as claims asserted by the government.

Reports are transmitted to the Veterans Administration to assist that agency in determining entitlement to benefits administered by it.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records maintained in storage cabinets in division files for three years and then forwarded to the Federal Records Depository.

RETRIEVABILITY:

Card index maintained permitting access to individual investigations by listing identifiable data such as name of person, vessel or other facility involved in investigation.

SAFEGUARDS:

Authorized personnel are granted access to these records in connection with the performance of their official duties.

Records are disclosed to members of the public under the provisions of the FOIA. These requests are considered on a case by case basis.

RETENTION AND DISPOSAL:

Records are maintained in division files for three years and then forwarded to Federal Records Depository

SYSTEM MANAGER(S) AND ADDRESS:

Chief Counsel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Written request must be signed by the individual. Write to or visit:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

All individuals whose conduct is the subject of these investigations are designated at the outset as parties to these investigations and accorded their rights as such. Following completion of the investigative reports, parties will be provided with copies upon request.

At all subsequent times parties may have access to the investigative records by writing to or visiting Commandant (G-CMA), at the address in 'Notification Procedure' above or the local unit to which assigned.

Proof of identity may be required prior to release of records. Military identification, driver's license or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

A party has the right to make argument and/or submit statements on his own behalf during the course of an investigation or subsequent to its conclusion. Write or visit locations as indicated in 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Coast Guard investigating officers, military and civilian personnel.

DOT/CG 508.

SYSTEM NAME:

Claims and Litigation. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-L),
2100 2nd Street, SW, Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals, corporations, insurance companies, estate administrators.

CATEGORIES OF RECORDS IN THE SYSTEM:

Suits and claims for and against the Coast Guard.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by cognizant Coast Guard personnel, and attorneys handling cases.

For review purposes and determination as to the validity of claims.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File cabinets.

RETRIEVABILITY:

Two card index files, one alphabetic and one numeric, maintained for cross reference.

SAFEGUARDS:

Access is limited to Coast Guard and civilian employees of the Claims and Litigation Division granted in connection with official duties.

RETENTION AND DISPOSAL:

Records maintained for five years and then forwarded to the Federal Records Center. Card index files retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Counsel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Written request must be signed by the individual. Write or visit:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA0 at the address in 'Notification Procedure' above

Proof of identity may be required prior to affording access to records: A military identification card, a drivers licenses or similiar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Information obtained from Coast Guard military and civilian personnel, members of the public, and Coast Guard investigating officers.

DOT/CG 509.

SYSTEM NAME:

Non-Judicial Punishment Report. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-L),
2100 2nd Street, SW, Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard military personnel who have been subject to non-judicial punishment proceedings under Article 15 of the Uniform Code of Military Justice.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of Proceedings under Article 15, Uniform Code of Military Justice.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Coast Guard Personnel, in connection with military justice administration.

Records provide statistical data concerning the number of proceedings held, units holding proceeding, offenses committed, punishments imposed, and background data of individuals concerned.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File cabinet.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Records are made available to authorized personnel. Records are maintained in building with limited access during non-working hours and with roving security patrol.

RETENTION AND DISPOSAL:

New system, disposal procedures not as yet established. Back-up material disposed of after introduction into system.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Counsel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD SOURCE CATEGORIES:

Trial proceedings and subsequent statutory reviews - Court of Military Review, Court of Military Appeals and Chief Counsel of the Coast Guard.

DOT/CG 511.

SYSTEM NAME:

Legal Assistance Case File System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-L),
2100 2nd Street, SW,
Washington, DC 20593.
System is also located at:
United States Coast Guard District Legal Offices and
Legal Offices of Coast Guard Units. See Appendix I for addresses of the District and other legal offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Clients of officers assigned to render legal assistance regarding the personal affairs of Coast Guard military members.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain information concerning the matters handled by these officers for clients.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information is used on behalf of clients in providing legal assistance.

These records are also used to prepare statistical reports concerning a legal officer's time utilization.

The Prefatory Statement of Routine Uses applies to records in this system only to the extent that their disclosure would not constitute a violation of the judicially recognized privilege attaching to attorney-client communications and of the ethical and professional responsibilities of lawyers under the American Bar Association's Code of Professional Responsibility.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Normally, written records kept in file folders.

RETRIEVABILITY:

Alphabetical indexes by name of member.

SAFEGUARDS:

Kept in office space or filing cabinets which are normally locked during non-working hours. Building patrolled by roving security guards after duty hours.

RETENTION AND DISPOSAL:

Records retained as long as needed to serve client or as long as deemed necessary by the legal officer. Disposal is by whatever means considered appropriate by the legal officer, depending on the contents of the record involved.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Counsel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.
District or unit legal offices:
Senior Counsel, for records maintained at the particular location (See Appendix I for addresses).

NOTIFICATION PROCEDURE:

Requests for determination whether this system contains records concerning an individual should be made in writing or in person to:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

These records are available in the Office of Chief Counsel at Coast Guard Headquarters or within the legal offices in the various Coast Guard districts or units, dependent on where legal assistance was rendered.

A military identification card or other comparable identification will be required to be shown by persons seeking access to their legal assistance records.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting the contents of these records or for appealing initial determinations by the custodian therof not to disclose any part of these records shall be controlling. These rules may be obtained by writing: Commandant (G-CMA) at the address listed in 'Notification Procedure.'

RECORD SOURCE CATEGORIES:

Information in this record system is obtained from the client involved and as a result of any subsequent investigation by the legal officer on behalf of the client.

DOT/CG 516.

SYSTEM NAME:

Coast Guard Military Discrimination Complaints. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-H),
2100 2nd Street, SW,
Washington, DC 20593.
Records are also maintained at:
Each District Office and Headquarters Unit at the addresses in Appendix I.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard Military Personnel

CATEGORIES OF RECORDS IN THE SYSTEM:

Files contain discrimination complaints filed by Coast Guard military personnel or their representatives and correspondence resulting therefrom.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Department of Transportation, Office of Civil Rights:
Used for investigations of complaints and arriving at decisions for resolution of complaints.
Coast Guard Headquarters Military Personnel Office:
Used for information in making personnel administration decisions.
Coast Guard Headquarters, Commandant, Vice Commandant, Congressional Liaison: Used to answer correspondence being sent to Congressional representatives, federal and state officials, and nationally recognized organizations who are representing the individual.
Coast Guard Headquarters, Office of Civil Rights and the Military Equal Opportunity Division:
Used to take care of discrimination complaints and the correspondence precipitated therefrom and maintain a file on it.
All Coast Guard Commands:
Used to bring a complaint to a satisfactory conclusion, where possible.
See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders kept in file cabinets.

RETRIEVABILITY:

System is kept by alphabetical file, service number and/or social security number, rank/rate, and Coast Guard unit.

SAFEGUARDS:

During normal working hours access to records is controlled by office personnel; during non-working hours the building is guarded by a roving security patrol.

RETENTION AND DISPOSAL:

Files are kept permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Civil Rights,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW, Washington, DC 20593.

NOTIFICATION PROCEDURE:

Contact the following office in writing or in person:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local office where the record is filed.

Prior written notification of personal visits is required to insure that the records will be available at the time of visit.

Proof of identity will be required prior to affording access to records. A military identification, driver's license or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

From individuals or their representatives submitting complaints, congressional correspondence, personnel service, records, Coast Guard Headquarters and Coast Guard units correspondence, individuals and organizations volunteering information pertinent to complaints.

DOT/CG 517.

SYSTEM NAME:

Complaints of Discrimination. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-H),
2100 2nd Street, SW,
Washington, DC 20593.
Each District and Headquarters Unit: See addresses in Appendix I.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian employees (including non-appropriated funds employees) and applicants for employment.

CATEGORIES OF RECORDS IN THE SYSTEM:

Various memoranda, letters, statements, statistics and other information related to the situation which prompted the person to allege discrimination.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Investigating and processing complaints of discrimination by personnel in Office of Civil Rights, Investigators, Hearing Examiners, Employee Representatives, Coast Guard Officials.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Typed, hand-written, printed material stored in folders in metal filing cabinets.

RETRIEVABILITY:

Indexed by name and Coast Guard installation.

SAFEGUARDS:

Screening of personnel, need to know basis.

After duty hours, building is secured and roving security guards are on duty.

RETENTION AND DISPOSAL:

Maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Civil Rights,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Contact the following office in person or in writing:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

Procedure may be obtained by writing to or visiting the Commandant (G-CMA) at the address in 'Notification Procedure' or the local activity where the complaint was filed.

Prior written notification of personal visits is required to insure that the records will be available at the time of visit.

Proof of identity will be required prior to release of records. A military identification card, drivers license or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Interviews with complainant, employees, management officials; personnel records, internal Coast Guard memoranda.

DOT/CG 525.

SYSTEM NAME:

Active Duty Military Payroll System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-F)
2100 2nd Street, SW,
Washington, DC 20593.
System is used throughout the Coast Guard. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty military members.

CATEGORIES OF RECORDS IN THE SYSTEM:

Pay and allowances records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Prepare check tapes.

Prepare listings and reports for various USCG offices.

Reports of funds expended.

Reports of earnings to state and city taxing authorities.

Listing of earnings to appropriate taxing authoriites.

W-2 and federal tax reporting to the Internal Revenue Service.

FICA reporting.

Produce runs for reconciliation of allotments.

Produce mailing labels.

Used by Coast Guard employees in performance of official duties in preparing and maintaining the Active Duty Military Payroll System.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are filed manually in cabinets. Check tapes are retained in tape library.

RETRIEVABILITY:

Records are indexed alphabetically, check tapes are indexed by tape number.

SAFEGUARDS:

Access is limited to user staff members.

Secured building after duty hours.

RETENTION AND DISPOSAL:

Pay records are retained until closed (6 months) and then transferred to Headquarters, Pay Systems Branch.

Payroll listings are retained for 3 years and then transferred to a Federal Records Center.

Tapes retained for 6 years and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Comptroller
Department of Transportation,
United States Coast Guard
Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard
Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must be signed by individual.

RECORD ACCESS PROCEDURES:

Procedure may be obtained by writing to or visiting the Commandant (G-CMA) at the address in 'Notification Procedure', or the local Coast Guard District for the area in which an individual's duty station is located. See Appendix I for addresses.

Proof of identity will required prior to affording an individual access to records. A military identification card, a driver's license or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Information is obtained from the individual, Coast Guard personnel and payroll offices and the Department of Defense.

DOT/CG 526.

SYSTEM NAME:

Adjudication and Settlement of Claims System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT).
United States Coast Guard (CG).
Commandant (G-F)
2100 2nd Street, SW.
Washington, DC 20593.

Partial systems are located at Coast Guard Districts and Units. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty military members.
Reserve military members.
Retired military members.
Civilian employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Claims arising out of disputes concerning amounts of pay received.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To reach a final decision as to entitlements of claimants.

To use as precedential data in the resolution of similar questions in the future.

Used by authorized Coast Guard officials and officials of the IRS, GAO, and the Civil Service Commission, as required.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored manually in file folders.

RETRIEVABILITY:

Claims in the file are filed and retrieved by claimant name.

SAFEGUARDS:

Access is limited to authorized officials by screening of personnel.

Maintained in Government building having roving security guards after duty hours.

RETENTION AND DISPOSAL:

After adjudication and settlement, most submissions are disposed of. A limited number of such submissions are retained for precedential value, as required.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Comptroller,
Department of Transportation,
United States Coast Guard
Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

Offices of the District Commanders. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Masters, operators, owners, agents, shippers, charterers and/or pilots of commercial vessels and barges, reported for violations of United States port safety regulations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Computerized listings, by name, giving specific violations, date, place and penalty assessed.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Determining penalties to be assessed by Coast Guard hearing officers; execution of judgments by U. S. attorneys as necessary.
See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape or disc.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Restricted access data processing area. Program access by password.
Source documents and printouts are stored in locked rooms or file cabinets.

RETENTION AND DISPOSAL:

Disposed of 3 years after final disposition of case.
Paper files destroyed by mutilation, shredding or burning.
Magnetic tapes are obliterated by writing over magnetic surface till content is rendered useless and unreadable.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Marine Environment and Systems,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' above or the local Coast Guard District, at the address in Appendix I, where the violation occurred.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

Report of Violation, Form CG-2636, prepared by Coast Guard officials.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system may be exempt from disclosure under the provisions of 5 USC 552a (k)(2), which provide in part, that investigatory material compiled for law enforcement purposes may be withheld from disclosure to the extent that the identity of the source of the information would be revealed by disclosing the investigatory record, and the source has received an express guarantee that his identity would be held in confidence or, prior to the effective date of this section, if the source received an implied promise that his identity would be held in confidence.

DOT/CG 571.

SYSTEM NAME:

Physical Disability Separation System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-KMA),
2100 2nd Street, SW,
Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

USCG active duty personnel and USCG personnel separated or retired for physical disability.

CATEGORIES OF RECORDS IN THE SYSTEM:

Central Physical Evaluation Board files.

Formal Physical Evaluation Board files.

Physical Review Council files.

Physical Disability Appeal Board files.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by:

Coast Guard officials in connection with physical disability separation and retirement proceedings.

The Veterans Administration for assistance in determining the elgibility of individuals for benefits administered by that agency and available to USPHS or DOD medical personnel in connection with the performance of their official duties.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

By name of individual .

SAFEGUARDS:

Roving guard patrol. Restricted personnel access by screening.

RETENTION AND DISPOSAL:

Retained two years after disposition then transferred to Federal Records Center, St. Louis, MO.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Health Services,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must include a notarized statement attesting that the individual requesting the notification is in fact the individual about whom information is requested.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure.'

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure' above.

RECORD SOURCE CATEGORIES:

Information in records developed through proceedings of administrative bodies listed in 'Categories of Records' above.

DOT/CG 572.

SYSTEM NAME:

USCG Military Personnel Health Record System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-KPS),
2100 2nd Street, SW,
Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

USCG active duty personnel. USCG active duty personnel dependents,

Dependents of USCG active duty personnel.

Department of Defense active duty personnel and dependents.

Dependents of USCG and DOD retired personnel and their dependents.

Members of USCG Reserve.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of medical and dental treatment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by medical staff in affording medical and dental treatment to personnel listed in 'Categories of Individuals' above.

Provided to the Social Security Administration and Veteran's Administration for use in determining an individual's entitlement to benefits administered by those agencies.

Records are provided to the Department of Health, Education and Welfare for purposes of the Federal Medical Care recovery set.

Records are available to the Public Health Service or DOD medical personnel in connection with medical treatment of individuals at USPHS or DOD facilities.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Name and military identification number.

SAFEGUARDS:

Roving guard patrol. Room in which records are located is locked when unattended.

Access limited to these records at all times by personnel screening.

RETENTION AND DISPOSAL:

Retained so long as individual is assigned to the particular area. Transmitted to new duty station upon transfer of member/sponsor. Incorporated into personnel record file system upon transfer, separation, or retirement.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Health Services,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local District or Headquarters Unit Office for the area in which assigned. See Appendix I for locations. See Appendix II for details pertaining to release of medical records.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Medical facilities where treatment received and from the individual.

All Field Units with Medical Personnel assigned. See Appendix I for locations.

DOT/CG 573.

SYSTEM NAME:

U.S. Public Health Services (USPHS) Commissioned Officer Corps Staffing and Recruitment Files. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT), United States Coast Guard (CG), Commandant (G-KMA), 2100 2nd Street, SW, Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Personnel records of USPHS commissioned officers assigned to duty with the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel records, Commissioning applications, assignment preference, reference questionnaires, background information.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used to assist administrators in assigning personnel to area requiring their specific skills.

Used to monitor career development of personnel assigned to program.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

By name of individuals.

SAFEGUARDS:

During working hours access is controlled by office personnel; during non-working hours building is patrolled by roving security patrol.

RETENTION AND DISPOSAL:

Records are retained during period of an individual's assignment to the Coast Guard. Thereafter, records are destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Health Services, Department of Transportation, United States Coast Guard Headquarters, 2100 2nd Street, SW, Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation, United States Coast Guard Headquarters, Commandant (G-CMA), 2100 2nd Street, SW, Washington, DC 20593.

Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure'.

Proof of identity will be required prior to release of records. A military identification card, driver's license or similiar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Previous employers, educational institutions, references, Coast Guard Medical Administrators and the individual.

DOT/CG 586.

SYSTEM NAME:

Chemical Transportation Industry Advisory Committee. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT), United States Coast Guard (CG), Commandant (G-M), 2100 2nd Street, SW, Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Committee members.

CATEGORIES OF RECORDS IN THE SYSTEM:

Address, phone number.
Biographical sketch.
Committee information.
Minutes of meetings.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Arranging meetings, keeping records of committee business, determine committee membership.

Used by Coast Guard personnel in the performance of offficial duties.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

By committee name/individual name.

SAFEGUARDS:

Personnel screening prior to granting access.

Building has roving security after hours.

RETENTION AND DISPOSAL:

Permanently retained.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Merchant Marine safety.
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure.'

Proof of identity will be required prior to granting access. A military identification card, driver's license or similar document is considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

From the individual of record.

DOT/CG 587.

SYSTEM NAME:

Investigation of Violations of Marine Safety Laws or Regulations. DOT/CG.

SYSTEM LOCATION:

District Offices - See Appendix I for addresses.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have violated or who are suspected of violating marine safety or related laws or regulations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports of violation and supporting documents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Evaluation by Coast Guard personnel for law enforcement purposes.

Evaluation by other agencies, state, local and foreign governments for purposes of law enforcement, and other purposes which the agency may deem necessary for their mission.

For use in civil litigation.

For insurance purposes.

Use by the general public.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records pertaining to violations of law or regulation are retrieved by individual name or vessel name.

SAFEGUARDS:

Destroyed three years after case is closed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Merchant Marine Safety,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting (G-CMA) at the address in 'Notification Procedure' or the local Coast Guard District for the area in which the alleged violation occurred.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Coast Guard investigating records compiled as a result of vessel casualty.
Investigations by other law enforcement agencies.
Vessel operator complaints.
Deficiencies noted during Coast Guard inspections.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system may be exempt from disclosure under the provisions of 5 USC 552a (K)(2) which provide in part, that investigatory material compiled for law enforcement purposes may be withheld from disclosure to the extent that the identity of the source of the information would be revealed by disclosing the investigatory record, and the source has received an express guarantee that his identity would be held in confidence, or, prior to the effective date of this section, if the source received an implied promise that his identity would be held in confidence.

DOT/CG 589.

SYSTEM NAME:

U. S. Merchant Seamen's Records.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-MVP),
2100 2nd Street, SW,
Washington, DC 20593.
Portions of these records may be located at the Marine Inspection Office or the Marine Safety Office where the seaman was documented.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

U. S. Merchant Seamen.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel File.
Shipping Articles.
Locator List.
Log Books.
Seamen's License Records.
Fingerprint Records.
Disciplinary Records.
Security Records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Coast Guard officials in administering the Commercial Vessel Safety Program to determine qualifications for the issuance of licenses, documents, and certificates; to determine disciplinary action; to provide duplicate records of service or documents to the seaman, his next of kin or his agent; to provide information to other Federal Agencies, such as the Veterans' Administration, the Social Security Administration, etc. in connection with benefits and services administered by those agencies; to provide information to private organizations when considered beneficial to the seaman; to provide information to Federal, State, and local investigative and law enforcement officials as provided for by law.
See Prefatory Statement of General Routine Use.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The personnel file will be stored on updateable microfiche and limited personal data will reside on computer disks and magnetic tapes. The above media will be continuously updated as new or additional data is received. The remainder of the records will be stored in file folders in paper form.

RETRIEVABILITY:

The personnel file on microfiche will be accessed from its storage cabinet by a coded identifier of the location of the record within the cabinet. The data on the computer record will be retrieved by direct terminal access with the selection of data elements determined by the authorized user. Retrieval will be by name and cross indexed under ID (i.e., 'Z', 'BK', or Social Security Number).

SAFEGUARDS:

Personnel files on microfiche are stored in the locked retrieval cabinet. The data on the computer file can be retrieved only via 'password' identifier with users being permitted access only to that portion of the overall file that has previously been determined as meeting their needs. The file folders are maintained in locked rooms.

RETENTION AND DISPOSAL:

Personnel files are held 3 years for unlicensed personnel and 10 years for licensed personnel after last activity, then transferred to a holding area where they may be destroyed after 60 years of inactivity. Shipping Articles are held 3 years then transferred to a Federal Records Center where they are considered historical data and are not destroyed. Disciplinary Records are maintained in paper form. Administrative Law Judge's Decisions and Orders and Appeal File are transferred to a Federal Records Center after 5 years. Commandant's Decision on Appeal and National Transportation Safety Board Decisions and Orders are retained. Disciplinary Record Cards are destroyed upon notice of death.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Merchant Marine Safety,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation, United States Coast Guard Headquarters, Commandant (G-CMA), 2100 2nd Street, SW, Washington, DC 20593. In order to determine if a record for an individual exists, it is necessary that the applicant furnish the complete name in which the document was issued, the serial number of the document (i.e., 'Z', 'BK', and/or Social Security Number), and his date

V 46 / 234 D E 7 8 1 UMI

and place of birth. A written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing Commandant (G-CMA) or visiting at the address in 'Notification Procedure' or the Marine Inspection Office or Marine Safety Office where the document was issued for locally maintained portions.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

Personnel File - Date furnished by the seamen, U.S. Coast Guard officials, other Federal Agencies and employer. Shipping Articles - Vessels' operators, seamen, masters of vessels, State Department, and Coast Guard officials. Disciplinary Records - Furnished by the Investigating Officers at the various Marine Inspection and Marine Safety Offices.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a (k)(2), which provide, in part that investigatory material compiled for law enforcement purposes may be withheld from disclosure to the extent that the identity of the source of the information would be revealed by disclosing the investigatory record, and the source has received an express guarantee that his identity would be held in confidence, or, prior to the effective date of this section, if the source received an implied promise that his identity would be held in confidence.

DOT/CG 591.

SYSTEM NAME:

Merchant Vessel Documentation System (Manual and Automated). DOT/CG.

SYSTEM LOCATION:

Automated system is located at:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (C-MVD),
2100 2nd Street, SW,
Washington, DC 20593.
Manual systems are located at:
Coast Merchant Vessel Documentation Offices,
(See section E.W., Standard Distribution List - COMDTNOTE 5605 for office locations).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Vessel owners.
Mortgagees.
Vessel buyers and sellers.
Lien claimants.
Vessel builders.

CATEGORIES OF RECORDS IN THE SYSTEM:

Vessel owner information.
Vessel information.
Instruments of record (bills of sale, mortgages, etc.).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Establishing eligibility for documentation of vessels.
Issuance of marine documents.
Recordation of bills of sale, mortgages, etc.
Publication of the annual MERCHANT VESSELS OF THE UNITED STATES.
Publication of the monthly supplement to MERCHANT VESSELS OF THE UNITED STATES.
Used by:
Coast Guard.
Other Governmental agencies.
Financial institutions and other money leaders.
Anyone having business with or an interest in a documented vessel.
See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Index of owners maintained by Commandant (G-MVD).
All other records maintained at home port of vessel by vessel name.

RETRIEVABILITY:

Upon furnishing name of vessel owner to Commandant (G-MVD), vessel name is established and request for information referred to appropriate home port.
Records retrieved at home port by use of vessel name.

SAFEGUARDS:

Personnel screening.

RETENTION AND DISPOSAL:

Listings of vessel owners constantly updated by additions and deletions (automated).
Field office vessel folders transferred to FRC 2 years after change of vessel's home port or 2 years after removal of vessel from documentation (manual).

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Merchant Marine Safety,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written requests must be signed by the individual whose records are the subject.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing or by visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local Coast Guard District Office.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Vessel owners, Mortgagee, lien claimants, Vessel sellers and buyers, Coast Guard admeasures and vessel builders.

DOT/CG 592.

SYSTEM NAME:

Registered/Applicant Pilot Eligibility Folder. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Ninth Coast Guard District,
Great Lakes Pilotage Staff,
1240 East Ninth Street,
Cleveland, OH 44199.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

United States registered pilots and applicant pilots suitably registered to perform pilotage duties aboard foreign vessels on the Great Lakes.

CATEGORIES OF RECORDS IN THE SYSTEM:

Application for registration, renewal of registration, annual report of physical examination, Coast Guard license data, examination for registration.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Department of Transportation, U. S. Coast Guard, F.B.I., pilot associations and corporations.
Used for pilot registration, training program needs, retirements, statistical compilations, and negotiations with Canadian authorities to assure equitable

participation by U.S. registered pilots with Canadian registered pilots.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

By name and pilot registration number.

SAFEGUARDS:

Screened by office personnel prior to use. Locked in cabinets during non-working hours.

RETENTION AND DISPOSAL:

Permanent.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Great Lakes Pilotage Staff,
Ninth Coast Guard District,
1240 East Ninth Street,
Cleveland, OH 44199.

NOTIFICATION PROCEDURE:

Same as 'System Manager' above.

RECORD ACCESS PROCEDURES:

Same as 'System Manager' above.

CONTESTING RECORD PROCEDURES:

Same as 'System Manager' above.

RECORD SOURCE CATEGORIES:

Individual's original application for U.S. pilot's registration and individual's yearly report of medical examination.

DOT/CG 611.

SYSTEM NAME:

Intelligence and Security Investigative Case System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation(DOT),
United States Coast Guard(CG),
Commandant (G-OIS),
2100 2nd Street, SW,
Washington, DC 20593.

Systems are also located in Coast Guard District Offices at the addresses listed in Appendix I.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

U. S. Coast Guard military personnel, merchant marine personnel, port and dock workers, and persons under investigation for violations of laws and regulations administered by the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel security investigations, national agency check results, criminal investigations, counterintelligence investigations, computerized case control system.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by authorized Coast Guard personnel for:

Security clearances.

Actions by commanders under the Uniform Code of Military Justice.

Career advancement of U.S. Coast Guard military personnel.

Approval of merchant seamen documents.

Access of individuals to port facilities.

Used by:

Appropriate federal, state or local agencies for criminal law enforcement and prosecution by the United States government.

National Agency Checks and background investigations.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Investigative dossiers and 3x5 card retrieval system.

RETRIEVABILITY:

By name and/or case number.

SAFEGUARDS:

Alarm controlled spaces, locked and/or limited access file cabinets and office spaces.

Using receipt control, automatic data processing (ADP) system cannot be penetrated for data through terminals, or otherwise, located outside the U.S. Coast Guard computer center without use of proper administrative controls.

Release of dossiers to accreditied personnel on 'need-to-know' basis only.

RETENTION AND DISPOSAL:

Dossiers retained 50 years from date of birth.

Deceased, retirees and others separated are held one year from separation.

Dossiers are retired to the Washington National Federal Records Center for further retention of 30 years.

3x5 cards are annotated to recall retired dossiers if necessary.

Computer printouts are retained for 10 years then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Operations,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to, or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local Coast Guard District Office, location in Appendix I, for the area in which an individual's duty station is located.

Proof of identity will be required prior to affording an individual access to records. A military identification card, a driver's license, or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

National Agency Checks, background investigations, criminal investigations, interviews, records, checks, observations, statements.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a (k)(2), which provides in part that investigatory material compiled for law enforcement purposes may be withheld from disclosure to the extent the identity of the source of the information would be revealed by disclosing the investigatory record, and the source has received an express promise that his identity would be held in confidence, or, prior to the effective date of this section, if the source received an implied promise that his identity would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(5) which provides, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of the source who furnished information to the Government under an express promise that the identity of the source would be held in confidence or, prior to the effective date of this section,

under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the pro- visions of 5 USC 552a (k)(7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from dis- closure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of a source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 612.

SYSTEM NAME:

Port Security Card System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard
Headquarters (CG),
Commandant (G-OIS),
2100 2nd Street, SW,
Washington, DC 20593.
Records also also located at each District Office. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons regularly employed on vessels and water front facilities, or persons having regular public or private business with the operation, maintenance, or administration of vessels and cargoes or waterfront facilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for port security cards awaiting processing.

Processed applications indicating those granted or denied port security cards.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Authorized Coast Guard officials to determine eligibility for issuance of Port Security Cards

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper files, 3x5 cards.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Maintained in file cabinets in secure areas.

Personnel are screened prior to granting access.

RETENTION AND DISPOSAL:

Retained for 8 years, then destroyed by mutilating, shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Operations,
Department of Transportation,
United States Coast Guard
Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Departemnt of Transportation,
United States Coast Guard
Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local Coast Guard District or unit office for the area in which the application was filed.

Proof of identity will be required prior to affording an individual access to records. A military identification card, a driver's license, or similar document will be considered sutitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

Individual applications.

National Agency checks.

Other records already at Coast Guard Headquarters, if any.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(2), which provide, in part, that investigatory material compiled for law enforcement purposes may be withheld from disclosure to the extent that the identity of the source of the information would be revealed by disclosing the investigatory record and the source has received an express guarantee that his identity would be held in confidence, or, prior to the effective date of this section, if the source received an implied promise that his identity would be held in confidence.

DOT/CG 622.

SYSTEM NAME:

Military Training and Education Records. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT), United States Coast Guard (CG), Commandant (G-PTE), 2100 2nd Street, SW, Washington, DC 20593. Records are also located at District and Headquarters Units. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard Military Personnel (Commissioned Officers, Commissioned Warrant Officers, Cadets, and Enlisted Personnel.)

CATEGORIES OF RECORDS IN THE SYSTEM:

General Service Correspondence Course. Off-Duty Education Records. Professional Training Records. Non-traditional Educational Support Records. Achievement and Aptitude Test Results. Academic Performance Records. Correspondence Course Rate Advancement Records. Military Performance Records. Admissions Processing Records. Grade Reporting Records. Cadet Academic Status Records. Transcript Maintenance Records. Cadet Discipline Status Records. Military Personnel Records. Military Training Schedules Records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Evaluation and measurement of training performance. Statistical summaries. Input to personnel records. Partial criteria for selection and admission to service/professional schools. Partial criteria for selection to postgraduate education programs. Criteria for admission to the Coast Guard. Criteria for retention in service Schools. Criteria for promotion. The above information is used by authorized Coast Guard personnel in the performance of Official duties. See Prefatory Statement of General Routine Uses, 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders stored in file cabinets. Portions are stored on ADP equipment.

RETRIEVABILITY:

Retrieved by name, rate, class number, cadet code number, and Social Security Number.

SAFEGUARDS:

Records are kept in file cabinets in offices that are locked during off-duty hours. Those records stored in ADP equipment may only be accessed through use of a user access code.

RETENTION AND DISPOSAL:

Personal History, Service History and School Conduct and Military Performance records are kept for one year. Academic and Correspondence Course records are kept for five years. Aptitude and Achievement Test results, as a part of Training and Education records, are kept for five years. Records are destroyed by mutilating, shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel, Department of Transportation, United States Coast Guard Headquarters, 2100 2nd Street, SW, Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation, United States Coast Guard Headquarters, Commandant (G-CMA), 2100 2nd Street, SW, Washington, DC 20593. Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting (G-CMA) at the address in 'Notification Procedure', or by visiting the local activity where assigned for training. Prior written notification of personal visits is required to insure that the applicable record will be available. Proof of identity is required prior to release of records. A military identification card, driver's license, or similiar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedures'.

RECORD SOURCE CATEGORIES:

Official military personnel records, test results, instructors and supervisors.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the pro- visions of 5 U.S.C. 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the government under an express promise that the identity of the source would be held in confidence or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence. Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(6), which provides, in part, that testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service may be withheld from disclosure to the extent that disclosure of these records would compromise the objectivity or fairness of the testing or examination process. Portions of this system of records may be exempt from disclosure under the provisions of 5 U.S.C. 552a(k)(7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the government under an express promise that the identity of a source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 624.

SYSTEM NAME:

Personnel Management Information System (PMIS)

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-P),
2100 2nd Street, SW,
Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All regular Coast Guard personnel on active duty. All Reserve Coast Guard personnel on extended active duty and Reserve personnel on initial active duty for training.

CATEGORIES OF RECORDS IN THE SYSTEM:

A single computer record which currently contains about 450 data elements on each member. Some data elements are used only for enlisted, others only for officers. The file contains personal information such as name, place of birth, rank, location, etc. The file also contains pay date elements which will form the basis for deriving pay entitlements for Coast Guard military personnel under the Joint Uniform Military Pay System (JUMPS).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The file is used to produce a number of reports used throughout the Coast Guard. Types of reports are:

Locator Listing for Headquarters and Districts,

Personnel Roster for the unit to assist in verifying information,

Number of personnel in pay grades for advancement levels and budget expenditures,

Current reports for this system of records are listed in the Reports Distribution Manual generated by the Coast Guard for this system,

Queires and batch processing are used to recruitment levels,

Various Coast Guard offices receive the locator listing and management reports,

Government agencies other than Coast Guard categories,

See prefatory statement of General Routine Uses, 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The storage is on computer disks with tape backups. The file is updated once a week. Once a month the file is dumped to a tape file for historical purposes.

RETRIEVABILITY:

Retrieval from the system is by use of name or Social Security Number or a combination of personal and non-personal characteristics.

Users retrieve information direct from the file through card input or direct terminal access. Data elements to be retrieved and method of use are selected by the user.

An extract file containing summary records is produced monthly for use on a 'time sharing' system. Retrieval of information from this extract is by direct terminal access only. Data elements to be retrieved and method of use are selected by the user.

SAFEGUARDS:

The computer provides privacy and access limitations by requiring a user name and password match. In addition each element of the file has its own level of accessability which must be held by the user. Only those staff components at Headquarters with a need to have access to the file are given user names and passwords. Access to the 'Time Share' extract is similarly controlled. The backup tapes and monthly dumps also have limited access in that users

V 46 / 234 DEC 7 81 UMI

must justify the need before they are provided the tape numbers.

RETENTION AND DISPOSAL:

End-of-Year system backup tapes and day to day transaction tapes are retained indefinitely. Statistical and other report extract tapes are recycled into the system and consequently destroyed. Paper working files are disposed of in accordance with current record disposal instructions.

SYSTEM MANAGER(S) AND ADDRESS:

Chief,
Office of Personnel,
Department of Transportation,
United States Coast Guard
Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Inquiries should be directed to:
Department of Transportaion,
United States Coast Guard
Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

Procedure may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure'. Prior written notification of personal visits is requried to insure that the records will be available at the time of visit. Proof of identity will be required prior to release of records. A military identification card, driver's license or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

The data to update the file comes from copies of official service record entries prepared by field units. The data is entered on tape for update of the computer files.

DOT/CG 625.

SYSTEM NAME:

Officer Selection and Appointment System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-PMR),
2100 2nd Street, SW,
Washington, DC 20593.
Records are also located at each District and Headquarters Unit. Use Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for Coast Guard Officer Candidate School or direct commission programs of the Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information in the system is supplied by applicants and also by persons, other than the applicants, who submit information pertinent to the suitability of the applicants for commissioned service in the Coast Guard.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Officials and employees of the Coast Guard in the performance of their duties in managing and contributing to the recruitment and appointment of men and women for officer programs in the regular and reserve components of the Coast Guard.

The Attorney General of the United States or his authorized representatives in connection with litigation, fraudulent enlistment or other matters under the jurisdiction of such agencies.

Official employees of the Veterans Administration and Selective Service Administration in the performance of their official duties related to enlistment and reenlistment eligibility and related benefits.

The Senate or the House of Representatives of the United States or any committee or subcommittee on matters within their jurisdiction requiring disclosure of files or records of personnel covered by this system.

See Prefatory Statement of General Routine Uses, 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are stored in file folders.

RETRIEVABILITY:

The system is indexed alphabetically by name of applicant and is retrieved by name.

SAFEGUARDS:

Records kept in file cabinets locked after working hours.

Buildings have 24-hour security guards and limited access.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM: APPLICATION FILES FOR NONSELECTED OFFICER CANDIDATE APPLICANTS ARE DESTROYED AFTER SIX MONTHS AND NONSELECTED APPLICANTS FOR DIRECT COMMISSION ARE DESTROYED AFTER ONE YEAR. FILES FOR ALL SELECTED APPLICANTS ARE PLACED IN THE SELECTEE'S OFFICER PERSONNEL FOLDER.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard
Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard
Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

Procedure may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or to the applicable Coast Guard District Office.

A letter request should contain full name, address, social security number, approximate date of application, and signature.

Proof of identification will consist of military identification card, driver's license or other official identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

Coast Guard recruiting personnel and employee processing application.

Medical personnel conducting physical examination and private physicians providing consultations or patient history.

Character and employer references named by applicants.

Educational institutions, staff and faculty members.

Selective Service Commission.

Local state and Federal law enforcement agencies.

Prior or current military service record.

Commanding officer of Coast Guard unit, if active duty.

Coast Guard offices charged with personnel security clearance functions.

Other Coast Guard officials and employees in the performance of their official duties and as specified by current instructions and regulations promulgated by competent authority.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of a source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 626.

SYSTEM NAME:

Official Officer Service Records. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT).
United States Coast Guard(CG),
Commandant (G-PO),
2100 2nd Street, SW,
Washington, DC 20593.

Certain records in the system are maintained at:

National Personnel Records Center,
9700 Page Boulevard,
St. Louis, MO 63132.

Portions of the official service record, e.g., health record, security status jacket and leave record are maintained at the officer's unit.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Commissioned officers of the Coast Guard on active duty, permanent or disability retired lists.

Regular officers whonesign and do not accept a Reserve commission.

CATEGORIES OF RECORDS IN THE SYSTEM:

General file & service record card.
Fitness File & Officer Summary Records.
Medical File.
Medical History for officers on the Temporary Disability Retired List.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Fulfillment of normal administrative procedures including assignment, promotion, training, etc.

Physical Evaluation Boards.

Board for Correction of Military Records.

Answering of Congressional and personal inquiries initiated by the individual whose record is concerned.

Preparation of forms, statements, compilations and computations necessary in the daily personnel administration of each individual entering, reentering or leaving the Coast Guard.

(Routine personnel administration requires copies of this and other service record material to be included in administrative files physically separated from the record; however, the original of this material will be included in the official service record maintained at Coast Guard Headquarters).

Furnishing of information (authorized and specified by the individual concerned) to other agencies or individuals (specified by the individual concerned) normally concerned with employment, educational or veteran's benefits, claims or applications.

Furnishing specified material in an officer's service record pursuant to the order of a court of competent jurisdiction.

Used by:

Authorized Coast Guard Personnel.

Personnel from other Federal Agencies in the conduct of official business, as authorized by the Chief, Officer Personnel Division or his designated representative.

See Prefatory Statement of General Routine Uses, 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper and are assembled and filed in one official service record per member and stored on open shelf files in a room with controlled access.

RETRIEVABILITY:

Individual records are indexed and retrievable by name and/or last four digits of member's service number.

SAFEGUARDS:

During working hours physical access to records is controlled by the Officer Records Branch (G-PO-4).

Records are maintained in a central storage area locked behind two separate doors during non-working hours in the building, which has roving and static security patrols.

RETENTION AND DISPOSAL:

Each individual record is maintained at Coast Guard Headquarters until three months after retirement/resignation, after which it is shipped to the:

National Personnel Records Center (Military Personnel Records),
9700 Page Boulevard,
St. Louis, MO 63132.

After the separation documents are received, records of Reserve Officers released from active duty and Regular Officers who resign and accept Reserve Commissions are sent to the Department of Transportation,

United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Inquiry requests for a determination as to whether this system contains records on an individual should be made by that individual, in person or in writing, to:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Requestors in person will be required to show a valid I.D. card.

Written request must include the member's name, rank, Social Security Number, and period of service.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local activity to which assigned for locally maintained portions of subject records.

Proof of identity will be required prior to release of records. A military identification card, driver's license or similar document will be considered suitable identification.

V 46 / 234 DEC 7 81 UMI

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Personal interview and voluntary submissions by individuals.

Training/Educational Reports.

Fitness Reports.

USCG District Offices and other operating units of the Coast Guard.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5USC 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 627.

SYSTEM NAME:

Enlisted Recruiting Selection Record System. DOT/CG.

SYSTEM LOCATION:

Primary System:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-P),
2100 2nd Street, SW,
Washington, DC 20593.

Decentralized segments are maintained at:

Coast Guard District offices and Coast Guard recruiting offices. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Records and correspondence pertaining to prospective applicants, applicants for regular and reserve enlisted programs, and any other individuals who have initiated correspondence pertaining to enlistment in the United States Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records and correspondence in both automated and non-automated forms concerning personal history, education, professional qualifications, mental aptitude, physical qualifications, character and interview appraisals, National Agency Checks and certifications, service performance and congressional or special interests.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Officials and employees of the U.S. Coast Guard in the performance of their duties in managing and contributing to the recruitment program of the Coast Guard Reserve.

The Comptroller General or any of his authorized representatives, upon request, in the course of the performance of duties of the General Accounting Office relating to the management or quality of military recruitment.

The Attorney General of the United States or his authorized representatives in connection with litigation, fraudulent enlistment or other matters under the jurisdiction of such agencies.

Officials and employees of other Departments and agencies of the Executive Branch of government, upon request, in the performance of their official duties related to the management or quality of military recruitment.

Officials and employees of the Veterans Administration and Selective Service System in the performance of their official duties related to enlistment and reenlistment eligibility and related benefits.

The Senate or the House of Representatives of the United States or any committee or subcommittee on matters within their jurisdiction requiring disclosure of files or records of personnel covered by this system.

Such contractors and their employees as are or may be operating in accordance with an approved official contract with the U.S. Government.

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on magnetic tape.

Paper records are stored in file folders.

RETRIEVABILITY:

Alphabetically by name of subject and social security number.

SAFEGUARDS:

Records are accessible only to authorized personnel within the Coast Guard recruiting organization and are handled with security procedures appropriate for documents marked 'For Official Use Only'.

RETENTION AND DISPOSAL:

Records are normally maintained for two years and then disposed of by multilating, shredding, or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard
Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Gurad
Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to, or visiting, Commandant (G-CMA) at the address in 'Notification Procedure' or the appropriate local office where the record, or portion there of, is filed.

Prior written notification is required to insure that records will be available at time of visit.

Proof of identity will be required prior to affording access to records. A military identification card, driver's license, or similar document, will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

Coast Guard recruiting personnel and administrative staff.

Medical personnel or private physicians providing consultations or patient history.

Character and employer references.

Educational institutions, staff and faculty members.

Selective Service System.

Local, state, and Federal law enforcement agencies.

Prior or current military service records.

Members of Congress.

Other officials and employees of the Coast Guard, Department of Defense and components thereof, in the performance of their duties and as specified by current instructions and regulations promulgated by competent authority.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(5, which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualification for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a (k)(7), which provide, in part, that evaluation material used to determine for promotion in the armed services may be withheld from dis- closure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of a source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 628.

SYSTEM NAME:

Officer, Enlisted, and Recruiter Selection Test File. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-PE),
2100 2nd Street, SW,
Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian or military personnel who have taken the following tests:

U.S. Navy Officer Qualification (OQT).

U.S. Navy and U.S. Marine Corps Aviation Selection (AST).

U.S. Navy Basic Test Battery (BTB) (retests).

The Cooperative Tests for Advanced Electronic Training (AET TESTS).

The 16 Personality Factor Test used for screening of enlisted personnel for recruiting duty.

Professional Examination for Merchant Mariners.

CATEGORIES OF RECORDS IN THE SYSTEM:

Card files, answer sheets.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are kept to provide the test results if an applicant (civilian or military) applies for an officer program or is already in military and interested in certain training programs.

Internal users:

Officer Recruiting, Enlisted Recruiting, Enlisted Personnel, Training Programs, Merchant Marine, Commanding Officer, Enlisted Personnel District, Personnel offices, Training Centers and Academy.

Other Government Agencies:

U.S. Navy Recruiting, U.S. Marine Corps, U.S. Navy Bureau of Medicine and Surgery.

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, case files.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Combination - type safe, locked files.

Test results are given only on a need to know basis to authorized personnel.

Only custodian of safes and alternate custodian have access.

RETENTION AND DISPOSAL:

Test answer sheets are destroyed after 2 years.

Card file - destroyed after 4 years.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure.'

Proof of identity will be required prior to release of records. A military identification card, driver's license or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Individuals concerned and United States Coast Guard recruiting officials.

U.S. Marine Corps officials.

U.S. Navy Recruiting officials,

U.S. Navy Bureau of Medicine Surgery officials.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552(k)(6), which provides, in part, that testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service may be withheld from disclosure to the extent that disclosure of these records would compromise the objectivity or fairness of the testing or examination process.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a (k) (5), which provide, in part, that investigatory material compiled soley for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the pro- visions of 5 USC 552a (k)(7), which provide, in part, that evaluation material used to determine potential for

promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished informaton to the Government under an express promise that the identity of a source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 629.

SYSTEM NAME:

Enlisted Personnel Record System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-PE),
2100 2nd Street, SW,
Washington, DC 20593.

Decentralized segments of the system are located at each District office and Headquarters Unit. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All enlisted members of the Coast Guard now serving on active duty (including enlisted members of the Reserve on extended active duty), and members who have been temporarily or permanently retired or discharged.

CATEGORIES OF RECORDS IN THE SYSTEM:

Enlisted contract package, record of emergency data, leave records, performance ratings, administrative remarks, medical records.

All other requisite Coast Guard personnel forms, and pertinent miscellaneous correspondence.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For use in formulating all Coast Guard personnel actions including, but not limited to, assignment, promotion, re-enlistment, retirement, discharge, determination of entitlement to pay and allowances, correction of records, and disciplinary actions.

Data is provided to the Veterans Administration for determination of an individual's eligibility for benefits administered by that agency and to medical facilities maintained by the Department of Health, Education and Welfare in conjunction with medical treatment afforded an individual.

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in enlisted files record jackets and stored in file cabinets.

RETRIEVABILITY:

Records are retrievable by name of individual or the last three digits of the individual's social security number.

SAFEGUARDS:

Records maintained at Coast Guard Headquarters are located in a central storage area, locked behind two separate doors during non-working hours, in a building with a roving security patrol.

Records at field units are maintained in Government office buildings with off-duty hours security.

During working hours, access to records is controlled by office personnel.

RETENTION AND DISPOSAL:

Individual records are maintained at CG Headquarters until six months after an enlisted member is discharged, permanently retired for physical disability, or retired for years of service, after which records are transmitted for permanent storage to the:

National Personnel Records Center, (Military Personnel Records) GSA,
9700 Page Boulevard,
St. Louis, MO 63132.

In the case of members transferred to the Reserve, their records are sent to Commandant (G-RA-2) after separation documents are received.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW.,
Washington, DC 20593.

Written request must be signed by individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to, or visiting, Commandant (G-CMA) at the address in 'Notification Procedure' or the local Coast Guard District or unit administrative officer for the area in which an individual's duty station is located.

Proof of identity will be required prior to affording an individual access to records. A military identification card, a driver's license, or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure'.

RECORD SOURCE CATEGORIES:

Information is obtained from the individual, and Coast Guard Officials.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

DOT/CG 630.

SYSTEM NAME:

Coast Guard Family Housing. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-P),
2100 2nd Street, SW,
Washington, DC 20593.

Decentralized segments are maintained at:

Each District and Headquarters Unit. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Military and civilian personnel of all pay grades who make application for government and/or government leased housing.

Military personnel who make application in locating community housing, married officers and married E-3 or above (over 2 years service).

Certain government employees occupying government housing.

Military or civilian personnel who have corresponded with the President, a Congressman, or the Commandant concerning family housing.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applicants name, pay grade, marital status, current address and dependent information maintained for the Coast Guard Housing Administration Information and Liaison (HAIL) System.

Includes family housing survey; computer data summaries are maintained for the family housing survey.

Copies of correspondence from individual to the President, a Congressman or the Commandant, inquiry sheets, and replies maintained for Congressional correspondence files.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For use by authorized Coast Guard employees in performance of their duties in placing the applicant in government owned or leased housing or community housing.

Assessing housing needs of District and Headquarters Units.

Answering inquiries from individuals, Congressmen or the Commandant concerning family housing.

Preparing budgets.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

By name of individual, Coast Guard District and date received.

SAFEGUARDS:

Records are maintained in locked file cabinets and desk file drawers.

RETENTION AND DISPOSAL:

Records are maintained until the applicant is placed in housing and then destroyed.

Records concerning Congressional correspondence are maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel, Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must be signed by individual whose record is being requested.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local Coast Guard District Office. See address in Appendix I.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Information is obtained from applicants, individuals who complete family housing survey forms, initiate correspondence concerning family housing and Coast Guard Officials.

DOT/CG 632.

SYSTEM NAME:

Uniformed Services Identification and Privilege Card Record System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-PS),
2100 2nd Street, SW,
Washington, DC 20593.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Dependents of U.S. Coast Guard personnel (active, retired, reserve and deceased).

Former Coast Guard personnel who have been rated by the Veterans Administration as one-hundred percent disabled and their eligible dependents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for Uniformed Service Identification and Privilege Card (DD-1172).

Verification for eligibility to possess the Identification and Privilege Cards (DD-1173).

Pertinent miscellaneous correspondence.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by authorized Coast Guard employees to verify that applicant is entitled to be issued an Identification and Privilege Card.

Verification provided to other Armed Forces authorized personnel as required.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders.

RETRIEVABILITY:

Alphabetical by name.

SAFEGUARDS:

Maintained in file cabinets. During working hours access to records is controlled by office personnel. During non-working hours building is patrolled by roving security guards.

RETENTION AND DISPOSAL:

Retained for 10 years after which they are destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must contain, full name, social security number (SSN) and be signed by individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to, or visiting, Commandant (G-CMA) at the address in 'Notification Procedure.'

Proof of identity will be required prior to affording an individual access to records. A military identification card, a driver's license, or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Information is supplied by the sponsor and/or his dependents.

DOT/CG 633.

SYSTEM NAME:

Coast Guard Civilian Personnel Security Program. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-PS/6),
2100 2nd Street, SW,
Washington, DC 20593.

Decentralized segments are located at:

Each District Office and Headquarters Unit. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Coast Guard Civilian Personnel.
Applicants for civilian positions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of civilian security clearance granted. Correspondence and requests concerning civilian personnel security actions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For use in determining eligibility for access to classified information under Executive Order 11652 and suitability for sensitive positions.

Categories of users include use by Coast Guard employees in performance of official duties and use by investigative agents of other federal agencies.

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folder - 3x5 Index cards.

RETRIEVABILITY:

Records are retrieved by name of individual.

SAFEGUARDS:

Records are kept in locked cabinets and safes. Individual identification is required for users of records.

RETENTION AND DISPOSAL:

Upon termination of employment investigative files for civilians, which serve as a basis for security clearances, are returned to the Civil Service Commission.

A name record of type of investigation is kept for 5 years and then destroyed by burning.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard Headquartetrs,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must be signed by the individual whose record is being requested.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local office or unit. See addresses in Appendix I.

Proof of identity will be required prior to affording an individual access to records. A military identification card, a driver's license, or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Civilian Personnel:

Civil Service Investigative Reports, Personnel Security Clearance requests and forms SF-85, SF-86 and SF-171.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k)(5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a (k) (7), which provide, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of a source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-PS-3),
2100 2nd Street, SW,
Washington, DC 20593.

Decentralized segments are located at:

Each District Office or Headquarters Unit. See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Enlisted military personnel (active duty and retired) and dependents.

Officer personnel (active duty and retired) and dependents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Card Index.

Loan applications forms filed by month.

Educational loan file.

Organization financial records.

Bad debts listing.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by authorized Coast Guard officials in approving loan and grant applications.

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Index boxes and file folders.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Maintained in separate correspondence files.

All correspondence regarding an applicant is considered priviledged and personnel are screened prior to access.

No loan records or correspondence are placed in service record of individual.

Periodic inspections are performed.

RETENTION AND DISPOSAL:

Administrative and financial data relating to CG Mutual Assistance Cases are disposed of four years after date of last transaction.

All other records and correspondence are disposed of after four years.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

SYSTEM NAME:

Drug and Alcohol Abuse Prevention Program Record System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-PS),
2100 2nd Street, SW,
Washington, DC 20593.

All Coast Guard units have portions of duplicate case folders on individuals involved in the program. See Appendix I for addresses.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty Coast Guard officers, enlisted personnel and reserve personnel.

Retired and separated Coast Guard personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Annotations on file cards of drug abuse, drug exemptions, drug rehabilitation, alcohol rehabilitation and waiver for enlistment in the Coast Guard cases.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used to:

Determine extent of drug and alcohol problem in the Coast Guard.

To evaluate program effectiveness.

Maintain the integrity of the Coast Guard drug exemption program by authorized Coast Guard employees in performance of their official duties.

Assist the U.S. Navy Department in consonance with inpatient treatment at Navy Rehabilitation Centers.

See Prefatory Statement of General Routine Uses; 3 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on file cards (5'x8') and message file.

RETRIEVABILITY:

File cards are indexed by name; message file by date/time group.

SAFEGUARDS:

Files are stamped 'For Official Use Only' and maintained in locked filing cabinet.

RETENTION AND DISPOSAL:

Disposal schedules are under development and will be in accord with disposal schedules of the Military Personnel Record System.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Personnel,
Department of Transportation,
United States Coast Guard
Headquarters,
2100 2nd Street, SW,

Individual named in file.

DOT/CG 676.

SYSTEM NAME:

Official Coast Guard Reserve Service Record. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-RA),
2100 2nd Street, SW,
Washington, DC 20593. For official records on discharged, retired, and separated former members:
General Services Administration (GSA),
National Personnel Records Center (Military Personnel Records),
9700 Page Boulevard,
St. Louis, MO 63132.
Decentralized segments are located at:
Each Coast Guard District Reserve office (for District records).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Reserve officer and enlisted personnel (not on extended active duty) in an active, inactive, retired, discharged, separated or former member status; including those Reservists released from extended active duty to fulfill a specified term of obligated inactive reserve service.

Enrolled and disenrolled members of the Temporary Coast Guard Reserve.

CATEGORIES OF RECORDS IN THE SYSTEM:

Official career history of each Reservist including (as applicable):
Enlistment contract or Oath of Office.
Record of Emergency Data.
Training Courses/Educational achievements.
Rate/Grade/Rating qualifications.
Leave record.
Performance of duty marks/fitness reports.
Medals and commendations.
Record of sea duty/duty outside continental United States.
Statements of creditable and former service (including pay base date).
Statements and computations of retirement points.
Official orders.
Correspondence pertaining to any/all of the above.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Fulfilment of normal administrative personnel procedures, including examining and screening for completeness and accuracy of records and correspondence pertaining thereto.

Screening of service records for advancement, promotion, or retention of individual Reservists by various Reserve Boards.

Answering of Congressional and personal inquiries initiated by the individual whose record is concerned.

Preparation of forms, statements, compilations and computations necessary in the daily personnel administration of each individual entering, reentering or leaving the Coast Guard Reserve. Routine personnel administration requires copies of this and other service record material to be included in administrative files physically separated from the record; however, the original copy of this material will be included in the official service record maintained at Coast Guard Headquarters.

Furnishing of information (authorized and specified by the individual concerned) to other agencies or individuals (specified by the individual concerned) normally concerned with employment, educational or Veterans benefits, claims, or applications.

Furnishing specified material in a Reservist's service record pursuant to the order of a court of competent jurisdiction.

Used by:

Individual upon whom records are kept (personal review).

File clerks and personnel from the Office of Reserve, Administration, Training, and Programs Divisions in the normal performance of their duties.

Other personnel within the Coast Guard in the normal performance of their duties, as authorized by the Chief, Reserve Administration Division or his designated representative.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records maintained on paper assembled and filed in one official service record per member.

RETRIEVABILITY:

Individual Service Records are indexed and retrievable by name and/or triple terminal digit of member's service number.

SAFEGUARDS:

Service records are maintained in a central storage area locked behind two separate doors.

During non-working hours the building security consists of roving and static security patrols.

During working hours physical access to records is controlled by Records Control Branch personnel.

RETENTION AND DISPOSAL:

Individual records are maintained at CG Headquarters until six months after an enlisted member's separation from the service (three months for officers), after which it is transmitted for permanent storage to the:

Military Personnel Record Center (MPRC)

National Personnel Records Center (NPRC),
9700 Page Boulevard,
St. Louis, MO 63132.

In the case of retired members, the service record is shipped to NPRC upon retirement.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Reserve (G-R),
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Inquiry requests for determination whether this system contains records on an individual should be made by that individual, in person or in writing to:

Department of Transportation,
united States Cost Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written requests must be signed by the individual and must include the member's name, social security number and/or reserve number.

RECORD ACCESS PROCEDURES:

Procedures for access may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the District Office in which an individual's duty station is located.

Proof of identity will be required prior to affording an individual access (may consist of a military identification, driver's license, or other suitable identification.)

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Information contained in a member's service record is obtained from the individual concerned, CG Headquarters, District offices and other CG units.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a(k) (5), which provide, in part, that investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552a (k) (7), which provides, in part, that evaluation material used to determine potential for promotion in the armed services may be withheld from disclosure but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

Portions of this system of records may be exempt from disclosure under the provisions of 5 USC 552 (k) (6), which provides, in part, that testing or examination material used soley to determine individual qualifications for appointment or promotion in the Federal service may be withheld from disclosure to the extent that disclosure of these records would compromise the objectivity or fairness of the testing or examination process.

DOT/CG 677.

SYSTEM NAME:

Coast Guard Reserve Personnel Mobilization System. DOT/CG.

SYSTEM LOCATION:

Department of Transportation, (DOT),
United States Coast Guard (CG),
Commandant (G-RP),
2100 2nd Street, SW,
Washington, DC 20593.

Commander Reserve in each Coast Guard District Office (except 17th).

Each District and Headquarters Unit.

See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Reserve officer and enlisted personnel (not on extended active duty) in an Active or Retired status; including those Reservists released from extended active duty to fulfill a specified term of obligated inactive Reserve service.

CATEGORIES OF RECORDS IN THE SYSTEM:

Mobilization and qualification cards and orders.

Initial, Annual, and Retired Screening and Qualification Questionaires.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Fulfillment of normal administrative procedures including the examining and screening for completeness and accuracy of records, correspondence pertaining thereto as a basis for assignment to active duty for training; special active duty for training or extended active duty and mobilization billets.

Users of these Records are Coast Guard employees in performance of official duties.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records maintained on paper, punched cards and magnetic tape

RETRIEVABILITY:

Individual Reservists are indexed by name and/or social security account number.

SAFEGUARDS:

Safeguards and controls afforded this system of records are similar to those normally employed 'For Official Use Only' material, both at Headquarters and District Offices.

Records are maintained in locked secure areas when not in use and personnel screening is employed prior to granting access.

RETENTION AND DISPOSAL:

Individual records are maintained at CG Districts and at Headquarters throughout the members active Reserve status and during any period in a Retired Status thereafter (as applicable, and for as long as that member is considered a mobilizable resource).

A 'dead file' is often maintained for those Reservists transferred, discharged, or otherwise separated (this procedure varies from District to District.)

The majority of records in this system (in any form) are generally destroyed immediately after the expiration of their useful life, except those retained in the aforementioned 'dead files' (which are subsequently destroyed one year after placement in the file). The major exceptions to this policy are the Screening and Qualification Questionaires, which are filed in the Reservists District Service Record.

Records are destroyed by mutilating, shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Reserve (G-R),
Department of Transportation,
United States Coast Guard Headquarters
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.

Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Individual should contact Commandant (G-CMA) in person or in writing at the address in 'Notification Procedure'.

For records maintained at the District, individual should contact the Commander (r) at the District to which the individual is assigned. Refer to Appendix I for addresses.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Information contained in this system of records is obtained from the following

sources: the individual himself, CG Headquarters, and CG District Offices.

DOT/CG 678.

SYSTEM NAME:

Reserve Personnel Management Information System (Automated).

SYSTEM LOCATION:

Department of Transportation (DOT)
United States Coast Guard (CG)
Commandant (G-RA)
2100 2nd Street, S. W.
Washington, DC 20593

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Reserve officers and enlisted personnel in an active or inactive status, including retired reservist, and those reservists released from extended active duty to fulfill a specific term of inactive obligated service.

CATEGORIES OF RECORDS IN THE SYSTEM:

Included in RPMIS are the following data concerning each Coast Guard Reservist in this system which are necessary to administer the Coast Guard program: name, social security number, present and last five grades or rates, educational background, civilian and military, foreign language and proficiency, history of unit assignments and dates assigned, duty status, date of birth, date of enlistment, appointment or extension, AFQT scores, source of entry, date of commission, prior service, date of expiration of obligation, anniversary data on pay base date, aviation pay and administrative pay, training rating, reserve category and class, training/pay category, data on ADT for last five years, number of dependents, Federal withholding exemptions, Selective Service induction certification, date of completion of Ready obligation, officer experience indicator, last screening date and result, civilian occupation, date of last National Agency Check, Background Investigation and security clearance, domestic emergency volunteer, date of last physical and immunization, data on special active duty for training and extended active duty, annual training date, total retirement points and satisfactory years of service for retirement purpose, current year retirement point accounting data, including inactive duty training participation, correspondence course activity, taxable wages paid and withholdings, uniform allowances, Servicemens Group Life Insurance (SGLI) information, mailing address, and work and home phone number.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The RPMIS is used for the personnel administration of individual reservists and the overall management of the reserve program. See prefatory Statement of General Routine Uses. The Master Personnel File provides status and qualification listings, expiration of enlistment and physical reports, strength management reports, unit and district roster, and advancement and promotion reports. The Pay and Point File provides point count statements, budgeting reports, inactive duty and active duty pay, and retirement eligibility listings. The addresses of individual reservists are used for mailing paychecks, earning statements, 'The Reservist', and Annual Screening Questionnaires. Records in this system are routinely disclosed to the Treasury Department to complete payroll checks. Used by: Authorized personnel from the Office of Reserve and the Office of the Comptroller, authorized personnel on the staff of the various district commanders in the normal performance of their official duties, the Deputy Assistant Secretary of Defense for Manpower, Logistics and Reserve Affairs and others as authorized by Chief, Office of Reserve or his representative.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The storage is on computer disks with magnetic tape backups. The file is updated weekly.

RETRIEVABILITY:

Individual records in the system are retrieved by Social Security Number.

SAFEGUARDS:

Magnetic tapes are stored in locked storage areas when not in use and are accounted for at all times during actual use. Personnel screening is employed prior to granting access.

RETENTION AND DISPOSAL:

Magnetic tapes are used, corrected and updated until the tapes become physically deteriorated after which they are destroyed. A reservist's address is maintained on file for approximately one year after dis- charge, to allow for processing of annual point statements and W-2 forms. Audit trails are maintained indefinitely and the Master Personnel file and Pay and Points file are continually updated.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Reserve, Department of Transportation, United States Coast Guard Headquarters, Commandant (G-R), 2100 2nd Street, S.W., Washington, DC 20593.

NOTIFICATION PROCEDURE:

Requests to determine if this system contains information on any individual should be made in person or in writing to: Department of Transportation, United States Coast Guard Headquarters, Commandant (G-CMA), 2100 2nd Street, S.W., Washington, DC 20593. Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures for access to records may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedures'. Prior written notification of personal visit will insure that the record will be available at the time of visit. Proof of identity will be required prior to release of records. A military identification or similar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedures'.

RECORD SOURCE CATEGORIES:

Information contained in the system is obtained from the individual, Coast Guard Headquarters and district offices, and the various operating units of the Coast Guard.

DOT/CG 686.

SYSTEM NAME:

Coast Guard Motor Vehicle Operator Permit. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT).
United States Coast Guard (CG),
System is maintained at: District and Headquarters Unit Safety Offices.
See Appendix I for locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Licensed Coast Guard employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Statement of driving history and drive test results.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by authorized Coast Guard Officials for licensing Coast Guard employees to enable them to drive on Coast Guard property.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Applications (CG 3308) are stored in file cabinets.

RETRIEVABILITY:

Retrieved by name/service number.

SAFEGUARDS:

Locked files.

RETENTION AND DISPOSAL:

5 years.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Safety Programs Division,
Department of Tranportation,
U.S. Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Contact:
Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written request must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' or the local Coast Guard District or unit office for the area in which duty station is located.

Proof of identity will be required prior to granting access. A military identification card, driver's license or similiar document is considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Individual submission, accident experience, and driver's examination.

DOT/CG 691.

SYSTEM NAME:

Master Chief Petty Officer of the Coast Guard Individual Grievance and Correspondence File. DOT/CG.

SYSTEM LOCATION:

Department of Transportation (DOT),
United States Coast Guard (CG),
Commandant (G-CMCPO),
2100 2nd Street, SW,
Washington, DC 20593.
System is also maintained at:
Each District and Headquarters Unit which has a Senior Enlisted Advisor assigned. See Appendix I for addresses.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Enlisted Coast Guard Personnel who have filed a grievance or requested information through the Master Chief Petty Officer of the Coast Guard (at Headquarters) or the Senior Enlisted Advisors at field units.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence and other related information compiled during the process of resolving alleged grievance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Master Chief Petty Officer, Commandant/Vice Commandant, Special Assistant, Administrative Aide and other authorized officials, to resolve enlisted personnel problems and inquiries.

See Prefatory Statement of General Routine Uses; 2 through 5 do not apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders in locked file cabinet.

RETRIEVABILITY:

By name.

SAFEGUARDS:

Locked room and file cabinets.
Screening of personnel prior to granting access.

RETENTION AND DISPOSAL:

Kept until individual is discharged or retired at which time the records are destroyed by mutilating, shredding and burning.

SYSTEM MANAGER(S) AND ADDRESS:

Master Chief Petty Officer of the Coast Guard,
Department of Transportation,
United States Coast Guard Headquarters,
2100 2nd Street, SW,
Washington, DC 20593.

NOTIFICATION PROCEDURE:

Department of Transportation,
United States Coast Guard Headquarters,
Commandant (G-CMA),
2100 2nd Street, SW,
Washington, DC 20593.
Written requests must be signed by the individual.

RECORD ACCESS PROCEDURES:

Procedures may be obtained by writing to or visiting Commandant (G-CMA) at the address in 'Notification Procedure' above or the local activity where the complaint was filed. See Appendix I for addresses.

Prior written notification of personnel visits is required to insure that the records will be available at the time of visit.

Proof of identity will be required prior to release of records. A military identification card, driver's license or similiar document will be considered suitable identification.

CONTESTING RECORD PROCEDURES:

Same as 'Record Access Procedure.'

RECORD SOURCE CATEGORIES:

Information received from individuals and Coast Guard Units.

DOT/FAA 800.

SYSTEM NAME:

Aviation Medical Certification System DOT/FAA.

SYSTEM LOCATION:

Records are located at:
Aeromedical Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125.
Regional Flight Surgeon in all regional headquarters.
and at the
Office of Aviation Medicine,
Aeromedical Standards Division,
800 Independence Avenue, SW,
Washington, DC 20591.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current certificated airmen, airmen whose certificates have expired, airmen rejected for medical certification, airmen with special certification, airmen who are deceased and others requiring medical certification.

Controllers in Centers, Terminals and Flight Service Stations, and applicants for these positions.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of a variety of records that are required to determine the physical condition of an individual with respect to the medical standards established by the FAA.

These files contain medical examinations by an Aviation Medical Examiner, X-Rays, EKG's, lab reports, hospital records, treating or examining physician reports, consultant reports, copies of correspondence, worksheets, summaries, petitions for review by the National Transportation Safety Board, medical exemption records, letters of appeals for exemptions, medical history tapes, microfilm EKG's, and computer listings.

V 46 / 234 DEC 7 81 UMI

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records is used or may be used:

By agency officials and consultants for the purpose of determining eligibility for airmen medical certification.

By agency officials and consultants for purposes of review in connection with (1) airman requests for exemption from medical requirements or (2) petitions for review of certificate denials.

By agency officials and consultants in connection with the hiring and retention of employees.

To provide data for the Automated Medical Certification data base.

To provide data for the Automated Comprehensive Airman Information System (CAIS).

To provide statistical reports for internal use, to Congress, other Federal agencies and the public on the characteristics of the pilot population.

To provide information for Federal, State, and local agencies maintaining civil, criminal or other relevant information or other pertinent operational purposes, such as validating airman qualification, by supplying relevant information to an agency concerning the hiring or retention of an employee or the issuance of a grant or other benefit.

To refer where there is an indication of a violation, or potential violation of law, whether civil, criminal, or regulatory in nature, to the appropriate agency whether Federal, State, or local charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

As a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained.

To respond to general requests for statistical information under the Freedom of Information Act, or to locate specific individuals for a variety of personnel management functions.

To provide data to the Automated Medical History tape system.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File cabinets, magnetic disk, tape files, and microfiche.

RETRIEVABILITY:

Records are indexed by name, date of birth, and sex - Special cases are indexed and retrieved by pathological number.

SAFEGUARDS:

Records are maintained in steel file cabinets and electrievers which are locked when not in use.

All files are maintained in a secured work room limited to those whose duties require access.

Magnetic disks and tapes are maintained in secured computer center. When not in use, tapes are stored in fire proof tape library within the center; punch cards and microfiche are stored in steel file cabinets and tub files in work area.

RETENTION AND DISPOSAL:

Medical examination clear paper records are destroyed after microfilming is determined to be an adequate substitute for paper records. Microfilm records are destroyed after 30 years. Medical examination pathological inactive paper records prior to 1973 are transferred to the Federal Records Center 5 years after the case file is closed and destroyed by the FRC after 50 years. Pathological active paper records since 1973 are destroyed after microfilming is determined to be an adequate substitute for paper records. Microfilm records are destroyed 50 years after the record becomes inactive. The last examination record is retained on magnetic disk and tape. As a new record is received, the oldest record is put onto the history tape file. Magnetic tapes are retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

Records from Master Files:
Chief, Aeromedical Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125.
Records from Regional Files: Regional Flight Surgeon within Region where examination was conducted.

NOTIFICATION PROCEDURE:

Individuals wishing to know if their records appear in this system of records may inquire in person or in writing to the System Manager.

RECORD ACCESS PROCEDURES:

Individuals who desire access to the information about themselves in this system of records should contact or address their inquiries to the System Manager.

CONTESTING RECORD PROCEDURES:

Individuals who desire to contest information about themselves contained in this system of records should contact or address their inquiries to the Administrator or his delegate,
800 Independence Avenue, SW,
Washington, DC 20591.

RECORD SOURCE CATEGORIES:

Information is obtained from Aviation Medical Examiners, individuals themselves, consultants, hospitals, treating or examining physicians, other government agencies, tests taken by individual, special studies such as blood test, and in some rare cases, records supplied by other persons or agencies.

DOT/FAA 801.

SYSTEM NAME:

Aircraft Registration System DOT/FAA.

SYSTEM LOCATION:

Aircraft Registration Branch,
Aeronautical Center,
Oklahoma City, OK 73125.
Portions of these records are located in:
General Aviation District Offices (GADO's).
Air Carrier District Offices (ACDO's).
Flight Standards District Offices (FSDO's).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This system identifies aircraft owners, partners, corporations, lien holders, operators, and lessees.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of a series of records that identify:

Aircraft types.

Current certification status and ownership of registered aircraft.

Aircraft to be registered, or aircraft that have been registered and are now temporarily deregistered.

These records contain information about:

N - Number assignment.
Airworthiness of aircraft.
Bills of sale.
Appications for certification of amateur aircraft.
Major repairs and alterations maintenance inspection forms.
Revalidation and use forms.
Lien and collateral documents.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To determine that aircraft are registered in accordance with the provisions of the Federal Aviation Act of 1958.

To support investigative efforts of investigation and law enforcement

agencies of Federal, State, and foreign governments.

To serve as a repository of legal documents used by individuals and title search companies to determine the legal ownership of an aircraft.

To provide aircraft owners and operators information about potential mechanical defects or unsafe conditions of their aircraft in the form of airworthiness directives.

To provide supporting information in court cases concerning liability of individual in law suits.

To serve as a data source for management information for production of summary descriptive statistics and analytical studies in support of agency functions for which the records are collected and maintained.

To respond to general requests from the aviation community or the public for statistical information under the Freedom of Information Act or to locate specific individuals or specific aircraft for accident investigation, violation, or other safety related requirements.

To provide data for the automated aircraft registration master file.

To provide documents for microfiche backup records.

To provide data for development of the aircraft registration statistical system.

To prepare an Aircraft Registry in magnetic tape and microfiche form required by ICAO agreement containing information on aircraft owners by name, address, N-Number, type of aircraft, used for internal FAA safety program purposes and also available to the public (individuals, aviation organizations, direct mail advertisers, State and local governments, etc.) upon payment of user chargers reimbursing the Federal Government for its costs.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders, magnetic tape, punch cards, and on microfiche.

RETRIEVABILITY:

Records are filed by registration number, but may be retrieved by name of the current individual aircraft owners.

SAFEGUARDS:

Records are stored in open shelves in a room that is open only to authorized employees and by special permission.

Magnetic tapes are maintained in secure data processing area accessed by pass only.

Backup copies of microfiche are kept in a fire proof vault and storage room.

RETENTION AND DISPOSAL:

If records are microfilmed: (1) Original Records. Destroy original records after microfilm is determined to be an adequate substitute for paper records; (2) Microfilm of Original Records. Destroy when it is determined that the aircraft is no longer in existence.

If records are not microfilmed: Destroy when it is determined that the aircraft is no longer in existence.

SYSTEM MANAGER(S) AND ADDRESS:

For official agency records, contact:
Chief, Aircraft Registration Branch,
Aeronautical Center,
Oklahoma City, OK 73125.

Chief of the nearest GADO, ACDO, or FSDO.

NOTIFICATION PROCEDURE:

Individual owners of currently registered aircraft who wish to know if their records appear in this system of records may inquire in person or in writing to the System Manager.

RECORD ACCESS PROCEDURES:

Individual owners of currently registered aircraft who desire access to the information about themselves in this system of records should contact or address their inquiries to the System Manager.

CONTESTING RECORD PROCEDURES:

Individuals who desire to contest information about themselves contained in this system of records should contact or address their inquiries to the Administrator or his delegate,
800 Independence Avenue, SW,
Washington, DC 20591.

RECORD SOURCE CATEGORIES:

Information is collected from individuals, manufacturers of aircraft, maintenance inspectors, mechanics, and FAA officials.

DOT/FAA 802.

SYSTEM NAME:

Airman Certification System DOT/FAA.

SYSTEM LOCATION:

Airman Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125.

Copies or temporary files are maintained in the originating General Aviation District Office (GADO), Air Carrier District Office (ACDO), or Flight Standards District Office (FSDO) until required action or certification is completed.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals seeking to be certified, airmen seeking additional certifications or additional ratings, individuals denied certification, airmen holding inactive certificates, airmen who have had certificate revoked, and flight attendants engaged in international air transport.

CATEGORIES OF RECORDS IN THE SYSTEM:

Application for certification; written examination, application for written examination, results of written test, application for inspection authority, certificates held, ratings, stop orders.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To determine that airmen are certified in accordance with the provisions of the Federal Aviation Act of 1958.

Repository of documents used by individual and potential employers to determine validity of airmen qualifications.

To support investigative efforts of investigation and law enforcement agencies of Federal, State, and local governments.

Supporting information in court cases concerning individual status and/or qualifications in law suits.

To provide data for the Comprehensive Airman Information System (CAIS).

To provide documents for microfilm and microfiche backup records.

To prepare an Airman Directory in magnetic tape and paper form containing information on airmen by name, address, and certificate status, used for internal FAA safety program purposes and also available to the public (individuals, aviation organizations, direct mail advertisers, State and local governments, etc.) upon payment of user chargers reimbursing the Federal Government for its costs.

To verify U.S. citizenship, certify qualified applicants, and provide them with a crew member certificate to be used in lieu of a passport in International Civil Aviation Organization member countries.

To answer inquiries regarding crew member certification.

The U.S. Department of State uses these applications and any supporting documents to verify U.S. citizenship.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in microfilm, microfiche, magnetic disk, magnetic tape, file folders, and notebook listings.

RETRIEVABILITY:

Records are maintained in alphabetic order cross referenced with social security number and airman number.

SAFEGUARDS:

Records are stored in a data processing facility.

Data are retrieved via a terminal, which requires operation numbers and individual passwords.

Accessible only to limited numbers of authorized persons.

Backup microfilm and microfiche are kept in locked vault.

RETENTION AND DISPOSAL:

Source documents are destroyed after being microfilmed and key punched.

Magnetic tapes and disks are being continually updated, destruction is not authorized.

Source document crew member certifications are in storage at the Fort Worth Federal Records Center, destruction not authorized.

SYSTEM MANAGER(S) AND ADDRESS:

For official FAA Certification Records, contact:

Chief, Airman Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125 or request assistance from the originating GADO, ACDO, or FSDO.

NOTIFICATION PROCEDURE:

Individuals wishing to know if their records appear in this system of records may inquire in person or in writing to the System Manager.

RECORD ACCESS PROCEDURES:

Individuals who desire access to the information about themselves in this system of records should contact or address their inquiries to the System Manager.

CONTESTING RECORD PROCEDURES:

Individuals who desire to contest information about themselves contained in this system of records should contact or address their inquiries to the Administrator or his delegate,

800 Independence Avenue, SW,
Washington, DC 20591.

RECORD SOURCE CATEGORIES:

The individual to whom the record pertains. Written test scores are derived from answers given by individuals. Action filed by FAA personnel.

DOT/FAA 803.

SYSTEM NAME:

General Aviation Medical Accident System DOT/FAA.

SYSTEM LOCATION:

Aeromedical Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125.
Biomedical and Behavioral Sciences Division,
Office of Aviation Medicine,
800 Independence Avenue, SW,
Washington, DC 20591.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Pilots involved in all general aviation aircraft accidents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports of fatal accidents, autopsies, toxological studies, AME's reports, medical record printouts, nonfatal reports, injury reports, accident name cards, magnetic tape records of fatal accidents, psychological autopsy, and consulting pathologist summary of findings.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To identify and monitor airman having accidents or incidents, analyze medical data for regulatory purposes, research studies of causes of accidents, promote aviation safety.

Data are supplied to the National Transportation Safety Board (NTSB) under requirements of FAA accident investigation authority delegated to it by the Board.

Supporting information in court cases concerning individual medical fitness or medical mishap that may or may not relate to the cause of the accident.

Repository of legal documents that relate to individual's physical status or condition used to determine statistically the validity of FAA Medical Standards.

As a data source for management information for producing summary descriptive statistics and analytical studies in support of agency functions for which the records are collected.

Used in developing professional papers that are distributed to various aviation and medical groups for evaluation and study.

To inform the aviation community of medical findings related to flight safety.

To provide data for the automated Medical Accident System.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders, punch cards, magnetic tape, and computer listings.

RETRIEVABILITY:

Records are filed by accident number cross referenced by name of pilot.

Computer listings are maintained in name order.

Magnetic tapes are in accident number order and are cross referenced by name.

Records are quite often retrieved by name.

SAFEGUARDS:

Records are stored in lockable file cabinet in secured work area.

Computer listings are maintained in metal file drawers in secured area.

Magnetic tape is retained in a secured automatic data processing facility.

RETENTION AND DISPOSAL:

Records of fatal accidents are transferred to Fort Worth Federal Records Center when 5 years old and destroyed when 25 years old.

Accident name cards are destroyed when 50 years old.

Magnetic tape record - destruction not authorized.

SYSTEM MANAGER(S) AND ADDRESS:

For official medical accidents records, contact:

Chief, Aeromedical Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125.

NOTIFICATION PROCEDURE:

Individuals wishing to see their records may appear in person or submit in writing a request identifying records desired. For identification an individual must submit his or her name, date of birth, sex, social security number or Airman number. Letter should be addressed to:

Chief, Aeromedical Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125.

RECORD ACCESS PROCEDURES:

Individuals who desire to access information about themselves in the system records should contact or address their inquiries to:

Chief, Aeromedical Certification Branch,
Aeronautical Center,
Oklahoma City, OK 73125.

CONTESTING RECORD PROCEDURES:

Individuals who desire to contest information about themselves contained in this system of records should contact or address their inquiries to the Administrator or his delegate,
800 Independence Avenue, SW,
Washington, DC 20591.

RECORD SOURCE CATEGORIES:

Information is obtained from aviation medical examiners (AME), pathologists, accident investigation medical laboratories, law enforcement officials, and FAA employees.

DOT/FAA 804.

SYSTEM NAME:

General Aviation Aircraft Accident System (GAADS) DOT/FAA.

SYSTEM LOCATION:

This system is a computerized record maintained by the:
Safety Data Branch,
Flight Standards National Field Office,
P. O. Box 25802
Oklahoma City, OK 73125.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Crewmembers involved in aircraft accidents and incidents.

CATEGORIES OF RECORDS IN THE SYSTEM:

NTSB reports of aviation accident investigations, NTSP Form 6120.19 for preliminary reports and NTSB Form 6120.4 for final reports; and FAA reports of aviation accident investigations, FAA Form 80205. Data elements which are maintained in the computer for final reports of events include the crewmember certificate number and event case number. In addition, crewmember names are maintained temporarily for preliminary data, until the report becomes final.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To identify and monitor airman involved in accidents. To analyze facts surrounding accidents to determine whether or not FAA regulations have been violated for FAA enforcement actions and certifications.

To supply data to the National Transportation Safety Board (NTSB) as required by the delegated authority for accident investigation from the Board.

As a source of discriptive statistical data in analytical studies in support of agency functions.

Used in the development of professional papers that are distributed to various aviation organizations and the general public as required.

To provide data for the Automated Comprehensive Airman Information System (CAIS).

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on magnetic tapes, in file folders, and on magnetic disk on a commercial timesharing computer.

RETRIEVABILITY:

Data are retrieved by name, date of birth and sex, social security numbers, airman numbers, and accident number.

SAFEGUARDS:

Magnetic disk and magnetic tape - data can only be retrieved by computer operators with access codes.

File folders are maintained in a secured work area - files when not in use are kept in locked cabinets accessible to persons with a need to know.

RETENTION AND DISPOSAL:

Hard copy input files are destroyed after 3 to 5 years by shredding the documents.

Magnetic tapes are updated monthly, records retained up to 10 years, magnetic disk updated continuously.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Safety Data Branch, AFO 580.
Flight Standards National Field Office,
P. O. Box 25032
Oklahoma City, OK 73125.

Individuals who desire access to the information about themselves in this system of records should contact or address their inquiries to the System Manager.

CONTESTING RECORD PROCEDURES:

Individuals who desire to contest information about themselves contained in this system of records should contact or address their inquiries to the Administrator or his delegate,
800 Independence Avenue, SW,
Washington, DC 20591.

RECORD SOURCE CATEGORIES:

Data are collected from individuals, manufacturers of aircraft, maintenance inspectors, accident investigators, witnesses to accident, and involved passengers.

DOT/FAA 805.

SYSTEM NAME:

Administrative Action and Legal Enforcement System DOT/FAA.

SYSTEM LOCATION:

Portions of this system are maintained in the:
Office of the Chief Counsel,
FAA,
800 Independence Avenue, SW,
Washington, DC 20591.
and the:
Safety Data Branch,
Aeronautical Center,
Oklahoma City, OK 73125.

Originals and copies of some records are maintained in field offices and Flight Standards and Regional Counsel's offices in the Region of occurrence.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Records in this system are on individuals against whom FAA has taken administrative action or legal enforcement action for violation of certain Federal Aviation Regulations.

Individuals or companies holding Federal Aviation Administration certificates.

Persons charged with violating FAA regulations.

Persons allegedly violating FAA regulations.

Applicants who have been denied airman medical certificates.

Persons denied certificates or allegedly violating FAA regulations who have appealed to the National Transportation Safety Board (NTSB) or the courts.

CATEGORIES OF RECORDS IN THE SYSTEM:

Safety Compliance Notices.

Letters of Reprimand.

Letters of Correction.

Final action legal documents in enforcement cases.

Enforcement and airman medical denial cases on appeal to NTSB.

Summary of violation reports and enforcement actions.

Correspondence of Regional Counsels in enforcement cases.

Violation reports on alleged FAA certificate violations other than medical certificates. These reports include certificate number and/or social security numbers of alleged violators.

V 46 / 234 DEC 7 81 UMI

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records relating to final legal enforcement and administrative actions are disclosed, upon request, to members of the public and other government agencies.

Disclosed to the Department of Justice and the NTSB.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are stored in file cabinets and on magnetic tape.

RETRIEVABILITY:

Records in this system are filed chronologically and cross indexed alphabetically by name.

SAFEGUARDS:

Records are kept in lockable file cabinets. Magnetic tape is kept in a secured data processing facility.

RETENTION AND DISPOSAL:

Aeronautical Center records are transferred to the Federal Records Center after 6 years where they are destroyed after 4 years.

Washington records are sent to the Federal Records Center when the case is closed where general aviation cases are destroyed after 1 year and Air Carrier cases are destroyed after 2 years.

Monthly ADP printouts are destroyed each month. Annual printouts are retained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

For official agency legal enforcement action records:

Regional counsel and Flight Standards offices in the region of occurrence or the chief of the field office that made the charge maintain selected records.

For violation history and administrative action records:

Chief, Safety Data Branch,
Aeronautical Center,
Oklahoma City, OK 73125 and Flight Standard office and Regional Counsel in the region of occurrence.

NOTIFICATION PROCEDURE:

Individuals wishing to know if their records appear in this system of records may inquire in person or in writing to the System Manager.

RECORD ACCESS PROCEDURES:

Individuals who desire access to the information about themselves in this system of records should contact or address their inquiries to the System Manager.

CONTESTING RECORD PROCEDURES:

Individuals who desire to contest information about themselves contained in this system of records should contact or address their inquiries to the Administrator or his delegate,
800 Independence Avenue, SW.
Washington, DC 20591.

RECORD SOURCE CATEGORIES:

Regional counsel, NTSB, Flight Standards personnel, Aeronautical Center personnel, Office of Chief Counsel.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

System is exempt from certain subsections of the Privacy Act. The purpose of these exemptions is to protect investigatory materials compiled for law enforcement purposes. Disclosure of such material would hamper law enforcement by prematurely disclosing the knowledge of illegal activity and the evidentiary basis for possible enforcement actions. The exemption rule may be found on page 49887 of the Friday, October 24, 1975, issue of the Federal Register.

DOT/FAA 806.

SYSTEM NAME:

Federal Aviation Administration Employee Payable System DOT/FAA.

SYSTEM LOCATION:

Financial Systems and Accounting Operations Divisions, Washington, D.C., Central Payroll Operations Facility, Mike Monroney Aeronautical Center, Oklahoma City, Oklahoma, and each region and center accounting division. Working copies of certain of these records are held by the organizations employing the personnel and at emergency operations facilities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All employees of the Federal Aviation Administration, all civilian employees of the Office of the Secretary, Department of Transportation, the Transportation System Center, the Federal Highway Administration, the National Highway Traffic Safety Administration, the Research and Special Programs Administration, the National Transportation Board, and Civilians who work for the United States Coast Guard.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains those records required to insure that an employee receives his or her pay and benefits required by law. It includes Employee Master Record, Annual Leave Payroll Register, FAA Bond Deductions and Bond Issued, Union Dues, FICA Records, City Withholdings, State Withholdings, Federal Withholdings, Retirement, Leave Without Pay, Pay Scale, Contributions, Travel Orders, Travel Advances, Travel Vouchers, Time and Attendance, Overtime, claims relating thereto.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

This System is used to:

Calculate pay and allowances due to employees.

Prepare annual report and reconcile with Gen. Ledger Accounts.

Record permanent pay changes.

Record temporary pay changes.

Notify employees of pay adjustments processed.

Record travel advances and allowances.

List leave earned, taken, and/or lost and new balances for employees.

Test run against Employee Master Record to reflect missing T&A cards of employees.

Summarize earnings, deductions, and leave by pay periods, and produce statement for employee information.

Provide management information on an as required, ad hoc basis.

Produce history of checks and bonds to be issued and magnetic tape sent to Treasury for their issuance.

Report dues deducted by individuals to Unions.

Report amounts withheld to credit financial institutions, charitable organizations and professional associations.

Quarterly summary of earnings and deductions.

Adjudicate claims for reimbursements which are sent to GAO.

Extract list of FICA employees for reporting earnings and deductions to IRS.

Report State and local tax withholding to various States and local taxing authorities and to IRS.

Provide home address information for employee communications to FAA officials.

Provide statistical data of U.S. Savings Bond and Combined Federal Campaign participation.

Provide to commercial credit bureaus data relating to delinquent debts such as, amount, name, social security number, last known address, reason for indebtedness.

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on punch cards, magnetic tape, magnetic disk, microforms, and in file folders. Storage is at the geographic location of the servicing accounting office and the central payroll operations facility.

RETRIEVABILITY:

Records are maintained by employee name. Social Security Account Numbers. Retrieval is often accomplished by use of telecommunications.

SAFEGUARDS:

Magnetic tape and disk files are kept with limited accessibility by agency personnel. Other files are retained mainly in unsecured work area but are locked during non-duty hours.

RETENTION AND DISPOSAL:

Employee Retirement records are retained until such time as the employee leaves the agency whereupon these records are transferred to the OPM. Original payment vouchers and supporting documentation are usually retained on site for a period of three years, and then are stored in GSA Records Centers before destruction when ten years and three months old. Certain payroll records are retained permanently at the GSA National Personnel Records Center and others are destroyed after GAO audit or when no longer useful. See FAA Order 1350.15A for records in the 2710 and the 2730 series for specific details on individual records covered by this system.

SYSTEM MANAGER(S) AND ADDRESS:

Uniform Payroll System Operations Manager (UPSOM),
Mike Monroney Aeronautical Center,
Oklahoma City, Oklahoma.

NOTIFICATION PROCEDURE:

Individuals wishing to know if their records appear in this system may inquire in person or in writing to the System Manager.

RECORD ACCESS PROCEDURES:
